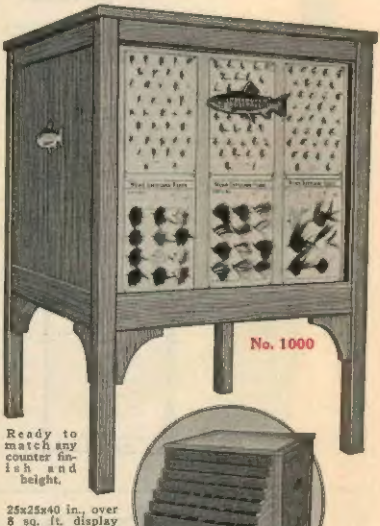
Weber Advertising Is YOUR Advertising

—*Greatly Increased for 1930*

IT IS the keynote of the Weber far-seeing policy in consumer advertising to capitalize for your benefit the well-known desire of fly casters and beginners to ask information and advice from factory headquarters. On lines long proved sound and effective, our advertising therefore takes on the expensive burden of inviting and encouraging this direct correspondence for the sake of catalog distribution and opening acquaintance. Thereafter we are emphatic in advising them to buy locally. Our own tested experience and other merchandising history proves that this system unfailingly builds business for the retail store and insures full jobbing service — thus fulfilling the Weber policy of Dealers and Jobbers first!



No. 1000

More advertising than ever for 1930

Stock-Keeping and Display Cases

furnished with Weber Goods in sizes proportioned to your stock.

Ready to match any counter finish and height.

25x25x40 in., over 8 sq. ft. display under glass. 264 compartments holding full stock of Flies, Snelled Hooks, Leaders—as much as can be held in 2 ordinary 10 ft. cases.

Handsomest Window Trim

Fish in Natural Size and Colors

The new Weber window display is a 40" cutout of the illustration shown on our catalog cover. It is lithographed in lifelike colors and is a fitting background for the other Weber Sales Helps. All Free — part of our proposition.

Tournament Casting Rules

Regulations Governing Official Events Recognized by National Association of Scientific Angling Clubs

Official Events

1. Accuracy Fly—5¾-oz. Rod.
2. Dry Fly Accuracy—5¾-oz. Rod.
3. Dry Fly Accuracy—5¾-oz. Rod. (Unknown Distances.)
4. Distance Fly—4¾-oz. Rod.
5. Distance Fly—5¾-oz. Rod.
6. Salmon Fly.
7. Accuracy Bait—Half-ounce.
8. Accuracy Bait—Quarter-ounce.
9. Accuracy Bait—Fisherman's ⅛-oz. Plug.
10. Distance Bait—Half-ounce.
11. Distance Bait—Quarter-ounce.
12. Distance Bait—⅛-oz. Plug.

Accuracy Bait, ½ Ounce

Rod unrestricted. Reel must be free running, without click, drag, brake, spring or abnormal device or adjustment which would tend to retard the movement of the spool except that, any so-called anti-back lash or level winding reel of any standard manufacture be accepted for accuracy bait events only. Line unrestricted. Weight to be official half-ounce casting weight. Single-handed casting.

The regulation target is to be used in this event. It will have a "perfect" center, thirty (30) inches in diameter and be so arranged that it can be located at distances of 60, 70, 80, 90 and 100 feet from casting point on platform to exact center of bull's-eye. There shall be made two casts at the target at each of the distances, viz.: ten casts in all. If casting weight falls within the 30-inch center, the cast shall be considered perfect. For each foot or fraction of a foot away from the 30-inch center, a demerit of one shall be made. The sum total of such demerits, divided by the number of casts, shall be the demerit percent. The demerit percent, deducted from 100, shall constitute the percentage. One cast shall be made by each contestant in turn at 60 feet and likewise consecutively at 70, 80, 90 and 100 feet, then reversing same order, from 100 feet back to 60 feet. If weight strikes any ring or target, cast scores as though just inside of said ring. In case contestant casts with drag or click or if line breaks before weight touches the water at the end of cast it shall constitute a "foul" and contestant must cast again to score. No more than ten demerits shall be given for any one cast.

Accuracy Bait, ¼ Ounce

Conditions, methods, rules, scoring and target in this event shall be exactly similar to those of the Accuracy Bait ½ ounce event, except that weight shall be of the official quarterounce casting weight and the distances of the target from casting point on platform shall be 60, 65, 70, 75 and 80 feet to exact center of bull's-eye.

Fisherman's Accuracy Bait—(Unknown Distances)

This event shall be governed by the N. A. S. A. C. Rules for ¼-oz. Accuracy Bait, except as follows: The lines used in this event shall be standard and furnished by the Association. This line without leader or trace of any sort to be one continuous length to the point where it is attached to the plug. Weight to be a ⅛-ounce wooden plug officially adopted by the N. A. S. A. C. Five targets consisting of 30-inch rings scattered at random shall be anchored at distances unknown to the caster. No target shall be at a greater distance than 80 feet nor at a less distance than 40 feet from the casting point. Two casts will be allowed at each target as the captain directs.

Average Distance Bait, ½ Ounce

Rod unrestricted. Reel must be free running without click, drag, brake, spring or abnormal device or adjustments which would tend to retard the movement of the spool. Line unrestricted. Weight to be the official half-ounce casting weight. Single handed casting.

The casting in this event shall be done on the lawn. Contestants each to make five (5) casts in turn, one cast at a time. Length of cast to be computed from casting point to where weight falls. The sum total of the five casts in feet, divided by the number of casts shall be the average and constitute the score of the contestant.

If line or leader parts after casting weight has left its starting position at tip of rod the cast shall be scored 0.

If contestant casts with click or drag it shall constitute a "foul" and contestant must cast again to score.

HERE is one phase of outdoor recreation that has shown a steady increase every year for many years. Both fresh and saltwater angling are extremely popular, and every merchant who stocks sports equipment knows that his tackle department is one of the most active when the various fishing seasons arrive.

One outstanding factor in the sale of fishing tackle today is the trend towards higher quality equipment. Bait and fly casting rods that retail anywhere from $35 to $75 found ready customers during the past year, and there are hundreds of other anglers still at large whose desire it is to own a high-grade fishing rod. Just like a boy with a new toy, so it is with a fisherman and his new rod. The best is none too good when the desire for possession strikes either mind.

Fishing tackle manufacturers have done much towards developing tackle customers the past few years. The complete programs of window display material, sales helps and co-operation with dealers has helped wonderfully to create greater sales throughout the country. Practically all of the leading manufacturers have some form of cooperation to offer the jobber and retailer, which, in turn, adds just that much more to increased business volume.

Tournament casting also took a big jump upwards in public interest. National and state events were staged in many of the principal cities of the United States during the summer months. These contests helped to create a desire among hundreds of fishermen to learn how to cast successfully. The result has been, more tackle sold, and the tournament caster, out of necessity, uses the finest rods, reels and lines obtainable.

Tackle sales will show another substantial increase in 1930. Orders should be placed early this year. A shortage of certain popular tackle items may result at the time you need them most. Loss of profits and business always accompanies the failure to purchase promptly and carry a complete stock when the demand is at its peak.

FOOTBALL

THE football season of 1929 was one of particular significance to the sporting goods merchant in many ways. Not only did it clearly demonstrate that the grid game has, in the comparatively past few years, forged ahead to a leading position in spectator interest as evidenced by attendance marks that reached 70,000 and more, but to the merchant who keeps in step with the changing order of things, it gave him some particularly valuable leads on how to prepare for the football business of 1930.

At no time in the history of the game has player and spectator interest been greater. With stadia seating thousands sold out weeks ahead in practically every contest worthy of mention, even in the high school schedules, and at prices equal to those of a Broadway production—if you were lucky enough to get seats—the sporting goods merchant need have little to worry about as regards volume next Fall.

One main point, however, he will have to watch closely in the buying of football goods this year is the change—and a radical change it is, too—in the matter of color in the football players ensemble. The drab khaki is just about out of the picture. Replacing it, is a new wardrobe in which it seems the sky is the limit in color selection. Solomon in all his glory was not arrayed like some of the teams we saw in the season recently ended, and they tell us "we haven't seen anything yet."

Interest in sports builds more interest in sport. There will be more football teams to outfit for 1930 than there were in the season just closed, but be ready for them with —color. Spectators and players both like it.

Your Jobber Can Supply You With
Lou J. Eppinger's Famous Products

Dardevles

Wiggle and Wobble—Do Not Twist The Lines

Dardevle—Three Sizes

Below are shown comparative sizes—Dardevle 1 oz. weight, Dardevlet 3/5 oz. weight, Dardevle's Imp 2/5 oz. in weight.

The difference in size is not a difference in effectiveness, but merely a convenience—so that you can use a Dardevle with any weight of casting rod.

Dardevle is just the right weight for the average steel rod or for a stiff bamboo rod.

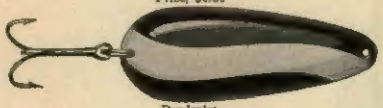
Dardevlet functions perfectly on a steel rod and seems ideal for a light, "whippy" bamboo rod.

It can be cast well with a bamboo rod up to 6 feet in length.

Dardevle's Imp is for use with extremely light weight casting rods, and for those who like to use a very light line—say 9 to 15 pounds test.

Dardevle's Imp is just as big a killer as its bigger brothers.

Dardevle's Imp
2¼" long, 2-5 oz. weight
Price, $0.80



Dardevlet
2¾" long, 1" wide, 3-5 oz. weight
Price, $0.90

Superheating surface	2487 sq. ft.
Weight on drivers	355,510 lb.
Weight, total engine	511,710 lb.
Tractive force	90,000 lb.

You are cordially invited to visit us at spaces 242 and 297, Municipal Auditorium

1831 BLW 1930

THE BURLINGTON introduced freight locomotives of the 2-10-4 type on the Beardstown Division in Illinois, in 1927. This Division taps the Southern Illinois coal fields, and has maximum grades against the loaded movement of 0.3 per cent.

These new locomotives, with a starting tractive force of 90,000 pounds, and a grate area of 106.5 square feet, replaced locomotives of the 2-10-2 type having a tractive force of 81,600 pounds and a grate area of 88 square feet.

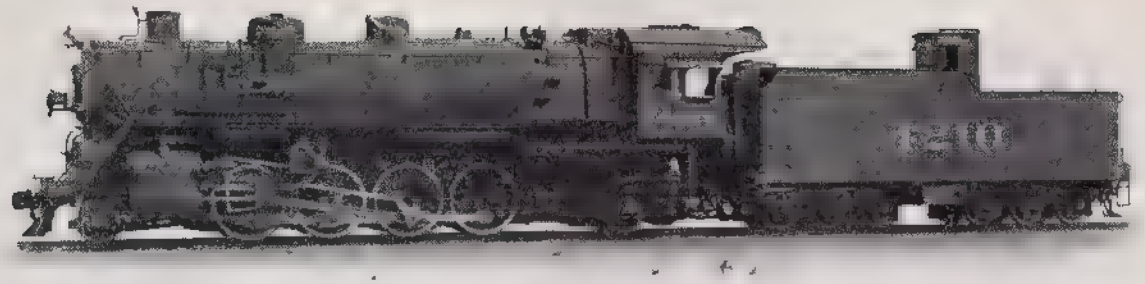
They promptly proved their ability to increase the train load from 6,800 to 8,000 tons, with a decrease, on a ton-mile basis, of 16 and 22 per cent in fuel and water consumption respectively. With tenders of large capacity two, and sometimes three, of the water stops formerly made were eliminated. This, together with the increased horsepower capacity of the locomotives, making possible higher speeds on ascending grades, naturally cut the running time.

Twelve of these locomotives were built for the Burlington in 1927, and six more in 1929. Specially designed for difficult service conditions, they have proved a great success.

Additional locomotives of the new type, with 4-8-4 and 4-8-4 wheel arrangements, are being built by these Works for the Burlington and will shortly be placed in service.

The Baldwin Locomotive Works

Philadelphia



Baldwin Mikados Make Long Runs On The Frisco System

DIMENSIONS AND WEIGHTS

Cylinders	27" x 32"
Drivers, diameter	63"
Steam pressure	235 lb
Grate area	80.3 sq. ft
Water heating surface	4384 sq. ft.
Superheating surface	1920 sq ft
Weight on drivers	274,690 lb
Weight, total engine	375,790 lb
Tractive force	66,700 lb

IN 1923, the first Baldwin Mikado type locomotives were built for the Frisco System. From the very beginning, they established a class which has proved highly successful in handling through freight traffic. So satisfactory were they in operation that repeat orders followed, bringing the total number of locomotives of this general design up to sixty-five.

Twenty additional Baldwin Mikados are now being placed in service. The design has been revised throughout with a view of developing maximum efficiency and capacity in severe service.

As compared with the previous Mikados, the boiler power has been materially increased and the locomotives are specially qualified for making the long runs which are a conspicuous feature of operation on the Frisco.

1831 BLW 1930

We are prepared, as never before, to cooperate with any railway in the designing of new power.

THE BALDWIN LOCOMOTIVE WORKS

PHILADELPHIA

IMPROVE
the fuel fraction with OIL ELECTRIC equipment

These operating fractions shadow your books

Under steam operation, the costs of branch line and switching service have virtually eclipsed profits. Fuel consumes too high a fraction of income; time out for overhauling and repairs cuts too large a fraction from availability; maintenance eats up too large a fraction of revenue; these fractions, and others, all cast their shadowy traces on the profit sheets.

Management must cope with them to improve its operating fraction.

ENGINEERS have done much in the last decade in lowering steam locomotive fuel costs. But, even with the application of many fuel saving devices, the steam locomotive has failed to stand comparison in fuel expense with the modern and efficient oil electric form of motive power, especially in meeting the present-day requirements of switching and light main line passenger service.

In actual tests, oil electrics have shown a reduction in fuel cost of from 6/10 to 8/10 below that for steam.

With the oil electric, fuel and lubricating oil are used only while operating. Variable speed operation of the oil engine gives full advantage of fuel economies.

Even when compared with the modern, efficient gasoline engine, the oil-driven unit shows a fuel cost averaging approximately one-third.

Westinghouse engineers will make a study of your operating conditions to determine where you can best apply oil electric equipments to effect the greatest savings.

The Baldwin Loco. Works, Philadelphia, Pa. ~ Westinghouse Elec. & Mfg. Co., E. Pittsburgh, Pa.

Plan Now to get Your CHEMCRAFT This Christmas!

Get a CHEMCRAFT outfit this year—tell everybody that's what you want. Look for CHEMCRAFT in any store where toys are sold. Look for the name CHEMCRAFT on the box. You will be sure to get the set that gives the most for the money. If the one you want is not obtainable in your local store, we will send it, fully prepaid, upon receipt of price

Try Chemistry for 25c—send for CHEMCRAFT JUNIOR

You can do many fine chemical tricks with this JUNIOR outfit, and various interesting experiments. It will introduce you to chemistry, a most wonderful sport you can have with a CHEMCRAFT outfit. Sent postpaid for only 25 cents

Free Magazine for Boys

Contains interesting experiments you can do at home; also ideas on Chemistry and Woodworking. Tells lots more about CHEMCRAFT outfits. It's free—just write for your copy

OCTOBER, 1930

A BIG CONFERENCE WITH A VERY IMPORTANT GENTLEMAN

THESE are the busiest days of all for Mr. Kris Kingle...Chairman of the Board. A dozen secretaries are helping him pass along sound merchandising advice. Every minute is taken for important conferences.

The holidays are just around the corner. Smart toy buyers are asking...what shall we buy? How about the demand this year? What will be the most popular price range? A thousand questions all to be answered by this grand old man who holds the Christmas toy volume in the hollow of his hand.

Here's a tip. He's favoring the colorful and durable toys that retail at 10c, 15c, 25c, 50c and $1.00. He knows how folks are going to buy. And he's favoring KILGORE Toys because there's a complete line that just fits his idea of "best sellers" for this year. Take his advice... Ask your jobber about the KILGORE line...or write direct if you buy direct.

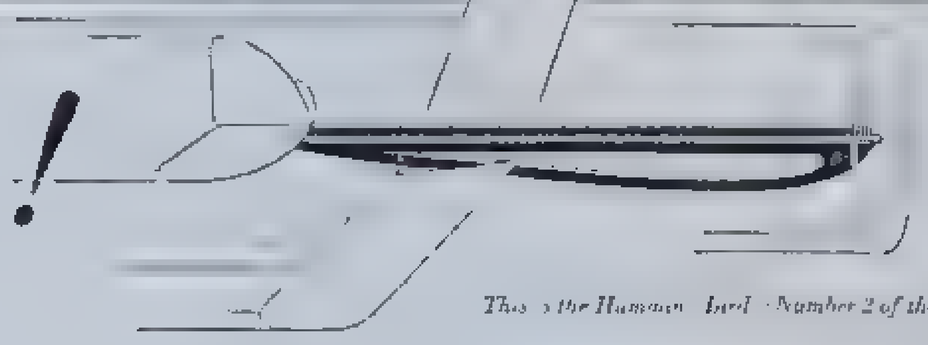
ZOWIE!



This is the Humming Bird—Number 2 of the Cracker Jack Air Fleet

Here's another Cracker Jack Airplane for YOU!

Your Cracker Jack Air Fleet will take on real form with this dandy Humming Bird Monoplane

TO the tune of whirring propellers your second Cracker Jack Airplane slips into port.

Thousands of fellows in all parts of the country last month received the first plane of their Cracker Jack Air Fleet. This month, in view of your wonderful enthusiasm, and the huge organization we have now, we are going to give members of the Cracker Jack Air Corps an entirely different type of plane.

This Humming Bird is a ship that will outfly most anything you've ever seen. Just wind up the propeller and let 'er go! It loops—banks—zooms—in fact, is a regular stunt flyer.

And it's just as easy to get

In order to get this dandy little stunter, all you need to do is collect 10 prizes from your packages of Cracker Jack. Cut the Sailor Boy face from each package and write on the back the name of the prize you received *in that package.** Then, when you have 10 Sailor Boy faces, mail them to the Cracker Jack Air Corps. We'll send your Humming Bird monoplane immediately.

Your whole gang can join too

It isn't too late for friends of yours to join the Cracker Jack Air Corps. Anyone that doesn't belong now, can join and get his Wings by simply writing his name on the back of a Sailor Boy face and sending it to us. As soon as a fellow has his Wings he can qualify for any of the Cracker Jack Airplanes.

Look at the coat lapels of everybody in your gang. When you see one that does not have the Wings of the Cracker Jack Air Corps, remind him that he's missing out on some great fun—and some mighty fine airplanes too

"The more you eat—the more you want"

Cracker Jack's that way. Chances are you'll eat lots more than 15 packages without half trying. And the dandy surprise in every package is just another reason why Cracker Jack is so popular.

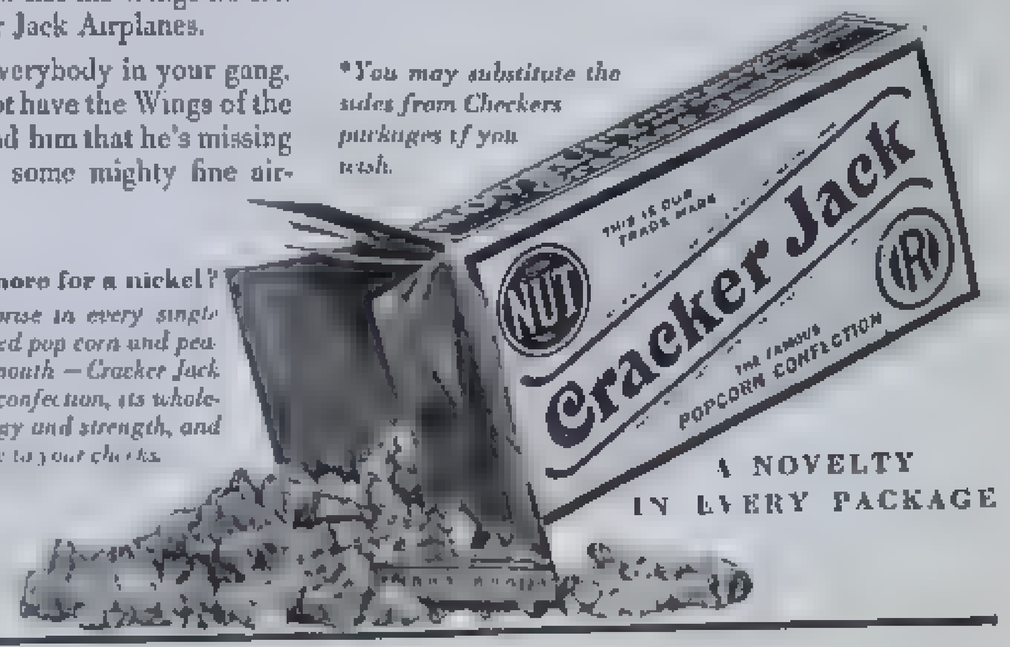
Go after it, fellows. Make your collection and send in the Sailor Boy faces as soon as you can. They must all be on their way before midnight, April 30th, 1930.

Address letters to The Cracker Jack Air Corps, care of The Cracker Jack Co., Dept. A, Chicago, Illinois.

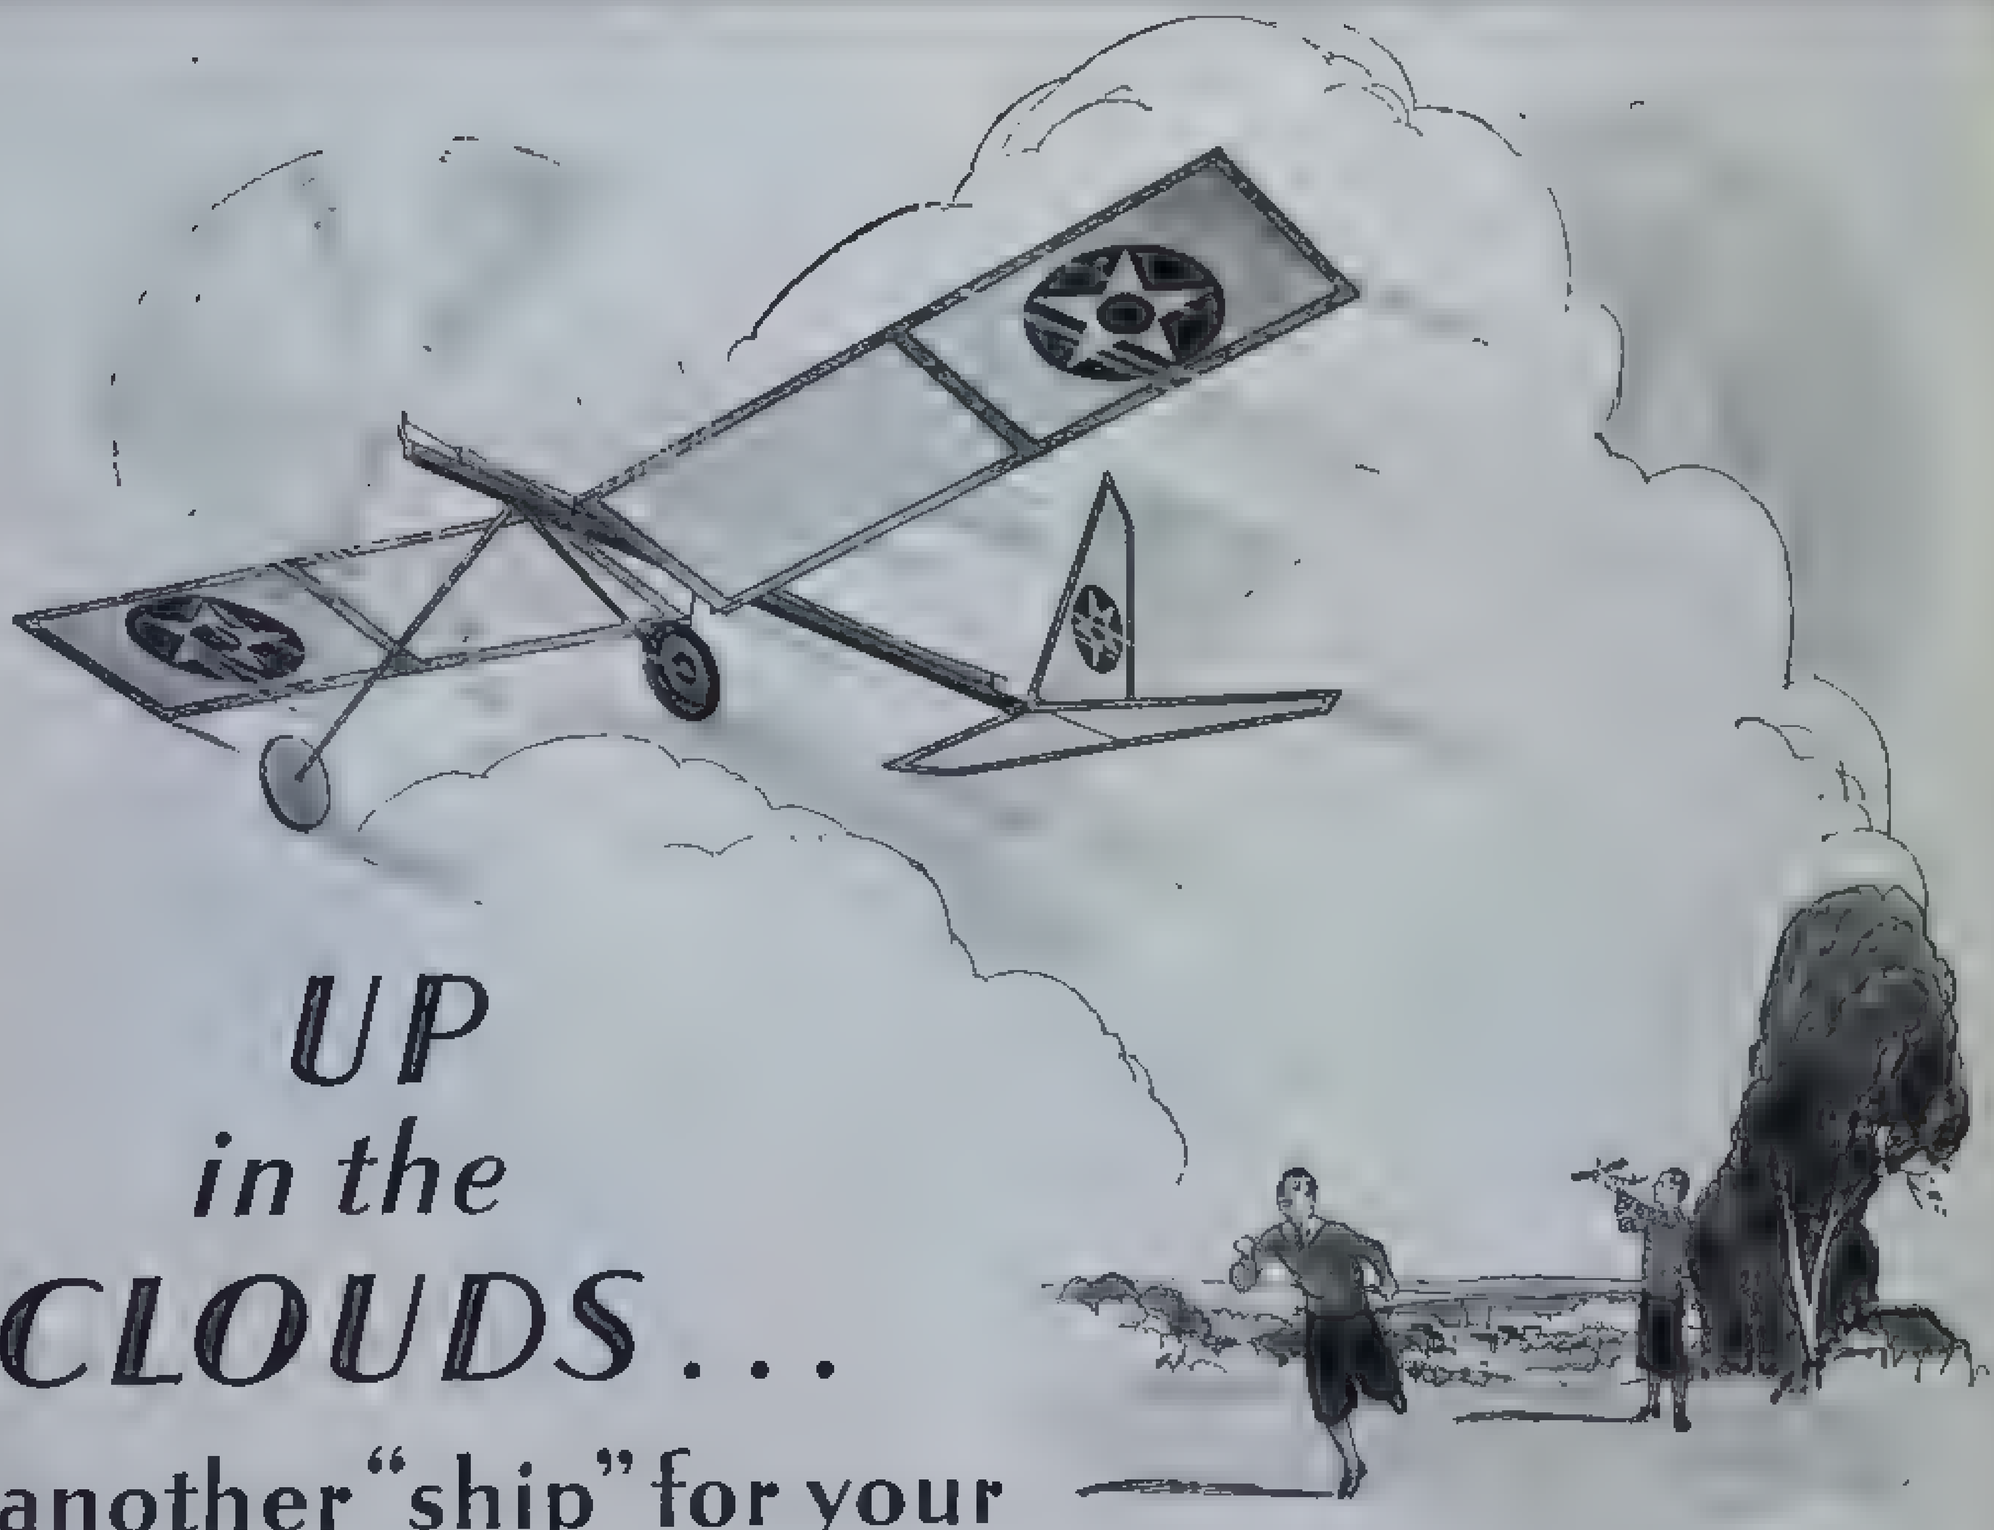
**You may substitute the sides from Checkers packages if you wish.*

Where can you get more for a nickel?

5c a pack—and a surprise in every single package. Molasses covered pop corn and peanuts that melt in your mouth—Cracker Jack is not only a wonderful confection, its wholesomeness builds up energy and strength, and brings a ruddy glow to your cheeks.



"THE MORE YOU EAT—THE MORE YOU WANT"



UP in the CLOUDS . . .

another "ship" for your Cracker Jack Air Fleet!

Sailing up there in the clouds is your dandy little Wanner Special, No. 101. And here are the Wings of the Cracker Jack Air Corps—just see how easily you can get them.

HEIGH HO, gang—here's a new plane for your Cracker Jack Air Fleet that's a peach. It's a genuine Wanner Special R. O. G. Monoplane No. 101, made by the official manufacturers for the Airplane Model League of America, and what's more you can have all the fun of building it yourself, because it comes to you in knocked down form—in a kit.

Every part of this Cracker Jack Airplane fits perfectly. All you have to do is sit down and assemble it—wind-up the propeller and watch 'er fly.

Easy to get, too

You can get this little flyer just about as easily as you got your first two planes too. All you have to do is save the Sailor Boy faces from 5 packages of Cracker Jack and send them to us with twenty cents to partially cover mailing costs. We'll send your "Wanner Special" immediately.

And you'll have all kinds of fun. There are 50,000 members of the Cracker Jack Air Corps already and it's growing by leaps and bounds. Step on it, fellows, and get in on this great sport.

If you haven't joined the Cracker Jack Air Corps send in the coupon below with two Sailor Boy faces and we'll send your Wings of Membership right away. Then—start winning the whole Cracker Jack Fleet. Better do it today because we're going to have lots of fun this summer and this offer closes June 30, 1930.

THE CRACKER JACK AIR CORPS
The Cracker Jack Co., Chicago, Illinois

THE CRACKER JACK AIR CORPS,
The Cracker Jack Co., 530 South Peoria Street
Chicago, Illinois

Dear Sirs: I want to be a member of the Cracker Jack Air Corps and start in using those candy planes. Attached are two Sailor Boy faces. Will you please send me my Wings?

Name .....

Address .....

City ..... *State* .....

If you can't get Cracker Jack, you can send the name and the panel from packages of Cracker Jack with Wings and planet weather forecasts on them. Price Checkers."

Try it with a nickel

The keen taste and pure wholesomeness of Cracker Jack have made it famous the world over. Every regular fellow knows that it helps develop husky muscles in arms and legs and puts a healthy glow in young cheeks. You'll find it's the greatest nickel's worth in the world—and a surprise in every package.

YOU WILL FIND

The Sonny Line

of

Juvenile Coaster Wagons

(THEY ARE NOT TOYS)

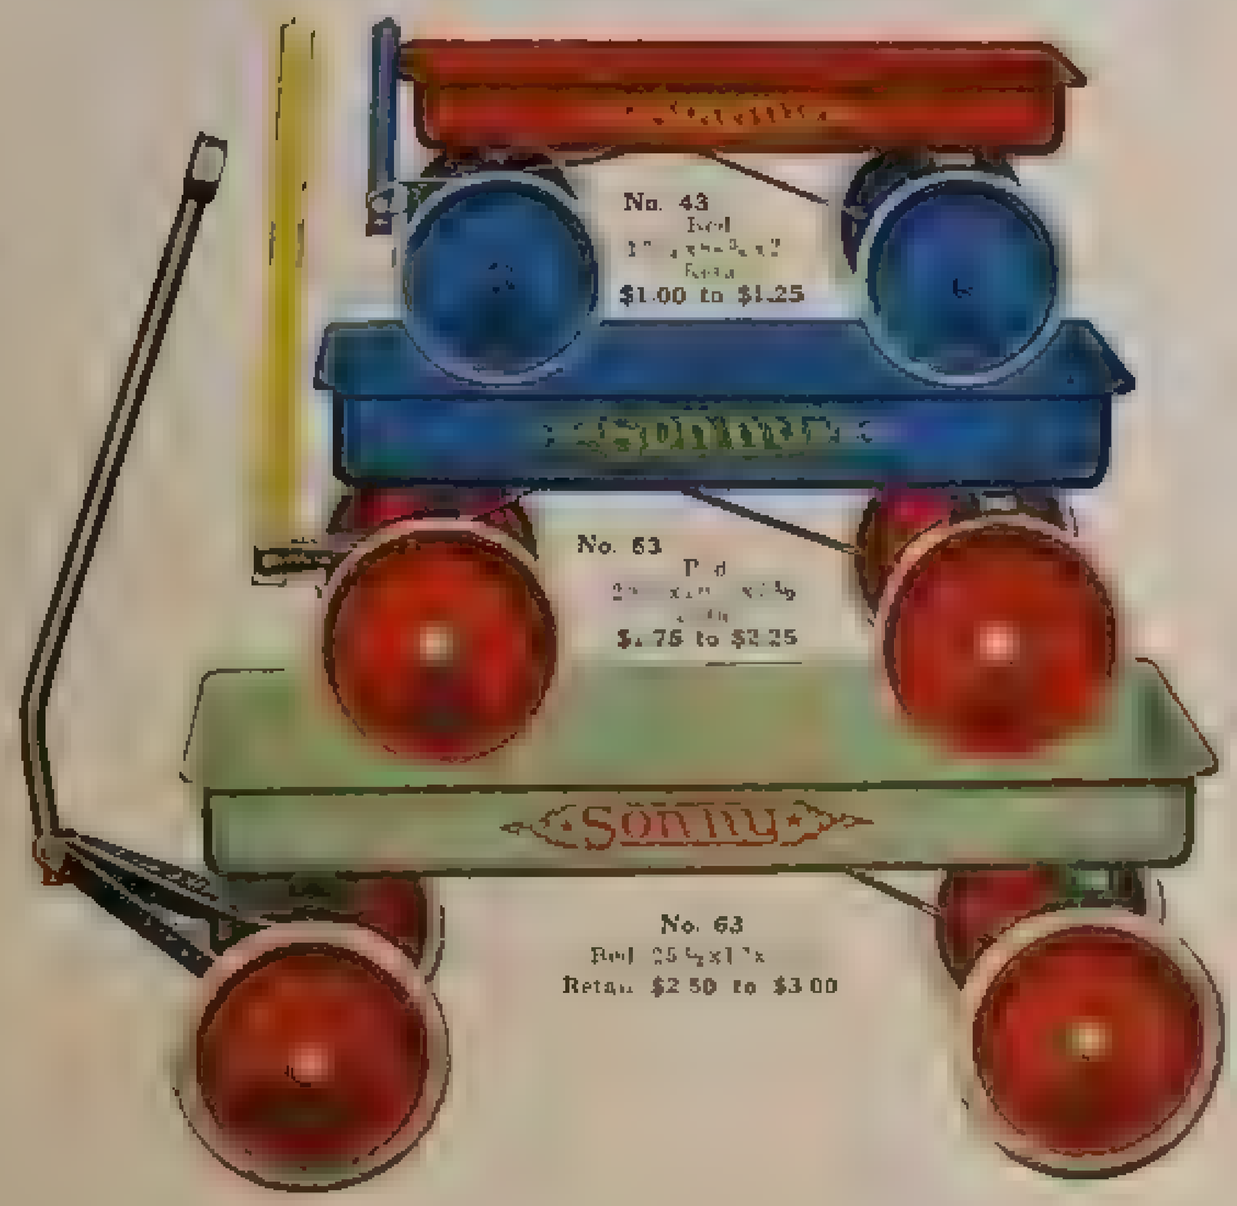
Good Fall & Christmas Profit Makers

The Largest, Strongest and Finest—at Lowest Prices

THE SENSATIONAL SELLERS OF THE YEAR

Try a Sample Dozen - Assorted - One Carton Of Each Size

Unequalled in Value



All Sizes Equipped with Large Size Rubber Tires

Retail from $1.00 to $3.00

Built of the same heavy steel as the larger coaster wagons, they are as strong and sturdy. One piece drawn metal beds with braces to front and rear axles makes them good for long hard abuse. Your trade will appreciate this high quality and at the low prices they will show you a handsome profit.

PACKED FOR YOUR BENEFIT. No. 43—6 to a Carton; No. 53—4 to a Carton; No. 63—2 to a Carton. If you are not familiar with the extraordinary value built into Sonny Wagons, order a dozen through your jobber, set them up in your show window, you will be surprised how their handsome appearance will help you sell them.

If your jobber has not stocked these numbers write us his name.

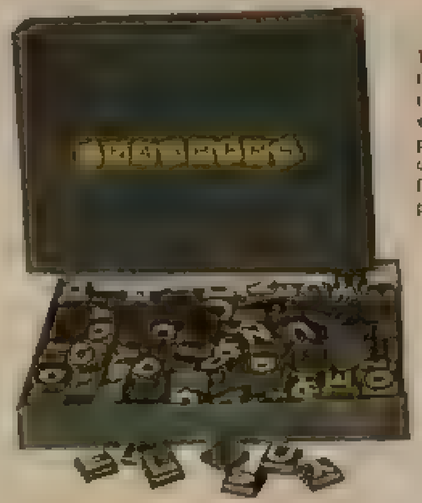
NEW NUMBERS FOR 1930

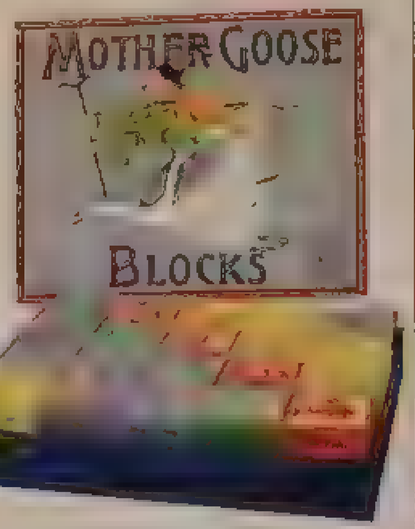
ANAGRAMS



The Game of Anagrams has been popular always, but recently there has been a renewed interest in the game due no doubt to its emotional advantages. In designing this set our aim was to offer the ideal color arrangement, black and yellow proper size and style letters, and an embossed back so that one letter could not be distinguished from another, when face down. This is an ideal Anagram Set to retail at a popular price. See illustration at left.

Retails for $1.00

NO. 92 BLOCKS



There will always be a good demand for a real high grade set of toy blocks with Mother Goose Illustrations and Rhymes. This set contains twenty 2-1 8" cubes, embossed and printed in six colors. Each block contains a Mother Goose Rhyme with the ends embossed with illustrations of the Rhyme. Sanitary washable finish. The sets are furnished in a cardboard box, also in a strong wood box, and in a substantial colored wagon. The illustration at the right shows the set in a cardboard box

FIRST STEP COLORED PLAY BLOCKS

The name FIRST STEP "TOYS THAT TEACH" COLORED PLAY BLOCKS was selected for these sets because we believe this type of toy should be the first given to the child. The sets which contain blocks in the six prismatic colors will teach colors and simple designing, and the blocks are just right for piling

Sets retail from 50c to $2.00.

THE EMBOSSING COMPANY, ALBANY, N.Y.

"TOYS THAT TEACH" Happy Contented Children

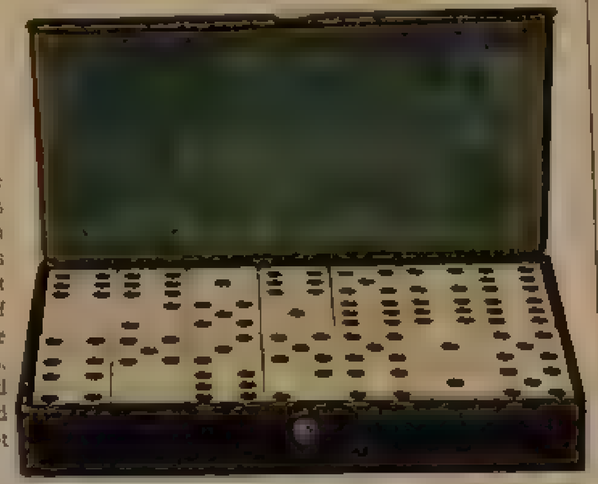
NEW NUMBERS FOR 1930

POPULAR TOY BLOCKS

This is a new line of popular priced Toy Blocks offered first in 1930. The features are along modern ideas. We call particular attention to the embossed letters on the blocks, which are plain and distinct. The illustrations too were very carefully selected for children of the toy block age. While we show an illustration of only one set in this line we have sets to retail at all prices from 10c up.

The blocks are made in three sizes 1-1 10", 1-5 16" and 1-11 16" cubes. Illustration of the 1-11 16" cube is shown above.

1930 CELLULOID DOMINOES



In offering our "1930" Dominoes, we have a practical, high grade set of Dominoes attractively packed. At the right is an illustration of the complete set, as well as the single Domino pieces showing front and back. This is a high grade set of Dominoes to retail at a fair price. The pieces are white celluloid with black dots, with an attractive design on back. Packed in special heavy snap fastener box covered with decorated cloth, with green velvet lining pad on cover

Retails for $5.00

The all year 'round line — "TOYS THAT TEACH"

NEW AND POPULAR NUMBERS

On this page are illustrated an assortment of new and popular numbers. Most of them have been added to our lines within the last few years; they are all ready sellers, and items which should be in every toy department. The educational phase of "Toys That Teach" is more pronounced than ever. We seek the counsel of educators in originating and developing new ideas. Our line has been increased and made more attractive, interesting, and easy to sell. The demand for "Toys That Teach" indicates that most buyers are familiar with this line; if you are not let us send you catalog and samples.

THE EMBOSSING COMPANY, ALBANY, N. Y.

New York Office and Display Room — Room 110, 200 Fifth Ave.

"TOYS THAT TEACH" — A Toy Department in Itself

MODERN "TOYS THAT TEACH" BLOCKS

A most important feature of these Blocks is that a young child can by forming the picture of the Clown and Boy Scout and piling the three Clown Blocks on top of the three Boy Scout Blocks automatically produce the prismatic colors in their proper order, and the numbers from one to six in consecutive order, also illustrations of a nursery rhyme complete

MODERN "TOYS THAT TEACH" BLOCKS

THE BLOCKS THAT SELL

Modern Blocks were first offered to the trade in 1929. The tremendous sale on this line indicated immediately that the features and workmanship on these block sets met with the approval of buyers.

These Blocks contain six educational features, and it is remarkable that all of these features could be incorporated into one set of blocks, in fact a set of these Blocks is really six toys in one. Remember that all of these features are contained in every set of MODERN "TOYS THAT TEACH" BLOCKS

In selecting the features we obtained the advice of a number of recognized kindergarten authorities, because it is very evident that Toy Blocks with real educational features are a very important factor in the education of children. Naturally these Blocks will replace the old-fashioned spelling blocks, although there still remains enough of the alphabet where this is desired

We are proud to add MODERN BLOCKS to our family of "TOYS THAT TEACH" believing that children will have many hours of instruction and entertainment with them.

Modern Blocks are made in all sizes to retail from 10c to $2.00. Send for Catalog and Samples.

THE MAGIC OF

EMPIRE

COLOR

With this announcement, Empire brings to you one of the greatest sensations of the year — a complete line of beautifully colored Miniature Electric Ranges.

Not the ordinary black ranges with colored panels attached—

But ranges that are *completely finished* in durable rich colors —with highly nickel plated legs, cooking tops and trimmings.

The Only Complete Line of Colored Ranges on the Market

Strikingly Beautiful With Colors That Last

Empire has long realized the tremendous sales value of color, not only in the panels, but on the complete ranges.

To accomplish this, however, was extremely difficult—due to the tendency of ordinary colors to crack and peel when subjected to high temperatures.

But by perfecting certain features in design — and through the cooperation of several of the largest paint manufacturers—the goal has finally been reached.

And this applies to the complete Empire line of six types and sizes—priced to suit every pocketbook.

Let the magic of these new, strikingly colored ranges—by far the most beautiful and efficient on the market—earn new profits for you. Write for complete details.

City

Hello boys! With your own hands build models of the world's greatest inventions

Boys! Days are coming when you'll never forget! Days of real exciting sport! Days when your friends will flock from miles around to see the marvelous things you build!

JUST lift the lid of the red brass-bound chest that holds my new improved Number 7½ ERECTOR. Here in this one big set is everything you need to build, one after another, realistic operating models of practically every great mechanical invention known to man. Two workful years to make the 1930 ERECTOR the last word in sport for boys.

Whatever you name—you can build it with ERECTOR. Automobiles, Steam Shovels, Locomotives, Airplanes, Ferris Wheels, Traveling Cranes. Hundreds of other wonders of the age.

AND that's not all. After you've built them with your own hands, just hook them up to the powerful ERECTOR electric motor. It comes with this great outfit. Click the switch, and the thing you yourself have built begins to hum with action! It operates just like the big ones engineers construct.

NOW here's the way to get this barrelful of red-blooded sport. Send today for the ERECTOR Mystic Mind Reader. Darn startling and amazing. Use the coupon. Show it to your dad—then take him to any good store where toys are sold. Let him see ERECTOR. Let him warm up to it. Before you know it he'll want to build things with it himself. It's a sure way to get The World's Greatest Toy for Christmas.

A. C. Gilbert

No. 8. Erector
Builds the Ferris Wheel

The [illegible] Ferris Wheel. Fly [illegible] Build it yourself with this great ERECTOR Set. Amaze your friends. Have real fun and get a barrelful of thrills. The No. 8 set also [illegible] other marvels, including the Loading Elevator, Derrick and Swing Wood Mill and Air Compressor. When you lift the cover of this big set you open up a whole new world of exciting sport. Get in on the greatest red-blooded fun maker in the world.

Sensational №7½ Motorized ERECTOR

THIS the 1930 No. 7½ Set will give you a new idea of what SPORT can be. It holds a brand new thrill for every day in the year. It is loaded with parts and equipment, each and every item invented and patented by Mr. Gilbert, with which you can build 817 realistic models. It includes the 19-inch steel truck body, the famous steel model building tray, the 96-page manual that describes every step in building each model, the powerful ERECTOR electric motor, completely assembled gear-box, big red steel disc wheels, with oversize balloon tires, fenders, radiator, hood, bumper, springs, steering wheel, heavy-duty truck axles, cab top, steam boiler, steam shovel, and many other exciting features. Yes sir, boys—it is 31 pounds of scientific thrills for every day in the year.

Aircraft and Zeppelin Set

It includes also four free Zeppelin with landing mast (the same model as in the Trans-Atlantic No. 8), and accessories in various types of airplanes, hangar, navy, Airplane Carrier, propeller, wheels, Land and sea planes, Autogiro, wings, pontoons, new Zeppelin bag, propellers—everything you need to build these realistic ships of the sky. This set gives you more the commercial value, boys, and gives the most exciting kind of sport.

Why the New [illegible] is the world's greatest toy

1. PATENTED ERECTOR GIRDER. A real, genuine girder like engineers use. The interlocking edge a novel, exclusive ERECTOR feature, eliminates bending and makes it possible to connect two girders, nuts and wrong, with a single bolt and nut, and a three-point square girder with two screws only. (In all ERECTOR Sets.)
2. PATENTED ERECTOR MOTORS. Powerful Battery Motor in No. 4 & 5, 7½ and 8. Famous 9-Set Cub 110-volt Universal Motor in No. 9 and 10.
3. PATENTED ADJUSTABLE CONE BELT. Adjustable to every possible gear combination and for reversing movements. Conversion into 3-drum hoisting engine. Transformed for use with electric motor or 110-volt Motor. Included assembled in the famous No. 6 Set and up.
4. HEAVY STEEL TOWER BASE, 11" long. Exclusive ERECTOR feature. In No. 7½ Set and up.
5. 3½" SOLID STEEL DISC WHEELS WITH BALLOON TIRES. An exclusive ERECTOR feature. In No. 7½ and up.

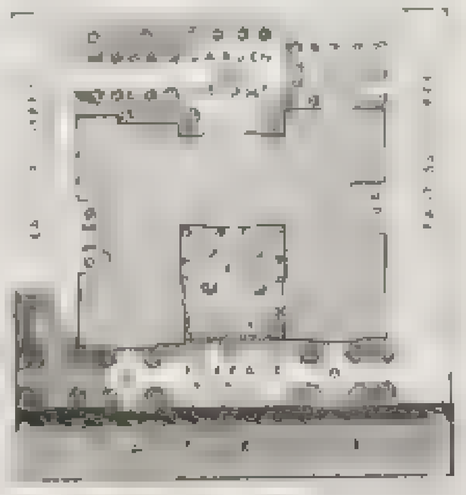
TOYS AND NOVELTIES

JULY, 1930

NOWHERE ELSE IN NEW YORK SUCH PEACEFUL, SUNNY SECLUSION AS THIS

There is a fascination in living directly on the water and it is appreciation of this that has so firmly re-established the East River front as a desirable type of residence.

New River House enhances the natural advantages of a perfect river front location with the peaceful surroundings of gardens, grassy terraces, quiet streets—permanently protected sunshine and view in all directions—and a private yacht landing for the convenience of its residents.



One-Half-Acre Plaza and Gardens

Within convenient but a few blocks from the center of uptown business. The construction is of unusual quality by James Stewart & Co., Inc., builders of international reputation.

The plans, as distinctive as the environment, afford 9 to 12 large rooms with high ceilings, terraces, loggias, balconies, roof gardens—tower apartments of 2 and 3 exposures.

The prices of $37,500 to $275,000, are lower than apartments of similar size in less inspiring residential sections—and special plans may still be arranged. Ready for occupancy—Fall 1930—Call for plans on request.

RIVER HOUSE

ALONG THE EAST RIVER— and TO 52nd STREETS. 100% COOPERATIVE.

The private yacht landing is an attractive feature

RIVER HOUSE

Plans Are Now Ready

THIS new 100% cooperative building will occupy a high bluff facing directly on the East River, 52nd to 53rd Streets, with light, air and outlook permanently protected on all four sides by water, gardens or quiet street.

The apartments range from 9 to 17 rooms, simplex, duplex and triplex — all with river view and many with loggias, balconies, terraces — and those in the tower will occupy two or three entire floors with sweeping vistas in every direction

Dame Wilkins and Her Cats

A Halloween Game

By Clara Fahrenbach

The game is played on the [illegible] page of the magazine with pins. Two people may play. Count [illegible]

Each player has [illegible] pieces of colored thread around the [illegible] will know which are his. A button is used as a counter for both players. Toss the counter [illegible] of a small box set an [illegible] from each player. If the button falls right side up, it [illegible] falls wrong side up, it counts a move down the roof.

The first player starts down one side of the Dame's roof and the next player starts down the other side. Then they go down and [illegible] that is a good move.

The counter must be right side up to place a cat on the top of the Dame's cottage, the starting point. No player can hold the top of the Dame's roof longer than necessary.

In the second row of cottages when two cats pass in opposite directions the cat who has an up count has the right of way and the [illegible]

When seven cats have arrived at [illegible] most cats there wins the game.

STAMP COLLECTION NEWS

REPEAT orders are a good indication of proved merit. The same Hyatt performance, which has won and held the confidence of Chicago, Rock Island and Pacific officials, has brought a steadily increasing number of Hyattized journals to the rolling stock of 65 other American and Canadian properties.

Savings in power and maintenance . . . elimination of jerky starts, sluggish pick-ups, and hot box delays . . . quietness and smoothness in operation these are good reasons for the selection of Hyatts wherever anti-friction journals are installed.

Each year, since 1926, Rock Island has added more HYATTIZED cars

One of the new 800 h. p. Hyatt equipped, gas-electric motor cars recently placed into service by the Chicago, Rock Island & Pacific.

Railroad executives will be interested to know that A. R. A. standards are Hyatt standards, and that Hyattized journal boxes can be installed by the regular shop force, with regular shop equipment.

These Mechanical KENTONTOYS Are Just What Boys Want

No getting around it . . . boys nowadays want toys that work like large, mechanical units. Yet, these toys must not be expensive, for a youngster's pocketbook is small at best.

That accounts for the increasing sales of these new Kentontoys. The Buckeye Ditcher, the Jaeger Concrete Mixer and the Vertical and Horizontal Engines are reasonably priced even though they do have a multitude of working parts.

There's a new Kentontoy catalog just off the press that we would like to send you . . . it shows these cast iron toys in their new, flashy colors — and gives complete specifications. Write for it.

"The kind the boys prefer." We recommend the use of Bulls Eye Steel Shot with Daisy Air Rifles.

$500.00 in Prizes—

For the Best Letters on this Subject, "How to Have the Most Fun with a Daisy Air Rifle."

Now is the Time to pick out your Daisy for Christmas

GET the jump on everybody this Christmas and pick out the Daisy you want for Christmas and make an early start on your campaign that will result in your making up Christmas morning to find waiting for you the gun of your dreams—the Daisy Air Rifle that will make you the envy of all the other fellows in the neighborhood.

How to Get the Daisy You Want

First of all pick out the exact Daisy model you want and find out the lowest price at which it can be had. All the famous Daisy models are described and illustrated in the Daisy Manual, which we will send free on request. Or, better still, go to your nearest hardware or sporting goods dealer and ask him to show you the Daisy models that he carries in stock. He will let you pick out the one you like best. Look it over carefully, put it to your shoulder and see how "sweet" it feels as you straighten your arm, sight along the barrel.

You will surely find a Daisy that suits you perfectly among the different models from the new Improved Daisy Lever, a repeater which will repeat 5,000 times—the Daisy Single Shot for only $1.00.

When you have decided on the Daisy you want, start right in and let everyone in the family know that you want a Daisy for Christmas. Tell them the exact model you want, how much it costs and where it can be bought.

It never occurs to your having a gun—realize as sometimes necessary about guns—tell them that you will be exceedingly careful and never point it in the direction of any living person, and even go so far as to promise to do anything that could possibly be construed as dangerous. Show them the Daisy package which you will find in the Daisy Manual and that you have a good notion to observe to the letter.

Tell them, too, that the Daisy is a safe gun and shoots with compressed air instead of powder and cannot shoot hard enough to harm anyone.

Tell them that for more than 40 years the Daisy has been the favorite American boys' gun and has created millions of boys now grown to manhood in the principles of marksmanship. Many of America's best marksmen got their start with a Daisy Air Rifle.

Above all keep after the folks. Perseverance always wins. Tell them morning, noon and night about the Daisy you want for Christmas. If you do a good pulpit salesmanship job you will surely find your Daisy waiting for you Christmas morning, ready to give you more real fun than you ever had before in your whole life.

DAISY AIR RIFLES

SYPHONS
are operative continuously

Thermic Syphons are integral parts of the boiler operative continuously during the whole locomotive service period

One of the 80 Syphon equipped switch engines built recently by the American Locomotive Company for the Chesapeake & Ohio Railway Company

Contributing Unequalled Economies in Switch Engine Operation

Switch engines make 25% of all engine mileage. From the time the fire is lighted until it is extinguished, Thermic Syphons are creating active circulation, saving fuel, reducing stresses on flues, sheets and staybolts—and providing unfailing safety.

Syphons are at work continuously whether locomotive is moving or standing, providing an abundant reserve of steam to meet the flexible requirements of switching service.

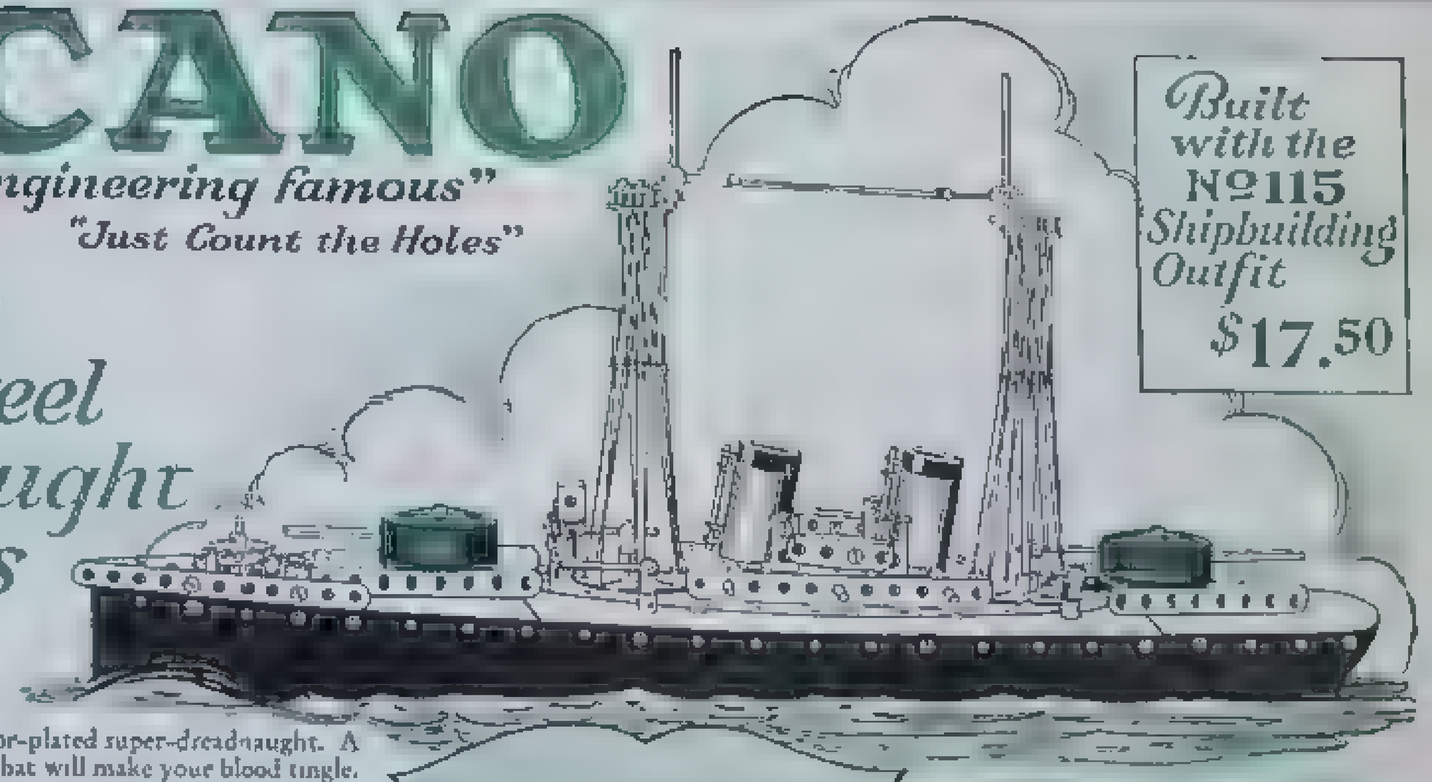
MECCANO

"The Toy that made Engineering famous"

"Just Count the Holes"



Built with the **№115** *Shipbuilding Outfit* **$17.50**

Build this Mighty All-steel Superdreadnaught that Floats and Runs

AHOY MATES! Feast your eyes on this powerful armor-plated super-dreadnaught. A roaring, racing bulldog of the Navy. Here's a flagship that will make your blood tingle. Built just like Uncle Sam's biggest and finest battleships

If you've a thirst for adventure and a taste for the sea, the MECCANO Shipbuilding Outfit is the most glorious toy you can own. You build this gigantic warship yourself, lay the keel just as they do in the big Navy yards, fit on the hull and armor plate and mount the guns.

BUT the big moment is when you launch her—when you see her slip gracefully into the water—when you see her awaken to a proud sea life and go forward under her own power

You can build all kinds of fascinating ships with this wonderful MECCANO Shipbuilding Outfit. Gigantic ocean liners—dashing speed boats—stalwart freighters—adventurous pirate ships—graceful yachts—and many others.

IN the sturdy, green, MECCANO Sea Chest, you will find keel, hull, armor plate, anchor, masts, smoke-stacks, guns, propeller and all necessary parts for building real ships—vessels that actually float and run.

Features that make MECCANO *famous*

MECCANO, the Toy that made engineering famous. Better and easier model building. The oldest construction toy and still the best. Fascinating fun, stupendous surprises, thrilling adventures in mechanical mysteries—they are yours with MECCANO. Interchangeable with other construction toys.

1. Just count the holes. The Famous MECCANO flat beams and angle beams have equally spaced holes (½" apart). Remember, too, MECCANO gives a connection or bearing wherever it is needed.
2. MECCANO Patented Super-Power Unit (Combination Electric Motor and Gear Box). Again—just count the holes. Adapted for simple reversing connections. (In No. 5 MECCANO outfit and up.)
3. Patented MECCANO Two-Drum 110-Volt Electric Hoisting Engine. Equipped with famous 110-Volt Polar Cub Motor. Multiple disc clutch. Miniature replica of a genuine hoisting engine. A complete operating unit for building hoisting machinery, derricks, cranes, elevators, etc. (In No. 125 MECCANO Outfit and up.)
4. Solid Steel Ship Hull, 23" long. Built to float and run. Other exclusive ship features—ship funnel, decks, keel, propeller, pilot house, and many others. (In No. 115 MECCANO Outfit and up.)
5. Patented MECCANO Braced Girders, 12" long, 2" wide
6. Giant MECCANO Geared Roller Bearing.
7. Giant MECCANO Perforated Flanged Plate, 16½" x 5½", heavy boiler steel.
8. Solid Steel Disc Wheels with genuine Dunlop solid rubber tires.

Innumerable other exclusive MECCANO features, such as—girder flanges, chimney adapters, corner angle brackets, eccentrics, MECCANO patented coupling, sector plates, etc.

Popular MECCANO Outfits

NO. 1—APPRENTICE OUTFIT. Builds over 470 models $1.00

LEGACY PATTERN

Called the Legacy because the chaste and lovely beauty is an inheritance from more than eighty years of 1847 Rogers Bros. leadership in silverware design

The Timeliness of the Pattern Recognized Everywhere — Keyed to the Day's Modes and the Merchant's Sales Needs

THE instantaneous success that greeted LEGACY established a new record in silverware history. . . . The reason is delightfully self-evident in the pattern itself, embodying, as it does, the crisp, straightaway lines of modern art.

The product of the best in modern craftsmanship, it expresses four generations of 1847 ROGERS BROS. Silverplate artistry. Lucky the bride who is starting her silver service with this smart and lovely design.

A Modern Pattern with a Distinguished Inheritance

1847 ROGERS BROS.

LEGACY PATTERN

Called the Legacy because the cheste and lovely beauty is an inheritance from more than eighty years of 1847 Rogers Bros. leadership in silverware design

The Timeliness of the Pattern Recognized Everywhere — Keyed to the Day's Modes and the Merchant's Sales Needs

THE instantaneous success that greeted LEGACY established a new record in silverware history. . . . The reason is delightfully self-evident in the pattern itself, embodying, as it does, the crisp, straightaway lines of modern art.

The product of the best in modern craftsmanship, it expresses four generations of 1847 ROGERS BROS. Silverplate artistry. Lucky the bride who is starting her silver service with this smart and lovely design.

SELLING TOYS ON THE World's Busiest Street

STATE STREET CHICAGO

The Fair

DOLL specials from the Chicago Toy Fair were placed on the main floor and sold well on account of their price and novelty.

A large wooden play house, big enough for little folks to live in, was on the floor. Playground equipment was allotted plenty of space. Wheel goods always have a lot of room in this department, too.

Promotional stunts are over for awhile, the last being the National Baby Week program, which went off very well.

Carson, Pirie Scott & Co.

There is "something doing" every Saturday to bring the children flocking to Carson's fourth floor toy department. For May 24, invitations were sent to all the Camp Fire Girls, and Boy and Girl Scouts in Chicago through their troop guardians. Chief Whirling Thunder and Evergreen Tree were the hosts from 1 to 5 p. m. and they showed a delighted audience how to make beaded articles and do yarn sash weaving.

Assisted by two Indian maids, they gave dances, bird and animal calls, and instructions in knife craft. Among children, at least, the romance of the Indian will never die.

The "party aid" idea has found favor among the customers. One boy had a birthday on the anniversary of Lindy's landing at Le Bourget. You may be sure he had the most appropriate of decorations for the occasion.

Boats that make the fingers itch for a patch of water are given generous space; one boy came in to buy the boat he will sail in the Jackson Park children's "regatta," an annual event.

Marshall Field's

May was a good month for toys at Field's—opening with a vacation week for Spring moving and ending with a three-day holiday.

An entertaining program was carried out during Vacation Week. The children started from the "Air Castle," which is the broadcasting headquarters of the toy department. There they were given a ticket and directed to stop at the first policeman. There was a policeman at each corner and "street lamp" globes were labeled "Little People's Street," etc. The children were directed from corner to corner until they had seen everything and ended at the Air Castle.

Many visitors came, sales were stimulated, and the event was a success—as the way Mr. Gibson summed it up.

An old game—having a new revival and threatening to supplant bridge—is backgammon. Dice and doubling dice plus the board and checkers make up a game as exciting as the players care to have it. "Rap-o" is a new game played indoors or out between two people.

Picturing the Chicago Toy Fair Association's office in the Morrison Hotel. Miss Rose Topor, assistant secretary of the association, is at the typewriter. The other young lady is Miss Helen Anderson, who helped during the Toy Fair

with wood or canvas rackets and balls.

May 30 may be called the first real holiday of Spring and this year it meant three days for play—stimulating toy and juvenile sporting goods sales to a pleasant degree.

Playground equipment sales are very satisfying, says Mr. Gibson. People are beginning to realize the possibilities for better health afforded by these articles. Wading pools, even though Chicago is a lake city, are a convenience to thousands of homes which are not near the lake. Then, too, mothers need not be constantly on guard as they must be at the beach. Heat and discomfort can be avoided by having play equipment at home.

The Boston Store

Two toy fairs and a trip to Europe have resulted in a well stocked and beautifully arranged department, which fairly bristles with the latest and finest of toy productions. New glass doll cases, which are built to the floor level, are being put in and are a marked improvement

An aisle of playground equipment, in space heretofore given to other departments, has been secured. Even the expensive pieces among them are selling well, reports Miss Hanley. Last year playground equipment made its first appearance in the store and the results have been very satisfactory.

Are You STILL a "Doubting Thomas" About CHILDREN'S DAY?

Then read what happened last year. Retailers used $100.000 worth of newspaper advertising space. Hundreds of toymen put in special toy windows. Thousands sold more toys than ever before during the ten days preceding the third Saturday in June. There's still time to enter the toy window contest and to secure free cuts for newspaper advertising. Address F. D. Dodge, Children's Day Promotion Committee, 200 Fifth Avenue, New York City.

Playgrounds and radio stations throughout the country joined in the National Children's Day festivities. It is estimated that between 200 and 300 cities staged special exercises in their playgrounds Although most of these activities consisted of games, contests, dances, etc., some of the play centers had elaborate programs. In Memphis, Tenn., 350 children took part in a pantomime, "Jack and the Beanstalk." A number of cities had parades preliminary to the playground programs. Seattle, Wash., had a big drive for "back yard" playgrounds.

In Tacoma, Wash., as in the case of many other playgrounds, folk dances, baby parades, pet shows, games, etc., were held. In the New Orleans, La., playgrounds a big program was carried out. At Oak Park, Ill., a town of 60,000 population, a public inspection trip of the play centers was made. West Allis, Wis., opened its playground season with National Children's Day, as did many other cities. In a few years Children's Day will undoubtedly be the playground opening date of many cities. Local merchants can usually be interested in backing playground projects.

About 100 radio stations, as far as we can judge, put on special Children's Day programs. Mrs. Will Durant, wife of the philosopher, and Dr. Shirley W Wynne, health commissioner of New York, spoke over WPAP. Supervisor of Recreation James V. Mulholland (New York) talked over WNYC. A special children's program was put on by WEAF. Local merchants arranged a program at KSTP, St. Paul, Minn., as well as many other cities. At Fargo, N. D., children from 4 to 10 years old gave a recital program over WDAY Mrs. Olive Hurst, juvenile entertainer, gave a program over WFJC, Akron, Ohio. In Chicago, Ill., stations WENR and WBCN sent out programs consisting of juvenile talent. KTM of Los Angeles, Calif., and KDYL of Salt Lake City were among the Western stations to feature the day. WIL of St. Louis, Mo., and a number of stations in New Orleans and other cities of the South staged special events. A person in any part of the United States owning a receiver set could tune in on June 15 on a special Children's Day program.

Observances to Be Repeated

Close to 30,000,000 persons, or half the urban population of the United States, were asked to observe National Children's Day in appropriate manner by the chief executives of the municipalities in which they reside Our records, incomplete as they necessarily are, show that the mayors of 133 cities in 42 states issued proclamations calling for city-wide observance of National Children's Day. Because of the fact that clipping agencies do not obtain much more than half of total items published, we can safely estimate that many more mayors issued proclamations than our records show. Governor Harry Flood Byrd of Virginia called upon the people of that state to give a thought to childhood on National Children's Day. The mayors of the following cities issued proclamations, as shown by our records:

Alabama
Montgomery
Birmingham
Arizona

Eastman Cameras—Kodak Films

BOX CARTRIDGE HAWK-EYE SPECIAL CAMERAS

This new Box Camera offered in two sizes, is popular because of its moderate price and simple manipulation. No focusing is necessary—just point the lens at the subject and press the lever. Both sizes have automatic shutters for either time or snapshot exposures. The tested lenses are carefully adjusted to each instrument and are set at universal focus, no judging of distance is necessary. Covered with fine grain imitation leather handsomely embossed. Metal parts are finished in nickel and black lacquer. Brilliant finders for either vertical or horizontal pictures. Illustrated instruction book is packed with each camera. Choice of two sizes.

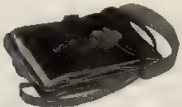
2G40178 No. 2, takes pictures 2¼x3¼. Uses Kodak Film No. 120. PRICE.....**$3.60**

2G40179 No. 2A, takes pictures 2½x4¼. Uses Kodak Film No. 116. PRICE.....**$5.20**

POCKET HAWK-EYE CAMERA

The scientific principles which have made Kodak products famous are embodied in this Vest Pocket Hawk-Eye Camera. It is a thoroughly capable and proficient camera, even though it is only a handful. It is equipped with an Eastman Lens and automatic shutter for either time exposures or snapshots. Has a reversible finder for either horizontal or vertical views. Fixed focus—just draw out the bellows and the camera is ready. Has tripod socket and loads in daylight with Kodak Film—two convenient features. The body is covered with imitation black leather, metal parts finished in black lacquer and nickel. An illustrated instruction book is packed with each camera. Takes pictures 1⅝x2½ inches. Uses Kodak Film No. 127.

2G40174 PRICE.....**$8.40**



LEATHERETTE CARRYING CASES

For the protection and added care of your camera, a carrying case is strongly recommended. The exceptional values are made possible only by the tremendous quantity production.

2G40189 To fit No. 2 Folding Hawk-Eye Camera. PRICE.....**$2.85**

2G40190 To fit No. 2A Folding Hawk-Eye Camera. PRICE.....**$3.00**

2G40191 To fit No. 3A Folding Hawk-Eye Camera. PRICE.....**$3.40**

KODAK FILM

The Dependable Kind in the Yellow Box

The speed, latitude and uniformity of Kodak Film make it the amateur's choice. Pioneers in the manufacture of cameras and film, the Eastman Kodak Company has maintained a standard that is without equal. We offer below the four sizes of Kodak film.

No. 127 is used in the Vest Pocket Hawk-Eye Camera that takes a picture 1⅝x2½.

No. 120 is used in No. 2 cameras and takes a picture 2¼x3¼.

No. 116 is used in No. 2A cameras and takes a picture 2½x4¼ inches.

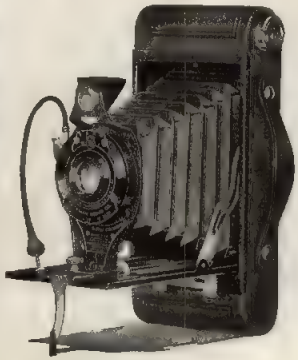
No. 122 is used in No. 3A cameras and takes a Post Card size picture 3¼x5½.

2G40185 No. 127 (8 Exposures). Per roll **$0.43**

2G40186 No. 120 (8 Exposures). Per roll.. **.43**

2G40187 No. 116 (6 Exposures) Per roll.. **.51**

2G40188 No. 122 (8 Exposures). Per roll.. **.94**



FOLDING CARTRIDGE HAWK-EYE CAMERAS

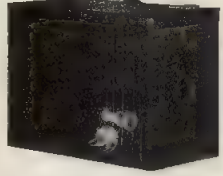
Three Sizes

The three Folding Cartridge Hawk-Eye Model B Cameras offer the utmost in value and efficiency at an extremely low cost. These cameras are identical in construction, workmanship and finish, excepting in size. They are compact, durable and simple to operate, and their picture-taking qualities will satisfy the most exacting. Adjustable focus, with handy automatic focusing lock. The accurate and automatic Kodex shutter has speed graduations of 1/25 and 1/50 of a second, as well as bulb and time. Reversible brilliant finder for either horizontal or vertical views; two tripod sockets for either position. The steel body is covered with fine imitation leather. Fittings in black enamel and nickel. Illustrated instruction book is packed with each camera.

2G40175 No. 2, takes pictures 2¼x3¼. Uses Kodak Film No. 120.....**$15.20**

2G40176 No. 2A, takes pictures 2½x4¼. Uses Kodak Film No. 116.....**$16.80**

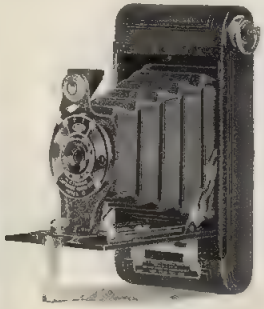
2G40177 No. 2A, takes pictures 3¼x5½. Uses Kodak Film No. 122.....**$25.60**



NO. 2 BOX CARTRIDGE HAWK-EYE MODEL C

This camera comes to you direct from the workshops of the Eastman Kodak Company—a generous guarantee of quality. The tremendous quantity production has made the low cost price possible on this model. A tested lens is carefully adjusted to each instrument and set at universal focus, no judging of distance is necessary. Can be loaded in daylight with Kodak film. Takes pictures 2¼x3¼. Uses Film No. 120.

2G40180 PRICE.....**$2.20**



NO. 2 FOLDING CARTRIDGE HAWK-EYE MODEL C

This model embodies features found only in the higher priced models—an all metal body, covered with durable imitation leather; sturdy rigid front standard; accurately tested lens with automatic shutter suitable for either time or instantaneous exposures; lens correctly mounted to insure perfectly satisfactory pictures even in the hands of the beginner. Two tripod sockets and the reversible finder permit the making of pictures either horizontally or vertically. An illustrated book of instructions accompanies each camera. Uses Kodak Film No. 120. Takes pictures 2¼x3¼.

2G40181 PRICE.....**$10.70**

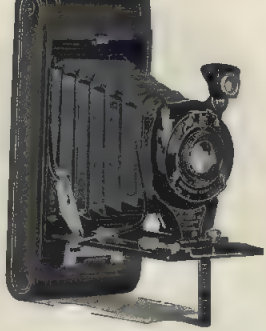
KODAKERY MAGAZINE FREE FOR 1 YEAR

This intensely interesting publication for the amateur photographer sells regularly at sixty cents per year. Profusely illustrated—most helpful to those interested in better picture-making. Packed with every camera is an invitation to subscribe for one year free of all charges.

NEW!! *Just Out! Eastman's Anastigmat f. 6.3 Lens Creates a New Standard of Camera Value*

These new, unparalleled, high-speed, fine quality, Folding Hawk-Eye Cameras, embrace unusual values at remarkably low prices. The Kodak Anastigmat f. 6.3 lens forms the most important part of this offering. This lens has definitely greater speed and covering power than any offered heretofore.

The Kodak Anastigmat stands at the peak of photographic lens design. Because of its high quality, however, it was formerly available only on equipments beyond the reach of the average amateur.



It remained for the Eastman Kodak Company—one of whose plants is devoted almost exclusively to lens manufacture—to reduce costs to such an extent, that makes it possible to offer the Kodak Anastigmat lens, on these fine quality yet popular priced cameras.

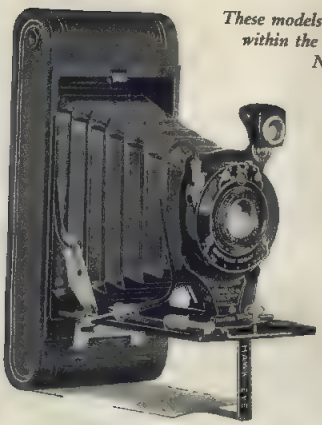
Every model represented on this page is geared with a reliable shutter equipment of unusual quality combining to produce the most satisfactory results. They are "Eastman Made"—more cannot be said.

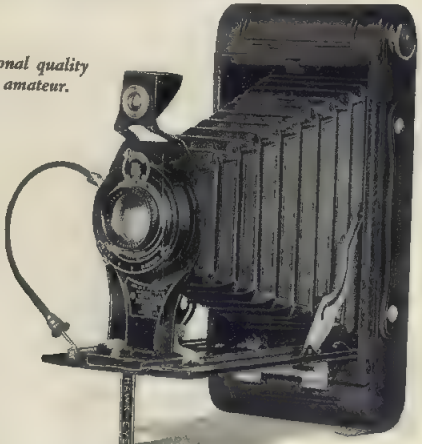
No. 2 FOLDING HAWK-EYE SPECIAL

This model is sufficiently compact to be carried in the pocket and yet is absolutely reliable for making clear, sharp pictures. Fitted with Kodak Anastigmat f. 6.3 lens, and Kodex Shutter with automatic speed graduations of 1/25th and 1/50th of a second, as well as time and bulb actions. Steel body covered with fine imitation leather. All exposed metal parts are finished in nickel and black lacquer. Worm screw focusing device to aid in obtaining microscopic definition. Illustrated instruction book is packed with each camera. Takes pictures 2¼x3¼. Uses Film No. 120.

2G40182 PRICE **$23.80**

These models bring professional quality within the reach of every amateur. New low prices!





No. 2A FOLDING HAWK-EYE SPECIAL

The popularity of the No. 2A size picture has long been established. The splendid equipment furnished with this model at such a remarkably low price presents the greatest camera value on record. Complete with Kodak Anastigmat f. 6.3 lens and Kodex Shutter which has automatic speed graduations of 1/25th and 1/50 of a second, as well as time and bulb exposures. Fine grain imitation leather covers the steel body and all exposed metal parts are finished in lacquer and nickel. The worm screw focusing device will assure you of obtaining microscopic definition. Illustrated instruction book is packed with each camera. Takes pictures 2½x4¼. Uses Film No. 116.

2G40184 PRICE **$25.20**

No. 3A FOLDING HAWK-EYE SPECIAL

This compact equipment embodies the conveniences found only in high grade cameras. This model is equipped with Kodak Anastigmat f. 6.3 lens and Kodak Ball Bearing Shutter with speed graduations of 1/25th, 1/50th and 1/100th part of a second as well as the usual time and bulb exposures. The all-metal body is covered with durable imitation leather. All exposed metal parts are finished in nickel and black lacquer. Complete with two tripod sockets and reversible brilliant finder to permit exposure either vertically or horizontally. The worm screw focusing device will be found a decided convenience in obtaining microscopic definition. The wide bed track forms unusual front standard rigidity. Illustrated instruction book is packed with each camera. Uses Kodak Film No. 122. Takes pictures 3¼x5½.

2G40183 PRICE **$32.90**

"They copied all they could follow,
But they couldn't copy my mind,
So I left them sweating and stealing,
A mile and a half behind."—Kipling

A NEW BABY DIMPLES

COMPETITION is good—good for the soul—when it is fair. But *copying*, dolls or any other creative work, is not competition. Kipling has another name for it, and those who practice it.

But they cannot copy a mind, so this wonderful, *new* "Baby Dimples" is going to leave them more than a mile and half behind. It will leave them years behind.

Its appealing, baby loveliness will cuddle its way into the minds of our trade. They will identify it as an

Look for the HORSMAN LINE at the CHICAGO TOY FAIR, April 28th - May 10th

HORSMAN'S 1930 BABY DIMPLES

unmistakable Horsman work of art —worthy of its own name—worthy of the dealer presenting it to customers whose confidence he must keep.

The fact that it is a sale-on-sight doll—that it will be yearned for by every little girl who sees it—and wanted for that little girl by every parent—will automatically bring quick sales for all our dealers who display it.

The above is a reprint with necessary name changes of a 1923 advertisement featuring the original "Baby Horsman."

Explosives and Blasting Supplies

Dynamite

Dynamite is a High Explosive, commonly used in mining and quarrying operations, excavating and earth moving, breaking log and ice jams and for the improvement of agricultural lands.

It is made in various grades and percentages and is packed in cartridges 8 inches long with various diameters, the standard diameter being 1¼ inch. It is packed in 25 and 50 lb. cases.

Low Freezing Extra—This is an ammonia Dynamite and is not frozen as readily as other grades and can be used for most all kinds of work with the exception of work in water and underground work where the air is poor. Manufactured in strengths of 15% to 60%.

Nitroglycerin—This is very similar in looks to the **Low Freezing Extra** but has more of a shattering force and can be used in quarry work as well as for ditch blasting on the farm. Manufactured in strengths of 40, 50 and 60%.

Gelatin—This is a plastic Explosive and can be used where the work is very wet and under-ground as it does not give off the amount of injurious fumes as the other grades. **Gelatin** is manufactured in percentages of 35% to 100% but only from 40% to 75% is carried in stock. **Prices on application.**

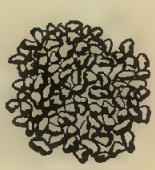
IMPORTANT

Dynamite, Caps or Powder cannot be shipped with hardware or other goods, neither can they be shipped by express. When entered on order with other goods, we will ship direct from nearest magazine. Shipments of 200 lbs. Dynamite, or more, will be delivered to any point on the line of transportation companies accepting High Explosives. Shipments of less than 200 lbs. f. o. b. nearest distributing point.

Hercules Blasting Powder

F

FF



FFF

Blasting Powder is packed in metal kegs of 25 lbs. each and is used in blasting soft materials such as dirt and soft coal as well as in some quarry work. It comes in various granulations and the most commonly used are those shown. The F granulation being slowest and the FFF fastest. **Prices on application.**

Hercules Blasting Caps

These are a small copper capsules about ¼ inch in diameter containing a charge of fulminate of mercury which is exploded by the spit of the fuse. These are manufactured in No. 6 and No. 8, and the No. 6 may be used for all practical purposes.

Prices on application.

Safety Fuse

Used for firing Blasting Powder directly by its spark or exploding Dynamite when attached to Blasting caps. Prices per 1,000 feet:

Beaver Brand used for Agricultural Purposes	$6.85
Clover Brand for use in very wet work	7.20
Single Tape for use in damp work	7.20
Double Tape for use in wet work	8.20
Crescent Brand for metal mining	7.80

Electric Blasting Caps

These consist of copper capsules similar to those of ordinary Blasting Caps, but longer and slightly larger in diameter, having two insulated copper wires inside the cap which are bare and joined together by platinum bridge embedded in guncotton. When current passes thru this bridge it is heated and sets off gun cotton which in turn fires the charge of fulminate.

Made in both No. 6 and No. 8 in lengths of 4 to 30 feet, **Prices on application.**

Hercules Blasting Machines

Hercules Blasting Machines or **Batteries** are used for generating electricity for the detonation of Electric Blasting Caps, and are manufactured in three sizes as mentioned below:

	Capacity List
Hercules Midget for testing purposes generally four Electric Blasting Caps	$15.00
Hercules 10 Cap. Capacity 10 Electric Blasting Caps	18.00
Hercules New Style. Capacity of one to fifty Electric Blasting Caps	35.00

Leading Wire

Leading Wire

Leading Wire made in Single and Duplex coils of No. 14 copper wire in various lengths. Standard coils are 250 ft. in length, used to connect Blasting Machine to Electric Blasting Caps.

Connecting Wire

Connecting Wire

This is No. 20 copper wire put up in one lb. spools and for use in connecting Electric Blasting Caps to each other

Tools for Blasting Purposes

Such as Stone Drills, Earth Augers, Chisels, etc., are listed elsewhere in this catalog. See index.

WELDING AND CUTTING SUPPLIES

PREST-O-WELD WELDING SPECTACLES AND GOGGLES

A great many make the mistake of try ng to weld or to adjust to welding flame without the use of goggles, while the oxygen flame does not give off any dangerous rays, the light is so intense that sooner or later the eyes will become strained unless protected by suitable lenses. They also serve to protect the eyes against small particles of molten metal. Per Pair

No. A-48F—Goggle, with fibre frame and amber lenses.. $6 45

One pair in carton.

PREST-O-WELD GLOVES Per Pair

No. A-38FLG—Presto Fire proof leather. Withstands the handling of rough metal much better than gloves of pure asbestos, and at the same time gives adequate protection against heat ◆$4 74

◆F. O. B. Illinois Factory Only.

WIRE SOLDER

KESTER ACID-CORE

Kester Acid Core Solder

Self-Fluxing Wire Solder.

The solder is a hollow wire filled with an acid soldering flux. Made from Strait's tin and St. Joe lead, both absolutely pure metals. The solder tube is a series of cells. As one cell is separated from the others, no excess flux can flow from the remaining cells.

The most practical solder for Automobile repair work. Handy, clean and easy to apply. Can be used without soldering iron It has many uses such as radiator leaks, spark plug terminals, gasoline pipe and tank joints, battery terminals, general garage use, etc. 1/8 inch in diameter.

	Per 100 Lbs
No. A-1ACS—lb coils	$202 50
No. A-5ACS—5 lb spools	187 50
No. A-10ACS—10 lbs spools	186 00

GEAR FLUSHERS

AIR-WAY

Heavy pressed steel container; nickel plated brass operating valve.

A practical device for cleaning transmission and differential gear cases. Requires no motor, operates from compressed air supply line, utilizing a clean fluid agitated by air pressure.

Complete with 12 feet of 1/4 inch high grade rubber hose with 1/4 inch connection.

	Each
No. A-32—Capacity 1 gal	$78 75

One in carton; wt each 15 lbs.

OILDRAULIC REVOLVING LIFTS

55RP	55 gal. Drum	..	450	55

GRAPHITE SPRING LUBRICANT

A product specially manufactured to penetrate effectively and lubricate spring leaves thoroughly. Through the use of this lubricant, life of springs are materially increased, in addition to eliminating squeaks that are common in this part of an automobile.

NO.	Container	Cans In Case	lb Case	GALLON
1RGS	1 gal. Can	12	120	$3.00
5RGS	5 gal. Can	2	90	2.50

A charge of $6.00 will be made for 55-gallon steel drum.

CASTOR MACHINE

Light amber color; for all machinery and engines with loose journals.

NO.	Container	Cans In Case	lb Case	GALLON
1RCM	1 gal. Can	12	120	$0.70
5RCM	5 gal. Can	2	90	.55
15RCM	15 gal. Drum	....	130	.75
55RCM	55 gal. Drum	....	450	.50

COMPRESSOR OIL

A high grade lubricant with high flash and low fire. Specially adapted to meet requirements for compressor lubrication, having no free carbon and being particularly made to stand the dry heat encountered in this type of equipment.

NO.	Container	Cans In Case	lb Case	GALLON
1RCOM	1 gal. Can	12	120	$0.85
5RCOM	5 gal. Can	2	90	.75
15RCOM	15 gal. Drum	....	130	.80
55RCOM	55 gal. Drum	...	450	70

DYNAMO OIL

A special oil for dynamos, generators and electrical motor lubrications.

NO.	Container	Cans In Case	lb Case	GALLON
1RD	1 gal. Can	10	100	$1.25
5RD	5 gal. Can	2	90	1.00

FLOOR OIL

Floor oil is specially intended to serve as a preservative for wood and at the same time keep down dust to a minimum. Richfield floor oil penetrates quickly and gives a maximum amount of preservation to floors that are treated with this product.

NO.	Container	Cans In Case	lb Case	GALLON
1RF	1 gal. Can	12	120	$0.80
5RF	5 gal. Can	2	90	.65
15RF	15 gal. Drum	....	130	.75
55RF	55 gal. Drum	....	450	60

No charge will be made for 15-gallon steel drum.

No credit allowed for return of 15-gallon drums.

A credit for the amount will be passed if 55-gallon drum is returned—transportation prepaid.

RICHFIELD SPECIAL OIL L

SOLUBLE OIL

Richfield soluble oil is a heavy body oil of dark ruby color which will mix thoroughly in any proportion with water, turning immediately to a milk white solution. This high grade oil is recommended for use on high carbon steel for turning, milling and grinding. No soluble oil can equal this product in its ability to carry such a large proportion of water.

NO.	Container	Cans In Case	lb Case	GALLON
1RSO	1 gal. Can	12	120	$1.05
5RSO	5 gal. Can	2	90	.95
15RSO	15 gal. Drum		130	1 00
55RSO	55 gal. Drum		450	.85

CUTTING OIL

Contains no harmful chemicals and is highly recommended for use on all types of automatic machines, turret machines, gear cutters, broaching machines, gear shapers, etc. This moderately priced oil has proven an ideal substitute for lard oil and in many classes of work will produce even a smoother finish.

NO.	Container	Cans In Case	lb Case	GALLON
1RCUT	1 gal. Can	12	120	$1.00
5RCUT	5 gal. Can	2	90	.80
15RCUT	15 gal. Drum		130	.90
55RCUT	55 gal. Drum		450	.75

TEMPERING OIL

Steel as it comes from the quenching bath is invariably both too hard and too brittle, and the purpose of tempering oil is to serve as a medium to destroy some of the hardness and brittleness, but at the same time increase the elasticity of the steel without materially changing the grain structure of the metal. Richfield Tempering Oil is so manufactured as to very adequately meet requirements as stated above

NO.	Container	Cans In Case	lb Case	GALLON
1RTEM	1 gal. Can	12	120	$1.00
5RTEM	5 gal. Can	2	90	.80
15RTEM	15 gal. Drum		130	90
55RTEM	55 gal. Drum		450	.75

QUENCHING OIL—NO. 1

The object of quenching steel is to arrest the grain structure of the metal at its greatest point of efficiency. To meet requirements as above, Richfield Quenching Oil, No. 1, having a specially high flash point is particularly suited to producing uniformity in hardness of the steel that is treated.

NO.	Container	Cans In Case	lb Case	GALLON
1RQ1	1 gal. Can	12	120	$1.10
5RQ1	5 gal. Can	2	90	.90
15RQ1	15 gal. Drum		130	.95
55RQ1	55 gal. Drum		450	.80

A charge of $6.00 will be made for 55-gallon steel drum. No charge will be made for 15-gallon steel drum.

A credit for the amount will be passed if 55-gallon drum is returned—transportation prepaid.

No credit allowed for return of 15-gallon drums.

QUENCHING OIL—NO. 2

Richfield No. 2 Quenching oil has the same high quality as No. 1, but is a slightly harsher oil. Same uniform results are obtained, however, providing the bath is kept at a moderate temperature.

NO.	Container	Cans In Case	lb Case	GALLON
1RQ2	1 gal. Can	12	120	$1.00
5RQ2	5 gal. Can	2	90	.80
15RQ2	15 gal. Drum		130	.90
55RQ2	55 gal. Drum		450	.75

ICE MACHINE OIL

Sold in two grades—medium and heavy, and manufactured to particularly meet the requirements of refrigerating machinery. This type of machinery requires oil that will not congeal at very low temperature, that is free from animal fats and high enough in flash to vaporize readily. Both grades of Richfield Ice Machine Oil have a zero cold test, and conform to requirements for ice machine lubrication as stated above.

Medium

NO.	Container	Cans In Case	lb Case	GALLON
1RIM	1 gal. Can	12	120	$0.85
5RIM	5 gal. Can	2	90	.75

55RIH	55 gal. Drum		450	.65

SEPARATOR OIL

This product is a pure mineral oil, pale amber in color, specially manufactured for the lubrication of hand power cream separators. To adequately meet requirements for lubrication of separators a free flowing pure mineral oil that will not gum should be used and for this purpose we recommend Richfield Hand Separator Oil.

For Hand Machine

NO.	Container	Cans In Case	lb Case	GALLON
1RHS	1 gal. Can	12	120	$0 85
5RHS	5 gal. Can	2	90	.75

GIFTS OF UTILITY

WHITE CROSS THREE-PIECE ELECTRIC WAFFLE BUFFET SET

Here is the ultimate in equipment to make those golden brown crisp waffles in the ELECTRIC way — so simple, so odd — and How Good They TASTE. This set comprises a beautifully polished nickel tray, a waffle set of artistic effect pattern, artistically designed in beautiful delicate blue, about 7¾ inches and a large size waffle iron — modern design with recessed handles and cord — match finished in matching nickel plate with the characteristic grids. Bakes the most golden brown waffles, both sides at once — does it faster and more delicately than the ordinary electric iron or toaster. The grid proper is 7¾ inches in diameter. Weight of Waffle Iron 6 lbs. Complete with six feet silk cord and two-piece plug

No. 7C2597S Per Set $17.50
(In lots of three) Per Set 16.65

THREE PIECE ELECTRIC WAFFLE SET No. 7C/154TS

This new ensemble portrayed above is an exceptionally good buy. It is the celebrated WHITE CROSS product, accompanied with the fine and gold tag to assure purchaser of artistic merit and satisfaction. The waffle iron bakes evenly rapidly and efficiently. It is handsome, polished nickel plate with black wood handles. Grids are "white cross" aluminum. The nickel-plated tray is the serving tray of heavy stock and measures 16 inches. The percolator is of attractive design, and is handsomely decorated. Has polished nickel plate with standard length cord and attachment plugs. Watts 660. A set that must be seen if you are bound to please the recipient. For great rabbit, and at the low cost present an unmatched value. Every factory profit assured. Shipping weight 11 lbs

No. 7C/154TS Complete Set $14.60
(In Lots of Three Sets) Per Set 13.35

WHITE CROSS ELECTRIC TOASTER

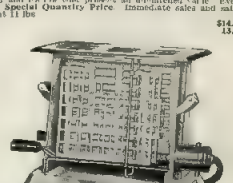
Here is an economical thoroughly dependable, medium priced electric toaster. It takes two full slices of bread without trimming and toasts evenly and quickly. Watts 300. Amps. 4.5, weight 5 lbs. Finished in heavy nickel plate complete with standard length heavy cord and two-piece plug. Packed one to a carton

No. 7C280 Each $5.70
(In lots of three) Each 5.35

WHITE CROSS ELECTRIC WAFFLE IRON

We offer this excellent table requisite to meet the demand for a dependable popular priced electric waffle iron. It is beautifully designed, easily operated and is finished in matching nickel plate. Bakes the most golden brown waffles, both sides at once — more and faster and more perfectly than the ordinary iron or toaster. The grid proper is 7 inches in diameter and is fitted in hinge and over-swinging pure aluminum grids of which many users claim is perfect batter. No grease required with these grids. Smoke and odor are entirely eliminated. Weight 5½ pounds. Complete with standard length cord and two-piece plug. A wonderful value.

No. 7C186 Each $12.85
(In lots of three) Each 11.75



WHITE CROSS ELECTRIC REVERSIBLE TOASTER

This beautifully designed REVERSIBLE toaster, which conforms with the trend of table appointments is especially priced to be a portant selling. The two reversible meeting bars, one at each side, turn the toast quickly and evenly without handling. No sparing or matches to get out of order. Toasts two slices large slices of bread at the same time. Ventilated top keeps surplus heat warm, crisp and delicious. Contains chrome nickel heating element. Tampered, Pure fabricated switch. Highly polished nickel finish complete with cord and two-piece plug. Packed in neat carton printed in color. Shipping weight, 3 pounds.

No. 7C229 Each $7.80

The Famous WHITE CROSS Electric Urn and Percolator Sets

This showing represents virtually the best product on the market in the popular priced field. Dollar for Dollar value nothing surpasses this famous WHITE CROSS line. For expert workmanship, careful finish, service and complete satisfaction, this product is in a class by itself. For Wedding, Birthday, Christmas or Anniversary Gifts, in which value seeking is primarily the main object, they immensely please donor and recipient alike.

GIFTS OF UTILITY

Below we illustrate and quote the NEW WHITE-CROSS COLD WATER TYPE URN AND PERCOLATOR SETS "WHICH MAKE BETTER COFFEE"

The glass pump in these coffee urn or percolators and automatically regulates the correct amount of boiling water and it all drips through the coffee in the basket, extracting every bit of the flavor and fragrance from the bean, as essential in making the best coffee.

The body color of the copper masterfully finished to a sparkling polished nickel, with matched sugars and creamers, which are of a featured, gold lined type. The insulated handles are always cool. All parts are assessable and very easily cleaned.

The WHITE-CROSS sets portrayed below are distinctly new this season. They are symmetrically designed, tall and graceful, and finished to the exacting "WHITE-CROSS" specifications and offered at exceptionally low prices, which comparison will reveal.

WHITE CROSS FOUR PIECE GRECIAN URN SET
Cold Water Type

We take pride in presenting to you the new addition to the White-Cross family. Its attractiveness as a set of service pieces needs no comment. Its positive satisfaction, value with price, in forming an ideal set with Electric Percolator known as client's appliances. Made of heavy copper and finished in polished nickel with sugar and cream pitcher gold lined. The Urn with cover measures 15 inches high, tray with bail feet is 16½ inches long, height of sugar and creamer 4 inches, weight in the tray will be 10 pounds, pleased to present your home with one of these attractive sets at a modest price, one which is a cherished Birthday or Wedding gift.

WHITE CROSS ALUMINUM ELECTRIC PERCOLATOR SET—Hot Water Type

This Electric Percolator Set is made of heavy pure aluminum without seams, welds or rivets in bottom of pot. Have spray top fountain or pump, metallically sealed nichrome, moisture proof element. Furnished complete with standard length, asbestos covered heater cord with two-piece attachment and regular connecting plug.

FOUR PIECE ELECTRIC PERCOLATOR BUFFET SET

This set of distinctive, attractive water fountain type percolator set and the water heater on the coffee urn is the best coffee we have ever tasted. Here the water is boiled over the coffee grounds in the better percolator, hence quicker.

Finished, pots of 8 cup capacity, in the popular style, exquisite appearance of utility combined with beauty. Pots are of aluminum with heavy walls, welds, rivets or seams in bottom of pot. Equipped with the new patented spray top fountain or pump, thus the desirable WHITE CROSS metallically sealed Nichrome moisture-proof heating element as designed for the electric percolators. This element is guaranteed for two years. Height metal will not fail as in ordinary percolators. This element is guaranteed for two years. Height 12 inches, furnished with standard length cord with detachable two-piece plug. The 12½-inch size also has cord, and the larger cord results in keeping with designs of percolator, complete with plug, and four piece set.

No. 7C241TS	Complete Four Piece Electric Percolator Buffet Set, per set	$9.80
No. 7C241	Percolator only each	8.15

WHITE CROSS COPPER NICKEL PLATED ELECTRIC PERCOLATOR SETS
Hot Water Type

Like all famous "White Cross" Hot Water Type, Percolators, these newly designed sets, quoted below, are also equipped with New Patented Spray Top Fountain or Pump—a feature which prevents water from hitting glass top and delivers the water hotter on the coffee, thus making better coffee with less coffee, for the hotter the water is delivered on the coffee grounds, the better the extraction is, and quicker. Furnished complete with standard length, asbestos covered heater cord with two-piece attachment and regular connecting plug.

CHOICE OF TWO SIZES OF PERCOLATORS

FOUR PIECE ELECTRIC PERCOLATOR BUFFET SET
Furnished with choice of 6 or 8-Cup Percolators

This range grade set shows above is expertly executed of the very best stock and beautifully finished. Silver plated and hand polished. Tall and graceful design, exclusively made of heavy pure white copper and richly finished in sparkling polished nickel. Set has 6-cup percolator and 8-cup percolator. Tray is 16 inches in length and sugar and cream measure 4 inches high. A set ready for use on any occasion. Gift of utility and beauty. Ideal for Birthday, Christmas or Wedding Gifts.

Horse Cave, Historic Town

AT SOME period back in the pioneer days of the new great Commonwealth of Kentucky, a few brave and sturdy folks pitched their belongings in an attractive little valley nestled at the foot of scenic and protecting hills and began building a new community in the richer portion of Hart County, south of Green River. Success and progress later brought this chosen location a United States Post Office and it was called Horse Cave. Subsequently, as the years passed, by an Act of the Legislature the name was changed to "Caverna".

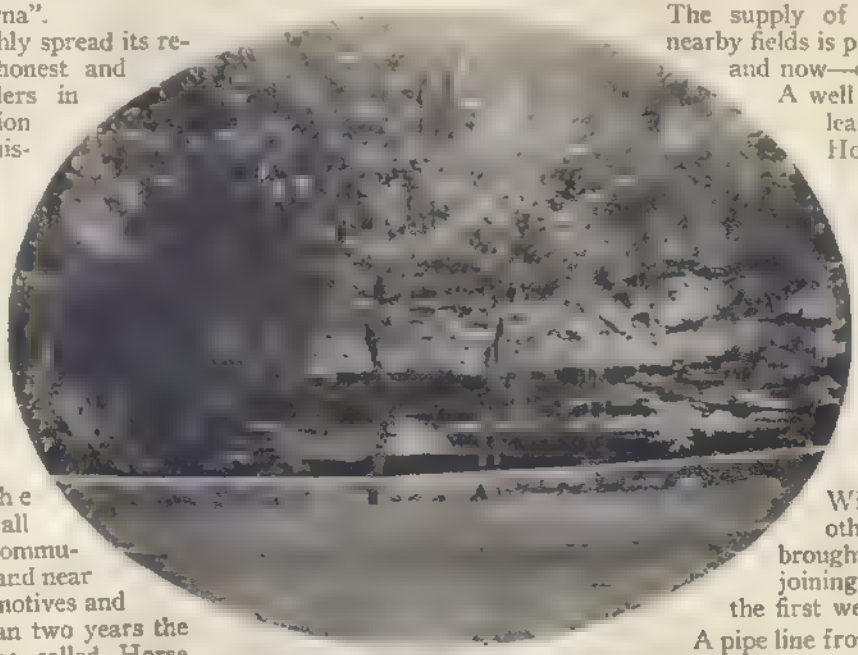
As prosperity richly spread its reward among the honest and happy home builders in and about the region of Caverna, the Louisville & Nashville Railroad Company, during the year of 1859, fortunately favored the little village by locating one of their depots therein as the line was constructed from Louisville to Nashville. The early citizenry of all the surrounding community came from far and near to see the first locomotives and cars. For more than two years the railroad station was called Horse Cave and the post office called Caverna. Finally the post office changed back to Horse Cave.

Business and commercial activities started with a most substantial foundation and volume and has continued throughout all of these years. There never was a spasmodic boom connected with the growth of this promising town but its rise has been adequate and gradual always. The production of fine Burley tobacco, and the raising and marketing of livestock engaged the attention of a large region of the back country up to and through the Civil War. South Hart County, Barren, Green, Metcalf, Cumberland and Monroe for many years reached railroad connection at Horse Cave.

For a number of years Horse Cave was the second largest shipping point on the L. & N.

During the time following the Civil War there has been a marvelous change in customs, methods and comforts of the inhabitants.

Horse Cave is now a city of the fifth class, boasting of 1,500 population, and has the advantage of being near such centers of industry as Louisville, Nashville and Lexington. Industries within the town include several modern tobacco markets selling nine to ten million pounds of fine Burley per year, a number of banks, hotels, wholesale houses, poultry packing house, flour mill, ice cream factory, bottling plant, newspaper plant, a large antique exchange, Stoll and Standard Oil distributing stations and a syrup factory. In addition there are adequate and modern stores, garages, sound pictures, etc., ample electric light and power and natural gas supply.



The entrance to Hidden River Cave in the heart of the town of Horse Cave, Ky. In front of the entrance is a tennis court, sixty feet below the surface of the street.

An efficient fire department, handsome churches, first class schools and a healthy civic pride are dominant factors in the progressive building of citizenship in Horse Cave and Hart County. The mayor, city council and health board all co-operate for the benefit of the entire population.

One of the unique features of the town is Hidden River Cave which is located right in the heart of the business section, with the entrance sixty feet below the surface of the street.

One can hardly write of Horse Cave without mentioning its natural resources. Of timber there are available such popular woods as poplar, oak, walnut and cedar. In the mineral field the section abounds in limestone suitable for chemical and construction purposes. Marl, which is used principally in fertilization, and clay for making brick, pottery and tile, are found in abundance. Onyx is also found and there is an available supply of kaolin. The supply of natural gas from nearby fields is practically unlimited, and now—oil has been struck! A well was drilled in on a lease six miles east of Horse Cave on September 25 and it turned out to be a gusher producing about a thousand barrels per day. Immediately leases were bought up in the surrounding territory and many other wells started Within a week another gusher had been brought in on a farm adjoining the one on which the first well was located.

A pipe line from the field to Horse Cave has been put into operation and tank cars are being loaded and shipped with unceasing regularity. The Missouri-Kansas Pipe Line Company and the Consolidated Gas Company have already completed the laying of their lines to furnish gas from the big Center gas field to Horse Cave, Bowling Green, Russellville, Henderson and St. Louis where it connects with their Western main line running to Chicago. Right-of-way is being obtained to pipe gas to Louisville also.

With this new development Horse Cave feels justified in believing that it is destined to be a city of several thousand population within the next few years. This belief is further bolstered by the expected establishment of Mammoth Cave National Park, the boundary of which, as at present designated, will be not more than five miles west of the city limits of Horse Cave, and with the

Sees Rapid Growth Ahead

These are the first tanks being filled by the first oil well on the McKinney lease, six miles east of Horse Cave

probability that it will ultimately be brought to within one or two miles.

At this time the town is teeming with activity in preparation of its potential growth. Many new enterprises are being fostered and buildings are rapidly being pushed to completion. The new Hotel Owens a three-story fireproof structure with comforts and conveniences that would make it a credit to a city many times larger than Horse Cave, is expected to be ready for occupancy before these lines are published. A new $15,000 theatre, equipped for the best in talking pictures, is under way and will be completed to afford entertainment to tourists and farmers this winter. The building, which will be one of the handsomest in the city, will also be the headquarters of several local fraternal lodges.

A new loose leaf warehouse, with a capacity of 2,000 baskets, is rapidly shaping itself for next season's sales. This will make six sales floors with a combined floor space said to exceed 200,000 square feet in the town equipped to accommodate 8,500 baskets of tobacco at one continuous sale.

Last season the Horse Cave market sold more than 9,000,000 pounds of Burley at an average of $23.02 and had one of the best regulated markets in the state. For the coming season a fifteen-million-pound market is the slogan.

A number of other buildings are in various stages of construction, showing that the people of Horse Cave are fully alive to the opportunity for development of the city. In this they are backed up by the Chamber of Commerce, an active organization which functions in a progressive co-operative leadership for the betterment of Horse Cave.

The State Highway Commission has announced that at its next meeting advertising will be made for the new road connecting the Jackson and Dixie Highways. It is said that this will be a Federal aid road, either of concrete or asphalt, with a thirty-six foot tread and it promises to be an aid in securing an East and West highway from Cumberland Falls to Mammoth Cave National Park, with an entrance at or near the city limits of Horse Cave.

Sensing the rapid growth ahead of the town, the city council has recently sold a franchise for an enlarged water supply system which will furnish adequate water for a city of twenty or thirty thousand people.

This may be a year of depression but for Horse Cave it is a time of expansion. And Horse Cave is fully confident that its boom is founded on enduring facts, not glistening bubbles that are doomed to burst in midair.

MAIN STREET, HORSE CAVE, KY.

PIECES OF 8

Trade Mark Registered

IN THE TREASURE CHEST

So eminently sound has the "Pieces of 8" idea proved, that leading merchants have adopted it in other lines of merchandise—table linens, china and glassware

"More than six" and "less than twelve"

Modeled after an old Spanish Chest that gave service in the brave days of galleons and conquests—gorgeous antique green and gold, heavily banded and studded, and lined with velvet the color of the sea

Mobile, The City of Azaleas

By JAMES W. JONES
Washington, D. C.

YOU have all heard of the wonderful azalea garden at Charleston, South Carolina, and various other collections of those wonderful plants, but you are now to hear of a city of azaleas.

Fortunate are those travelers who arrive at the Alabama seaport of Mobile during the period when the Azalea Trail is marked with the flame of its innumerable blossoms. Should you not care much for flowers you will say like the World War veteran on his return, "I would not care to go through it again but I would not have missed seeing what I did for a million dollars."

The azaleas in fact, adopted the city of Mobile. Like the English sparrow and the starling, it liked its new home and thrived. But unlike those pestiferous birds, it proved to be a valuable addition, hence the suggestion was made and propaganda urged that an azalea trail be mapped and marked, that many new plantings be made and that the title of Azalea City be both earned and conferred.

This plan was accepted and carried out by the Mobile Junior Chamber of Commerce with such zeal that by blossom time in 1929, more than 4,000 plants had been added and the City Commission had appropriated the necessary funds to blaze the trail with permanent markers. These steel arrows, painted red on a white background and mounted upon blue steel posts seven feet high, mark each turn of the trail, which so winds along the live oak embowered streets as to lead the traveler within view of the most important plantings and many of the new ones, with many Camelia Japonicas, less riotous and more formal, exotics growing between, interlaced with fragrant spirals of wisteria, the latter blooming before the azalea blossoms depart, with a background of Magnolia Grandiflora.

On Washington's Birthday each year Mobile begins to don these garlands of red, white, near blues, rose, pink, purple and every shade of the rainbow except yellow, with shades and tints between that are too delicate to bear the weight of a distinctive color name.

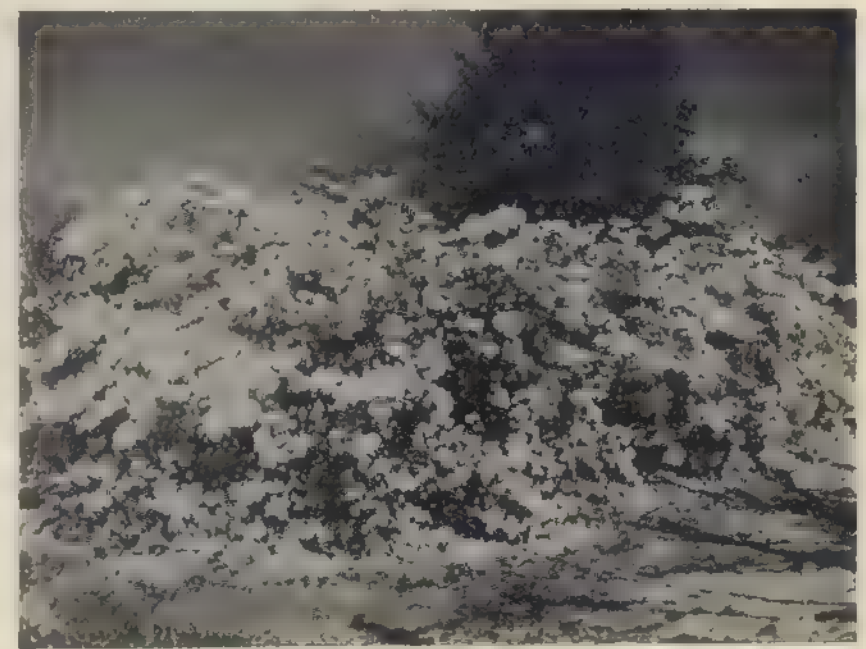
The Mobile Chamber of Commerce has prepared and printed a description of the route, including a map showing where the more important and interesting points are to be found, as well as azalea plantings.

Mobile's oldest azaleas are known to be nearly or quite one hundred years old. Some of these were probably brought from Middleton or Magnolia Gardens near Charleston, South Carolina, where it is recorded that the first Chinese azaleas in this country were planted in the year 1785. Many of the American pioneers who settled in and around Mobile on the heels of the French, Spanish and English Colonial occupants, were from the Carolinas and contact with that coast was maintained by land and sea, so it is more than probable that some of the Mobile plants, though certainly not all of them, could be traced to the celebrated Middleton Gardens beside the Ashley River.

Many of the older Mobile azaleas can be traced to Langdon, 29 miles north of Mobile, where Colonel C. C. Langdon, naturalist, world traveler and once Alabama's Secretary of State, made his home in 1853 and devoted his time for many years to the collection, planting and cultivation of trees, shrubs and flowers from all parts of the world. His collection included azaleas from China, India and possibly varieties from the Kingdom of Japan. This plantation, the grounds of which have been preserved in their natural wild beauty and grandeur, is now the property of Sam Houston Lackland, of Mobile, a lover of trees and flowers, and it was he who first suggested and vigorously urged the movement which brought into existence the Azalea Trail.

Mr. Lackland is responsible for the statement that there are at least two hundred varieties of azaleas in and around Mobile. The bushes, extremely floriferous in this region, begin to flower during their first year in the open. The blooming season, which begins in Mobile three weeks to a month earlier than on the Carolina coast, always includes Mardi Gras Carnival period, celebrated annually at Mobile with elaborate parades, masking and mystic society balls. Last year Mobile's Azalea Trail was officially opened for the season at 4:30 p. m., February 27.

Gathering in Bienville Square, interested citizens and visitors listened to the ceremonies and a speech by the Mayor. Officials of the U. S. S. Detroit took part in the ceremonies and in the motorcade traversing the route of the trail which led to Spring Hill College, five or six miles from the starting point and



Azaleas with a background of magnolia trees at Mobile. A mere black and white reproduction gives small hint of the riot of color and beauty in this scene.

back by another route. Several private estates were visited along the route, among them the Fields, McClure, McGowion, Bellingrath and Patterson estates, and the Blacksher Block on Government Street. Since 1929 there have been at least 20,000 azaleas planted within the limits of the Azalea Trail.

Mobile is proud of her history, her romances, her mystic societies, her flowers, her state docks and her growing commercial importance; and if you happen to be there during Mardi Gras, when the Azalea Trail is officially opened for 1931, you will find that she is also proud of her hospitality.

Good Foremanship

By N. L. DUNNING

Inspector of Safety, Evansville, Ind.

THE morning of January 8, 1931, was cloudy and hazy, the thermometer stood at 20 above zero and old "Mother Nature" had blanketed the ground with an inch of snow during the night. The putt-putt-putt of motor cars broke the stillness of the early morning at Mannington, Ky., on the Henderson Division. Section gangs were arriving to lay new steel just south of Mannington.

Extra gang foreman Chas. Southard and section foremen, C. B. McIntosh, Tom Teague and Raleigh Choate with their gangs gathered around the section tool house. Supervisor Thos. (Cap) Hammond walked up to the gangs rubbing his hands together in his usual manner, and with a cheery, "Good morning," he started giving instructions to the section foremen, regarding the laying of the new steel. The most rigid instruction given by him was, "Boys it's a bad morning and we don't want to hurt anybody. Watch your step and be careful."

The preparatory work was started. Train No. 95, "The Dixie Flyer," passed at 8:10 a. m., and then the work started in earnest. The west rail was cut loose and was shoved over in the clear and the extra gang walked to the first new rail to be laid. The rail was to be handled by hand with tongs. Extra gang foreman Chas. Southard walked up in front of the 18 men standing by the new rail. He addressed the men with these words. "Boys, we are ready to start, and I am going to give some instructions. The first thing, I am going to do the calling myself, as it is a bad morning, and I don't want anybody to get hurt. Keep your mind on your business and pay attention to me. Do what I tell you to do, and don't try to do any more. If anybody feels like they have not got a good foot hold, and are liable to slip, holler before I make the call, and not afterwards. Now let's go."

"Dogs on," and the rail tongs were applied on the rail. *"Set 'em up in the north,"* and the north end of the rail moved up towards the edge of the ties. *"Set 'em up all along,"* and the rail moved closer to the edge of the ties. *"Headline,"* and the rail was placed on the top of the ties. *"Bed time,"* and the rail was placed in line. *"Joint back,"* and the rail was pulled back against the joint, and the first new rail was laid.

The calls given by Foreman Southard were clear, loud, and distinct. There was little or no chance of a man failing to hear or misunderstanding the call. The men handling the rail were on the alert. There was no talking or boisterousness in this gang. The 18 men moved as one man, and not in a single instance was there a slip or a near accident. These men were handling rail safely, and were heeding the safety instructions given to them by their foreman.

The three-quarter mile stretch of rail was laid without a scratch, and the conditions were bad, as the ground was slick, and covered with snow. Whole hearted safety spirit in the work by the foreman and the men avoided the chance of an accident.

Foreman Southard has served in the capacity of section foreman, and extra gang foreman for *twenty-one years.* He has had three reportable injuries to men in his gang in that period of time. In the past *eight* years there has been one injury in his gang. He says that he has always guarded against accidents and believes that with the proper supervision on the part of the foreman a majority of all accidents can be avoided. He will not permit swearing or practical joking in his gang, as he believes that it causes arguments and sometimes results in a fight, and above all it keeps the minds of the men off of their work, and opens a loop hole for an accident. Good foremanship means good Safety Records.

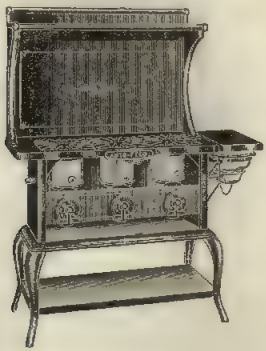
Extra Gang Foreman Chas. Southard instructing his men on safety just before going to work.

AUTO-FEED OIL STOVE



The Auto-Feed is a thoroughly safe practical, wickless, leakless, oil stove. These stoves are handsome in appearance, steel frame construction, finished in black and gray; grates are large, square type, providing maximum cooking surface. Burners are genuine brass made from one piece, rustless and so constructed as to give an intensely hot fire with a minimum of fuel.

NO.	Burners	Hgt.	Top	Wt. Each	EACH
921	2	30¼ in.	25½x17½ in.	67 lb.	$18.60
931	3	30¼ in.	35x17½ in.	80 lb.	$23.60
941	4	30¼ in.	43½x17½ in.	93 lb.	$30.00

Splashers are gray. Extreme height with shelf, 53¼ inches; cooking height 30¾ inches.

NO.	Burners	Top	Wt. Each	EACH
921S	2	25½x17½ in.	87 lb.	$24.60
931S	3	35 x17½ in.	117 lb.	30.85
941S	4	43½x17½ in.	125 lb.	39.00

Pandora Picture Puzzles

The Line "Beautiful"

The colors are gorgeous; the pictures are original and will be found nowhere else except in the PANDORA LINE.

The subjects include our artists' own interpretations of popular nursery and fairy-tale favorites, and several new creations of likeable children's characters.

The PANDORA LINE embodies the best in Picture Puzzles.

An exceptional feature is that all puzzles are wrapped in pure white cellophane which insures the true portrayal of their wonderful coloring, thereby eliminating the necessity of handling by the customer.

The Puzzles are lithographed in five colors, varnished, mounted on heavy cardboard and cut in large pieces, each puzzle being lined on the back with an individual color.

No. 503—Pandora Box of Puzzles

Subjects: Four

A) Froggie Went A-wooing; B) The Owl and Pussy Cat.
C) Four Fuzzy Puppies; D) Four Wuzzy Kittens

Puzzle Size: 9 x 6¼ inches Box Size: 12¾ x 9¼ inches

Description: Varnished original prints, cut in large pieces, wrapped in cellophane, sealed to heavy baseboard

Packed ½ dozen . . . . . **Retails 50c**

THE BIG THREE
IN THE TOY WORLD

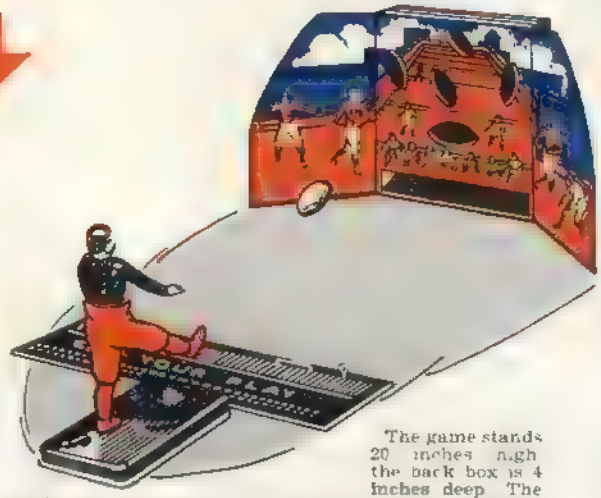
Woolsey's Football Game

Woolsey's Football—the great indoor game for outdoor people. Everything indicates that this intensely fascinating game will be the outstanding selling sensation of the year. It teems with the action of a real game—it has the same element of chance, the same opportunities for thrills that pack millions of sport lovers into the university stadiums every year.

Press the lever and the kicker kicks the ball into the hole or out—a gain or a loss, according to your skill. For there is skill to this game. The tee is moveable and the ball can be placed for high or low kicks. Veteran toy buyers are keen for Woolsey's Football. The kids aren't the only ones that like this game. The grown-ups take to it, too.

Here's action skill and chance And a set-up with a flash that will win many, many sales.



The game stands 20 inches high the back box is 4 inches deep The playing surface is 18 inches wide—the wings 14 inches wide The player is made of cast iron and steel construction, stands 7 inches high on an 8-inch base. The game is beautifully finished in full colors The player is colorful and modeled faithfully Packed complete in shipping carton Play it and convince yourself that this is going to be a big seller during the football season Send sample order today

RING · A · NOSE!

Flip the ring over his nose—he makes outlandish faces he wiggles his eyes and ears, and he shows his teeth. But there's more to Ring-A-Nose than funny faces it's a game to see who can ring his nose most often. You'll say it's the best popular priced number you ever featured.

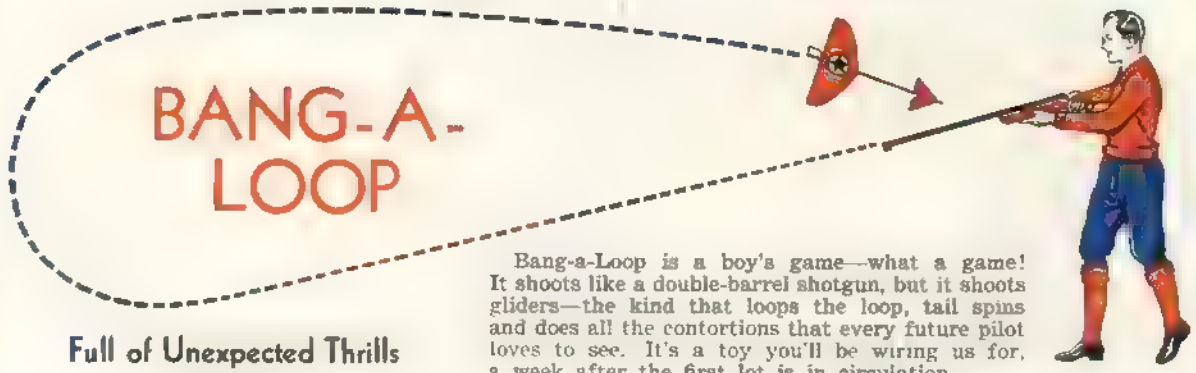
IT LOOPS ◆ IT GLIDES
TAIL SPINS

BANG-A-LOOP



Bang-a-Loop is a boy's game—what a game! It shoots like a double-barrel shotgun, but it shoots gliders—the kind that loops the loop, tail spins and does all the contortions that every future pilot loves to see. It's a toy you'll be wiring us for, a week after the first lot is in circulation.

PAT PEND

The CARLTON AUTOMATIC

TRADE MARK

SNAP THE LEVER – THERE'S YOUR LIGHT

From the first flame you will be pleased with the Carlton Automatic Lighter. It has fewer working parts and will not get out of order. No flint adjustment is necessary. The Carlton operates with one simple motion of the thumb—no wheels to turn or soil the fingers. The Carlton's sure as fate. Aside from being sure-fire a Carlton is smart in appearance. It is the thinnest lighter made. Both of these are sufficient reasons for Carlton's popularity with both men and women.

THIN
does not bulge the pocket

FIRE PROOF SAFES

COLUMBIAN

Steel body plates, angles, door jambs and frames. The steel angles at front and back are welded at corners and surrounded by hoop like bands of steel which give them the arched strength to support tremenduous loads. Tongue and groove on door furnish close contact around door frame and insulating material, conforming in shape to the extensions and depressions excluding the entry of flame. The density of fire-proof composition in walls and doors is unvarying, maintaining its fire resisting, properties indefinitely. Fitted with an armored combination lock reinforced by a drill proof steel plate between door plate, lock and bolt mechanism. The lock has many thousand changes and tumblers numbered so that any one may select their own combination. Black enameled dials with white numerals.

Finish—All safes except Nos. 100 and 125 finished in olive green baked enamel finish.

Locks—All safes equipped with 4 tumbler combination locks.

Black enameled finish with gold striping. Heavy wall pattern, for household use. Featuring a separate handle and dial operating through one hole in door. contains book space, knob drawer and pigeon hole that extends full depth of safe. Two nickel plated flat steel keys.

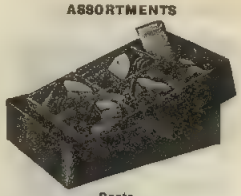
ASSORTMENTS



Parts

The cost of handling orders for repair parts is usually more than the profit if they are only ordered by the individual items as needed. Usually a certain amount is lost if carried in bulk. The assortment includes only parts having largest sale. The carton is of cardboard with compartments for each size and measures 4½x6½x1½ inches. The cost of the parts are regular dealers' prices. No charge for carton.

— EVANS —
NEW ROLLER BEARING ACTION

Lighter Magic is achieved in the New Evans—the magic of modern mechanical perfection.

Cross Lever, Roller Bearing Action is a new principle in lighter building - exclusively Evans. It means smoother action, wider clearance between snuffer and wick, an almost complete revolution of the sparking wheel that spurts a veritable shower of sparks to insure ignition—not at one, but at several points in the revolution of the wheel, from just one pressure of the thumb. The removable wick holder is a unique convenience and all steel parts are specially hardened to assure long wear.

ITS STYLE NEVER FAILS TO REGISTER—

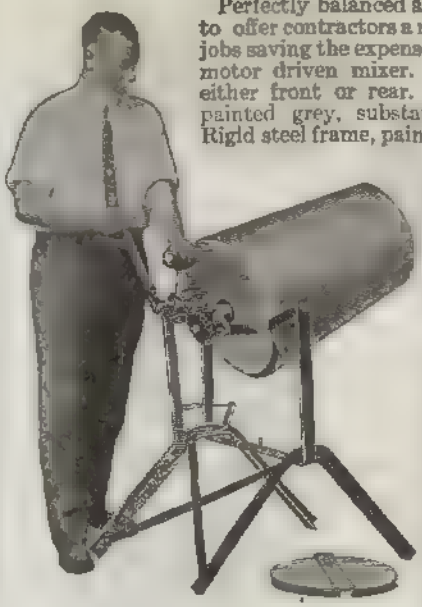
✚Safety Fuse—F. O. B. Connecticut Factory Only.
✚Blasting Paper—F. O. B. Ohio Factory Only.

CONCRETE MIXERS

ONE-MAN



Perfectly balanced and geared. Designed to offer contractors a mixer for use on small jobs saving the expense of operating a large motor driven mixer. Can be loaded from either front or rear. 16 gauge steel drum, painted grey, substantial cast iron base. Rigid steel frame, painted red. Constructed so that every part screws up to a shoulder thus giving strength and taking up lost motion. Two steel blades fastened on inside of drum facilitate mixing.

Can be used for mixing poultry and stock feed, fertilizer, etc., also for treating seed wheat, oats, barley, for smut, blight and other diseases and inoculating seeds like alfalfa, soy beans, clover, etc. 1½ cu. ft. Enough concrete to build 1 ft. of side walk 4 ft. wide and 4 ins thick with each batch

	Each
No. 0M-1—Wt each 125 lbs	$73 50

K. D. Packed loose.

JUMBO

18 gauge steel drum with grey iron casting and base, mounted on well braced angle iron frame, painted battleship grey. Made with 2 reversible stops on handle to permit holding drum at proper angle while loading and mixing also reverses mixer so that it may be loaded from either side to suit the convenience of operator. Designed to meet the requirements of the farmer or contractor who already has 1 H. P. or larger power equipment.

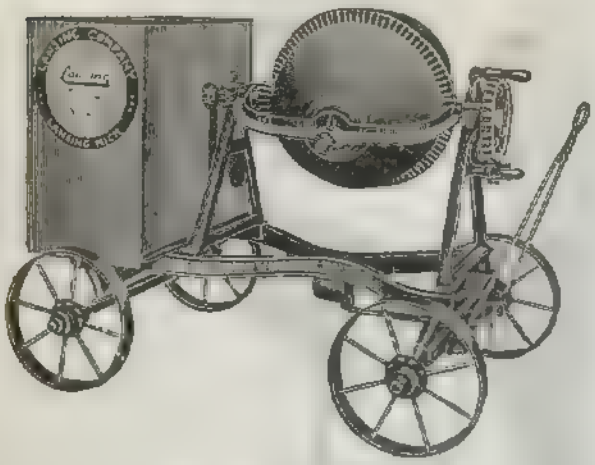
	Each
No. 2N—Capacity drum 2½ cu ft; diam pulley 12 ins, 3 in. face; loading height of drum 48 ins, discharge 24 ins	✚$73 50

K. D. packed loose; shipping wt each 270 lbs.

✚F. O. B. Michigan Factory Only.

CONCRETE MIXERS

LANSING, BRONCHO JR.



8 inch channel steel frame. A popular mixer that can be easily moved from one job to another. Large drum mounted on ball bearings. Suitable for mixing common concrete, cinder concrete, top dressing cement or lime mortar.

The three mixing wings are raised from the surface of the drum, doing away with the sharp angles that would catch concrete. A pail of water at the end of the day cleans the mixer. 20 inch wheels with 2½ inch tread.

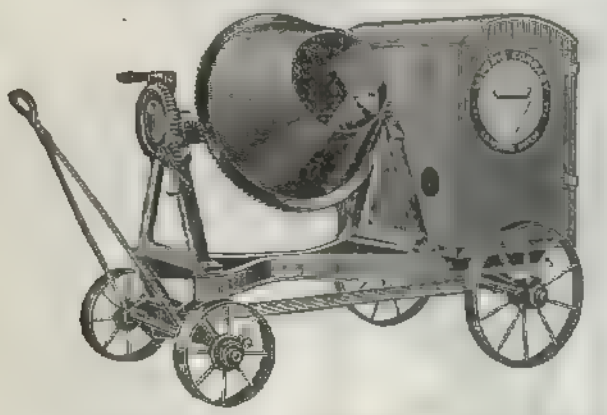
A 1½ H. P. engine, magneto and draw pole or tongue is included with each mixer.

For Data see opposite column.

Each

No. 3BJM—Wt each about 1170 lbs..... +$510 00

LANSING, BRONCHO SPECIAL



4 inch channel steel frame. The Broncho Special is a popular mixer which can easily be moved about from one job to another. It is a general utility machine and suitable for mixing common concrete, cinder concrete, top dressing or cement or lime mortar. The cost of operation is very small.

The engine and all sprockets and chain are completely housed in steel. 24 inch steel wheel with 3 inch tread. With every mixer is included a 2½ H. P. engine, steel housing and draw pole.

For Data see opposite column.

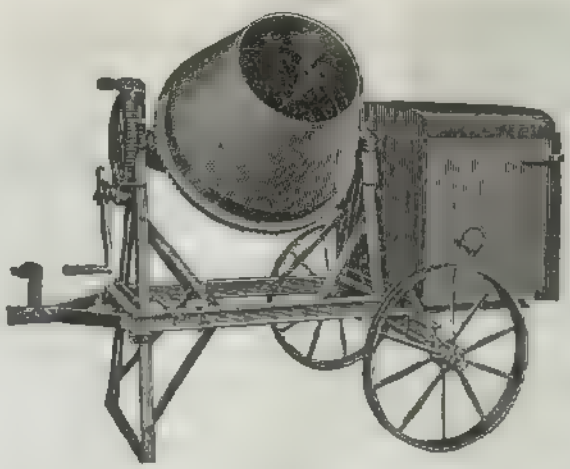
Each

No. 4B—Wt each about 1650 lbs..... +$750 00

+F. O. B. Michigan Factory Only.

CONCRETE MIXERS ON TRAILERS

JUMBO



(No. 3½S)

A popular model 3½ foot concrete mixer designed for hitching to auto or truck for speedy transfer from one job to another.

Heavy cast iron drum base, drum cone is of heavy boiler plate steel with heavy band to reinforce its lip, fitted with four wide mixing blades, two long and two short, carefully designed to give a slicing, turning and throwing action, insuring a thorough and the most rapid mix possible, drum may be tilted to any desired angle while mixing.

2 H. P. engine mounted on iron sub-base, gasoline tank cast in base, capacity 2 gallon. Engine enclosed in sheet metal housing, equipped with door. Mixer, chain and sprocket driven.

Capacity of drum, dry materials 5 cubic feet, wet mixed concrete 3½ cubic feet, diameter drum, inside 31 inches; depth 27½ inches; diameter of opening 18½ inches; shovel height 44 inches; discharge height 25½ inches; drive shaft 165 R. P. M.; speed of drum 17 to 18 R. P. M; length over all 90 inches; width over all 54 inches; height over all 69 inches; 3 inch channel steel frame.

Each

No. 3½C—Two wheels with rubber cushion tires size 30x3½ ins; wt each 1150 lbs..... +$498 00

No. 3½FS—Four steel wheels, wheel thread 44 ins; wt each 1250 lbs..... + 480 00

No. 3½S—With two steel tired wheels, size 28x3 ins; wt each 1125 lbs..... + 456 00

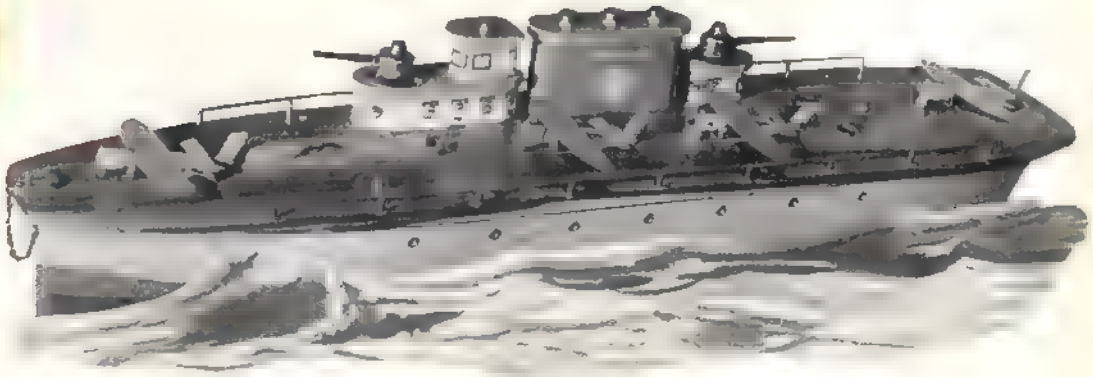
Liberty Playthings

IDEAL TO FEATURE FOR BIG SUMMER SALES



Model No. 60 AIRPLANE CARRIER...Catapults flying planes from its deck. Two husky motors and twin screws. A realistic reproduction. All wood, non-crushable hull. Length 27 inches.

Model No. 22 LIBERTY SEAPLANE. A different water toy which recognizes the prevalent craze for aircraft. Driven by air-propellers and double motors. New brake locks motors while winding. One of the big sellers of the year. Wing spread, 22 inches.

Model No. 30 DESTROYER. Drop one of the four torpedoes in the tube of this low, racy destroyer, touch a lever, and swish...another enemy goes to the bottom. This irresistible action feature, coupled with rugged realism, power and speed, makes boys' fingers itch. All wood hull, and colors that sell. Length 25 inches.

Summer time is Playboat time! Millions of children hear the call of the water. Every pond becomes an ocean. Every stream is dotted with miniature navies. Every real boy becomes boat-minded. What greater opportunity to boost toy department sales? And what better line to feature than Liberty Playboats for 1930—the boat hit of the New York and Chicago Toy Fairs?

They're crowded with irresistible action features—these new Liberty Playboats. Colors have been scientifically chosen for greatest juvenile appeal. Every model is a faithful reproduction—husky, powerful and fast. Torpedoes shoot from the destroyer's prow. Fighting planes are catapulted from the airplane carrier. Streams of water are thrown by the fire-boat. No red-blooded boy can resist their appeal!

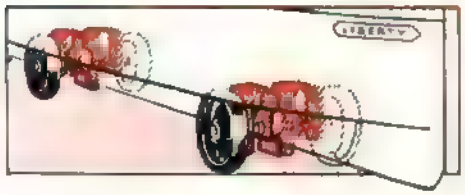
Get in a stock of these realistic toys at your earliest opportunity. Every model, except seaplanes and small numbers, is equipped with removable undercarriage and wheels. Feature them for summer sales! Have plenty on hand for Xmas. You'll find them real money makers—spring, summer, fall and winter.

See Back Page for other Playboat Models

MORE THAN JUST BOATS

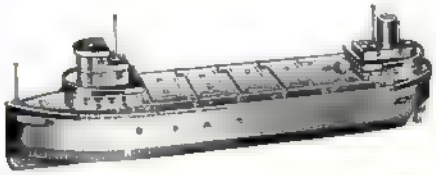
They're year 'round Playthings

with all year 'round SALES



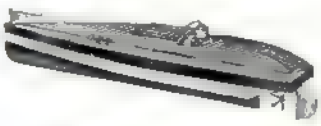
Seasons mean nothing in the sale of Liberty Playboats. A removable undercarriage and wheels is furnished with every boat (except seaplanes and small models) ,instantly transforming them into pull-toys. Snap on and off in a jiffy, equally at home on land or water—on sidewalk or pond indoors or out. This all-season, all-weather usefulness doubles their appeal and assures them of all-year round sale, everywhere, regardless of climate or local conditions

LIBERTY PLAYTHINGS, Inc.
228 10th St., Niagara Falls, N. Y.



Model No. 5 LIBERTY FREIGHTER...A true-to-life representation of the big cargo carriers—hatches, hold and everything. Twin motors and twin propellers give ample power with the heaviest cargo. 27 inches long.

Model No. 7 LIBERTY FIREBOAT. .A real action toy—more thrilling than the old fire engine. Movable nozzle on deck throws big stream of water as far as 25 feet! Equipped with standard Liberty motor. Length 22 inches.

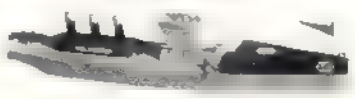


Model No. 1 SPORTSTER...A racy looking, speedy sport model. White enameled wood hull, metal deck. Length 16 inches

Model No. 10 SEA SCOOTER. A brand-new number one of the fastest "sellers" in the line. Dashes about at breath-taking speed. What boy hasn't wished for an outboard sea scooter? And with its big Liberty motor, it's the speediest craft on the water. 14 inches overall

Model No 2 LIBERTY TUG AND SCOW...This husky little work boat looks just like the tugs boys watch at work in the harbor. Its strong Liberty motor enables it to pull a scowful of sand or stones with ease. Both tug and scow, 12 inches long.

Model No 23 LIBERTY SEAPLANE JUNIOR...A smaller companion to the larger Seaplane. A smart, air-driven water toy that's made a hit with every boy who has seen it. Wing spread, 14 inches.



Model 00 PULL TOY DESTROYER.. An inexpensive model for the tiny tots. 16 inches long and brightly colored. Can be used on land or water.

SILVERPLATE

Presenting SILHOUETTE

Wise business experts have pointed out that women influence the purchase of 85% of all commodities. It's 85% on all commodities. Imagine what it must be on extra feminine article like silverware. You can estimate it at 98% and never be accused of the slightest exaggeration.

Therefore SILHOUETTE follows the most feminine slant in the world for its theme — fashion. SILHOUETTE brings in silverware, the same basic Paris inspired lines women demand in frocks, hats, handbags shoes . . . every article of fashion. For certain identical, right, true lines run through all things of beauty and good taste. Clean, stream lines. And these are the lines of fashion, and of SILHOUETTE.

THE NEW SILHOUETTE PATTERN

VIANDE . . the new knife
PATENT APPL. CO FOR

Created by
SAARINEN

The new dinner knife, the Viande, is of special interest. Short blade . . long handle. Enabling one to press one's finger on the handle instead of the blade. It's the logical shape for a knife. However, to please your conservative prospects, we also make the regular conventional dinner and dessert knives in SILHOUETTE thereby giving you the chance to give your customer the choice. We predict that Viande will be the regulation standard knife on tomorrow's tables and it is ready for you today.

The Union Double Acting Steam Pile Hammer

Operated by steam or air without any changes, operates equally well in fixed leaders or suspended from the boom of a derrick or crane. Requires very little head-room and is extremely simple.

This type of modern double-acting, rapid-fire pile hammer delivers a succession of blows so rapidly that each blow falls before the movement caused by it predecessor has ceased; in this way an effect which is practically continuous is obtained, that the pile may be said to be literally pushed into the ground and when the hammer is stopped, the earth grips the pile firmly and holds it securely and penetration is obtained that would be impossible with a drop hammer, while the fact that the blows do not split or broom wood piles or sheeting, gives it an additional advantage.

The small dimensions of these machines admit of their use where head-room is limited.

Another advantage lies in the fact that this hammer may be suspended under any derrick boom or by chain hoist or tackle of any kind as well as in the ordinary pile driver leads.

Principle of Operation

On opening throttle valve, steam or air is admitted to the lower port in cylinder raising the ram to the top of its stroke; the valve being actuated by a rod and rocking lever, then admits steam to the upper port and causes the steam under the piston head to exhaust through the lower port. The full pressure of steam acts on the piston for the entire length of the down stroke, thereby increasing the force of the blow over gravity, in direct proportion to the effective steam pressure acting on the piston. The Hammer is therefore double acting. After throttle valve has been opened, the operation of the hammer is continuous until the supply of steam or air is shut off.

CONSTRUCTION

The frame, or body, is a single semi-steel casting, and not made in sections bolted together. The upper portion contains the cylinder, while the ram guides are cast in the lower half. The ram and valve mechanism also being enclosed in the frame, are protected from injury. The safety buffers and pile plate are also enclosed, so that nothing but the steam inlet is exposed.

The piston and rod are of steel, forged in one piece, and accurately machined, being over-size to secure weight; breakage is impossible.

The Ram is of steel, forged and machined on all surfaces. It has 6 guides which work on machined pads, cast in hammer frame and provided with oil grooves. Since weight is essential, all parts are heavy and of more than ample strength and easily accessible.

The Valve is of the rotative type, of manganese bronze working in a cast iron bushing. All parts are accurately finished to gauge. The rod and lever are made of special steel and hardened.

The Gland is of cast bronze in one piece and is held by four studs with an arrangement to prevent the nuts from working off.

Lifting Piles From Ground

Starting the Drive

The Union Steam Pile Hammer

(Continued)

Lubrication. All hammers are equipped with a patented inlet and lubricator, made of one casting, forming an oil chamber which is packed with absorbent felt to retain the oil. The oil is sucked into the steam passage through a small hole directly over the inlet to the hammer. It cannot run back through the hose and deteriorate the tube. The hose is so connected that it hangs straight down and does not project in front of the hammer to be knocked off in landing piles.

Economy of Steam or Oil is obtained by the design of the valve mechanism and the movement of the valve. The figures for steam consumption given below are very liberal and provide an ample reserve under all conditions.

Base Equipment. Union pile bases, or caps, have been developed which insure the most efficient driving of the various types of piles and sheeting. They hold the piles in perfect alignment, allow a maximum of power in the blow to be transmitted to the pile head, and prevent injury to the pile or to the working parts of the hammer. All hammers have an automatic by-pass in the cylinder so that they cannot be started unless they are landed, or resting, on the pile, and the construction is extremely simple, there being only two bolts in all the moving parts.

Union Hammers for Pulling Piles

By inverting the union hammer it can be used for pulling any kind of pile. Only one change is required on sizes larger than No. 5 and that is to insert a one way valve which provides steam on the up-stroke only. The weight of the ram causes it to fall back automatically. Cut at right shows the improved method of rigging hammer with wire rope bridle and forged steel hammer straps. The ram block and lower bridle block are either forged or cast steel, of ample strength and provide seats for the bridle which prevent the rope from cutting.

The bridle is of one piece high grade flattened steel wire rope, all pins are of mild steel forged and turned. The shackels are of refined iron. The lower bridle is fitted with a clevis for engaging steel sheeting, or chains for round piles or square timbers.

GASOLINE LAMPS

QUICK-LITE

Special Design Opal Shade

This standard model is equipped with a shade which has been especially designed for Quick-Lite Lamps

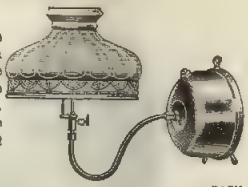
It is ornamental and a splendid value. With this lamp, shade-breakage is reduced to a minimum because the large panel design of the shade and the weight and quality of glassware used produce uniform heat expansion.

One in carton complete with shade, mantles, pump, wrench, hanger, cleaning pick and extra generator.

NO.	lb Each	EACH
C329	10	$11.00

QUICK-LITE BRACKET

The Bracket Lamp is handy in rooms with low ceiling, over the desk, etc. Can also be used as a table lamp. One in a carton, same equipment as No. CQ 329.



NO	Wt. Each	EACH
BQ329	9 lb.	$14.00

QUICK LITE

Decorated Brown and Tan Shade

The regular lamp with fancy instead of plain shade. No. 318 shade has always been a good seller. This shade is decorated in brown and tan tints with delicate green vine and pink wild roses.

One in carton complete with shade, mantles, pump, wrench, hanger, cleaning pick and extra generator.

NO.	lb Each	EACH
C318	10	$12.50

QUICK-LITE

Decorated Mellotone Opal Shade

No. CQ324 Quick-Lite Lamp is the same as No. CQ329, excepting the shade. No. 324 shade is unusually attractive. It is made from beautiful mellotone opal glass, tinted in delicate green. This shade is gracefully designed and gives a wonderfully rich and pleasing light.

One in carton, complete with shade, mantles, pump, wrench, hanger, cleaning pick and extra generator.

NO.	lb Each	EACH
C324	10	$12.50

Coleman

Lights instantly. No preheating required. New instant gas design burner. Equipped with triple-life generator, new automatic gas tip cleaner; new automatic safety air release. Brass fount, crown ribbed embossing; handle of Grecian vase design, equipped with hand operated filler plug and built in air pump. New kremelite shade; 12 inch in diameter made of heat resisting cream-colored opal glass.

Complete with shade, two mantles, wrench and tip pick.

NO.	lb Ea	EACH
116	10½	$12.00

COLEMAN MANTLES

Coleman Mantles are made with a reinforced bottom to resist wear where the pressure is greatest. They are made from Egyptian long fiber thread, highly solutioned with best grades of necessary chemicals. They help the sale of Quick-Lite Lamps and Lanterns by giving the user more light, better light and longer service.

Each gross of Coleman Mantles comes packed in a counter display carton attractively printed in purple and orange. Each dozen mantles are packed in a special paraffined box that keeps them fresh and clean. The dozen size boxes are printed in purple which makes a very attractive color combination with the gross size carton for display purposes on the dealer's counter.

This display carton makes stock keeping easier and increases mantle sales. Regular Quick-Lite users quickly see the advantage of buying their Coleman Mantles by the package.

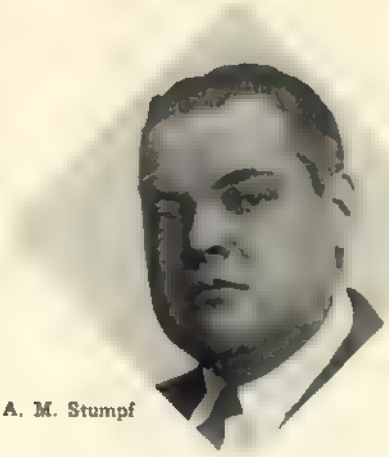
Here's the Inside Track on How to Do a RAILROAD BUSINESS in Toys

The Grand Central Toy Shop Is Located in One of New York's Great Railway Terminals — Where It Never Rains — Yet This Toyman Prays for Rain!

By

A. G. WINKLER



A. M. Stumpf

Here is a toy shop so ideally and unusually located that during every sunshiny working day, year in and year out, 65,000 people pass the door, whereas on every rainy day, that number is almost doubled! Is it any wonder that the proprietor prays for rain?

This is only one of the odd features of this most unusual shop. The proprietor is A. M. Stumpf. His store is the Grand Central Toy Shop, located in one of the busiest arcades in that huge New York Central terminus at 42nd Street and Park Avenue, New York City. This station is one of the busiest spots in the great city and has dozens of passages leading into it from hotels, subways, streets and train platforms. The Toy Shop faces one of the busiest tunnels, a 25 foot passage from one of the subway lines to the station proper. The reason Mr. Stumpf prays for rain is that during bad weather, more people abandon the bus, surface and elevated lines in favor of the subways, and consequently more people pass his door.

There is not a great deal about this successful shop and the system used by Mr. Stumpf that can be applied by other toy shop men. It is decidedly unique in location and operation. But inspiration can surely be drawn from the thoroughness with which Mr. Stumpf has studied his peculiar problems and the careful steps he has taken to overcome them. So long as this type of

industry and intelligence is to be found in the toy business, just that long will real profits be made in it.

The shop itself is quite interesting. The front is 18 feet wide and the depth is 30 feet. Windows of equal size on either side of the front door are 7½ feet square. A basement, the same size as the store, is utilized for storage purposes, and as a greeting card salesroom during proper seasons.

How to Serve the Man in a Hurry

Inside the store, toys are displayed as freely and completely as possible. This is to solve a certain problem. "We find that the people are almost invariably in a hurry," said Mr. Stumpf. "They are either hurrying for a train, or are just off a train, hurrying home. So we have as varied an assortment as possible to show them. Most of those who come in are men. So we stock a lot of games, toys, sets, etc., that appeal particularly to the masculine mind. These are our biggest sellers Few men buy dolls. We try to have lots of boxed stuff, so the packages can be easily slipped into the traveling bag."

Of course, there are other customers who are neither leaving nor coming into town, but the bulk of the business is done with people who are traveling and particularly with traveling salesmen. "I sometimes think that salesmen's children are the luckiest youngsters in the country," said Mr. Stumpf, smiling. "Invariably, when their father is away, he takes them home a toy. If he has a good week he generally buys a more expensive toy. If business has been poor, his purchase is smaller. But he *always* buys *something*. I have many steady customers among the traveling men and also the commuters who come through the station."

How to Make Every Inch Count

To facilitate quick selections, every available bit of wall space is taken up with shelves. The ceiling is 9 feet high and along every wall the shelves extend from floor to ceiling. There are also two pyramid racks, each with five shelves, 12 feet long and ranging from a 30-inch width at the bottom to six inches at the top. Two glass-covered counters are also used

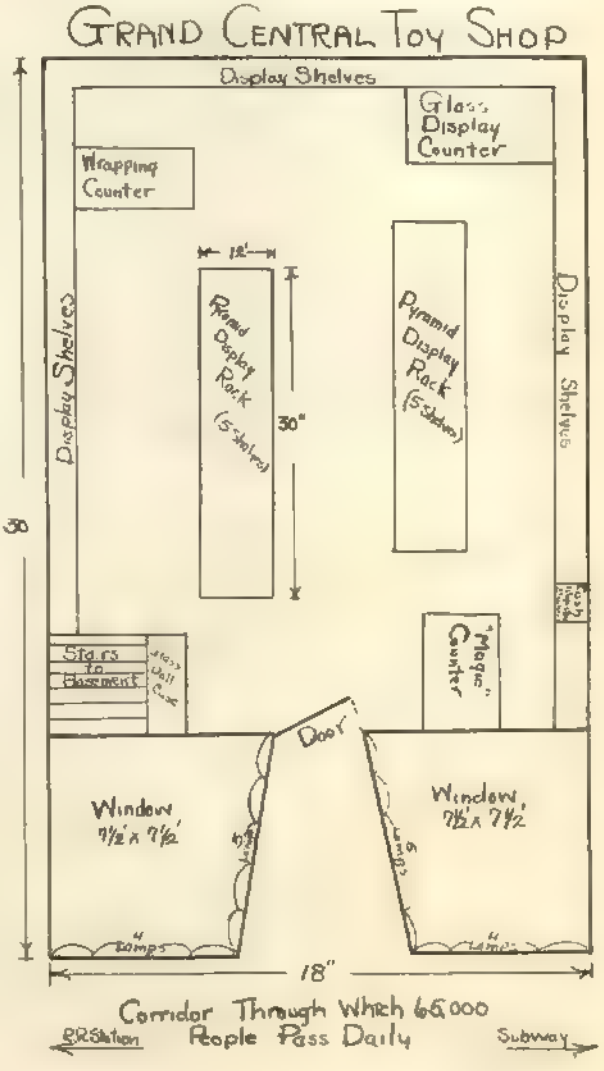
Windows Say, "Stop, Look and Come In!"

Though he knew that 65,000 people were sure to pass his shop every working day, Mr. Stumpf did not sit back and trust to luck. "My problem," he said, "has been to make them stop to look and then come in. We are very careful with our windows, using catchy objects and moving toys whenever possible. Just recently we rearranged the shape of the windows and improved the lighting. The results are very pleasing." The windows are certainly brilliantly illuminated. It is interesting to note that they contain more lamps to light their 100 square feet than are used inside the store. Nine 100-watt lamps are used in each window, whereas but 1350 watts are used in the store proper.

"During the pre-Easter season," Mr Stumpf went on, "we used a very ingenious stuffed toy display in one window, and it brought us a great deal of business. Of course the rainy days just before Easter helped a lot, also. On any rainy day we do twice as much business as on a good-weather day, but those days we did three and four times as much as usual. People from the offices in this neighborhood who could not walk around outside during their lunch hours, came in the station to stroll and we sold many of them. Also, the regular diversion to the subway of others who usually walked outside, or took buses, surface or elevated lines, helped out." This is in direct contrast with other toy departments in New York, most of which suffered from the rains

"Toys Are Trumps—Play Them"

Mr. Stumpf tried all sorts of ideas to get people into the shop. At one time he played music rolls, phonographs, etc. "But they just stood in the door and stared, like average New Yorkers," he lamented. "Now we simply make the window as snappy as possible, leave the door wide open (it is warm in here in the winter)



and put interesting toys inside where they can be seen just before entering."

He has a counter where "magic" sets are sold by Bob Sherman, well known inventor of these sets. He also sells sheet music and greeting cards. But he is at heart a toyman, and that is where his real interest lies

Have You Analyzed Your Business Like This?

He has studied every detail. He knows, for instance, that his business peaks each day are from 8:30 a. m. to 9:30 a. m., from 11:30 a. m. to 2:30 p. m., and from 4:30 p. m to 7 p. m. He keeps his shop open from 8 a. m. to 9 p. m. The last important train leaves the station at 9 p. m., and Mr. Stumpf has proved by experimentation that it does not pay to keep open later than that

Another fact, interesting and important to him and his shop only, is that on Monday, Tuesday and Wednesday the sales average $1 per person. The remaining three days of the week they average $1.25. This is because the salesmen who come into the city to do business are generally leaving during the last few days.

Mr. Stumpf takes his job as a real obligation. He has trained his force to be alert and helpful. He handles good merchandise. He knows that for many of the people who come to his store, it is the "last chance" to buy a toy before boarding a train. And so well has he arranged his store, stock and sales force *that fully 90% of all the people who come into his store actually do make a purchase.*

With such a small store, and a stock which averages between $9000 and $10,000, he does a business of $50,000 a year, which is considerable of an achievement. He could only do it by carefully studying his problems, and by giving the best value possible for the money, even though his location is exceptional. When he buys, he says, he considers the manufacturers behind the toys, and he puts his faith in those he knows through personal contact and advertising. And that is a sound rule for any toy man to follow

REISS Puts the Children ON PARADE

Reiss Mercantile Co Mobile, Alabama, who call themselves "Mobile's Best, Biggest Toyists," are confirmed believers in the annual street parade. They should know, having tried the stunt six times.

The last juvenile vehicle parade was held November 22, 1929, and let Mr. Reiss make his own comments

"Every year the toy parade has been put on it has grown in popularity. Six years ago when we first attempted it we had a large audience. Every year it has grown in volume until last year the streets were as crowded as they are during Mardi Gras. All along the route of march the sidewalks were thronged with cheering spectators, with almost as many adults as youngsters represented.

"As producer of the parade, I naturally come in contact with the children in it. From this I get almost as much pleasure as I do out of Christmas day, for these youngsters get a tremendous kick out of being in the parade. They are widely enthusiastic and it is with great difficulty they are restrained from starting the march before the scheduled time. I really believe they get as many thrills from the event as they do from their own birthday parties."

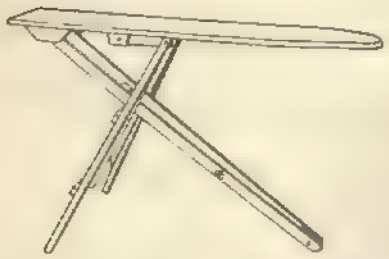
Mothers, grandparents, aunts were prepared to "let the housework go" to bring the children down at 11 o'clock Saturday. Here's what they saw:

First, Santa himself, then 200 of their playmates and fellow juvenile citizens, most of them pushing or riding a toy vehicle and costumed to match their mounts. There was Tom Mix and Tony, Admiral Sea Legs with a dry land battleship, Ima Aviator and his airplane, Mrs. Iva Family and her ten nursemaids wheeling the children in carriages, Chief Killa Fire and his six assistants, who were unable to dampen the enthusiasm of all concerned.

It was by no means a silent parade—hardly. A 40-piece harmonica band, a 20-piece drum corps, plus a 40-piece "kiddies' band" could make the deaf to hear again.

Figure it out for yourself, Mr. Merchant. Innumerable sales possibilities may be opened up by a juvenile

IRONING TABLES



Works on two patent swinging arms which open and close automatically and keep it from collapsing should the top be lifted while the board is in use. The neatest and safest board for the money on the market. No wires to contend with or to stretch when board has been used for a while.

No. 410. Size 13x54 in. Wt. doz. 170 lbs. .....Dozen **$36 00**

Four in a crate.

Automatic.

A patented gravity lock which locks automatically each time the board is opened. To close it, just lift the lock with one finger and it folds right up, and with a slight tap of the hand the board locks when folded. The safety iron holder, which is also a patented feature, fits very smoothly in the board, leaving no sharp edges. It is set in asbestos all around where it touches the wood, making it absolutely fireproof. The wood is only partly cut out, leaving an air space between the iron holder and the board, making it strong and smooth.

No. 400. Size 14½x56 in. Wt. doz. 270 lbs. .....Dozen **$48 00**

Two in a crate

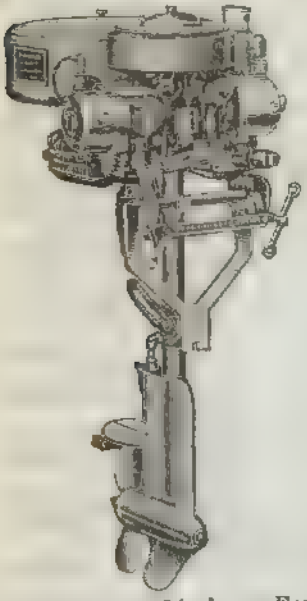
OUTBOARD MOTORS

CAILLE, MASTER FIVE SPEED TWIN, MODEL 22



2 Cylinder, 2 Cycle, 3 Port, 6 H. P. Motor, 200 to 2800 R. P. M. 2½ Inch Bore, 2 Inch Stroke.

Cylinders—Grey iron accurately ground to size.

Muffler—Extra large muffler silences motor, provided with cutout.

Pistons—Grey iron.

Piston Rings—American Hammered. Three to each piston. Pinned in place.

Crank Case—Heat treated aluminum alloy with bronze bearings pressed in.

Crank Shaft—¾ inch chrome nickel steel.

Main Bearings—2½ inch phosphor bronze.

Connecting Rods—Phosphor bronze.

Gasoline Tank—Heavy pressed aluminum. Two-gallon capacity. Strainer in bottom.

Main Frame—Heat treated aluminum alloy. Opening between clamps 2 inches. Equipped with theft proof lock clamp for fastening on boats.

Propeller—Bronze nickel plated, with shifting blades, giving two speeds forward, two speeds reverse, and neutral starting.

Drive Shaft Housing—Nickel plated brass tubing. Amply strong to withstand all thrust strain.

Drive Shaft Propeller Shaft—Stainless steel, ground finish.

Gear Housing—Stream line, heat treated aluminum alloy.

Gears—Chrome nickeled and Vanadium steel. Ratio: Propeller ½ motor speed.

Cooling System—Double water circulation system. All bronze plunger pump and forced circulation by action of propeller.

Ignition—Bosch High Tension Magneto built into flywheel. Waterproof.

Carburetor—Caille Special Carburetor with float and needle point adjustment. Throttle control and choke.

Starting—Caille 5 Speed Motors are the only motors with neutral starting position.

Tilting—Motor is pivoted on main frame, permitting propeller and shaft to tilt over submerged obstructions. Propeller can be tilted out of water for beaching boat.

Adaptability—Can be readily attached to any square stern boat without any fittings whatever.

For fresh or salt water without change of parts.

OUTBOARD MOTORS
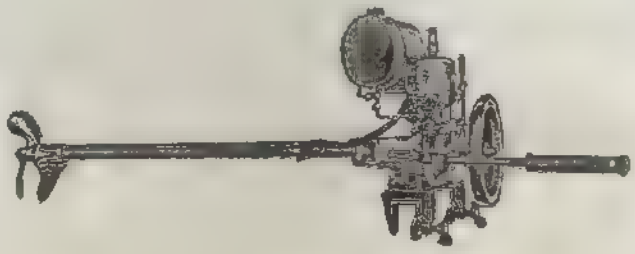
CAILLE—LIBERTY DRIVE



Same high grade materials and workmanship as the famous Five-Speed Motor but it does not embody the five-speed feature nor has it a starter. This motor has made a big hit with sportsmen because of its ability to go through weeds. It pivots on the stern of the boat in both an up-and-down and sidewise movement. It rises over stones, sunken logs and other obstructions and enables one to motor in very shallow water.

Two horse power motor, has 2⅝ inch bore, 2½ inch stroke; 150 to 800 R. P. M. Lunkenheimer carburetor generator valve; equipped with either Bosch high tension magneto or battery ignition; capacity of gasoline tank 1 gallon, sufficient to run motor four hours under full load.

Will drive a boat 7 to 9 mile an hour, or the speed can be reduced to less than 2 miles an hour. One spark plug with each motor, any standard S. A. E. ⅝ inch plug may be used.

Imported Dinnerware

From the Best Potteries of England, France, Bavaria and the Orient

PRICES AND DESCRIPTIONS ARE ON PAGE OPPOSITE

No effort has been spared to bring from the far corners of the earth, the best examples of Dinnerware made in those countries most famous for their porcelains. Each of the patterns offered below comes in four different standard assortments. Packing them in this uniform way, we have kept the price down. We do not break the packages. We do carry, however, an ample supply in open stock for replacements and additions. Prices of loose pieces on request.

ENGLISH BLUE WILLOW

The famous ware has found its way, from the potteries of England, all over the world. It is admired everywhere.

MAYFIELD

A touch of Spring prevails in conveyed by the skillful application of brilliant colorings with restrained art. English Dinnerware of excellent character.

MANCHESTER

Distinctly new and charming is this Dinnerware in its white Wedgewood design. The design you see on the cup is repeated in the center of each piece. English ware of surpassing quality.

DEL MONTE

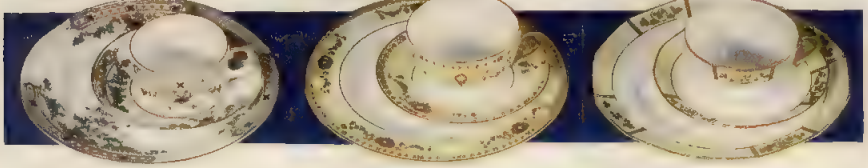
Very handsome design and graceful shape, decorated with a lavish display of beautiful but subdued coverings. The product of a famous English pottery.

MAPLE LEAF

Everyone admires this pattern. A faint suggestion of maple leaves in the glorious colors of Autumn covers each piece. Extremely fine Oriental porcelain.

ALHAMBRA

The unmistakable quality of the Orient combined with the rich designs of Europe is offered in this exquisitely decorated gift worthy fine quality Dinnerware.



GARLAND

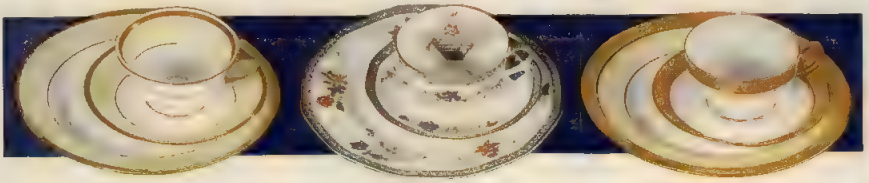
Truly representative of the best Bavarian porcelains. Note the exquisite pattern and the charming shape of the capacious cup.

PARSIFAL

Nothing has been spared to make this exquisite set of Bavarian china one of beauty and a joy forever. Richly lined with coin gold.

LA FLEUR—Haviland

Made by the famous Haviland Pottery of France. This is a studio set which means that each piece is hand painted. Coin gold is lavishly applied.



RHINE GOLD

Daily use will never dim the joy of seeing this handsome Bavarian china with its rich borders of pure coin gold. An exquisite pattern.

GANGA—Haviland

A rare example of the famous Haviland Pottery's product. Rich and ornamented in delicate tones. A masterpiece of French pottery.

MINTON—Gold Encrusted

The limit of luxury is offered here in this gold encrusted Bavarian china. Superlative quality. An adornment to the most richly laid table.

We illustrate six patterns of dinnerware which are marked, D, E, F, G, H and J. The illustrations on the page opposite show you how beautiful they are. The descriptions above tell you what they cost. Please order by number.

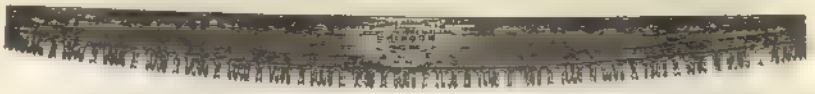
Send us your order in the regular way. Shipment will be made to you direct from the factory. Potteries are in Ohio, the glassworks in Maryland.

Shipping weights are about as follows:
32-piece set weighs about 27 lbs. packed.
50-piece set weighs about 53 lbs. packed.
100-piece set weighs about 95 lbs. packed.
The 100-piece set is always shipped most economically by freight. Specify freight or express when ordering.

CROSS-CUT SAWS

SIMONDS. CRESCENT GROUND

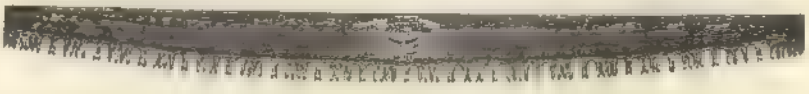
When a lumberman picks out a Cross-cut Saw he naturally chooses a Simonds. Throughout the continent they have clearly shown that they are the fastest and easiest cutting saws in the woods. They cut more timber, do it in less time, and with less labor. As a result of Simonds' Process of Crescent Grinding—teeth and rakers have clean, sharp edges; the teeth need be set only slightly, the kerf is less; the power required for pulling is less; there is less resistance, and therefore more cutting can be done with less work. All Simonds Cross-cuts are covered by the broadest guarantee as to quality and workmanship.



Chinook. Bucking Pattern.
13 Gauge on Teeth, 17 Gauge on Back.

A general utility medium price saw. Used extensively on construction work.

No. 520. Length, ft.	5	5½	6	6½	7	7½	8
Wt. each, lbs.	6	7	8¼	8¾	9¾	10½	11
Each	$6 50	7 20	8 10	9 15	10 20	11 25	12 25



Royal Chinook. Bucking Pattern.
13 Gauge on Teeth. 17 Gauge on Back.

Especially adapted to coast timber such as fir, spruce or hemlock.

Especially designed for use in pine timber, either for bucking or falling.

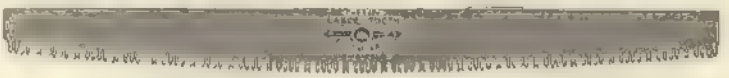
No. 541. Length, ft.	5	5½	6	6½	7
Wt. each, lbs.	6	7	8	9	10
Each	$6 15	7 00	8 20	9 50	10 75

Bucking Pattern Cross Cut Saws are used for sawing fallen or down timber.
Falling Pattern Cross Cut Saws are used for felling standing timber.

CROSS-CUT SAWS

ATKINS

E. C. Atkins & Company's No. 51 Cross Cut and No. 52 Falling Saws are made of the highest quality of saw steel under their celebrated Silver Steel trade-mark. These blades are ground on the segment of a circle, the backs are rounded off and all gullets are cleaned out, lengthwise, and polished the same as the side of the blade. Every saw is given a Damascene finish, insuring absolute perfection in true grinding. They are given a special heat treatment insuring uniformity of temper, so they will maintain a fast cutting edge, yet easily filed and set. The rakers are toughened so a good heavy chisel bit swage can be carried, which will place out gnarled knotty, cross-grained wood as true and easily as straight-grained timber. We are proud to recommend these saws, and they are fully guaranteed to give absolute satisfaction in every respect.



Bucking Pattern.

Lance Tooth. Not Perforated.

Special Steel. 14 Gauge on Teeth, 18 Gauge on Back.

No. 361. Length, ft.	5	5½	6	6½	7

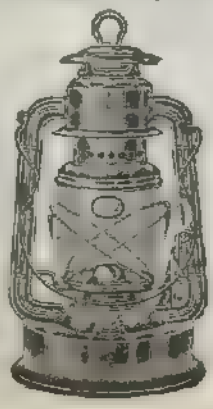
DIETZ
D. Lite.

The short globe type of lanterns with the exposed wick directly accessible for cleaning, trimming and lighting. They can be filled, lighted and regulated without removing globe. Dome shaped solderless oil founts; heavy gauge cross wire globe guards; polished steel bail hooked into patent brass eyelets.



Large Fount.

Bright tin finish; No. 2 Dietz special burner; 1 inch wick; side lift; upright bail.

Special features of this lantern are the extra large fount and the patented "Loc-Nob" globe. The globe actually locks fast, and will not drop out when globe holder is tipped back.

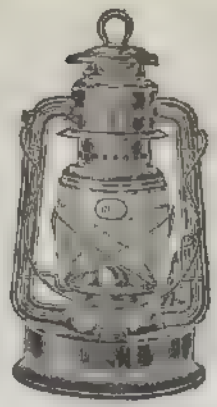
Per Doz

No. 2DDL—Height over all with bail down 13½ ins; oil fount capacity 2 pts; 10 candle power $47 25

(Sold in full carton lots only.)

Half doz in carton; wt per doz 42 lbs.

LANTERNS



DIETZ—D. Lite.

Bright tin finish; No. 2 Dietz special burner; 1 inch wick; side lift; large filler cap.

	Per Doz
No. 2DD—Height with bail down 13¾ ins; diam base 6½ ins; oil capacity 1⁷/₁₆ pts; will burn from 20 to 25 hours	$43 50

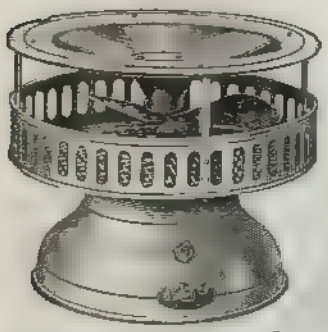
D 5

ELECTRIC FANS

CIRCULAIR, NEW TYPE



USES—For cooling and circulating air in homes, offices, banks, hospitals, restaurants, beauty parlors, undertaking establishments.

SPECIAL FEATURES—No direct draft, indirect circulation of air cools but does not chill, circulates air in four ways. Does not simply agitate air at a certain level, but draws new air from below to replace stale air. May be placed on the desk, will not blow papers from desk or table. Top of shield made to hold ash tray, flower holder or humidifier. Circulates over 360 degrees.

MATERIAL—Steel motor housing. Sheet steel frame, shield and base with rubber feet. Four polished brass blades. Two speed Universal type ball thrust bearing, vertical motor. Nickel plated toggle switch in base. Complete with 8½ feet of cord with separable attachment plug.

FINISH—Ivory Duco enameled finish, black line decorations.

R. P. M. 1200 to 2000. CURRENT—A. C. or D. C.

CYCLE—25-60.

VOLTAGE—110.

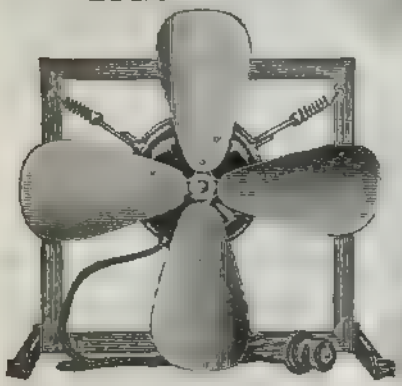
ELECTRIC FURNACE FANS

WAGNER



USES—For installation inside of cold air intake, forces large volumes of heated air into and through furnace into every room of the house.

SPECIAL FEATURES—Single speed, induction type motor without brushes or commutators.

This type motor eliminates the necessity of replacement of brushes.

Noiseless, vibrationless, cool running, mounted on spring suspensions that absorb any vibration or oscillation set up by the fan blades. Rubber cushion feet on base of frame affords a secure grip for outfit on air duct floor.

MATERIAL—Drawn steel motor housing. Four steel blades. Welded angle iron frame and base. 27 inches of wire for making connections.

FINISH—Black lacquered motor housing and frame.

CURRENT—For A. C. 100 to 115 volts. 60 cycle.

—BLUE GRASS—

4 Blades, Three Speed, Induction Type Motor. Width 56 Inches.

(Illustration of No. BG-C-56-110ACG)

USES—For moving large volumes of air and maintaining a live stimulating atmosphere in large public rooms, halls, auditoriums, theatres, hotels, ball rooms, restaurants, stores, shops, offices, factories, etc.

FEATURES—Four imitation mahogany finish hardwood blades, adjustable for up or down draft, dull black finish motor housing and brackets, A.C. three speed switch control and choke coil, ceiling hook, insulated hanger with canopy for attaching glassware, two pull chain keyless switches, one for operating current to fan and the other for operating illuminating unit.

MATERIAL—Induction type motor without brushes or moving contacts. Field or stator wound with enameled cotton covered wire on steel laminations. Single main vertical bearings with large coil grooves permitting an adequate and continuous flow of oil to be distributed over rotor shaft when fan is in operation. Ball bearings held in retainers running between two hardened steel plates, support the weight of rotor. Because of its unusual inaccessibility, being hung from ceiling, exceptional large oil reservoirs are provided in motor so that oiling is necessary only once a season. Approximate speeds high 225, medium 200, low 180. Cubic feet of air moved per minute in high speed 9000.

60 Cycle, Alternating Current. 110 Volts. 150 Watts.

ICE CREAM FREEZERS

REGAL

All Metal. Single Action.

Galvanized tub, retinned can.

No. 90. Size 2 quarts. Ship. wt. doz. 42 lbs. .....Dozen **$15 00**

Six in a case.

AUTO VACUUM

For Picnics, Excursions, Etc.

Freezes without turning a crank—just put in the cream to be frozen and the ice, and let stand—in half an hour the ice cream is ready to serve, and it will keep for hours without melting as the dead air space between the walls acts like a vacuum.

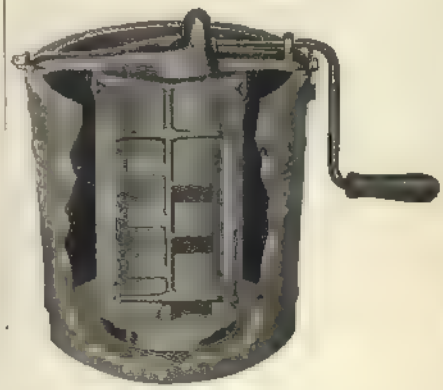
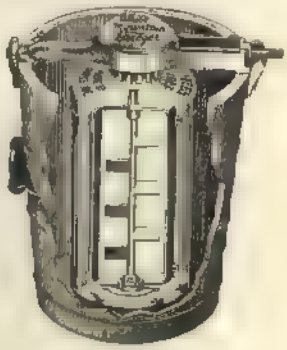
POLLYANNA



A special, low priced freezer to meet a popular demand. White pine tub, two electric welded wire hoops, all outside castings galvanized; can made of copper bearing steel, tin plated.

Pollyanna. Two quart. Ship. wt. carton of six, 40 lbs. .....Each **$2 50**

WHITE MOUNTAIN



Triple Motion.

The tubs are built to correct height and diameter resulting in minimum ice consumption; cans are made of copper steel charcoal tin plate and are of corresponding height, insuring quick freezing. Can covers are of cast iron with accurate gear teeth. The special patented new form of beater retains the famous Triple Motion, an original and exclusive feature of White Mountain Freezers. The new top frame construction eliminating all complicated gear mechanism makes a remarkably smooth and easy operating freezer.

THE FAMOUS LINE OF "LEADER" GAS RANGES AT FACTORY PRICES

Last the Longest. Displayed in your choice of Jade Green and Ivory, Grained Green and Ivory, and Blue and Ivory. Bake the Best.

Aside from the colorful beauty of their finish, the Leader Gas Ranges are quality ranges—from a long line noted for durability, performance and service—superb gas ranges in a beautiful, modern dress that will catch the eye of every housewife—at prices that are revolutionary.

Built-in Beauty and Performance

Characteristic of "Leaders"

The New Leader Gas Ranges *in color* offer a striking combination of attractive finish and quality

Six vibrant color combinations (displayed herein and on the following page) have been planned to meet every demand for color harmony in the kitchen **Flush fronts, concealed bolts, one-piece insulated porcelain handles and service drawers are** just a few of the salient features

A mirror-like finish, soil proof and immune to stains, is provided by the permanent porcelain enamel that is fused right onto the metal

Construction details make for convenience and economy in operation New-styled "slide-easy" top grids, balanced oven and broiler doors and easy opening service drawers mark the new Leaders and the Leader Burner Intake holds down gas bills by giving just the right mixture of gas and air

And, finally—of greatest interest to you these new Leader Gas Ranges *in color* are right" in price They have been priced to meet the competition of gas ranges that can not approach Leaders in quality

Performance Without Peer

Because they bear the famous old name of "Leader" you can buy these ranges with full confidence in their cooking and baking qualities Thousands of delighted users say that they make kitchen hours happy hours and kitchen tasks immeasurably easier and pleasanter. You will find these ranges to be very satisfactory and we recommend them very highly.

Lustrous Porcelain Enamel Finish

Porcelain enamel, applied by the famous "Pemco Process, permanizes the colorful beauty of these famous new Leaders The mirror-like finish, soil-proof, immune to spots and stains, cleaned in a wink, is fused right into the metal Ovens are porcelain inside, the last word in durability and sanitation The highest standards are maintained in finishing all other interiors.

Distinction in Design

"As modern as tomorrow" aptly describes the design of these new models In advance of today's styles, they may be purchased with every assurance that they will stay "in style for years to come Witness flush fronts concealed bolts one-piece insulated porcelain handles, service drawers, and innumerable other features.

J. MARBLE HUNTING AND SCOUT KNIVES

IDEAL

The thick, strong blade is relieved by hollow grinding which provides proper balance for weight and size. Strength of back is necessary for splitting kindling or digging holes in hard ground or ice. The hollows aid quick sharpening. Blade is adapted to sticking and skinning. Back of point is beveled for breaking small bones. The Ideal is an every-purpose knife. These knives have been honored by being imitated, but the original and genuine has Marble's stamped on blade.

Knives No. 41 and 45 have a heavy tang onto which are driven washers made of sole leather, red and black fibre and brass. Bolster is brass. Tip is aluminum. All parts held rigidly in place by a round brass nut sunk into tip, engaging the threaded tang. Knife is highly polished.

Furnished with Sheath.

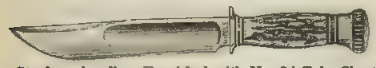
NO.	Size Blade	Wt. Each	EACH
41-4½	4½ in.	6 oz.	$2.50
41-5	5 in.	7 oz.	2.75
41-6	6 in.	8 oz.	3.00
41-7	7 in.	10 oz.	3.25

Six in a box.

As No. 41 but with full brass hilt. Furnished with Sheath.

NO.	Lgth. Blade	Wt. Ea.	EACH
45-5	5 in.	7 oz.	$2.75
45-6	6 in.	8 oz.	3.00
45-7	7 in.	10 oz.	3.25

Six in a box.



Staghorn handle. Furnished with No. 34 Tube Sheath. These handles are composed of two grooved slabs of selected staghorn carefully riveted together and driven on the tang. Brass bolster. Tip is stag horn. Knife is highly polished.

WOODCRAFT

Acknowledged to be the best seller of all outing knives. Finest steel blade—tapering to point for sticking—just the right curve for skinning—thin enough for slicing and whittling—checkered for thumb or finger grip—back is beveled for breaking small bones—perfectly and uniformly tempered. Proclaimed by sportsmen to be the best all 'round knife. Handle 3¾ inches. Construction same as Ideal knives. Furnished with No. 39 Sheath.

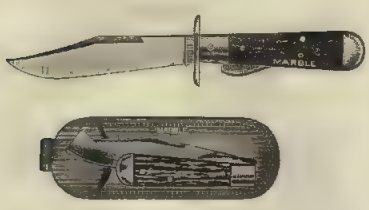
HUNTING KNIVES J

SAFETY HUNTING



These knives will appeal especially to that class of woodsmen and sportsmen who object to the sheath knife and yet want a knife that is heavy, strong, and rigid. They have a long blade with a short handle, utilizing the extension guard as a safety lock when knife is open. The guard as well as the blade is held in position by a spring when either open or closed.

The hilt and the bolsters are of nickel silver. Side plates are of genuine staghorn. Furnished with Sheath.

PACKED TWO IN A BOX

MARBLE'S BELT AXE

Very popular with Boy Scouts and campers, as well as sportsmen.

The tempered head will not become battered. The accurately machined eye is fitted perfectly by the handle, and is constructed to give the greatest amount of bearing surface on the handle. These are features that are exclusive in Marble's tool-steel axes.

Belt

These axes are made of fine steel and are ideal for use around camp.

NO.	Length	Blade	Wt. Each	EACH
9	12 in.	2⅜x4½ in.	22 oz.	$1.50

Camp

Blade is forged from solid tool steel. The tempered head, designed for driving stakes, spikes, etc., will not become battered even under continuous service. The nail puller has tempered jaws. These are features that are exclusive in Marble's tool-steel axes.

The thoroughly seasoned selected hickory handles offer a very secure grip, and allow the axe to be easily inserted or removed from the sheath.

PAINT SPRAYING OUTFIT

PRESTO

Sprays Paints, Varnishes, Lacquers, Enamels and Bronzes.

Pressure feed type giving positive and uniform application of materials. Built to operate on any standard air line or compressor which will deliver one cubic foot or more per minute. Better atomization; high speed application; minimum rebound of materials spayed; less dust and fog; lays a perfect coating at a distance of only 2 to 6 inches from surface being sprayed complete filteration of air; clamp-on can cover with quart aluminum container; adapted for fan or round spray; instantaneous, material and air shut-off; handle and container of even height so gun will not tip over when set down; no oil and water separator required which reduces the cost of extra equipment to about one-half. For successful spray painting with the No. 90 an air regulator and gauge is required, so that the volume of air and pressure can be controlled to assure perfect atomization and application of material being sprayed

No. 90. Presto Spray Painting Outfit. Consisting of regulator, gauge, 25 feet ¼ inch high grade air hose and pressure feed spray gun..Each **$35 00**

No. 90. Spray Gun Only. Complete with a quart aluminum container and two interchangeable pint containers .....Each **$20 00**

Air Regulator and Gauge .Each **$10 00**

Air Hose. 25 feet ¼ inch with connections .....Each **$5 50**

ELECTRIC SPRAYING

UNITS

PRESTO

Sprays Paints, Varnishes, Lacquers, Enamels and Bronzes.

Finger tip control, light weight; perfect atomization; double filteration of air; seamless 1 qt aluminum container; clamp or cover; interchangeable heads for fan or round spray; rotary compressor develops constant pressure of 25 to 30 lbs.; instantaneous material shut-off after release of trigger; well balanced pistol grip handle; Universal motor, for use on AC or DC; 12½ feet rubber covered electric cord, with non-breakable plug; 12½ feet 3 ply rubber air hose

Lays a perfect coat of paint—without rebound of the material being sprayed; sprays 1 to 6 inches wide—and more, depending upon how far the gun is held from the surface

No. 84. 110 Volts. Shipping wt. 15 lbs. .....Each **$39 50**

WATER PUMPS

SCOUT

A first class pump that will improve the efficency of the Ford motor. Has many features of the Blackhawk Chief. Second only to the chief in pumping power and performance. Equipped with curved three-blade bronze impeller. Big bronze bearings with grease lubricator at belt end Husky construction throughout. Flange prevents the belt from running off. Belt sizes: Fords previous to 1926 32½ inches.; 1926 model takes 36 inch belt

Scout. Complete with horn bracket and fan belt. Wt, 8 lbs....Each **$5 00**

GREASE PAK OR CABINET

"OVAL"

A 25 lb. grease pak with ½ pound per stroke pump mounted on oval top tapered container with hinged fill opening; 4½ feet of ⅝ inch flexible metal hose and brass tube nozzle; container mounted on malleable iron base with 4 legs.

No. 25. Wt. each, crated, 30 lbs. .....Each **$10 50**

JACKS

MARQUETTE

HYDRAULIC

Hydraulic lifting and lowering mechanism totally enclosed and operates in oil. Honed cylinder with mirror finish made of nickel alloy steel. Piston cup washer operates on smooth surface assuring long life and prevents leakage. Grips are large and well formed. Stroking, dollying and general handling of the Jack is easier. Trigger control for lowering right at finger tips. The Marquette has a double release valve. Speed of lowering is controlled by trigger after load valve is opened apply downward pressure to handle at end of stroke. Handle adjustment control is conveniently located for instant adjustment of the handle to any position for raising or lowering Jack. Strong steel handle rigidly braced. There is ample room to work with handle in upper position when close to wall or other cars—lower positions clear bumpers, trunks, etc. Jack can be raised or lowered in any one of four handle operating positions. Strong cross member prevents abuse to hydraulic mechanism when stroking handle or dollying car. Large caster wheels ball bearing equipped and with water proof caps makes dollying easy.

Oil by-passes when jack is raised to extreme height or overloaded, thereby eliminating injury to jack. Roller bearing rear wheels—heavily constructed with two point lubrication. Extra heavy swivel cap designed to fit all axles and differential housings.

Lifting Range, from ..... .5 inches to 18 inches
Tread of wheels, center to center ..... 10½ inches
Overall length ..... 50 inches
Capacity ..... 5,000 lbs.

Model H. Shipping wt. 168 lbs. ..... Each **$56 00**

REPAIR JACKS

Steel Body, Bar and Cap.

This adjustable repair jack does away with unhandy wooden horses and clumsy blocking when adjusting brakes, replacing springs and shackle bolts, changing wheels for tire wear, etc. Heavy steel construction, with load carried on oversized high carbon steel bar; teeth machined to provide fine adjustment; no springs or pins to shear or lose; positive lock which is quickly released by convenient carrying handle. Capacity 2 tons; adjustable from 11 to 18 in.; base 9 in. square.

No. C1. Wt. ea. 10½ lbs .. Each **$3 50**

AUTO JACKS

DREADNAUT

Light Pressed Steel Model.

A light, pressed steel ratchet jack of unusual strength and efficiency; rack bar carefully made and operating mechanism positive; the wide flared base adds strength to stand, permitting unusual service. Finished in olive green lacquer.

No. 57. Height, lowered 8¼ in.; height raised 13½ in.; handle 16 in. flat steel; capacity 1500 lbs. Wt. ea. 4½ lbs. ..... Each **$1 50**

AUTO JACKS

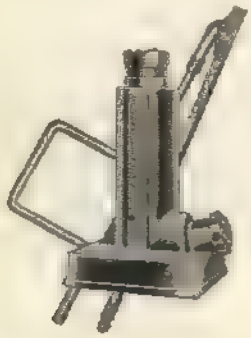
DREADNAUT

Balloon Tire.

A very sturdy twin-lift jack for light cars. Only one screw operates at a time, assisted by ball-bearings; large skid base permits handy placement. Finished in red lacquer.

No. 999. Height lowered 6½ in.; height raised 15 in.; handle 40 inch folding; capacity 2000 lbs. Wt. ea. 8¼ lbs. .....Each $3 50

DREADNAUT



Balloon Tire.

Designed for use with balloon tires. The load is carried directly on telescoping steel cylinders which prevent tipping with consequent binding of driving screws when under load. The entire mechanism including the double screws are entirely enclosed, free from dirt and water. Finished in red lacquer.

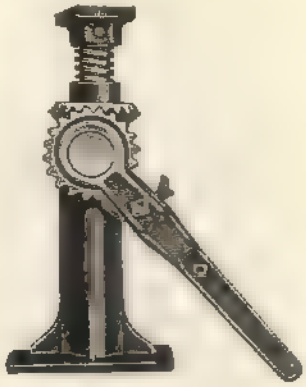
No. 27. Height lowered 7 in.; height raised 16¾ in.; handle 48 in. auger type, folding; capacity 3000 lbs. Wt. ea. 11¼ lbs. .....Each $5 25

RELIABLE

5-Ton.

Absolutely the most durable jack made for a five ton truck.

No. 38. Capacity, 5 tons; height, lowered, 11 inches; raised, 16 inches; diameter screw, 1¼ inches. Wt. each. 12 lbs. .....Each $4 70

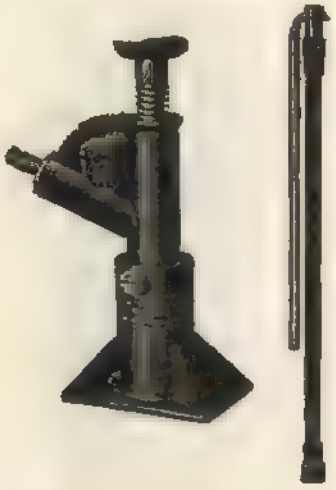


6-Ton.

Strongly reinforced and designed for the heaviest kind of loads such as heavy motor trucks, trolley cars, tractors, mine cars, etc.; easy to operate under their full rated load.

No. 26. Capacity, 6 ton; height, lowered, 11½ inches; raised, 16½ inches; diameter of screw, 1½ inches. Wt. each, 17 lbs.....Each $7 20

MILLERS FALLS



Easy Working. Sturdy. Dependable. Handle Controlled.

The body of handle is steel tubing, each end of which is strengthened by a brazed steel sleeve. The telescopic rod is ⅝ inch hexagon cold rolled steel; folds to a minimum of 18 inches and extends to 36 inches; is extra strong at the joint where it attaches to jack. You can slide jack around, even lift it off the ground with perfect safety. Handle turns easily whether load is light or to capacity. Perfect control without stooping or reaching under the car. Operator is full length of handle away from all dirt and grease. Direct worm drive with ball bearing end thrust. Working parts of steel. Worm is heat treated. broad rectangular base of grey iron, checked on bottom. Barrel of malleable iron. Cap and screw one piece of forged steel, practically unbreakable, and cannot be screwed out of barrel. Lifting worm gear shaft releases screw instantly. Base is adjustable, permitting three ranges of heights before screw is raised. Every jack is warranted to be mechanically perfect.

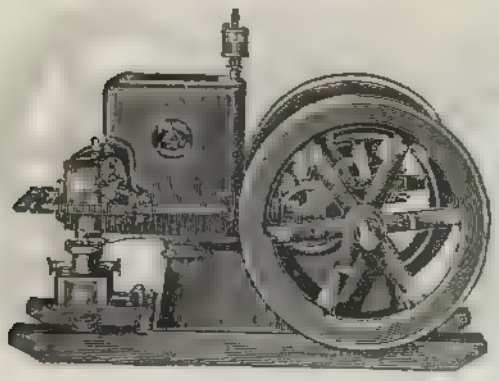
No. 145. Capacity, 2 tons; minimum height, 9½ inches; maximum height, 18 inches. Wt. ea., 10½ lbs. Each $8 00

D 2

KEROSENE ENGINES

FULLER & JOHNSON

Model "KA"—Throttling Governor.



3, 5, 7, 9 and 12 Horse Power.

Well adapted for electric lighting plants, for use on the farm, in shops, elevators, mills, creameries, etc., or on concrete mixers, balers, etc. Has new and improved throttling governor; extra heavy fly-wheels which further insure constant, steady power, so essential for operating the electric dynamos, cream separators, etc.

Painted and striped in gold and are mounted on substantial hardwood skids. They may easily be skidded from place to place, or installed as stationary engines. If it is desired to mount the engine on a hay baler, well drill, concrete mixer, or other machine, simply remove the skids as the engine is self-contained, that is, the engine is hopper cooled with no pipes or screens, and the fuel tank is mounted in the full base and connected to the mixer above the base line.

3, 5 and 7 H. P. engines equipped with built in low tension gear driven magneto. 9 and 12 H. P. equipped with starting battery in addition to magneto. Will run on kerosene, benzine, naptha, distillate, motor spirits or gasoline.

Furnished with a heavy galvanized fuel tank; a machine turned pulley, which fits on either side of the engine; a good muffler; a sight feed lubricator; large grease cups for the bearings; a full set of dry batteries, and a water-proof spark coil all wired up and packed in a good battery box, painted; all necessary wrenches; oil can; priming cup; starting crank (except on 12 H. P.); a can of oil; a can of grease; and a complete book of instructions.

Pulleys other than those specified below can be furnished, charge being made according to the size of the pulley.

KEROSENE ENGINES

MONARCH LINE

Scientifically designed for a general utility power unit. Heavy enough to withstand any strain, light enough to be easily handled. Throttling governor regulates fuel supply and keeps the engine running at a uniform speed. They are primarily a Kerosene burning engine, but will operate on gasoline with equal satisfaction, developing the same horse power and utilizing a like amount of fuel.

All parts easily accessible for inspection and repair. Every part uniform and interchangeable

No. 355. Ratchet handle, 8 in. long.
No. 351. Extension bar, 9 3/8 in. long.
15 sockets of steel: hex. openings, 13/32, 15/32, 17/32, 19/32, 5/8, 21/32, 23/32, 25/32, 13/16, 27/32, 29/32, 1, 1 1/32, and 1 3/32 inches.
One 29/32 inch hexagon spark plug socket, No. 402, 4 inches long.

Container: Enameled steel box, the new attractive Frostine finish.
Size of box: 2⅛ by 4¼ by 10⅛ inches.
Packing: Each box in corrugated carton.
Shipping weight: 5¼ pounds.

Price, complete **$9.34**

No. 14 General Service Set

A full line of engineers' open-end wrenches is included—these are for close work, and are thin-model construction.

The set is cleverly packed in a steel kit, every tool is in its place at all times. It contains:

No. 350. Reversible ratchet handle.
No. 331. Sold "Tee" handle, 11 inches long.
No. 322. Offset handle, 10 inches long.
No. 351. Extension bar, 9½ inches.
No. 336. Universal joint.
No. 77. Combination pliers, 6 inches long.

Five engineers' open-end wrenches:

Openings: 5/16, 3/8, ½, 7/16, 9/16, 11/16, ¾, ⅞, 15/16, and 1 1/16 inches.

Three sizes spark plug sockets:

No. 402 opening 29/32 inch hex.
No. 407 opening 31/32 inch hex.
No. 422 opening 1 5/32 inch hex.

Thirty-four guaranteed steel sockets:

Hex.: 5/16, 3/8, 13/32, 7/16, 15/32, ½, 17/32, 19/32, 5/8, 21/32, 11/16, 23/32, 25/32, 13/16, 27/32, ⅞, 29/32, 31/32, 1, 1 1/32, 1 3/32, 1 5/32 and 1 9/32 inches.

Square: 13/32, 15/32, 17/32, 19/32, 21/32, 23/32, 25/32, 23/32, 1 1/32, 1 5/32, and 1 9/32 inches.

Container: Enameled steel box.
Size of kit: 4½ by 12 by 14¼ inches.
Packing: Each kit in corrugated carton.
Shipping Weight: 20 pounds.

Price **$24.00**

Mossberg Wrench Sockets

Small Series Drawn Steel Sockets

Small series sockets are marked to exact opening of socket. The marking of each socket represents the short diameter of nuts, bolt heads and screw heads plus the clearance. Construction: Drawn by pressure from cold rolled steel, thereby retaining the necessary long grain in structure.

Finish: Mottled and lacquered. Complete list of small series sockets.

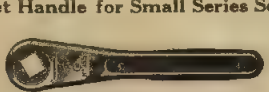
No. 350. Is the reversible ratchet handle that is responsible for the general adoption of interchangeable sockets.

Construction, heavy steel sheet; finish, buffed nickel; length, 10 inches; packed one in a carton; shipping weight, 18 ounces.

Price, each.....$3.00

Ratchet Handle for Small Series Sockets



No. 355. Is a "Junior" handle—built to do the work under all conditions.

Construction, heavy steel sheet; finish, burnished nickel; length, 8 inches; packed one in a carton; shipping weight, 11 ounces.

Price, each $1.66

Ratchet Socket Wrench Handle for Large Series Sockets Only

No. 387

Made of heavy steel with a leverage length of eighteen inches; every part is proportionally sized to give the great strength necessary.

Construction, heavy plate steel; finish, black; length, 19½ inches; packed, individual cartons; shipping weight, 5 pounds.

Price, each $12.66

Hargrave Brace Wrenches

Standard Square and Hexagon

These wrenches are made of malleable iron, hardened so as to give the greatest durability together with maximum strength.

Each size is accurately drifted to United States standard nut sizes. A shoulder prevents the nut working far up into the wrench and the open shank prevents clogging with dirt and also enables the user to handle the wrench in places where a brace would not go.

*Size opening given below for both Square and Hexagon Wrenches is measurement from flat to flat.

Please Order by Stock Number.

Superior Quality Imported Westminster Chime Hall Clocks

Portrayed below is an additional showing of the Superior Quality Imported Westminster Chime and Strike Hall Clocks, which are attractively priced in this selling

These clocks are not only beautiful to the eye—they are also as near trouble-proof as it is possible for a clock to be. Built by experienced clock makers whose entire lives have been devoted to exclusive high-class clock building

Finest workmanship, attractive styles, rich in tone, the ability to give long service, these superior quality clocks are quick to be admired—long to be enjoyed

It is not only their appeal of rich beauty and timely designs, but also their evident usefulness that makes these superior quality clocks so practical

DESCRIPTION OF MOVEMENTS

MOVEMENT "DU"—Westminster Chime, large five tube movement, arch moon dial, eight-day. Three train extra heavy brass plates, dead beat escapement maintaining power. All wheels of hard brass, pinions of hardened and tempered steel. Renders the Westminster Chime on the Quarter, Half, Three-Quarter and on Hour on five tubes.

MOVEMENT "FU"—Westminster and St. John's Chime, large movement, arch moon dial, 8-day. Strikes on seven tubes, each quarter also on hour. This movement plays either the Westminster Chime or the St. John's Chime and is equipped with seven tubes. Either one of the chimes may be played at the option of the owner and the chime desired is obtained by merely moving an indicator on the dial. Also by moving other indicators the chimes may be entirely silenced or the strike may be silenced, or both if desired.

MOVEMENT "DX"—Westminster Chime, small five tube movement, arch moon dial, eight day, three train extra heavy brass plates, dead beat escapement maintaining power. All wheels of hard brass, pinions of hardened and tempered steel. Renders the Westminster Chime on the Quarter, Half, Three-Quarter and on Hour on five tubes.

MOVEMENT "E"—Westminster, Whittington and St. John's Chime, large movement, strikes on nine tubes, each quarter also on the hour. Any one of the chimes, Westminster, Whittington or St. John's may be played at the option of the owner. The chime desired is obtained by merely moving the indicator on the dial. Also by moving other indicators the chimes may be entirely silenced or the strike may be silenced, or both. This movement is of particularly high-grade quality in construction and has the same general construction as movements "DU" or "FU".

GIFTS THAT LAST

No. 8P1000E Each $834.90
(For description of movement refer to "E" above)

The NEW WAGNER Radio

New Perfected All Electric Screen Grid—Balanced Tone

The New WAGNER Table Model—7-Tube Set

Choice of Speakers

Everything you want in a radio—everything that radio can give you is offered in the new WAGNER. This new set has a tremendous new power to pick and select the station and program you want, and reproduce the speech and music with a living, vital REALNESS that never before was thought possible! No hum! No background of noise or distortion! Nothing but the pure joy and pleasure of listening to the best programs on the air reproduced by your new WAGNER without distortion and without over-emphasis on the higher or lower notes. All this, as a result of the newest perfected Screen-Grid (also called Shielded-Grid) tubes, and the marvelous new type 245 power tubes.

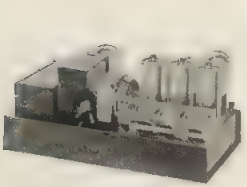
Such rare fidelity of tone comes from the special balanced circuits licensed under R. C. A. patent(s), and the careful matching and balancing of the smallest parts used. The new WAGNER 7-tube (with rectifier) table model set shown above, offers luxurious radio quality in its most convenient most compact form. The wonderfully attractive old gold finished metal cabinet measures only 17½ inches long. You have your choice of the sweet-toned Magnetic-Cone speaker pictured above, in an attractive gold bronze finish, faced with beautiful gold silk, size 18 inches in diameter, or the powerful new Super-Dynamic speaker, in a hand-rubbed Walnut case, as shown below. For the greatest volume, the dynamic speaker is recommended.

No set is easier to tune. Just one dial to turn to select the station and program you wish to bring in. Then turn the other large, comfortable dial to control the volume, to make the tone soft or loud. There's nothing else to adjust! Costs only a fraction of a cent an hour for electricity. Size of cabinet is 17½x9x7½ inches. Shipping weight 37 lbs. Master aerial kit and instructions free with every set. The WAGNER is backed by the John Plain 100% Guarantee.

Table Model with Magnetic-Cone or Super-Dynamic Speaker

9G70011	Set only. PRICE	**$99.50**
9G70012	Set with Magnetic-Cone Speaker. PRICE	**117.50**
9G70013	Set with Super-Dynamic Speaker. PRICE	**139.50**
9G70014	Set of 7 AC tubes for table set (the above prices are without tubes. PRICE	**34.50**

If you wish the set complete, with nothing else to buy, order 9G70014 in addition to either 9G70012 or 9G70013. Complete master aerial set and instructions sent free with every WAGNER.

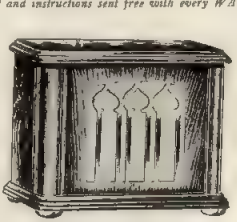


DESCRIPTION OF 7-TUBE SET

Uses 3 Screen-Grid Tubes

The new WAGNER 7-tube receiver is built with a two-unit chassis that segregates the power and radio circuits. It is of completely shielded construction, licensed under R. C. A. patents. Seven tubes are used, including three type 224 screen-grid tubes, two 227 tubes, one 245 power tube and one 280 full wave rectifier tube. The remarkable efficiency of the screen-grid tubes makes this set super-selective, sensitive and powerful. Well balanced audio system and improved detector give life-like depth and beauty of tone.

The Table Model 7-tube WAGNER has three sharply tuned circuits. The 7-tube chassis in the Symphony WAGNER shown on the following page, has four tuned circuits with a special type of power detector. True one-dial control with illuminated scale, graduated in kilocycles and reference numbers. Over-size built-in power pack operates direct from light socket. Smooth, clear performance under all conditions. For distinguished Symphony Console Model, see next page.



DYNAMIC SPEAKER FOR ABOVE TABLE MODEL

No radio is better than its speaker. You have your choice of the attractive Magnetic-Cone speaker, pictured at the top of this page, or this handsome Super-Dynamic speaker shown above. The dynamic speaker contains the same Electro-Dynamic unit as is used in the two distinguished WAGNER models described on the following page. For ordinary use, the Magnetic Cone speaker is sufficient but for the finest and best in radio reproduction, where unusually powerful, undistorted volume is desired, the dynamic is recommended. Size of dynamic speaker is 13¾ inches high, 15 inches wide and 10¼ inches deep, of hand rubbed Walnut.

DESCRIPTION OF 9-TUBE SET

Uses 4 Screen-Grid Tubes

The mighty, new, 9-tube WAGNER has special features of design and construction that never before were available in any radio receiver. Power detection. Perfected screen grid circuit. Push-pull power amplification! Uses four type 224 screen-grid tubes, two new 245 power tubes, nine tubes in all, including two 227 tubes and one 280 full wave rectifier tube.

The screen-grid tubes are used in one stage of a periodically tuned radio frequency and three stages of sharply tuned radio frequency. A power detector is used, and is resistance coupled to the first audio stage. Hum is thus eliminated. The chassis is fully shielded against inside and outside interference, which results in sharp, razor-edged selectivity. Two 245 tubes are connected in push-pull giving an enormous amplification factor. The output is perfectly matched to the Super-Dynamic Speaker.

One single illuminated dial to tune. So silently as the new WAGNER operated, that you actually need the tiny dial light inside the set to tell whether it's turned on or off. For Composer Model see next page for illustration and prices.

The NEW WAGNER Radio

Luxurious Cabinets of Genuine Walnut

Super-Dynamic Speaker
Screen-Grid Circuits
Rare Fidelity of Tone
Amazing Reserve Power

THE SYMPHONY

WAGNER 7-Tube Screen-Grid Radio

We are proud to present the WAGNER as the newest achievement in radio. A perfectly synchronized, high-powered, high-gain receiver of great selectivity—combining power detection, screen-grid circuit, power amplifier, electro dynamic speaker and sturdy "battleship" construction, that maintains absolute rigidity and hair-line uni-balance. Housed in an exquisite two-tone Walnut Lowboy console cabinet, with five-ply top and three-ply sides, with all the rich beauty of the natural grain brought out by the careful matching of the woods and the soft-hand-rubbed finish.

The powerful Super-Dynamic speaker and the new type 245 power tube, bring a new meaning to tone reproduction. The three screen-grid tubes provide power not equalled by 20 ordinary tubes. Get the feel of this enormous power under your control. Try the new needle-point selectivity! The pick of the air is yours with the new WAGNER! One knob to select your station, one knob to control the tone from a whisper to full auditorium volume. The other knob turns the set on or off! No other adjustments.

Compare the new WAGNER in tone—in power—in selectivity—in quietness and ease of operation. Compare the new WAGNER with any other double the price—*for* performance, for beauty and value. Only a substantially higher price will purchase radio quality comparable to that offered in WAGNER

The Symphony console measures 39 inches high, 27¼ inches wide, 18 inches deep. Power dynamic speaker is built-in, scientifically baffled and matched to the output of set. Shipping weight complete about 150 lbs.

Every feature in the new WAGNER has been carefully tested and proved. The tubes we furnish are made by the latest modern equipment under R. C. A. patents. The tubes are all tested and matched. We back the new WAGNER and all equipment with the John Plain 100% guarantee.

9G70015 Without tubes. PRICE..... **$169.50**

AERIAL SET FREE WITH EVERY SET

With every WAGNER, we furnish without charge, a complete Master aerial set, including a lightning arrester and full instructions

THE COMPOSER

WAGNER 9-Tube Screen-Grid Radio

The mighty new WAGNER 9-tube set reaches the peak of radio performance. Every notable development of radio science has been incorporated in the design and construction of this great new receiver. Screen-grid—wonderful new principle of radio—is applied with almost unbelievable results. Power detection gives this new set the power and reach of a giant. Push-pull power amplification with two new 245 power tubes, for a great reservoir of power that may never be used but is always there. Power to bring in even the distant stations with auditorium volume. Power that thrills when you bring in far distant stations with the clarity and strength of locals.

The beautiful Walnut Highboy Console cabinet is worthy of the wonderful receiver it contains. Beautiful matched sliding doors of Burl Walnut, generous strength and thickness 5 ply top and 3-ply sides -hardsome, turned legs and selected figured overlays. A cabinet whose beauty will blend with the best appointments and furnishings. The power dynamic speaker is hidden behind the sliding doors and is faced with silk. The dynamic speaker is scientifically baffled and exactly matched to the output of the set. No hum or distortion. No background of scratches or noises. The low notes and high notes are all brought out clear and balanced. The tone is real and life-like, in true pitch, without the slightest suggestion of muffling or hollowness. Only power detection, the power of the four screen-grid tubes, and the enormous power capacity of the two 245 tubes could deliver a tone with such a new intensity, a certain delightful mellowness impossible of description. Not a single rich, vibrant note is lost!

The Composer console measures 50 inches high, 27¾ inches wide, 16¾ inches deep. Shipping weight complete, about 195 lbs. For operation direct from any light socket of 100-120 volt, 50-60 cycle alternating current.

9G70017 Complete without tubes. PRICE..... **$230.00**
9G70018 Complete with tubes. PRICE..... **275.00**

Portable All-Purpose Phonograph

THE FAMOUS "NITEN-GALE"

Now that it is possible to get such an excellent phonograph that serves every purpose, many people are doubting the wisdom of putting a large amount of money into a phonograph that serves only one purpose. The "Nitengale" is famous for its quality, and it is indeed, not possible to make a better instrument.

It measures 14⅜" long, 11½" high and 7" wide and weighs only 12½ pounds. Attractively covered with an embossed Du Pont Fabrikoid, the famous covering that is waterproof, washable and long lasting. All the metal parts are sturdily constructed and heavily nickeled, the corners are reinforced with riveted metal braces. On opening the case you find a plush covered turn-table, with control lever and speed regulator. Fitted with a flexible tapering arm and protected disc reproducer of newest construction. Will play any standard record with remarkably fine tone quality. Lined with an embossed gold material. Fitted with spring cover needle box and patented record holder of large capacity.

2G70007 PRICE **$22.50**

On the nine preceding pages, we have illustrated and described the favorite models of our musical instruments. Lack of space has prevented us from showing our full line. If you have not seen the exact kind of instrument you are looking for, please write us and we will be glad to furnish you with further information, without obligation.

All the musical instruments we show in this John Plain Book are 100% guaranteed. They are all correct in design, and are very carefully made, with precision workmanship.

When you purchase an instrument, you should also have a case, cleaning equipment and accessories. These accessories you will find listed below.

WAHL-EVERSHARP
PERSONAL-POINT PENS

The Nib-Key, illustrated above, is furnished free to every dealer with instructions for use. Points are instantly and permanently transferred from holder to holder. The customer selects any point desired and the dealer immediately puts that point into the style and color of holder selected. Size 4 and 6 nibs only are interchangeable

The new Wahl-Eversharp Personal-Point Pen is an exclusive Wahl achievement. The Interchangeable Nib feature of the Personal-Point Pen enables the dealer to satisfy every customer. And the resultant increase in sales is accomplished from reduced pen and pencil investment. . . . Distinction of appearance is assured by the beautiful colorings and the 14K gold-filled mountings. These pens and pencils are unconditionally guaranteed defect-free.

Not all Wahl Fountain Pens are "Personal Point." Pens with this exclusive feature are indicated in the descriptions below. In no case are other than 4 and 6 nibs interchangeable.

TO MATCH FOUNTAIN PENS AND PENCILS

After you have bought a Fountain Pen and wish to obtain a Pencil that matches it in style and design, use the following method. Add 100 to the number of the Fountain Pen and you will have the number of the Pencil that matches it.

To find the number of the Gift Set that is made up of Fountain Pen and Pencil and the Pencil that matches it, add 200. *Colors must be specified.*

Eversharp Pencils

These models in attractive colors and handsome gold trimmings are a fitting companion for the pens shown on the previous page. They may be matched by comparing the group numbers under each cut. The fittings are gold filled. A concealed eraser and extra supply of leads are in the magazine concealed under the cap. Eversharps are as mechanically perfect as it is possible for a pencil to be made today. In addition they are being produced in the most beautiful colors and materials obtainable.

WAHL - EVERSHARP

Fountain Pen Desk Sets

These desk sets with bases of Black and Gold Portoro Marble, Green Argentine Onyx, and creamy White Pedrara Onyx are luxurious necessities.

Pens fit into humidors that keep the points moist and ready to write; humidors attached to bases by ball and socket swivels which hold the pens at desired angle.

WAHL manufacture are leading the field in popularity because of expert craftsmanship and ingenious design, especially exhibited in the humidor cap and the EXCLUSIVE Wahl Ball and Socket Joint. Appropriate as Christmas, Birthday or Anniversary Gifts.

AUTOMOBILE JACKS

WEAVER, CURB

For Balloon Tires and Cars With Low Slung Axles.

Frame and lifting mechanism high grade steel; steel wheels. A speedy and efficient jack for changing tires on the curb, etc., raising and lowering are controlled from the handle. Long curved handle makes it easy to operate in case of overhanging tires, bumpers, etc.

Each

No. A-WA-23—Capacity 2,500 lbs; height lowered 4¼ ins; height raised 17 ins; length over all 70 ins..... $57 75

Packed loose; wt each 55 lbs.

WEAVER LO-WAY

For Cars with Low Slung Axles.

Spring steel frame and mechanism, painted green; cast iron wheels. Solid steel axle, ball bearing and roller bearing construction throughout. Long lever handle held in vertical position by spring when not in use. Lifting mechanism consists of quadrant to which standard is attached and turned by upper dog attached to bell crank which operates by lowering and raising handle. The weight of load is carried by a set of heavy roller bearings in quadrant and by two sets of roller bearings between axle housing and steel axle. Easily guided by turning handle. For general garage use also for unloading automobiles and moving new cars in showroom. Each

No. A-WA20—Capacity 5000 lbs. Minimum height 6 ins; maximum lifting height 14 ins, with extension standard 17 ins $113 40

One in bdle K. D. wt each 110 lbs.

+F. O. B. Wisconsin Factory Only.

AUTOMOBILE JACKS

WEAVER, HYDRAULIC

Heavy channel steel frame electrically welded Front end pivoted on front axle, rear supported by two casters. A three point support enables jack being used on uneven surfaces without undue strain. Ball bearings in rear casters, roller bearings in wheels. The hydraulic principle of operation enables jack being operated with short as well as long strokes, a great advantage under crowded conditions.

Front wheels can be used to guide jack when placing under or moving cars. Raising and lowering of car controlled by a lever conveniently located under handle. A safety port in cylinder prevents overpumping when raising. Handle stands upright when not in use. Range of lift from 5 to 18 inches.

Each

No. A-WA24—Capacity 3 tons; length over all 55½ ins, handle 45¼ ins; width 16¼ ins..... $165 00

Packed loose; wt each 209 lbs.

WALKER, LIFT-A-CAR

Quick Tire Changer.

Malleable iron chassis; hardened drop forged lifting segment with milled teeth, blue finish. Foot lift is 4 inches from ground when lowered.

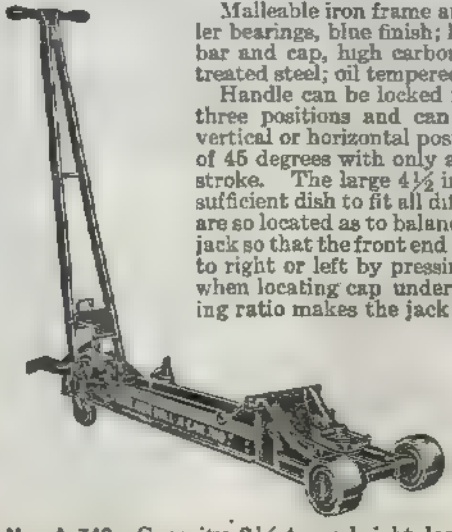
Designed for cars having balloon tires and equipped bumpers and trunks. Each

No. A-716—Capacity 3000 lbs; height lowered 4 ins; height raised 17 ins; length handle 52 ins..... $57 75

Packed loose; wt each 52 lbs.

WALKER, ROLL-A-CAR

For Cars and Trucks With Low Slung Axles.



Malleable iron frame and wheels with roller bearings, blue finish; lifting pawls, rack, bar and cap, high carbon drop forged heat treated steel; oil tempered steel springs.

Handle can be locked rigid in any one of three positions and can be operated in a vertical or horizontal position or at an angle of 45 degrees with only a 12 inch operating stroke. The large 4½ inch square cap has sufficient dish to fit all differentials. Wheels are so located as to balance the weight of the jack so that the front end can be easily swung to right or left by pressing down on handle when locating cap under axle. 43 to 1 lifting ratio makes the jack operate easily.

Each

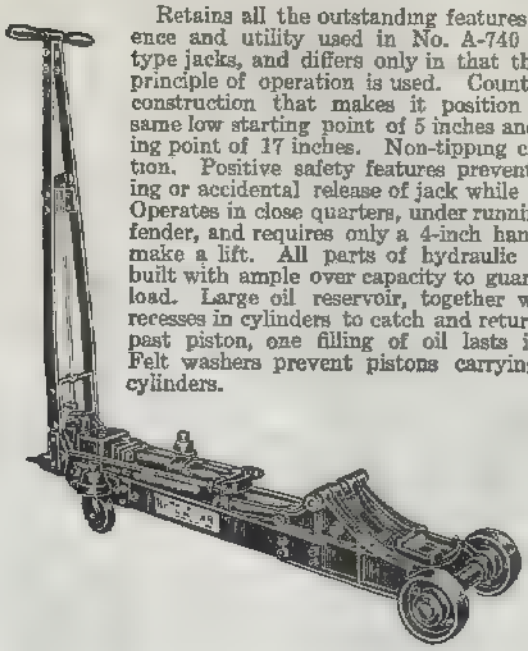
No. A-740—Capacity 2½ tons; height lowered 5 ins; height raised 17 ins; length 50 ins..... $117 00

Packed loose; wt each 120 lbs.

AUTOMOBILE JACKS

WALKER ROLL-A-CAR HYDRAULIC

For Cars and Trucks with Low Slung Axles.

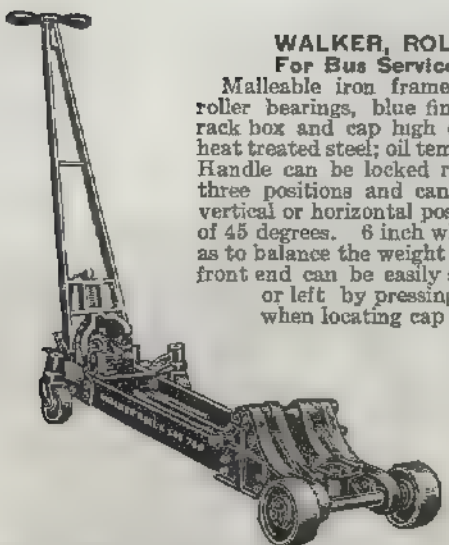


Retains all the outstanding features of convenience and utility used in No. A-740 mechanical type jacks, and differs only in that the hydraulic principle of operation is used. Counter balanced construction that makes it position easily, the same low starting point of 5 inches and high raising point of 17 inches. Non-tipping cap contruction. Positive safety features prevent overloading or accidental release of jack while under load. Operates in close quarters, under running board or fender, and requires only a 4-inch hand stroke to make a lift. All parts of hydraulic mechanism built with ample over capacity to guarantee a full load. Large oil reservoir, together with special recesses in cylinders to catch and return oil forced past piston, one filling of oil lasts indefinitely. Felt washers prevent pistons carrying dirt into cylinders.

Each

No. A-770—Capacity 2½ tons; height lowered 5 ins; raise under power 12 ins; maximum height 17 ins.....**$158 40**

Packed loose; wt each 165 lbs.



WALKER, ROLL-A-CAR

For Bus Service Stations.

Malleable iron frame and wheels with roller bearings, blue finish; lifting pawls rack box and cap high carbon drop forged heat treated steel; oil tempered steel springs. Handle can be locked rigid in any one of three positions and can be operated in a vertical or horizontal position or at an angle of 45 degrees. 6 inch wheels are so located as to balance the weight of jack so that the front end can be easily swung to the right or left by pressing down on handle when locating cap under axle.

Each

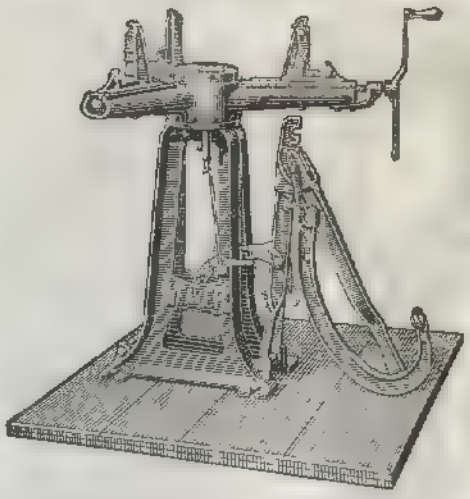
No. A-760—Capacity 6 tons; length over all 56 ins; length handle 49 ins; lowest point 5¼ ins; highest point 17¼ ins; 3 in. extra cap adjuster..... **+$321 75**

Packed loose; wt each 275 lbs.

+F. O. B. Wisconsin Factory Only.

AUTOMOBILE TIRE CHANGERS

WEAVER, MODEL E



Lever mechanism and jaws malleable iron and steel; malleable iron frame, mounted on heavy wood platform.

Handles all types of disc and wire wheels, solid and split rims.

Will handle pneumatic tires including the balloon tires, up to and including 7 inches.

Equipped with three sets of jaws which engages the rim giving top and bottom contact.

The tire is forced off the rim by the down pressure of the goose neck hook, operated by an adjustable hand lever.

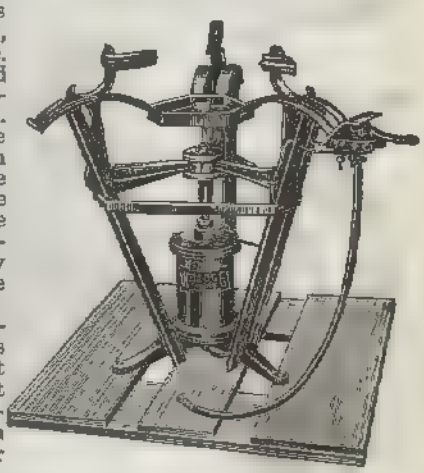
Each

No. A-WF10—Size platform 42x42 ins..... **$186 00**

Crated; ship wt each 250 lbs.

KELLOGG'S, TIRE CHANGER

Air Operated.



Angle iron uprights and spreader arms, crowfoot cast iron base.

Speeds up and makes easy the removal of tire from rim.

Replacement of tire accomplished with equal facility as the device is double acting, pressure can be applied instantaneously to rim by movement of valve control handle.

Air pressure operates three lever arms which act on rim at three equidistant points, moving simultaneously so that rim can not be sprung or twisted.

Handles all size rims without adjustment. Any ¼ H. P. motor air compressor will furnish sufficient air to operate machine.

Each

No. A-RTC—Wt each 150 lbs..... **+$138 60**

Crated

CRITES—Wizard of Wooster

L. C. Crites, toybuyer and advertising manager for H. Freedlander & Co., of Wooster, Ohio, talks of toys, toy psychology, the public mind, the chain store and home town merchandising. Your business story bloodhound met him in the smoking compartment of a car going West—and is able to give you the keen reactions of a thoughtful mind on a number of present-day business problems. In passing, it is pertinent to say that this story will also be a surprise to Toybuyer Crites—we trust a pleasant surprise. Writing without benefit of notes, this is an accurate recital of the Wooster man's ideas, if not his exact words

"Ordinarily I am a very quiet fellow. Like to think I'm as silent as Cal Coolidge. Here I am rattling away as if I'd known you for years. A lot of people are like that. But then I'm an advertising man as well as a toybuyer—and in both jobs I have to say 'No' so often that it's a relief to open up to a fellow traveler

Wooster Merchants Combine to Boost Christmas Sales

"The community-tree idea? Oh, yes. It was this way It did seem a shame for the Wooster merchants to keep on playing individual hands, so somebody made me the goat to collect the funds and put over something really big for the benefit of all of us.

"We decided to get everyone talking for miles around about Wooster. We wanted to make Wooster a good town in the minds of every poor benighted soul who did not know that fact already.

"Jever collect funds for a 'common cause?' Yes? Then you know that it's one thing to win hurrah enthusiasm, and another thing to follow through with money enthusiasm. As you probably know, 'the right people' must be seen first—and be careful they don't see you first, if they have any inkling of your designs on their bank rolls. But it isn't always as tough as that. It only seems tough Fortunately the right people consented to become pioneer backers, and I raised the needed amount far easier than I expected.

"The plan was a double row of Christmas trees attached to the electric light poles along the main business street in town — each tree to be strung with colored lights that would blaze a welcome to Wooster. We succeeded in putting a hundred and five lighted trees in place — and boy what a beautiful sight that was! Best of all it boomed Wooster for miles around, and resulted in a banner Christmas business for all of us.

"The cost was a trifle, when you consider the snap-up it gave to general holiday trading in our town—but it's hard to please everybody. I gave that up several years ago. I try to please all reasonable people, including myself, and let it go at that

How Crites Answered a Troublesome Question

"One of the objectors to our little community's 'splurge' took me to task in the store the day after the lighted Christmas trees were in place She was a big customer, too, and had to be carefully handled

" 'What a pity, Mr. Crites'," she said, 'to spend $1800 on useless Christmas trees and lights when Wooster has so many people out of work

' But that isn't the complete story, my good friend," I told her. "It's a little principle of economics. What to you is a 'waste' of $1800 is in reality sure-fire advertising that will burn the Christmas spirit into the souls of every scared pocketbook in the county. They will 'get religion,' one might say, and say it with dollars in buying toys and all other merchandise from the merchants of Wooster. This will make money flow and get more people employed. We will overcome trade lethargy with trade prosperity

"I probably didn't make as long a spiel as that, but she got my drift—and finally admitted that there might be something in what I said

A Child Needs 'Soul Food'—Toys

"Another unthinking woman talked about the same way the very next day in the toy department. 'Heavens, all this money for toys and so many poor children need bread!'

"Well, I had to answer that one, too; and the answer was, 'My dear Madam—a child cannot live by bread alone—he needs soul food. He needs toys.' I was just a little proud of that answer.

How to Avoid "Suppressed Desires"

"A third good woman charged me with fomenting a

FOURTH OF JULY GREETINGS

From Santa, the Reindeer and Bilbe.

The Southern California Music Co. featuring their juvenile musical instruments, urged the purchase of same in place of dangerous fireworks, stressing the fact that the children could have the noise in which they all delight, without the burned fingers attendant upon the shooting of explosives. Their window showed life size cutouts of four little children. One was seated on the floor beating a drum. One carried a flag, another a sword, and a third a bugle, while at the head was a tiny tot drawing a wooden cannon. A pair of cards announced "Now Our Country Is Safe" and "The Home that Has Music Always Provides a SAFE AND SANE Fourth of July."

Of course, most stores close on the Fourth of July, but people are apt to forget that fact, in order to remind them to make their purchases the day previous, the J. C. Penney Co., Albany, Ore., issued a classy little reminder.

OUR STORE WILL BE CLOSED FRIDAY

The day we burn our fingers while celebrating the signing of the Declaration of Independence falls on Friday. Accordingly, we will keep our fireworks and our oratory until that day, when, "weather permitting," we can all give full relief to our pent up enthusiasm and patriotism. However, rain or shine, this store will remain closed all day, so do your shopping before the closing hour Thursday.

If you wish to spend your Independence Day vacation enjoyably, let our store help you profitably with your preparations.

Previous ads of this store featured merchandise of many kinds to add to the pleasure of the celebration. They gave special prominence to a toy cannon that was noisy, yet absolutely without danger, as well as many kinds of flags, baseball and tennis equipment, and crepe paper decorations. They listed a number of specialties for children which could be purchased at 5c, 10c and 12½c each. Their announcement showing a group of children firing off one of the cannons was captioned:

FIREWORKS !

BOYS AND GIRLS: It's nearly the Fourth. Come to Penney's soon—isn't it good it's vacation—and choose your favorites.

They backed up this ad with a simple, yet very striking window. It showed an embankment covered with vivid green grass. Above it hung a flag, while a tall vase in the corner held red, white and blue flowers. Down in front was a little lad dressed in red and white, pulling a wooden cannon. On the bank and on the floor were a dozen of these Fourth of July toys, while a card advised: "Safe Toys for the Fourth of July."

In the toy section was a table devoted to the sale of safety toy cannons, and another to assorted fireworks. In cases arranged along the wall were favors for Fourth of July luncheons. These included crepe paper napkins stamped with the national colors, firecrackers filled with tiny candies; and bon bon and nut dishes fashioned out of colonial hats, drums and shields.

B. ALTMAN & CO.
SPORTING GOODS
for Little Huskies
Youngsters are always happier when they are doing something. For hours they will sit and build sand castles with the outfit above

This is the kind of progressive advertising done by a New York City department store. It successfully visualizes safety and happiness for children

Lansing Merger

DANCER BROGAN CO., 101 South Washington, for whom Mrs. F. Washburn was toybuyer, has merged with J. W. Knapp Co. (a Kirby, Block & Fischer store) at 220 South Washington, Lansing, Michigan, taking the Knapp name.

Miss V. Patterson is the toybuyer and her stock at the present time includes dolls and toys for the baby. An attractive showing is made on the second floor throughout the year. Wheel toys are now carried in the basement.

warlike spirit by selling toy pop guns. I should burn 'em all up, etc. Frankly, I don't see things that way. Theoretically, there may be something in what she's shooting at, but great snakes, if people get so supercivilized that they don't know what guns are, they always get bumped off by some rough and tough enemy nation that hasn't heard that a great reformation is under way. Then, again, to give a boy a woolly lamb, when his soul craves a gun, is to foster what the psychologists call 'suppressed desires.' When he gets the chance he'll get a real gun, know nothing about it, and do some real damage in his shooting. He might even become a stick-up man just to get even. I say give 'em harmless toy guns, and let 'em shoot the cussedness if it is that, out of their systems. Look what's happened with prohibition.

The Spendthrift with a Dollar Bill

"Now that I've started telling customer stories, let's shoot a couple more and quit. Another chap came in to buy Christmas toys last Christmas eve. He was just a little 'blotto'—waved a dollar at the salesgirl and demanded full value for his two kids.

"Now you'll probably think me a pretty nervy chap, poking into other people's business, but I just couldn't keep out of that little sale. You see, I knew that bird. He had plenty of kale for a real toy purchase—and I told him so and got away with it. I won't tell you all that I said—but it was plenty—and he took it standing up when I told him that when he was old he'd be glad I'd made him do the right thing by his kids.

We Don't Go After a Customer's Last Dime

"An earlier customer that day was a different cat entirely. He had $10 to spend on toys for his three kids, and placed his problem in our hands. That $10 meant a lot to him, and you can believe me when I tell you that I first found out all about those children of his—ages, dispositions, and all there was to know. Then I prescribed like a doctor, and I made the cost not $10, but $7.50. He wanted to spend the change I gave him, but I convinced him that he had just the toys he needed—and that there were other things in life besides straining for a customer's last available dime.

The First Scare of the Chain Store

"The coming of the chains to Wooster made quite a stir—as they have in many other cities—and in the early days the grocery boys called me for a visit to talk things over. I wasn't after applause, and for a long time a lot of them didn't talk to me—because I told them they wouldn't get very far in screaming 'murder.' I said that I had a sneaking notion that the dear public would grin, and say that maybe the chains weren't entirely vicious, and that they would improve the merchandising methods of the type of dealer that sits like a spider and aims to catch the consumers in a web of prices that may well be too high. I said that the public would be fair in the long run, and that the alert merchant who gave values had little to fear. But it was a long time before I was invited to make another address.

Woolworth Store Sought for Wooster

"Later on I was actually able to help get a Woolworth store in our city. I felt it would be good for business, and it was. My contention was that rival towns to Wooster, 'A,' 'B,' 'C,' all had the red front nickel and dime emporium, and that unless we had one too we'd get the jolly run around when Mr. and Mrs. Farmer decided to motor to one of the nearby shopping centers.

Freedlander's Advertisement Welcomes the Chain Store

"Another incident may be interesting to you. The day that a popular price department store opened I convinced my house that a cordial welcome advertisement was the correct procedure.

"You see, I had mingled with the shopping crowds who looked into the chain store windows before the official opening—and the one outstanding thought in John Q. Public's mind ran about like this: 'Ha, ha! Now these Wooster merchants will wake up and give us some values. They've had things their independent way for a long, long time. Now we'll see what we'll see!'

"As a cold matter of fact we independents had been shooting pretty darn square—but when the boys in the street get an idea in their Stetsons it's no time to be stubborn.

"That was the reason I shot a large advertisement of welcome to our friendly rival, the chain. Of course the heavy thinkers said I was crazy—but I think I can prove that I was just about right. To sulk, or to show fear would have been stupid. And now I'm satisfied that my reaction was the right one

Santa began to bounce the pretty nursemaid on his knee!

"Just one more yarn and we'll turn into our bunks.

Santa Claus Bounced Bigger and Better Babies

"We have a wonderful Santa Claus in our toy depart-

ment each Christmas—and in spite of his false whiskers, denoting age and dependability, he's a very young man. He has a great way with children, and last year sprung a new one in bouncing the kids on his knee as he told them about his reindeer.

"Well, that seemed to be all right in principle, but every once in a while I would pass by and find that he had raised his age limit for 'children.' Now as far as I know the 'toy age' is over in the early teens, but possibly loyalty to our cash register made him decide to first bounce the kids and then bounce the pretty nurse girls that came along with the kids.

"I had warned him several times about this—but he didn't really quit until one day he had his ears roundly boxed, and his false whiskers pulled up around his eyes

" 'Let that be a lifelong lesson to you,' I said. 'You surely know that children grow up and become adults.'

" 'That's why you're all wet as a toybuyer," he came back. 'Once a child always a child. Keep that in mind and make big money.'

"Eventually I had to fire him—but I suppose next Christmas he'll try to get the Santa Claus concession at Vassar

"Well, that's that—time to turn in. We'll say 'Auf wiedersehen' at Wooster."

Making the Most of Flag Day

Well in advance of Flag Day—June 14—all patriotic, religious, civic and fraternal societies should be canvassed and their flag requirements ascertained and, when necessary, assistance should be given in putting up the decorations.

A very effective publicity campaign was conducted by Sibley, Lindsay & Curr, Rochester, N. Y. Several days in advance they came out with a flag ad in which they said:

Every Schoolhouse, Every Store, Every Factory, Every Home

SHOULD HONOR THE AMERICAN FLAG.

The American Flag talks the language of freedom, so display it and show everyone where you stand. We carry all sizes. Drop in and pick one out.

We also handle bunting, metal devices, paper and cardboard patriotic novelties of all kinds.

One of their large windows was filled with flags of all kinds, in the midst of which was a framed card:

TO THE FLAG!

"I pledge allegiance to the flag of the United States of America, and the republic for which it stands. One nation indivisible. Liberty and justice for all."

DON'T FORGET OLD GLORY ON FLAG DAY—June 14

Large flags hung on the wall and stands of small flags of different sizes were scattered all through the display.

Lansing Dry Goods Co.

LANSING DRY GOODS CO., 313-17 South Washington, Lansing, Michigan, carries a few miscellaneous specialties in popular price toys during the year, and at the holidays carries a full line of popular priced merchandise. This store is a member of the Interstate Department Stores group.

How Toys Team With Hardware

VANDERVOORT HARDWARE CO., Michigan Avenue, Lansing, Michigan, carries a fine assortment of toys during the Christmas period and a few pick-ups during the year. Del Vandervoort, the buyer, was away fishing on the hot, sticky day your correspondent called, but the business was in the capable control of brother Tom in Del's absence.

If more managers would go fishing once in a while business would be better all around—and all of us would live longer.

Besides hardware and toys, this store carries a full line of sporting goods.

Northway's Toronto Toyland

S. W. MASON buys the toys for John Northway & Son department store, 24 Yonge Street, Toronto, Canada. A complete assortment is carried at Christmas, with just a small quantity of miscellaneous novelties on show during the balance of the year. Northway's is a medium sized dry goods store, catering to the quality clientele

INTERNATIONAL SILVER CO.

An International Silver Co. Product

Wise business experts have pointed out that women influence the purchase of 85% of all commodities. If it's 85% in all commodities . . . imagine what it must be in an ultra-feminine article like silverware. You can estimate it at 98% and never be accused of the slightest exaggeration. Therefore SILHOUETTE follows the most feminine slant in the world for its theme . . . fashion. SILHOUETTE brings, in silverware, the same basic Paris inspired lines women demand in frocks, hats, handbags, shoes . . . every article of fashion. For certain identical, right, true lines run through all things of beauty and good taste. Clean, stream lines. And these are the lines of fashion, and of SILHOUETTE.

THE NEW SILHOUETTE PATTERN

VIANDE . . the new knife

PATENT APPLIED FOR

The new dinner knife, the Viande, is of special interest. Short blade . . . long handle. Enabling one to press one's finger on the handle instead of the blade. It's the logical shape for a knife. However, to please your conservative prospects, we also make the regular conventional dinner and dessert knives in SILHOUETTE—thereby giving you the chance to give your customer the choice. We predict that Viande will be the regulation standard knife on tomorrow's tables... and it is ready for you today.

BLUE GRASS EIGHT DAY ALARM CLOCKS

THINK OF IT--for only a few cents more a clock can be had that requires winding only every eight days--**AND NOT EVERY DAY**--as most Alarm Clocks.

COMPARE the size, construction and attractive finish, large numerals, positive alarm.

It is clearly seen that the Blue Grass Eight Day Alarm is a wonderful value.

The alarm is long and loud.

Springs are enclosed in drums; movements are substantially constructed of brass and steel.

The case is of the thin model type and finished in burnished nickel.

Large alarm bell is in back--hidden by back cover; on and off switch is located in handy place and is positive in action.

Height 7¼ inches,
Diameter Dial 4¼ inches,
Thickness 2¼ inches.

(ILLUSTRATION IS ACTUAL SIZE)

A PERFECT TIME KEEPER—ONLY NEEDS WINDING EVERY 8 DAYS

BENCH

Sensitive—For Power

Compact and desirable. For machine shops and garages. Drills holes up to 9-16 inch with speed and accuracy. Has substantial one-piece frame, machined and fitted gears. Upper cone pulleys supported between bearings; countershaft with tight and loose pulleys. Feed lever and spindle held in position by a friction spring which automatically keeps the spindle up and out of the work. The work table is adjustable—up, down, or sideways. The base is planed so it may be used as a work table.

Drills to center of 10-inch circle, up to 9-16 inch holes. Greatest distance between base and spindle, 16 inches; between table and spindle, 9¾ inches. Travel of spindle, 3 inches. Diameter of spindle ⅝ inch Size of table, 7x8 inches; of tight and loose pulleys, 4x1¾ inches. Diameter of column, 2½ inches; of crown gear, 2¾ inches. Bored for No. 1 Morse Taper Shank Drills.

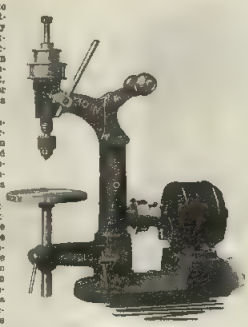
NO.	Height	Wt. Each	EACH
10SB	37 in.	120 lb.	$55.00

Junior—10-Inch

The 10-inch Junior Drill is one of the late additions to the Buffalo line. We are putting it on the market only after a period of thorough experiment in which the efficiency, reliability and design was severely tested. The finished product is an efficient, sturdy little bench drill, for accurate, small work at a moderate price

This drill is especially desirable in pattern shops, garages, machine shops, etc., on account of its small size and light weight, and also because it is much more convenient to work with than a larger drill.

The construction is of latest design and has one feature which is new in this type of drill. The belt may be shifted from one speed to another without loosening the idler, as this idler works on a pivot principle, and when shifted from one speed to another, the idler snaps into a socket which holds it securely. This eliminates the use of set screws and consequently saves a good deal of time.



Greatest distance of spindle to the table, 8 inches.
Vertical movement of the spindle, 3 inches.
Vertical movement of the table, 7 inches.
Diameter of the table, 8 inches.
Distance from center of the spindle to the frame, 5½ inches.
Drilling capacity, 0 to ⅝ inch.
Tight and loose pulleys, 4x1¾ inches
Speed of driving pulleys, 650 R. P. M.
Standard equipment includes No. 2A Jacobs Chuck. Can be furnished without chuck if desired.

Junior—10-Inch—Motor Driven

Same specifications as No. 10 Jr. except that it is furnished with motor, 110 Volt A.C.

NO.	Weight	EACH
10JM	130	$95.00

BENCH

Power—Three Speeds—10-Inch

A substantial one piece frame, assures perfect alignment of gears and shafts Upper cone pulley is supported between the bearings instead of being over-hung, increasing the power materially and reducing strain on the shaft. The feed lever is held in position by a friction spring which automatically keeps the spindle where it is placed. The work table is adjustable up or down, or can be pushed to one side. The base can be used as a table, being carefully planed and has countersunk bolts It will drill holes up to 9/16 in. with great speed and accuracy. The countershaft is supplied with tight and loose pulleys and belt shifter. The direct connected motor is ¼ h.p. of 1500 r.p.m

Drills to center of 10-in. circle.
Greatest distance from base to spindle, 21 in.
Greatest distance from table to spindle, 10½ in.

BUFFALO DRILLS E

UPRIGHT

For Power—15-Inch

Designed for accurate and efficient work, is of durable construction throughout. Top spindle bearing is bronze lined. Upper drive shaft bearing babbitted and split for easy adjustment. Main spindle bearing is adjusted by 3 set screws, wear is taken up easily. A very important feature.

Frame of drill is one piece casting of first class grey iron, accurately machined, column turned, ground and polished.

Has four speeds and lever handle adjustable from 6 to 12 in. Gears machine cut and guarded, insuring smoothness and safety.

Spindle made of high grade steel, graduated sleeve, end thrust of spindle being taken on ball bearings as shown in cut.

A feature is the way the spindle is counterbalanced. Until recently was by means of a weight in the column, but in our 15-inch is held in position by means of friction spring which automatically keeps it where placed.

Round adjustable table is furnished which can be raised or lowered by means of a screw. Furnish a tilting table if desired

Equipped with belt-shifter, conveniently located for foot operation. The spindle is regularly bored to take No. 2 Morse taper

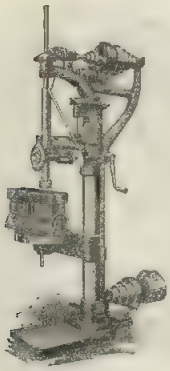
E BUFFALO DRILLS

UPRIGHT



Back Geared—24-in.

This machine especially designed for reboring and in addition has all requirements of a first class machine shop drill. It can be instantly changed from plain to back geared drive without using wrench, by disengaging a knurled knob in the top gear and throwing in back gears by means of hand lever. A locking screw is provided to hold this in place. An adjustable automatic trip throws out power feed when piece has been drilled to required depth.

The ball bearing spindle is accurately ground and sleeve ground and graduated. Lever handle is adjustable from 6 to 18 inches and is held in place by tension spring. All bearings are split and adjustable for wear. Worm feed gear runs in continuous bath of oil and is latch-hinged. Crown gears are made of high grade steel and run in heavy bronze bushings.

This machine is built with the same refinements as characterize all Buffalo Power Drills. Has practically all the advantages of higher priced drills and will drill to the center of 24 inch circle—with a spindle travel of 14½ inches; amply fitted to handle reboring work with ease.

Can be furnished direct connected to motor. Tapping attachment furnished at extra cost.

SPECIFICATIONS

Height of drill 83 inches.

"TOYS THAT TEACH"—A Toy Department in Itself.

MODERN "TOYS THAT TEACH" BLOCKS

Patent applied for

A most important feature of these Blocks is that a young child can by forming the picture of the Clown and Boy Scout and piling the three Clown Blocks on top of the three Boy Scout Blocks automatically produce the prismatic colors in their proper order, and the numbers from one to six in consecutive order, also illustrations of a nursery rhyme complete.

MODERN "TOYS THAT TEACH" BLOCKS

THE BLOCKS THAT SELL

Modern Blocks were first offered to the trade in 1929. The tremendous sale on this line indicated immediately that the features and workmanship on these block sets met with the approval of buyers.

These Blocks contain six educational features, and it is remarkable that all of these features could be incorporated into one set of blocks; in fact a set of these Blocks is really six toys in one. Remember that all of these features are contained in every set of MODERN "TOYS THAT TEACH" BLOCKS.

In selecting the features we obtained the advice of a number of recognized kindergarten authorities, because it is very evident that Toy Blocks with real educational features are a very important factor in the education of children. Naturally these Blocks will replace the old-fashioned spelling blocks, although there still remains enough of the alphabet where this is desired.

We are proud to add MODERN BLOCKS to our family of "TOYS THAT TEACH" believing that children will have many hours of instruction and entertainment with them.

Modern Blocks are made in all sizes to retail from 10c to $2.00. Send for Catalog and Samples.

THE EMBOSSING COMPANY, ALBANY, N. Y.

New York Office and Display Room — **Room 440 200 Fifth Ave.**

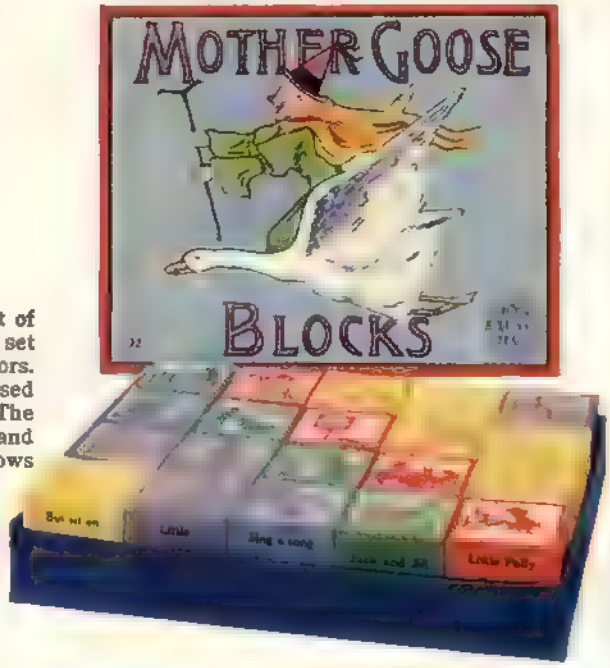
With proper display "TOYS THAT TEACH" Sell on sight.

NEW NUMBERS FOR 1930

ANAGRAMS

The Game of Anagrams has been popular always, but recently there has been a renewed interest in the game due no doubt to its educational advantages. In designing this set our aim was to offer the ideal color arrangement, black and yellow, proper size and style letters, and an embossed back so that one letter could not be distinguished from another, when face down. This is an ideal Anagram Set to retail at a popular price. See illustration at left.

Retails for $1.00.



NO. 92 BLOCKS

There will always be a good demand for a real high grade set of toy blocks with Mother Goose Illustrations and Rhymes. This set contains twenty 2-1 8" cubes, embossed and printed in six colors. Each block contains a Mother Goose Rhyme with the ends embossed with illustrations of the Rhyme. Sanitary washable finish. The sets are furnished in a cardboard box, also in a strong wood box, and in a substantial colored wagon. The illustration at the right shows the set in a cardboard box.

FIRST STEP COLORED PLAY BLOCKS

The name FIRST STEP "TOYS THAT TEACH" COLORED PLAY BLOCKS was selected for these sets because we believe this type of toy should be the first given to the child. The sets which contain blocks in the six prismatic colors will teach colors and simple designing, and the blocks are just right for piling.

Sets retail from 50c to $2.00.

"TOYS THAT TEACH"—Happy Contented Children.

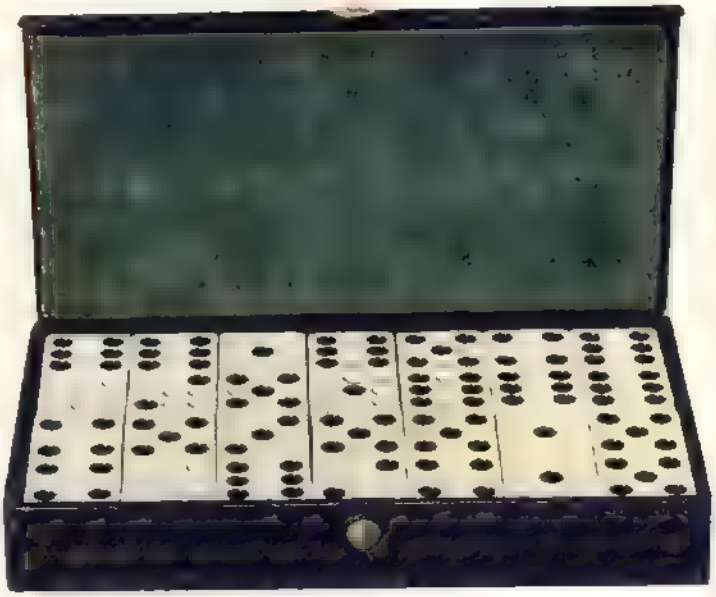
NEW NUMBERS FOR 1930

POPULAR TOY BLOCKS

This is a new line of popular priced Toy Blocks offered first in 1930. The features are along modern ideas. We call particular attention to the embossed letters on the blocks, which are plain and distinct. The illustrations too were very carefully selected for children of the toy block age. While we show an illustration of only one set in this line we have sets to retail at all prices from 10c up.

The blocks are made in three sizes—1-1/16″, 1-5/16″ and 1-11/16″ cubes. Illustration of the 1-11/16″ cube is shown above.

1930 CELLULOID DOMINOES



In offering our "1930" Dominoes, we have a practical, high grade set of Dominoes attractively packed. At the right is an illustration of the complete set, as well as the single Domino pieces showing front and back. This is a high grade set of Dominoes to retail at a fair price. The pieces are white celluloid with black dots, with an attractive design on back. Packed in special heavy snap fastener box covered with decorated cloth, with green velvet lining pad on cover.

Retails for $5.00

The all year 'round line—"TOYS THAT TEACH".

NEW AND POPULAR NUMBERS

On this page are illustrated an assortment of new and popular numbers. Most of them have been added to our lines within the last few years; they are all ready sellers, and items which should be in every toy department. The educational phase of "Toys That Teach" is more pronounced than ever. We seek the counsel of educators in originating and developing new ideas. Our line has been increased and made more attractive, interesting, and easy to sell. The demand for "Toys That Teach" indicates that most buyers are familiar with this line; if you are not let us send you catalog and samples.

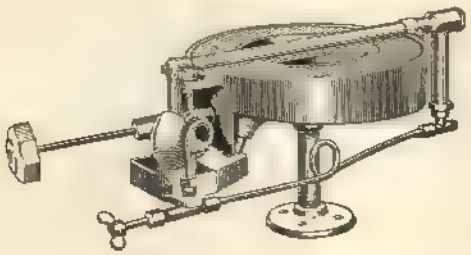
GASOLINE BURNERS

COLEMAN

Made to meet the demand for a complete and dependable cooking unit where natural gas cannot be obtained or where the gas supply cannot be depended upon; can be attached to any hollow wire system or used independently with a 10-gallon fuel tank.

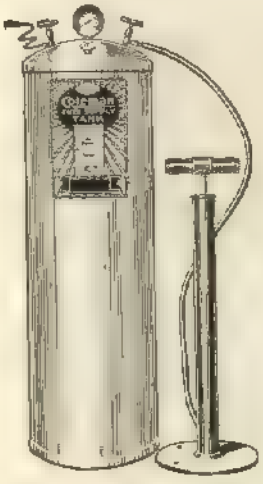


Model No. 505. The most popular burner in the line. It is a five-inch burner, match lighting, and suitable for light or heavy duty. The long-lived brass generator can be easily cleaned or replaced. Burner is furnished with either pedestals or stove supports. Wt. each, 5 lbs.....Each **$8 25**

Model No. 707. Built for large capacity urns, boilers, or vats. Has 7-inch burner casting. Is match lighting. Wt. each, 9 lbs. .....Each **$12 00**

FUEL TANKS

COLEMAN



Supplies fuel under pressure to water heaters, urn burners, stoves, etc. This is a ten gallon tank with six gallons of fuel capacity and four gallons of air space, equipped with air gauge, brass valves, hand operated filler plug and pressure pump. Made of heavy gauge galvanized steel, all seams electrically welded, to withstand several times normal operating pressure, carefully tested, and guaranteed.

No. 652A. With pump, wire assembly consisting of 16 feet of wire with fittings attached, wall valve and special filler plug for connecting with tank on stove or radiant heater. Ship. wt. ea. 28 lbs. .....Each **$15 90**

No. 652B. With pump only. Ship. wt. ea. 25 lbs.Each **$13 50**

No. 65W. Wire assembly, wall valve and special filler plug. Ship. wt. ea. 3 lbs. .....Each **$2 40**

OVENS

These ovens are superior to the ordinary oven in several ways. The body is made in one piece, free from seams, preventing rust and making the oven very easy to clean as well as more attractive. The tight-fitting spring door retains all the heat. The asbestos insulation is **clamped** to the tin linings, **not pasted** to the outside walls. Pasted linings soon loosen and sag from heat and moisture, thus preventing circulation. These ovens are scientifically designed for perfect heat circulation and ventilation. The V shaped flame spreader directs the heat to the sides, preventing heat from striking door and breaking the glass.

No. 22. Baking capacity 18 in. wide, 12 in. high, 12½ in. deep. Wt. 22 lbs. .....Each **$5 25**

No. 155. Baking capacity 10¾ in. wide, 8 in. high, 10¼ in. deep. Wt. each, 8 lbs. .....Each **$2 50**

GASOLINE LAMPS

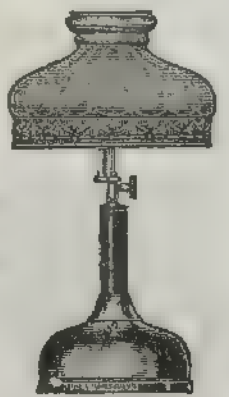
One in carton; wt each 6½ lbs.

GASOLINE LAMPS
COLEMAN, "QUICK-LITE"

The latest types of hydro-carbon gasoline lamps. They produce a very powerful, bright light (approx. 300 C. P.) at a minimum cost. The construction is such that they cannot explode will not smoke nor smell. Ideal for homes, yet can be used for stores and halls by suspending from ceiling by an extra wire and ring which are furnished with each lamp.

They have three features that make them different from all other gasoline lamps. The first and most important is that it lights with common matches instead of being generated with an alcohol torch. The second is the simplicity of maintenance. Third is that the burner is supported by the air intake tube which takes the air below the mantles where it cannot be affected by heat.

Seamless brass fount. All lamps regularly furnished complete with mantles, pump, wrench, hanger, cleaning pick and extra generator.



Nickel Plated, Polished Fount.

Ornamental opal paneled glass shade.

Each

No. C329—Capacity 3 pts, burns 15 to 18 hours; height over all 20 ins; diam shade 10 ins $18 00

One in carton; ship wt each 10½ lbs.

COLEMAN, "QUICK-LITE"

Nickel Plated, Polished Fount.

Opal panel glass shade fitted with asbestos coated wire bug screen, which protects the mantel from flying insects.

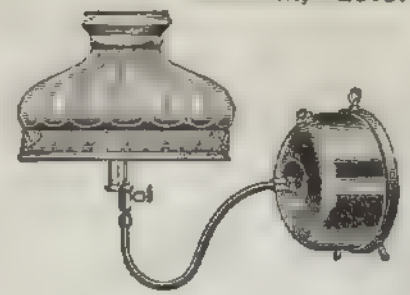
Each

No. C333—Capacity 3 pts, burns 15 to 18 hours; height over all 20 ins; diam shade 10 ins $20 25

One in carton; wt each 11 lbs.

GASOLINE LAMPS

COLEMAN, "QUICK-LITE"



Bracket, Wall Or Table Lamp.

Last Call For
EASTER

Make Every Toy an Easter Toy. Clean Out the Slow Movers. This Article Tells How

THERE's still time to plan for Easter. It falls this year on Sunday, April 20th. To grown-ups it has several points of significance—to some its religious aspect is the big thing; to others it presages the height of style in garment finery. But to the youngsters it means that "school is out."

Easter brings certain ingredients which, if mixed together, automatically point to toy sales. The school vacation means the necessity for play materials to aid in whiling away the time. Sufficient time has elapsed for Christmas toys to have lost interest or to have reached a stage of obsolescence that makes replacement necessary. And that most important ingredient—legend, or custom—decrees, just as it does at Christmas time, that the children must get gifts significant of the occasion.

Bunnies, Chicks and Eggs

It is not the purpose of this article to dwell upon those types of merchandise which from time immemorial have been regarded as "hot Easter numbers." The Easter eggs, bunnies and chicks have sufficient background, established through the ages, to place them in the foreground as Easter sellers. Nor is it the purpose of this article to enumerate any of the stunts or features that enterprising toy dealers can stage, at a relatively small expense, as an aid in drawing the children and their parents to the toy department. The past two issues of PLAYTHINGS have carried suggestions for these features and have shown the type of advertising and window display necessary to bring the crowds.

Moving The Slow Ones

This article concerns itself primarily with the moving of the poorer sellers. While it is true that a check-up throughout the nation proved that stocks carried over into 1930 were at the lowest mark in history, these reports were for the entire toy stock and did not take into consideration certain isolated types of merchandise. Were there any little errors made in judgement on certain toy lines? Were there any other types of toys on which conditions beyond control slowed up the sales? Or possibly, as happened in certain sections of the country, weather conditions at the height of the Christmas rush prevented the expected attendance. All of these things probably meant a certain amount of carry-over. And it is for these toys that this article is written. Change them over into Easter toys and sell them.

How The Plan Works

This is not a idle statement. It is a plan that has been worked to advantage by toy merchants year after year; it is a plan through which toys that couldn't under any circumstances be sold at Christmas have sold at prices that even more than made up for the additional carrying charges. We have seen imported toy garages which could not under any amount of pressure be made to sell at Christmas time for $1.00, sell for $1.50 at Easter; we have seen a large stock of 50c toy wagons that couldn't be moved, move at $1.00 during the Easter holidays; we have seen groups of cheaper toys, which as individual items did not sell, disposed of at a price in excess of that reached by the total of the individual prices.

Ribbon — Plus Chicks

The transition from a slow-moving Christmas number to a fast-selling Easter item is accomplished at a few cents cost. The $1.00 garage has a few yards of ribbon wound around it, and perched on the roof is a tiny fluffy chick. Presto! It became a $1.50 Easter toy. The toy wagon carried over from Christmas also gets its decoration of colorful ribbon and a chick. Result—another fast-selling Easter number. In short, the plan by which this change is brought about is merely the taking advantage of what folk lore through the ages has always associated with Easter. Dress up a prosaic toy in Easter raiment and it immediately carries an additional appeal to the buying public.

Groups of Toys

A large number of stores seize on Easter to group their toys together and obtain six or a dozen sales where before one sale was difficult. An Easter basket plus a rubber ball, a top, a toy glider, and toys of similar type and price, can be sold at a price exceeding the retail figures for the toys included and the cost of the basket. Similar baskets are readily made up for the girls—with

Scene at the Tournament Recently Held at the Hotel Pennsylvania, New York

rivalry on the Ping Pong table. Then word began to get around of Ping Pong games in private dwellings, where the bridge table was forsaken to settle the question of supremacy on the green table. Then leading department stores staged tournaments, to which an international flavor was added by participation of champions from all countries, these appearing from Hungary, England, France, Germany all countries, in fact, having their entrants

A Job Well Done

Naturally, back of this revival there must have been the strong hand of organizations or individuals who, believing in the merits of Ping Pong, were taking it upon themselves to sell its possibilities to the world

Especially active in exploitation of Ping Pong is Mr. E B. Rose, New York Manager of Parker Bros. His understanding of the best method of deeply interesting the public has had much to do with the accomplishment of the revival of Ping Pong and the establishing of it upon a basis of approved laws and specifications. The newspaper publicity accomplished through Mr. Rose's efforts has been of vital importance in increasing the interest throughout the country to the great benefit of the dealers as well as of the playing public.

The newspapers and magazines are continually carrying stories of Ping Pong. The public is having held up to them the possibilities of sport recreation, skill and exercise that exist in this game. The public is apparently accepting Ping Pong and it is this public acceptance, in this revival, that the opportunity rests for the toy dealer.

Stage a Tournament

Stage a Ping Pong tournament of your own. We don't hold out the hope that you will get four hundred entrants, but we are firmly convinced that the revival has now reached a point where enterprise of the dealer in staging such a tournament will be rewarded by interest on the part of the people in the dealer's community And it goes without saying that to attain proficiency means practice—that practice, in turn, means the necessity for equipment, and the necessity for equipment means sales of Ping Pong sets and tables.

The American Ping Pong Association

Another suggestion. Why not, in your community, organize a local chapter of the American Ping Pong Association? This organization, patterned closely along the lines of the U. S. Lawn Tennis Association, is now past the formative period and is an established organization. Details relative to methods of organization and helpful hints in the matter of creating profitable interest in your community can be obtained from the American Ping Pong Association, 175 Fifth Avenue, New York City.

Ping Pong has revived. Toy dealers are going to make money out of this revival. Just which toy dealers these are going to be, however, rest with themselves. In short, the ones who make the money are the ones who are going after the business.

jackstones, jump ropes, painting sets, sewing sets and other numbers particularly designed for the little ladies. These need not be confined to the lesser priced grade of toys, baskets retailing up to $10.00 selling quite satisfactorily. The appeal on the basket is two-fold. It removes the burden of choice for the parent and, at the same time, contains a variety of toys calculated to keep the youngster satisfied for many days to come.

The plan by which all toys are turned into Easter numbers is simple. It does not entail heavy outside purchases; it needs no experts. It simply means taking girls with an aptitude for decorative effects and putting them to work trimming toys and making up baskets.

Easter carries with it time-honored opportunities. Stuffed toys have a particular appeal; vehicles come into their own due to the fine days that mark the holidays. These opportunities of themselves should be sufficient to make the dealer determine to feature this period as "a little Christmas." But when with Easter comes the added opportunity for disposal of the carry-overs, for getting rid of those constant reminders of something that didn't go as well as expected, when it offers what might be properly called the final clean-out opportunity, then it certainly merits every toy seller's best attention. Make the most of this chance! Sell Easter toys, but make all of your toys come properly under this classification.

A Doll Surgeon

Benjamin Hoffman, Richmond Hill Merchant, Says Boys Prefer Brunette Dolls as Well as Blondes

By Dick Lee

BENJAMIN HOFFMAN

"The Doll Surgeon of Richmond Hill"

"DR" Ben Hoffman, owner of Hoffman's Doll Hospital, Richmond Hill, L. I., N. Y., has practiced doll "surgery" for fifteen years. Many of his "patients" have been in dire distress, but he has managed in all cases to start them on the road to recovery. His deft fingers have restored "fractured skulls," "sightless eyes" and "broken limbs" hundreds of times. Naturally, so skilled a "surgeon" has his reminiscences.

"Life in a doll's hospital is not one of pain for the 'patients,'" 'Dr. Hoffman said. "The trying ordeal of the 'operation' is always reserved for the 'parent.' Six-year-old 'mothers' sometimes come into my hospital with their 'babies' who have been crushed underfoot, prodded in the eyes with sticks, or chewed by dogs. In such cases, I am called on to remove the 'injured' parts. When this happens, it is always the little 'mother' that cries—never the 'parent.'"

'Dr.' Hoffman, in addition to his doll hospital, carries a very complete line of toys, dolls, novelties, sporting goods and musical instruments. He has built up his business in these lines to its present thriving proportions by his modern merchandising ideas, his friendly counsel and advice that customers have come to rely on, and through the reputation that he enjoys of carrying a very wide and complete stock to choose from.

In the doll section, many hundreds of this type of plaything are to be found on the shelves

There are big dolls and little dolls, blondes and brunettes, "boys and girls," some of them walk, talk and sleep. Others have none of these human attributes. All of them, however, are pretty, enticing and appealing. All sorts of people buy them. Many of them find their way to foreign countries, where Americans have small nieces and nephews. Some of the dolls which have been returned to 'Dr.' Hoffman's hospital for "operations" are as much as forty years old

Dolls for Adults

"It may seem a bit untrue, many a childless couple have bought dolls to take the place of the children they never had," said "Dr." Hoffman. "A couple bought a doll for that purpose only recently. They paid twenty-five dollars for the doll and almost as much for its clothes, which I carry in stock at all times They bought a silk dress, silk stockings, a lace cap, fancy shoes and a hat and coat. They freely admitted why they wanted the doll

"Handling dolls for fifteen years has taught me a good deal about human nature. Children who own dolls take very good care of them. They are on the way to good parenthood. When a mother comes into my hospital with a broken doll, she invariably says, 'My little girl borrowed this doll from the girl next door, and she dropped it on the walk.' It is as I said—the girl who owns a doll seldom breaks it."

"Dr." Hoffman was a little shy about claiming ability to determine the nature of the child by the type of doll for which it expressed a preference. He said, however, that both boys and girls like dolls. Some mothers, he said, will buy dolls as birthday anniversary gifts for girls as old as 16, 18 and 20. He refused to admit, on being questioned, that the majority of little boys prefer blondes.

Abraham Meier

THE trade will regret to learn of the death of Abraham Meier, President of Meier & Frank Co., who passed away in his sixty-second year at his home in Portland, Oregon. Mr. Meier was one of the founders of the firm, which was established back in 1857.

He is survived by his brother, Julius Meier, the present Vice-President and General Manager, and also a son, Alan, who now serves as Merchandise Manager.

The Ideal Bulldog

3 and 5 Unit Gang Mowers
For Tractor and Horse Drawn Service

Designed for use on golf course fairways, parks, estates of large acreage and grounds of similar character.

Frame is of extra strong, reinforced angle steel, hinged for flexibility and mounted upon wide faced caster wheels which carry the assembly weight. Sturdy "Bulldog" Cutting Units attached to frame by side arms and are pushed beneath frame just as a hand mower is pushed. Cutting units free to move up and down to conform to ground irregularities. Will not bob or sway on side hills or in heaviest cutting. Tests prove that it can travel faster than any other gang mower and do good work.

Cutting units easily lifted completely off the ground. Mower turns easily, can be backed up, and cuts right up close to obstructions. Close-coupled, low-wheeled "Bulldog" Cutting Units insure years of service at minimum up-keep cost.

3-Unit Bulldog Mower
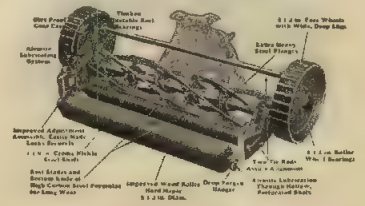
Horse Hitch

Used on over 1,000 Golf Courses Noted for Long Life and Low upkeep cost.

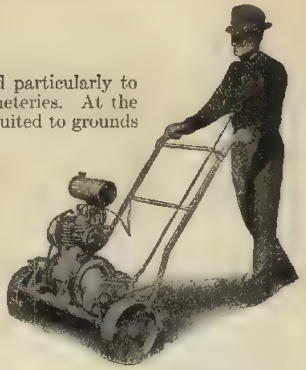


The Bulldog Cutting Unit
Simple Sturdy Construction

Ideal Power Lawn Mowers—Wheel Type

Ideal "Twenty-Five"

A Flexible Mower



The Ideal "Twenty-five" is a wheel type mower adapted particularly to the work on lawns having steep grades and for use in cemeteries. At the same time, it does a very smooth job of cutting and is well suited to grounds of any character.

It has ample power and the extra wide wheels provide sufficient traction to negotiate any grade that it is possible for any power lawn mower to climb—and it wades right through thick, heavy grass with ease.

With a capacity of from four to six acres per day, it is particularly suitable for medium size estates, parks, schools, colleges, cemeteries, etc., having lawns with steep grades. Power is applied to both drive wheels and cutting unit. Control levers conveniently placed.

Specifications

Power—4 cycle, air cooled engine.
Bore, 3 in.; stroke, 3¾ in.
Width Cut—25 in.

Speed—2 to 4 miles per hour.
Capacity—4 to 6 acres per day.
Width Wheels—3½ in.

Diameter Wheels—12 in.
Net Weight—310 lbs.
Shipping Weight—390 lbs.

Price..... $295.00
Extra for grass catcher..... 6.00

Ideal "Twenty"

A Sturdy Reliable Mower

Having a capacity of from 1 to 3 acres per day it is just the mower for use on any grounds too large to be conveniently cut with hand mowers. It handles as easily as a hand mower. A splendid outfit for cemeteries and trim up work in parks.

Thousands of home owners can afford this small "Twenty" who would not care to invest in the larger and more expensive power equipment. Home owners who do not relish the hard job of pushing a hand mower will welcome this reliable little machine.

Very easy to operate, having automobile type differential, and with clutch and throttle controls conveniently located on mower handle. Well balanced design and without exception the sturdiest small power mower ever built.

Specifications

Power—4 cycle, slow speed engine
Bore, 2¾ in.; stroke, 3 in.
Width Cut—20 in.

Speed—From 1 to 3 miles per hour.
Capacity 1 to 3 acres per day.
Width Traction Wheels—2½ in.

Diam. Traction Wheels—12 in.
Net Weight 245 lbs.
Shipping Weight 315 lbs.

Price..... $195.00
Extra for grass catcher..... 5.00

Ideal Power Lawn Mowers—Roller Type

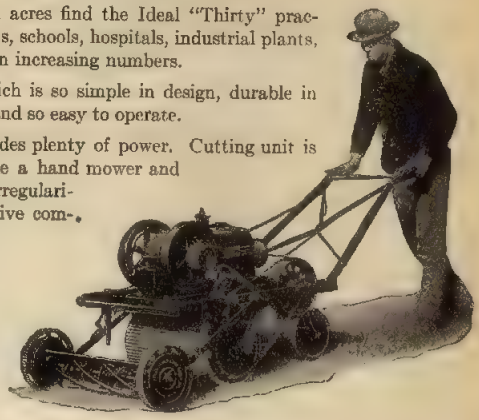
Ideal "Thirty"

It Rolls as it Cuts

Home owners with lawns of several acres find the Ideal "Thirty" practically indispensable—park departments, schools, hospitals, industrial plants, ball parks, cemeteries are using them in increasing numbers.

There is no other power mower which is so simple in design, durable in construction, dependable in operation and so easy to operate.

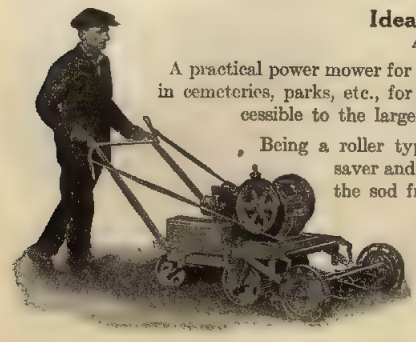
The slow-speed, 4-cycle engine provides plenty of power. Cutting unit is pushed ahead of the machine just like a hand mower and is so suspended as to conform to all irregularities. Two levers on steering handles give complete control.



Specifications

Power—4 cycle, slow speed engine. Bore, 4 in.; stroke, 4 in.
Ignition—Magneto.
Width Cut—30 in.
Speed—2¾ miles per hour.
Capacity—5 to 7 acres per day.
Width Roller—24 in.
Diameter Roller—14 in.
Net Weight—630 lbs.
Shipping Weight—800 lbs.

Price	$385.00
Extra for riding trailer	25.00
Extra for grass catcher	12.00



Ideal "Twenty-Two"

A Real Lawn Builder

A practical power mower for small and medium size lawns, also widely used in cemeteries, parks, etc., for trimming and cutting in narrow places not accessible to the larger mowers.

Being a roller type mower the "Twenty-two" is both a labor saver and a lawn builder as frequent lightrolling keeps the sod free from irregularities, smooth and vigorous.

It is a simple mower that anyone can operate—it takes all the hard work out of mowing. Guides easily around trees, flower beds, etc. The reliable 4-cycle, air-cooled engine and Ideal "Bulldog" cutting unit assure years of service.

Specifications

Power—4 cycle, slow speed engine. Bore, 3¼ in.; stroke, 3¾ in.
Ignition—Magneto.
Width Cut—22 in.
Speed—3 miles per hour.
Capacity—3 to 4 acres per day.
Width Roller—17 in.
Diameter Roller—10 in.
Net Weight —430 lbs.
Shipping Weight—575 lbs.

CABINET MAKERS' RABBET PLANES

STANLEY

Bull Nose.

Designed for fine cabinet work where extreme accuracy is desired; the sides and bottom being square with each other, the plane will be perfectly flat on either side, and can be used right or left; both the cutter and width of throat opening are adjustable. The front can be removed to make a chisel plane; handy grip; nickel plated

No. 90. Adjustable; length, 4 inches; cutter, 1 in.; Wt. ea., 1 lb..Each $4 75
1 lb. .....Each $4 75

Regular Pattern.

Will lie perfectly flat on either side, and can be worked either right or left; adjustable throat; cutter adjustable endwise; removing the front makes a chisel plane; handy grip; nickel plated.

No. 92. Length, 5½ inches; cutter, ¾ in. Wt. ea., 1 lb.....Each $4 75

No. 93. Length, 6½ inches; cutter, 1 in. Wt. ea., 1½ lbs.....Each $5.75

SIDE RABBET PLANES

STANLEY

Very convenient for side-rabbeting in trimming dados, mouldings and grooves of all sorts. A reversible nose-piece gives a form whereby it will work close up into corners. Rosewood knobs; nickel plated. Fitted with Depth Gauge.

No. 98. Right hand. Length 4 in.; cutter, ½ in. Wt. ea. ½ lb.Each $2 35

No. 99. Left hand. Length 4 in.; cutter ½ in. Wt. ea. ½ lb..Each $2 35

All above, one in a box.

FILLETSTER AND RABBET PLANES

STANLEY

Japanned. Nickel Trimmings.

Has two seats for the cutter, one for regular work and the other where a bull nose is required. Also spur and removable depth gauge. Adjustable fence can be used on either side and slides under the bottom, regulating width of cut. To work same as a rabbet plane, remove fence and arms.

No. 78. Length, 8½ inches; cutter, 1½ inches. Wt. each, 8 lbs.Each $3 95

Japanned. Nickel Trimmings.

Sides and bottom being square with each other, the plane will lie perfectly flat on either side; an adjustable fence slides under the bottom, regulating width of cut. Has spur on each side for working across grain, also adjustable depth gauge; suitable for right or left hand work; front part can be detached, providing bull nose plane for close work; cutter is adjustable endwise.

No. 278. Length, 6¾ inches; cutter, 1 inch. Wt. each, 2 lbs.....Each $3 80

PLOW, DADO, FILLETSTER AND MATCHING PLANES

STANLEY

Nickel Plated.

Skew cutters are the feature of this plane. Consists of a main stock carrying spur, depth gauge and slitting cutter, a sliding section carrying a spur and forming an extra sole for the plane, and a fence (rosewood face) which can be set for either plow or filletster work. Rosewood handle and knob; cutters comprise 9 plow and dado bits, 3/16, ¼, 5/16, ⅜, ½, ⅝, 13/16, ⅞ and 1¼ inch; a 1½ inch filletster cutter; a ¼ inch tonguing tool, and a slitting cutter.

No. 46. Length, 10½ inches; 12 cutters. Wt. each, 5¾ lbs.....Each $9 50

All above, one in a box.

PLOW, BEADING AND MATCHING PLANES

STANLEY

Nickel Plated.

Very handy tool for light work; consists of main stock, carrying spur and depth gauge, and forming a support for one side of cutter; a sliding section, carrying a spur and forming a support for the other side of cutter, and a fence with a 5-inch adjustment. The handle is metal, being part of main stock. Cutters comprise 7 plow and dado bits, ⅛, 5/16, ⅜, 7/16, ½, ⅝ and ¾ inch; 7 beading tools, ⅛, 3/16, ¼, 5/16, ⅜, 7/16 and ½ inch; and a ¼ inch tonguing tool.

No. 50. Length, 9¼ inches; 15 cutters. Wt. ea., 3¾ lbs....Each $10 35

DADO PLANES

STANLEY

Japanned Iron.. Nickel Plated Trimmings.

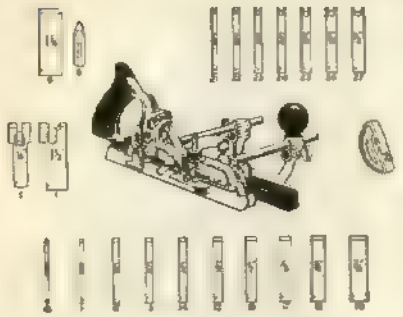
The great advantage over those made of wood is that they will keep true under all conditions, even in the narrowest widths. They have skew cutters, an adjustable depth gauge, and two adjustable spurs, one on each side. This adjustable feature permits of the spurs being adjusted to take up wear, as well as for depth of cut.

No. 39. Cutter, in...	¾	½	¾
Length, in.	8	8	8
Wt. each, lbs., ...	1¾	1¾	2
Each $3 85	4 30	4 70	

All above, one in a box.

"FORTY-FIVE" COMBINATION PLANES

STANLEY



Nickel Plated.

Seven tools in one in a compact and practical form. 1. Beading and center beading plane. 2. Plow. 3. Dado. 4. Rabbet and filletster. 5. Match plane. 6. Sash plane. 7. Slitting plane. The plane has two principal parts, a main stock, and a sliding section; the main stock carries the handle, cutter adjustment, a slitting tool, depth gauge, and forms a bearing for one edge of cutter. The sliding section slides on two arms secured in the stock and has a bearing for the other edge, allowing cutters of different widths to be used. A fence slides on these arms for use when working as a plow, beader or filletster, to gauge distance from cutter to edge of board, and to keep cutter at right angles to same. When used as a filletster, the fence slides under the bottom of plane and determines width of cutter exposed to the work. The plane is fitted with spurs for use across the grain, etc., and can be used either right or left hand. With each plane are furnished twenty-three cutters, all of which are shown in cut. The cutters, together with plane, are packed in a neat substantial box. All metal parts are nickel plated. The handle, knob and fence are made of selected rosewood. For beading at a distance from edge of a board, attach cam rest (see cut at right of plane) to front arm between sliding section and fence to prevent fence sagging. In certain work attach same to rear arm to prevent plane from rocking.

No. 45. With 21 cutters. Wt. each, 9½ lbs. .....Each **$15 00**

One in a box.

The following cutters are furnished with each plane. The price is given in case duplicates should be required:

PARTS FOR "FORTY-FIVE" PLANES

SPECIAL BOTTOMS

To work hollows and rounds, or a nosing cutter in the No. 45 plane, specially formed bottoms are furnished called hollows, rounds, or nosing tools.

A hollow and its cutters will form a ROUND on the moulding being worked. A Round and its cutters will form a HOLLOW. A nosing tool and its cutters will form what might be called an exaggerated round, as in shaping edges of stair treads. Hollows and rounds are made in four sizes, and are usually sold in sets, a set comprising one hollow, one round and two cutters. A nosing tool includes one cutter.

No. 6. Hollow and round, ½ inch cutters; work ¾ inch circle. Pair **$2 80**

No. 8. Hollow and round, ⅝ inch cutters; work 1 inch circle. Pair **$2 80**

No. 10. Hollow and round, ¾ inch cutters; work 1¼ inch circle. Pair **$3 00**

No. 12. Hollow and round, 1 inch cutters; work 1½ inch circle. Pair **$3 00**

No. 5. Nosing tool, 1¼ inch cutters; work 1¼ inch circle.....Each **$2 00**

TONGUE AND GROOVE MATCH PLANES

STANLEY

Swinging Fence.

Nickel Plated. Rosewood Knob.

This form has two plow cutters of same width, and one extra wide cutter The fence in one setting exposes two cutters for cutting the tongue, and when reversed, leaves only one exposed for cutting groove. On thicker boards than the plane works on center, the extra wide cutter is used when cutting tongue.

No. 48. Cuts 5/16 in. groove, on boards ¾ in. to 1¾ in. Centers on ⅞ in. Wt. ea. 2½ lbs. .....Each **$6 30**

One in a box.

"FIFTY-FIVE" COMBINATION PLANES

STANLEY

Nickel Plated.

This tool, in addition to being a beading and center beading plane, plow, dado, rabbet, filletster, match plane, sash plane and slitting plane is also a superior moulding plane, and will accommodate cutters of almost any shape and size. In fact, it is "A PLANING MILL WITHIN ITSELF."

The regular equipment sent comprises fifty-five cutters, all of which are shown in cut. These cutters, together with plane and all attachments, are packed in a neat box. A further line of forty-one cutters can be supplied from factory. Cutters of practically any form can be used in plane, which owner can make from blanks or order from sketch. All metal parts are nickel plated. Handle and fences are made of selected rosewood, and every part is well finished.

No. 55. With 55 cutters. Wt. each, 15¼ lbs. .....Each $30 00

One in a box.

The following cutters are furnished with each plane. The price is given in case duplicates are required.

ROUTER PLANES

STANLEY

For surfacing the bottom of grooves or other depressions parallel with the surface of the work. A wooden bottom of any size can be attached to Nos. 71, and 71½ to router on large openings.

OPEN THROAT

The cutters are adjustable, and can be held on the front of the cutter post for regular work or on the back, for bull-nose work. An attachment is furnished for closing the throat, for use on narrow surfaces, and regulating depth of cut. Maple knobs, nickel plated.

Three cutters are furnished: ¼ and ½ inch router cutters and a patented (3 piece) "V" or smoothing cutter.

No. 71. Length 7½ ins. Wt. ea., 2⅝ lbs. .. ..Each $3 90

CLOSED THROAT

The cutters are adjustable and can be held on the front of the cutter post for regular work or on the back for bull-nose work Maple knobs, nickel plated.

Three cutters are furnished: ¼ and ½ ins. router cutters and a patented (3 piece) "V" or smoothing cutter.

No. 71½. Length 7½ ins. Wt. ea., 2½ lbs ....Each $3 10

All above, one in a box.

EDGE TRIMMING PLANES

STANLEY

Japanned.

Designed especially for trimming or smoothing ends of boards, such as sidings, etc., for a square or close fit. Has right angle rest or guide from cutter edge, and cutter works on a skew giving an easy shaving cut. In the rest or guide are two screw holes to which wood blocks of various bevels may be attached enabling user to make a slanting cut.

No. 95. Length 6 inches; cutter ⅞ inch. Wt. each, 1¼ lbs. ..Each $2 50

VENEER SCRAPER PLANES

STANLEY

Single Handle.

Has rosewood handle and knob, having same form as regular Bailey plane, and preferred by some users to the two-handle or double grip form of scraper plane; blades are adjustable endwise and for angle, and can be firmly locked in position desired; can also be used as a toothing plane, doing excellent work in scraping off old paint or glue, and in roughing up surface of wood preparatory to veneering same.

No. 112. Length 9 inches; cutter 2⅜ inches; japanned. Wt. each, 4 lbs. .....Each $5 10

All above one in a box.

DOVETAIL PLANES

STANLEY

The only plane manufactured that will cut a dovetail. It will cut any size grooves and tongues to fit, with sides at flare of 20 degrees, where the width of the neck is more than ¼ inch and the depth of the groove not more than ⅝ of an inch. The tongue and groove are cut separately and can be made with parallel or tapering sides.

No. 444. Nickel plated. Length 6 ins. Wt. ea. 5 lbs. ....Each $10 65

SCRAPER PLANES

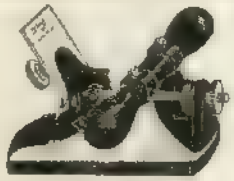
STANLEY

Double grip, rosewood handle. Blades are adjustable endwise and for angles. Japanned.

IRON BOTTOM

No 12. Length 6¼ inches. Width of blade 2⅜ inches. Wt. ea., 3½ lbs .....Each $4.70

HARDWOOD BOTTOM



No. 12½. Length 6¼ inches. Width of blade 2⅜ inches. Wt. ea. 4 lbs. .....Each $6 40

All above, one in a box.

CAR WRENCHES

ADVANCE SAFETY

Cast steel black japanned finish; maple handle natural finish. Automatically adjusts itself for attaching to any size winding tap on standard drop bottom cars.

Each

No. 50SCW—Length of handle 52 ins ..... ✚$15 75

Packed loose; wt each 14 lbs.

CAR MOVERS

NEW BADGER

Cast steel, black japanned finish; natural finish select northern maple handle. A combination of a pinch bar and toggle action which provides great force, importing a turning motion to the wheel, moving car forward. Equipped with slip-proof spurs that grip the unpolished edges of rail eliminating the possibility of mover slipping.

Each

No. 5—Length handle 53 ins $16 50

Packed loose; wt each 18 lbs.

EXTRA SPURS

For No. 5 car movers.

Per Set

No. 22—Two Slip-proof safety spurs $1 65

Packed loose; wt per set 4 ozs.

EASY

Japanned, solid steel bar, tempered at points; malleable iron heel with extended lugs to prevent slipping; finest tool steel triangular bit, grips rail firmly and prevents slipping back. Bit can be inverted and all three sides used. Steel spring prevents bit touching rail when not in actual operation.

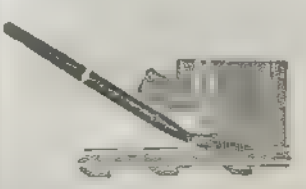
Each

No. 15—Length 6⅜ ft with extra triangular bit; wt each 20 lbs $13 50

No. 15B—Extra bits; wt each ⅛ lb 81

Packed loose.

ATLAS



Japanned malleable iron frame and socket; finest tool steel square heel, can be inverted and all four sides used. Selected maple handle, varnished. By the compound lever arrangement the moving power is applied on the rim of the wheel so far from its contact with the rail that the moving force is utilized to roll it forward, instead of wasted in an effort to raise it from the track.

Each

No. 10—Length over all 67 ins; complete with handle; wt each 15 lbs $16 50

Per Pair

No. 10B—Extra bits; wt each ⅛ lb $1 20

Packed loose.

SHOT GUN SHELLS

REMINGTON

All Remington Loaded Shells are Wetproof.

Remington **Wetproof** Process is the only means of completely waterproofing a shell It is exclusively Remington —originated, perfected and patented by Remington. All Remington loaded shells are completely wetproofed throughout the entire shell—top wad, crimp and body—positively sealed against wet. This Wetproofing process is only one of the many strong features that have earned for Remington their recognized leadership in the ammunition industry.

ARROW EXPRESS

Loaded with Progressive Burning Powder

12 Gauge, 2¾ inch Shell.

Load No.	Size of Shot	List 1000
Arrow Express	Nos. BB, 2, 4, 5, 6, 7 Ch.	**$60 75**

ARROW EXPRESS LACQUERED

Following the Remington tradition for leadership another important improvement has been added—the Arrow Express Lacquered shell. The brilliant glossy finish gives a striking appearance to the shell and adds greatly to protection against water and moisture. The lacquer completely seals the top wad and crimp. Under the most adverse conditions crimp remains hard and even, without brooming out, flattening or swelling

Arrow Express,Lacquered. Nos. BB, 2, 4, 5, 6, 7 Ch. **$60 75**

Average weight per case, 66 lbs.

GAME LOADS

When you buy shot gun shells, forget everything but the kind of game you are going to hunt—then ask for the Remington Game load for that game.

The Remington method of loading the Game Load shells assures the shooter of the proper velocity, pattern, penetration and size of shot that is best suited to each particular type of game.

Just order your shells by the name of the game you are going to hunt

Fail in a sale of Mechanics Tools and you have failed in a service that will not soon be forgotten. Mechanics are "cranky" about the tools they use, as only with the best Tools can the best work be accomplished. Blue Grass Tools for many years have satisfactorily served every individual requirement of best mechanics. They are and always will be: "As good as Tools can be." We specify how they shall be made and unless absolutely perfect they will not be branded "Blue Grass."

YOU'LL FIND BUDDY "L" TOYS AT THE CHICAGO TOY FAIR
Room 335 .. MORRISON HOTEL

as used by large manufacturing plants and on large construction projects—it is just as big in appearance and just as big in value as it looks in the illustration on this page.

The set is complete as illustrated with locomotive 10¼ inches long, a gondola car, rock car, stake car, ballast car and rocker dump car, each 8 inches long, making a total over-all length of 50¼ inches. Each set is complete with twelve 24-inch sections of 2-inch gauge curved steel track, each equipped with special Buddy "L" attachments for connecting together into one solid piece.

Switches, cross overs, round houses, turn tables, various lengths of straight and curved track can be secured as well as a special Buddy "L" service covering a variety of track layouts with instructions as to just what parts are required.

This train will stand the wear and tear of strenuous child's play. It is simple to assemble and operate, and is one of the popular sellers of the Buddy "L" line. Be sure and get our special dealer's price on this outfit. You'll find a ready sale for many of them.

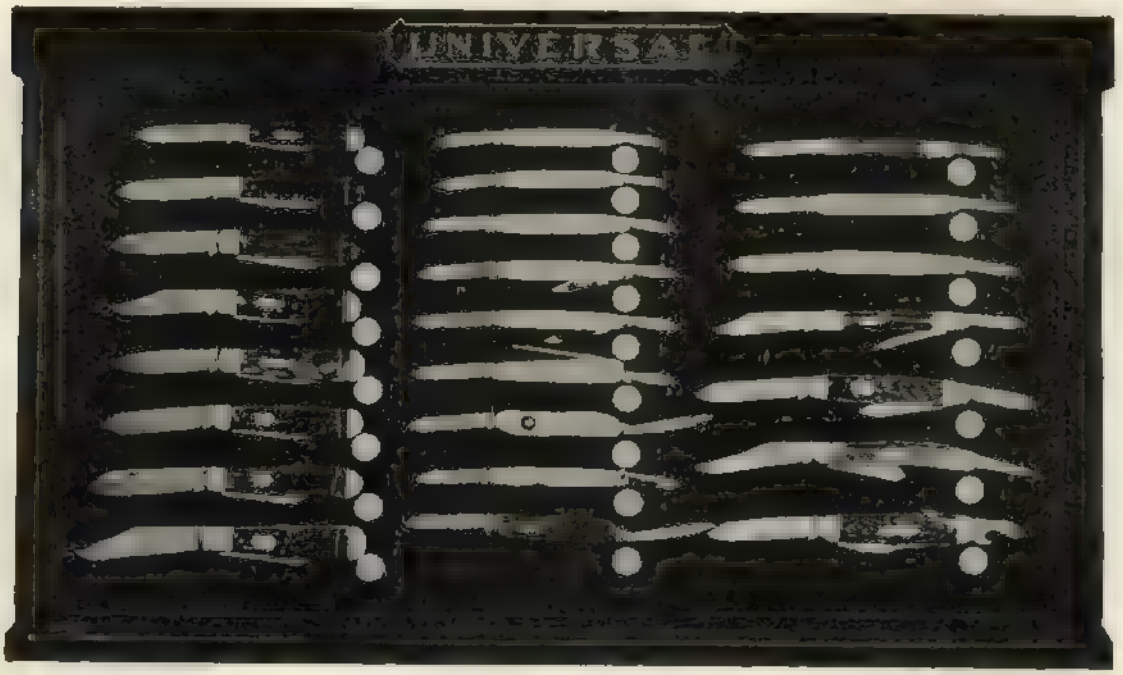
DISPLAY CASES

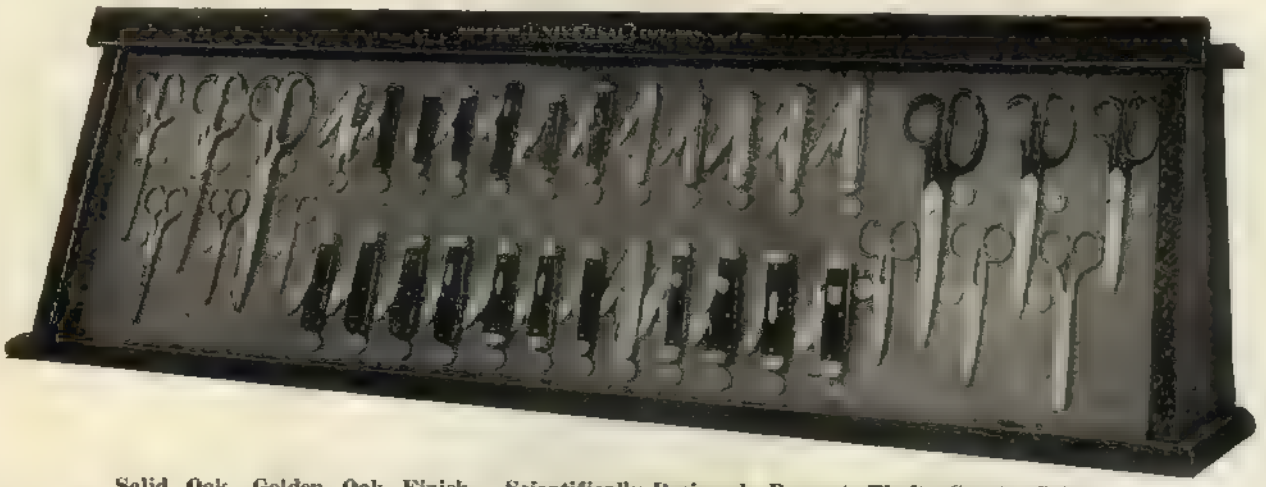
UNIVERSAL POCKET KNIFE



Mahogany Finish, Glass Top.

No. 611 Case. The way to sell Universal Pocket Knives is to display them in this attractive manner. Each knife is fastened with blades open. Purchaser at a glance sees the entire structure of the knife, type of blades, finish, handle and pattern. Numbers and prices are plainly marked upon celluloid button beneath each knife for selection. Stock is kept in 24 separate partitions in the back of case, one for each number, and can be securely locked. Stock is easily replenished as sold. Display board is easily removed through top of case for renewing and adding samples as required. 24 numbers neatly mounted are shown without crowding. Makes sales easy—avoids theft. All pocket knives have number stamped on blades. **These cases are sold to dealers, without knives.** They may mount their own selection. Size of case. Length 25¼ in., height, 12¾ in.; depth, 3¾ in.; one in a corrugated case. Wt. 10 lbs. ... . Each **$10 00**

UNIVERSAL COMBINATION POCKET KNIFE AND SHEAR



Solid Oak, Golden Oak Finish. Scientifically Designed—Prevents Theft—Creates Sales.

No. 632 Case. This sloping front display case while requiring but small counter space, attractively displays 24 numbers of pocket knives, 6 numbers of shears and 6 numbers of scissors. White celluloid price buttons show number and price of each item. Space is provided in rear of case for one half dozen of each item displayed. **This case is sold to dealers unmounted and without stock.** They may make their own selection and mount them as they see fit. Removable metal panel, orange enameled. Size of case. Length, 38 in.; height, 12½ in.; width at base, 9 in., at top, 5¾ in. **Packed one in a shipping carton. Wt. packed, approximately 75 lbs.** ....**Each $15 00**

CUTLERY

UNIVERSAL

The **Universal** is the most complete line of Cutlery under one trade mark manufactured in the United States. The line is complete, covering every item from pocket knive flat cutlery including cooks knives, sleers butchers' paring knives and steels, carving sets, shears and scissors, also silver plated flat ware. Excepting shears and scissors the line is made of crucible or carbon steel, also Resistain Stainless Steel under the "Universal" trade mark, and every piece of the entire line is made at the Universal factory by Landers, Frary & Clark, New Britain, Conn.

POCKET KNIVES

UNIVERSAL

Manufactured from the finest materials obtainable in the markets of the world and every detail of manufacture carried out by skilled workmen under expert supervision, Universal pocket knives offer a complete assortment of attractive and distinctive designs to please the most exacting user.

Stag handles are manufactured by Landers, Frary & Clark, and will stand more hard knocks without breaking than any stag handle on the market.

Every Universal Pocket Knife is thoroughly inspected before packing and the blades and springs are tested for flaws and hardness. Each carries the assurance that no better pocket knife can be produced, and we recommend the entire line knowing it will prove extremely profitable to the trade.

WRENCHES

WILLIAMS' "SUPERRENCH."

Double Head Obstruction Pattern. Drop Forged. Heat Treated. Heads Polished Nickel Plated. Body Dull Nickel Plated. Opening Milled and Smooth. 75° Angle.

CHROME-MOLYBDENUM

For Close Quarters.

On most every car there are a number of awkwardly placed nuts, and ordinary wrenches will not reach or turn them unless interfering parts are first removed; but Williams new Obstruction Super-rench will. The narrow pointed jaws and thin heads with 75° angle of openings are specially designed for just such jobs. Around the carbureter, motor head, manifold, steering gear and a host of other places in close quarters these wrenches make rapid efficient service possible. And because the jaws of both heads project from the same side of the handle they offer a comfortable working grip.

WRENCHES

WILLIAMS' "SUPERRENCH."

Double Head Engineers' Pattern. Drop Forged. Heat Treated. Heads Polished Nickel Plated. Body Dull Nickel Plated. Openings Milled and Smooth. 15° Angle.

After exhaustive tests, Chrome-Molybdenum steel was selected as providing the strongest, toughest and most desirable material for the purpose ever produced. Wrenches made from it, though of lighter weight, thinner section, greater length and with narrower jaws than Carbon steel wrenches with corresponding openings, are far stronger than the latter

Guarantee: Williams' "Superrench" (Chrome-Molybdenum) wrenches will strip the thread of any standard nut, or break the bolt, before spreading the jaws. Furthermore they will not break. Any "Superrench" returned to us that does not meet these claims will be immediately replaced.

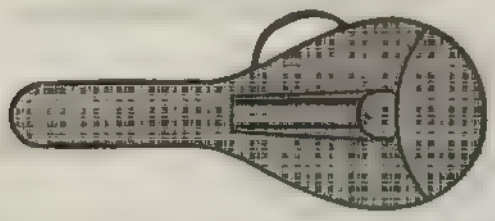
RACKET CASES

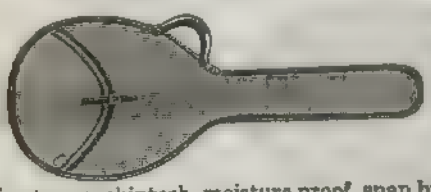


Per Doz

No. 22—Plaid waterproof cloth; tan cloth binding; leather handle; brass snap buttons. Equipped with pocket for three balls; wt per doz 3 lbs $21 60

No. 33—Denim waterproof cloth; tan cloth binding; leather handle; brass snap buttons. Equipped with pocket for three balls; wt per doz 4 lbs 25 50

One doz in cardboard box.



Per Doz

No. 5—Fine tan mackintosh, moisture proof, snap button flap; wt per doz 4½ lbs $33 75

Packed loose.

Per Doz

No. 10—Double texture tan Mackintosh cloth; tan cloth binding; leather handle; brass snap buttons. Equipped with pocket for three balls and pocket for shoes on reverse side, wt per doz 6¾ lbs $37 50

One doz in cardboard box.

RACKET PRESSES

Players wanting to keep their rackets from warping should always keep them in a press when not in use. This is the strongest and most practical press ever used for the purpose.

Per Doz

No. 0T—For holding one racket; made of maple; plain finish $28 50

Packed loose; wt per doz 13 lbs.

TENNIS BALLS

FAULTLESS

Official Size and Weight.

Sponge rubber of the lightest and most uniform texture, seamless cover. True in shape and perfectly centered. This construction makes it possible to put greater English or sharper cut on this ball than on the inflated type. Permanent resilience, will not deflate, stands up splendidly under hard play.

Per Doz

No. 25—Wt per doz 2 lbs $7 50

One in box, one doz in cardboard box.

TENNIS BALLS

The Championship Ball is adopted by the United States National Lawn Tennis Association; Inter Collegiate Lawn Tennis Association, Southern Lawn Tennis Association, Pacific States Lawn Tennis Association, Canadian Lawn Tennis Association and all other associations of note in United States and Canada.

WRIGHT & DITSON CHAMPIONSHIP

In Moisture Proof Containers.

High grade materials, resilient and durable. Cloth covered and undersewn. Has a peppy, live bounce, fast and accurate in play.

This is highly valuable to the player because it keeps the balls fresh and lively.

Per Doz

No. 1CB—One doz in cardboard box $13 20

No. 3CB—Same as No. 1CB except that it has a tight fitting, sealed, air and moisture proof Viscose protective covering which preserves the original life of the ball indefinitely until ready for use. Protects it from air, relieves the strain or pressure of inflation and prevents seepage of air contents through the rubber walls. Remove Viscose cover and you have fresh new balls uniform in every requirement. A small cutter furnished to remove protective covering 14 25

One doz in cardboard box; wt per doz about 1½ lbs.

LAWN TENNIS GUIDES

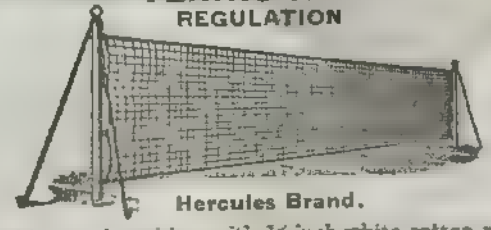
Each

No. 1G—Contains all the rules: how to build and mark out a court, also completely covering all items of interest applying to lawn tennis. Profusely illustrated. The most complete publication of its kind $0 84

Packed loose; wt per doz 18¾ lbs.

TENNIS NETS

REGULATION



Hercules Brand.

Machine made, white; with ⅛ inch white cotton rope; 1¾ inch mesh. Price does not include posts.

Each

No. 100—Single court; length 27 ft, No. 12 thread; wt per doz, 16 lbs $4 50

No. 106—Double court; length 36 ft, No. 15 thread; wt per doz, 24 lbs 7 50

No. 109—Double court; length 42 ft, No. 15 thread; wt per doz, 27 lbs 8 70

No. 106B—Double court; bound; length 36 ft, No. 15 thread; wt per doz, 30 lbs 9 90

No. 109B Double court; bound; length 42 ft, No. 15 thread; wt per doz, 32 lbs 11 25

Packed loose.

Newport Brand.

Hand made, white; with ¼ inch white cotton rope; 1¾ inch mesh; price does not include posts.

Each

No. 157—Double court; bound; length 36 ft, No. 21 thread; wt per doz, 45 lbs $11 40

No. 160—Double court; bound; length 42 ft, No. 21 thread; wt per doz 54 lbs 12 45

Packed loose.

TENNIS POSTS

LONGWOOD TOURNAMENT

Fitted with a very strong reel for tightening the rope; has hooks on the side to lace the net close to the pole. The clutch on post is of one piece, with three prongs bent at the end, so they may be driven in the ground, making the clutch absolutely rigid and secure.

	Per Pair
No. 1LP—Iron, enameled green	◆$59 40

Packed loose; wt per pair 40 lbs.

TENNIS CENTER STRAPS

CHAMPIONSHIP

A new device for holding center of net at regulation height (three feet). The anchorage or forks are flush with the ground instead of having an eye project above as heretofore, thereby permitting a roller to run over them without interference.

	Per Doz
No. 3-0—Canvas, with turnbuckle	$72 00
No. 2-0—Canvas, without turnbuckle	39 60

Packed loose; wt per doz 16 lbs.

TENNIS GUY ROPES

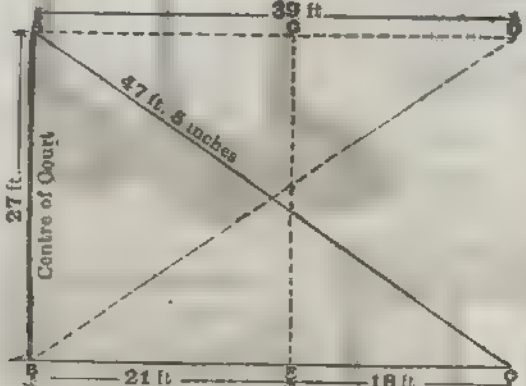
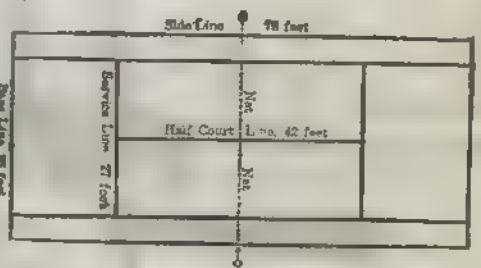
Boy's	
No. 2B$—Sizes 3; 3½, 4, 4½, 5 and 5½	2 25

One pr in cardboard box; wt per pr 1 lb.

HOW TO MARK OUT A COURT

("Officially Adopted" Lawn Tennis Guide).



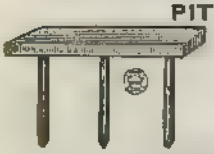


As a double court practically includes every line to be found in a single court, it is best to take first the measure for the latter.

Having determined the position of your net, plant in the ground, in the line chosen, two pegs, 27 feet apart (at the points A and B in the diagram). Then take two measures and attach their respective ends to the pegs A and B. On the first which will measure the diagonal of the court, take a length of 47 feet, 5 inches; on the other 39 feet; pull both taut in such directions that at these distances they meet, in a point C. This will give one corner of the Court. At that point, F, 21 feet from B, put in a peg to mark the end of the service line. The other corner, D, and the other end of the service-line G, may be found by interchanging the measures and repeating the process. The same measurements on the other side of the net will complete the exterior boundaries of the court. By prolonging the base-line 4 feet 6 inches in each direction, and joining the four new points thus obtained, we can make the side lines of a double court. It only remains to mark the central line. This is done by joining the middle points of the service lines. If a double court alone be required, the interior side-lines need not be prolonged to meet the base-lines. Remember that in all cases the net posts must stand at a distance of 3 feet from the side-lines.

BASE BALL GOODS

PITCHERS' BOX PLATES



Each

No. PR—White rubber; according to league regulations; complete with pins ..... ✚$26 40
Packed loose; wt each about 14½ lbs.

BASES—BELKNAP'S

All of above in paper bag.

An International Silver Co. Product

PRESENTING

SILHOUETTE

THE NEW 1847 ROGERS BROS. PATTERN

INTERNATIONAL SILVER CO.

Wise business experts have pointed out that women influence the purchase of 85% of all commodities. If it's 85% in all commodities . . . imagine what it must be in an ultra-feminine article like silverware. You can estimate it at 98% and never be accused of the slightest exaggeration. Therefore SILHOUETTE follows the most feminine slant in the world for its theme . . . fashion. SILHOUETTE brings, in silverware, the same basic Paris inspired lines women demand in frocks, hats, handbags, shoes . . . every article of fashion. For certain identical, right, true lines run through all things of beauty and good taste. Clean, stream lines. And these are the lines of fashion, and of SILHOUETTE.

THE NEW SILHOUETTE PATTERN

VIANDE, the new knife

The new dinner knife, the Viande, is of special interest. Short blade . . . long handle. Enabling one to press one's finger on the handle instead of the blade. It's the logical shape for a knife. However, to please your conservative prospects, we also make the regular conventional dinner and dessert knives in SILHOUETTE—thereby giving you the chance to give your customer the choice. We predict that Viande will be the regulation standard knife on tomorrow's tables... and it is ready for you today.

The FIREFLY Lighter

always works ~ made by CLARK

MAKERS OF MENS FINE JEWELRY SINCE 1881

THE LIGHTERS SHOWN HERE ARE APPROXIMATELY ¾ ACTUAL SIZE

CLARK'S NEW *Perfected* AUTOMATIC!

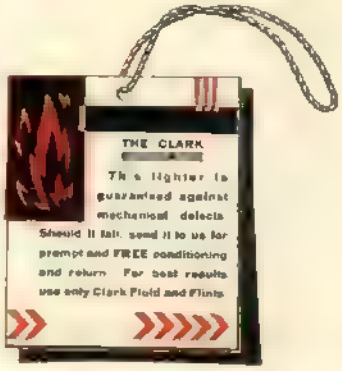
Clark has produced a new automatic—a beautiful, jewelry-finish Lighter that always works

CIGARET lighters were clumsy and uncertain mechanical devices until Clark the Jeweler made them. His jewelry experience, dating back to 1881, created in the Clark a precise, unfailing lighter. People wanted Clark Lighters in such quantities that competitors sprung up overnight. They sold lighters only to make money. Clark stuck to his policy of producing stylish, jewelry-finish lighters that always work. The new Firefly Automatic (from $5 up) is the culmination of two years of work and study to furnish the finest lighter on the market. Sixteen individual models were made and tested. Not until the seventeenth model was produced was Clark satisfied he had an automatic worthy of his name.

Advertising in national magazines has told and again will tell the story of Clark Lighters, policies and free repair service. Trade publications will give out the news of the many new and striking developments in the Clark and Firefly Lighter line.

The new Firefly Automatic Lighter by Clark is being announced in these magazines. Advertising will continue to tell your trade of Clark and Firefly precision, beauty and style.

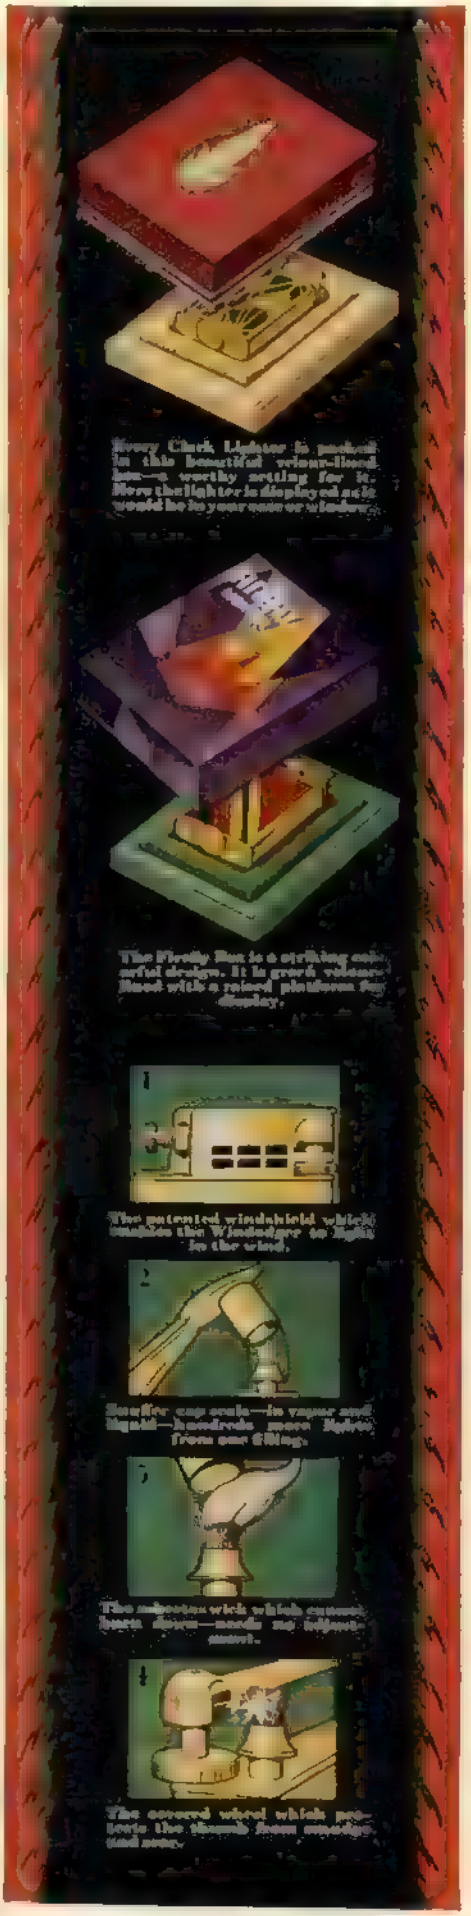
In these trade magazines, the vital news of Clark and Firefly Lighters with the latest models, styles and patterns are shown



THE CLARK
This lighter is guaranteed against mechanical defects. Should it fail, send it to us for prompt and FREE conditioning and return. For best results use only Clark Fluid and Flints

Not One Penny for Repairs

Nobody has ever paid Clark one cent for repair service on Clark and Firefly Lighters. To make customers realize that this free repair service is inseparably bound up with the in-built quality of Clark Lighters, this guarantee tag is attached to each lighter. It is, in itself, the clearest evidence of Clark's policy of protecting your good name from comebacks, criticism and complaints.



Every Clark Lighter is packed in this beautiful velour-lined box—a worthy setting for it. Here the lighter is displayed as it would be in your store or window.

The Firefly Base is a striking example of useful design. It is grooved velour-lined with a raised platform for display.

1 The patented windshield which enables the Windstopper to light in the wind.

2 Sunpipe cap seals—in vapor and liquid—hundreds more flights from our filling.

3 The asbestos wick which cannot burn down—needs no adjustment.

4 The covered wheel which protects the thumb from smudge and sores.

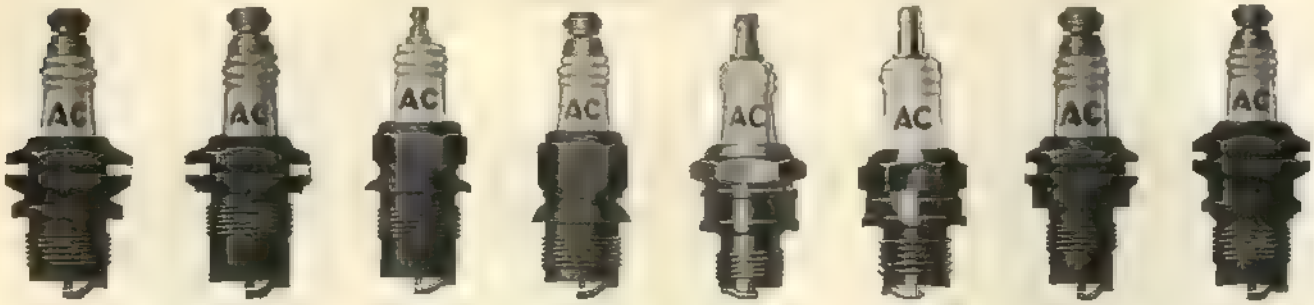
AC SPARK PLUGS



Type A | Type B | Type C | Type E | Type G | Type J | Type W | Type Z

See Specification Chart Indicating The Types Of Spark Plugs Suitable For The Various Engines

Types A, B, C, E, G, J, W, and Z . . . . . Each $0 75

No. 1075. For Model T Fords

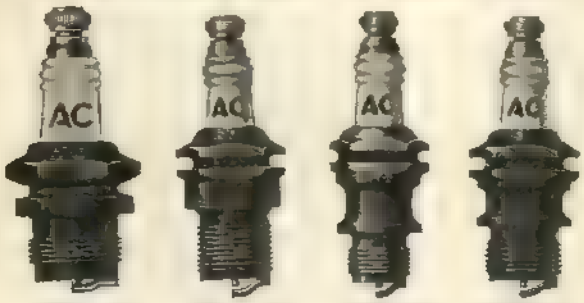
Type T. One piece design . . . . . Each 50
Type U. Two piece design . . . . . Each 50

For Model A Fords.

Type Z. In special Ford cartons . . . . . Each $0 75
In ordering be sure to specify "In Ford Cartons."

For Chevrolet

Type B. For all Chevrolet Models to 1928 . . . . Each $0 75
Type Z. For all Chevrolet 1928 Models . . . . Each 75
Type G. For all Chevrolet 1929 Models . . . . . Each 75
In ordering be sure to specify "In Chevrolet Cartons."

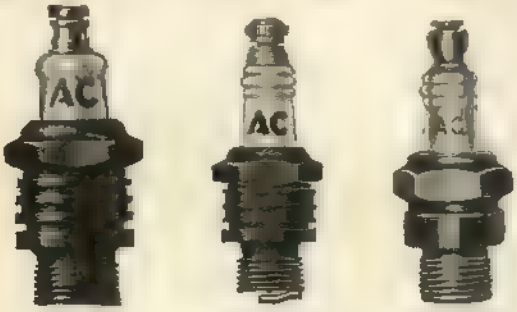


Type A | Type D | Type G | Type I

Long Life.

With extra heavy insulator, extra heavy gaskets and electrodes, made especially for truck and bus service. Can be used wherever types A, D, G or I Spark Plugs are recommended on the specification chart.

Types A, D, G and I, Long Life . . . . . Each $0 90



Type N | Type N-1 | Type NN-1

For Aviation Engines.

Type N. Metric Aircraft; recommended for air-cooled engines operating at cruising speeds or where continuous fouling is experienced with type NN 1 or pre-ignition with type N-1. . . . . Each $1.25

Type N-1. Metric Semi Aircraft (Modified Aircraft); recommended for water cooled engines, or in air cooled engines where fouling is experienced with type N Each $1 25

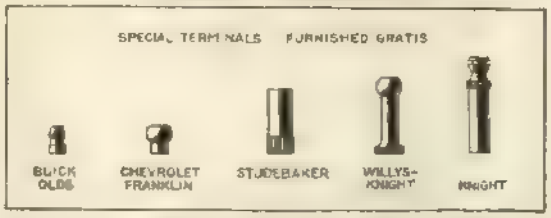
Type NN-1. Short Metric Aircraft; recommended for air cooled engines operating at full throttle over long distances, or where pre-ignition is experienced with type N . . . . . Each $1 25

Other Types and Sizes.

A-2½. ⅞ in Racing . . . . . Each $1 25
AM. ⅞ in. Marine . . . . . Each 75
F. ½ in. Regular . . . . . Each 75
GM. Metric Marine . . . . . Each 75
G-2½. Metric Racing . . . . . Each 1 25
G-6. Metric . . . . . Each 75
G-7. Metric . . . . . Each 75
G-8. Metric . . . . . Each 75
G-9. Metric . . . . . Each 75
G-10. Metric . . . . . Each 75
G-11. Metric . . . . . Each 75
G-12. Metric . . . . . Each 75
G-13. Metric . . . . . Each 75
I. ⅞ in. Long Body . . . . . Each $0 75
L. Long Body Metric Long Thread . . . . Each 75
M. Long Body Metric Short Thread . . . Each 75
NC-6. Metric Aviation . . . . . Each 1 25
NN. SAE Aircraft . . . . . Each 75
O. Metric Semi Aircraft Short . . . . Each 75
P. Short Metric . . . . . Each 75
Q. ½ in. Long . . . . . Each 75
Y. ⅝ in. Semi-Aircraft . . . . . Each 75
Z-1. ⅞ in Short Special . . . . . Each 75

AC Carbon-Proof. Types A, B, C, E, F, G, I, Q and Z are available with carbon-proof insulator. In ordering be sure to specify, "CARBON PROOF" . . . . . Each $0 75

SPECIAL TERMINALS



All A. C. Spark Plugs are shipped with the style of terminal connection most universally used.

When special terminals are required it is possible to use those from the old plugs as there is no deterioration on these parts. Special terminals, however, will be furnished gratis on request.

All above one in a carton. 10 cartons in a container. Weight of ten, 2½ lbs.

Marine engine service is grouped into four classifications, for each of which there is a special type AC Spark Plug, as follows:

1 For high speed, high compression marine engines operating at high temperatures—AC Type "AM" ¾ inch, Regular Marine, or Type "GM" Metric Regular Marine.

2. For outboard or inboard racing engines—AC Type G-2½ Metric or AC Type A-2½ X inch Regular.

3 For boats equipped with automobile engines, operating at fairly high speeds, compressions and temperatures, as well as outboard engines for cruising speeds AC Type "Y" ⅞ inch Semi-Aircraft or AC Type "N 1" Metric Semi-Aircraft.

4 For slow speed, large bore marine engines, operating at ordinary compressions and temperatures AC Type "Q" ½ Inch Long; AC Type "A" ⅞ Inch Regular, or AC Type "G" Metric Regular.

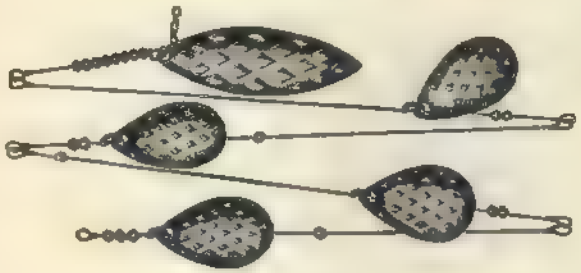
TROLLING RIGS

JACK LLOYD



Nickel Finish.

The Jack Lloyd No. 1-5 is a five-bladed nickel spinner with diamond cut indentations covering each blade. These diamonds act as reflectors and attract fish of all sizes. This is especially good for lake fishing in either deep or shallow lakes.

Jack Lloyd. No. 1-5. Wt. ea. 1 oz. .....Each **$1 50**

One in an envelope.

POP GEER

No. 90.

Consists of four nickel blades in assorted sizes and shapes; 1 nickel flusher. Mounted on bright wire; length overall, 54 inches.

Pop Geer. No. 90. Wt. ea. 2 ozs. .....Each **$1 00**

One dozen in a box.

SALMON TROUT

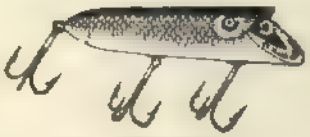
Consists of 1 nickel and 1 brass blade hung with red beads. Length overall, 8 inches

Pop Geer No. 4. Wt. ea. 1 oz. .....Each **$0 40**

One dozen in a box.

MINNOWS.

HEDDON



No. 8500 Series.

HEAD-ON BASSER.

This minnow darts and swims in an irregular way. Very erratic in action but equally positive in results. Will run from one to three feet below the surface when retrieved. Floats when at rest. Has made wonderful records for bass, pickerel and muskellonge. Equipped with three treble hooks, non-rotating hook fasteners, eyes, and full Heddon finish. Wt., ¾ oz.; length overall, 4¼ inches.

Supplied in the following colorations:

No. 8501. Rainbow.
No. 8502. White body, red head and tail.
No. 8509D. Green scale.
No. 8509H. Red scale.
No. 8509J. Frog scale
No. 8509L. Yellow perch scale.
No. 8509M. Pike scale.
No. 8509P. Shiner scale.
No. 8509R. Natural scale.
No. 8509V. Orange with black spots.
No. 8509X. Blue scale.

No. 8500 Series .....Each **$1 00**

All above, one in a box.

No. 8300 Series.

ZIG WAG.

This new lure has a unique duplex movement. A wide erratic sweeping action, cutting the water in those unexpected angles and zig zags that seem to hunt out the hiding places of the fish. The tail section keeps up its fish-like fanning movement in sinuous curves as alive as life itself. Length of body, 4¼ inches. Wt., ¾ oz. Supplied in the following standard colorations:

No. 8302. White body and red head.
No. 8309D. Green scale.
No. 8309M. Pike scale
No. 8309P. Shiner scale
No. 8309R. Natural scale.

No. 8300 Series .....Each **$1 25**

All above, one in a box.

MINNOWS.

HEDDON

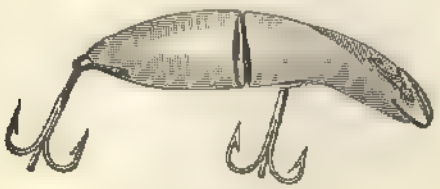
No. 5500 Series.

GAME FISHER.

Has a triple compound movement as natural as nature itself. When retrieved the sections move in graceful serpentines, covering a full third of a circle. It floats while at rest, draws well down in a deepening course as regulated by reeling speed. Casts accurately, is non fouling, cannot break or refuse to work. Heddon scientific hook presentation. Flexible body offers hooked fish minimum purchase to shake loose. Length of body, 4¾ inches. Wt. ¾ oz. Supplied in the following colors:

No. 5501. Rainbow.
No. 5502. White, red head and tail.
No. 5509D. Green scale.
No. 5509M. Pike scale
No. 5509P. Shiner scale.
No 5509R. Natural scale.
No. 5509V. Orange with black spots and red head
No. 5509X. Blue scale.

No. 5500 Series .....Each **$1 25**



No. 5400 Series.

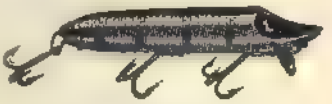
BABY GAME FISHER.

The Baby Game Fisher is made on the principle of the Heddon Game Fisher which has met with such wonderful success. It is composed of two sections instead of three as in the original lure and joined in the same manner. also distinguished by its life-like action. The Baby Game Fisher is 4 inches long, weighs 1/2 ounce, has two treble hooks, one at the tail and one on the forward section This is the No. 5400 series and is regularly supplied in the following colors:

No. 5401. Rainbow.
No. 5402. White, red head and tail.
No. 5409D. Green scale.
No. 5409M. Pike scale.
No. 5409P. Shiner scale
No. 5409R. Natural scale.
No. 5409V. Orange with black spots.
No. 5409X. Blue scale

No. 5400 Series ....Each **$1 25**

All above, one in a box.



No. 7500 Series.

THE VAMP.

The "Vampire" is one of Heddon's best baits and is considered one of the most deadly lures yet produced. Flat-nosed to resemble a baby pike and beautifully enameled in natural fish colorings it is a lure that few fish can resist. It floats well at rest and in action has a diving, wiggling and darting motion like that of a live fish. Equipped with three gangs extra sharp hooks it is a sure "Getter." Those who have used it in hundreds of tests are enthusiastic over the results. It weighs ⅝ ounce, measures 4½ inches, and is furnished in the following colors:

No. 7500S. White body, red and green spots.
No. 7501. Rainbow.
No. 7509D. Green scale.
No. 7509M. Pike scale
No. 7509P. Shiner scale.
No. 7509V. Orange with black spots.
No. 7509X. Blue scale.

No. 7500 Series .....Each **$1 00**

No. 7300 Series.

JOINTED VAMP.

To the already popular Vamp bait, the jointed feature has been added, which gives the bait an entirely new movement, and provides additional luring. Dives and swims. Floats when at rest. Length 4½ inches. Wt. 3/4 oz.

Supplied in the following standard colors:

No. 7302. White body, red head.
No. 7309D. Green scale
No. 7309L. Perch scale.
No. 7309M. Pike scale.
No. 7309P. Shiner scale.
No. 7309R. Natural scale.
No. 7309Z. Rainbow scale

No. 7300 Series .....Each **$1 25**

All above, one in a box.

MINNOWS.

HEDDON

No. 7400 Series.

THE BABY VAMP.

Experiments and tests, under all conditions, show this little lure to be just as effective as the regular size, the well known Vamp Minnow, the 7500 series. The Baby Vamp is made smaller and lighter for the light rods. Has the same active swimming movement resembling that of a pike minnow, darting, zigzagging to a depth of about 18 inches when retrieved. Equipped with two sets of treble hooks. Wt., ½ oz. Length, 3½ inches. Carried in the following colors:

No. 7400S. White body, red and green spots.
No. 7401. Rainbow.
No. 7409D. Green scale.
No. 7409M. Pike scale.
No. 7409P. Shiner scale
No. 7409V. Orange with black spots.
No. 7409X. Blue scale.

No. 7400 Series .....Each $1 00

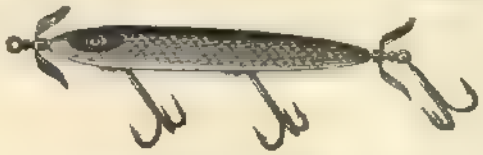
No. 100 Series.

SINKING MINNOW.

Sinking Minnow, two spinners, No. 100 Series has three treble hooks, weighs ⅝ oz.; length of body, 2¾ inches Furnished in the following variety of beautifully blended colors:

No. 101. Rainbow.
No. 104. Red body with dark blended back.
No. 109A. Yellow perch.
No. 109B. Frog colors.
No. 109D. Scale finish, natural green.
No. 109L. Scale finish, yellow perch.
No. 109P. Shiner scale.

No. 100 Series ..... Each $1 00



No. 130 Series.

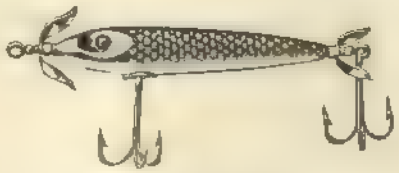
TORPEDO.

A sinking minnow—a favorite because of the ease with which it may be shot to the mark, straight as an arrow. Length, 4½ inches overall. Wt., ¾ oz. Carried in the following colors:

No. 139D. Green scale.
No. 139M. Pike scale.
No. 139P. Shiner scale.
No. 139V. Orange with black spots and red head

No. 130 Series .....Each $1 00

All above, one in a box.



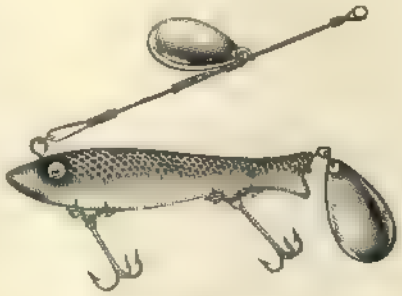
No. 120 Series.

TORPEDO.

Has only one treble hook on the body, otherwise same pattern as 130 series. Length, 3 inches overall. Wt. each, ½ oz. Carried in the following colors:

No. 129D. Green scale.
No. 129M. Pike scale.
No. 129P. Shiner scale.
No. 129V. Orange with black spots and red head.
No. 129X. Blue scale.

No. 120 Series .....Each $1 00



No. 9100 Series.

"SUPER-DOWAGIAC" SPOOK

A ghostly go-getter for all game fish. A transparent, lifelike lure of new construction. Made of Heddylin (like pyralin). Whirling spoon at front and rear. Sinks of its own weight and can be sent deep with slow retrieving. Is indestructible in construction, and finish has become an integral part of the bait and will not come off, even when bait is used for fish with sharp teeth. Length, 3¾ inches, weight, 1 ounce.

Carried in the following colors:

9100S Transparent Body, Red and Green Spots
9101 Transparent Body, Rainbow.
9102 White Head and Tail. Red Decorations
9108RH Transparent Body, Gold Specks. Red Head
9109L Transparent Body, Perch Scale
9109P Transparent Body, Shiner Scale

No. 9100 Series .....Each $1 50

All above, one in a box

MINNOWS

HEDDON

No. 4000 Series.

MEADOW MOUSE

A "true-to-nature" bait, even to bead-eyes, and flexible ears and tail. Floats, and swims with lively, teasing motion. Three natural colors: Brown, the true field mouse; grey with white belly and white with red decoration. A sure hooker under all conditions. One wide spreading double hook on body, and single hook concealed in tail. Length, 2¾ inches. Wt. ⅜ oz. Supplied in the following colors:

No. 4000BM. Brown Mouse.

No. 4000GM. Grey mouse.

No. 4000WM. White and red.

No 4000 Series .....Each **$1 00**

No. 3500 Series.

LUNY FROG

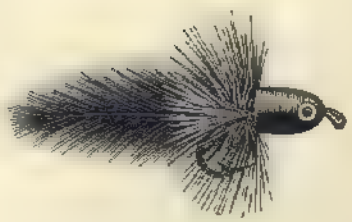
This is the first imitation frog bait having all the elements which have made wooden baits popular. When at rest in the water, it stands in exactly the same position as a live frog. When retrieved, it dives and has a good swimming movement. Is an excellent casting lure. It is made of Pyralin, practically indestructible, with hooks firmly imbedded and each placed in the best position to strike the fish. Length of body, 4½ inches. Wt. ⅞ oz. Regularly equipped with 4/0 single hook at tail and large extra strong double hook on belly. Made only in the following finishes:

No. 3509B. Green Frog.

No. 3509BB. Meadow frog.

No. 3500 Series .....Each **$1 25**

WILDER DILG TROUT LURE



Nos. 30 to 35.

This Wilder Dilg is a fly rod lure. The cork and feather combination closely imitates the action of a wounded minnow causing the bass to strike viciously. Length, overall, 2 inches; No. 6 O'Shaughnessy hook. Wt. each, ¼ oz Carried in the following patterns:

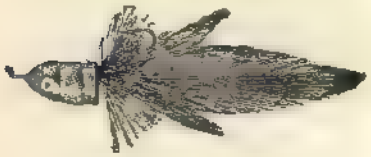
No. 30. Irvin Cobb; Red Body with Red feather and orange Hackle.
No. 31. Brann's Glory; white body with gray feather and hackle.
No. 32. Wilder's fancy; black body with orange feather and brown hackle.
No. 33. Zane Gray; brown body, brown feather and hackle.
No. 34. Dilg's Own; white body with white feather and red Hackle.
No. 35. Bob Davis; Yellow body with yellow feather, and green Hackle.

No. 30 Series .....Each **$ 50**

All above, one in a box.

MINNOWS

HEDDON



Nos. 1 to 12 Series

WILDER DILG BASS LURE

These cork and feather body combinations closely imitate the action of a wounded minnow, causing bass to strike viciously. These wonderfully effective lures, successfully brought to perfection by B. F. Wilder of New York and Will H. Dilg, have been christened, after twelve of the country's foremost anglers, men who stand for the highest ideals in the Camp of Walton. Made from a light enameled cork head, brilliant eyes, a ruff of various colored hackle and fin-and-body-feathers that impart the curious rolling, dipping and depth-seeking throes of a wounded minnow, with a single non-twisting hook.

Length 3¼ inches; No. 1 O'Shaughnessy hook used. Carried in the following patterns:

No. 1. Capt. Samson; green body, red and white feathers.

No. 2. Mannfeld's Coaxer; red body and red feather

No. 3. Venable's Charmer; green and yellow body, yellow and red feather.

No. 4. Kemper's Charge; green body; brown and red feather.

No. 5. Irwin Cobb; brown body, orange and white feather.

No. 6 Wilder's Fancy; black body, yellow and black feather.

No. 7. Peet's Choice; white body, white and red feather.

No. 8. Zane Grey; brown body, brown feather.

No. 9. Gifford Pinchot; red body, white and green feather.

No. 10. Brann's Glory; gray body, yellow and red feather.

No. 11. Dilg's Own; green and white body, white, green and yellow feather

No. 12. Bob Davis; yellow body, yellow feather.

Nos. 1 to 12. Wt. ea ¼ oz...Each $0 75

One in a box.

SOUTH BEND

BASS-ORENO

The Bass-Oreno is a wobbler type of bait, used for casting or trolling. Has a wonderful erratic action, irresistible to game fish. In motion it dives, dashes, darts and wiggles much like an injured fish. Not in motion it floats. This bait while primarily designed for all species of fresh water fish, has also proven effective for salt water species. Body is 3½ inches long; equipped with three treble hooks.

List of Colors:

No. 973RHA. Red head and aluminum color body.

No. 973RH. Red head and white body.

No. 973YP. Yellow perch, scale finish.

No. 973F. Imitation frog color.

No. 973 Rain. Rainbow color.

No. 973R. Solid red color, with black nose.

No. 973C. Copper finish with black stripe and black blending around eyes.

No. 973SF. Scale finish, green.

No. 973Y. Yellow body with red and green decorations.

No. 973W. White body with red and green decorations.

No. 973RSF. Scale finish with red blend.

No. 973PL. Pearl Enamel finish.

Bass-Oreno. Wt. ea. 2 ozs...Each $1 00

One in a box.

SOUTH BEND

BABY TEAS—ORENO

THE NEW STYLE LEADER OF MODERN SILVERWARE

DEAUVILLE

in

COMMUNITY PLATE

gallant . . . gay . . . full-of-go . . .

WHAT the Riviera is to the world of fashion in winter Deauville is to it in summer—the natural gathering place of Wealth and Leisure from all continents. There the famous couturiers of Paris send their parading manikins . . . there new styles for the coming season receive their first accolade . . . and there was born the name of this sensational new silverware pattern. . . . What Deauville-on-the-sea is to today's watering places, Deauville-on-the-table is to today's silverware. Fresh as the breezes that cool the French coast . . . full of the dash and spirit that modern style demands . . . it yet possesses the dignity and restraint without which no fashion can find universal applause. Judge silverware by the fineness of its design, by its impression on eye and hand, and you cannot conscientiously withhold the palm from this newest creation of Community craftsmen.

An unusual window display vividly suggesting the source of the Deauville's name has been prepared, and is reproduced in miniature below. It is in full color, measures approximately 23 x 17 inches, and may be had free by sending to Oneida Community Studios, Oneida, New York.

No. 45GL—Grey Lacquer Finish		

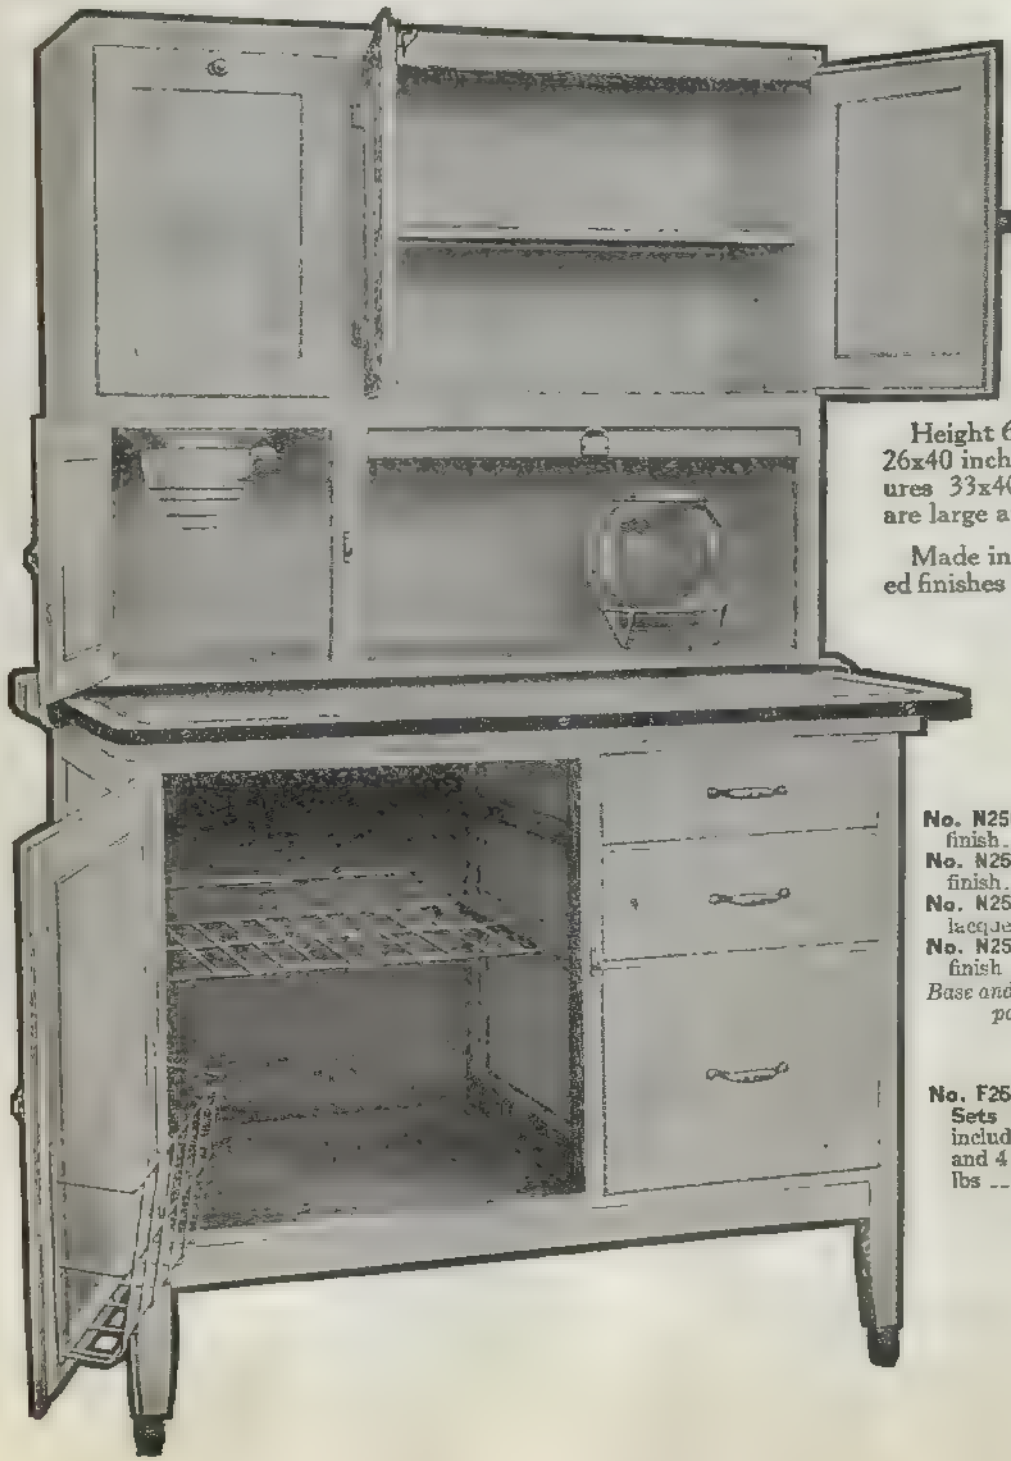
Carefully packed for shipment.

KITCHEN CABINETS

Here is a Kitchen Cabinet that has proven a real value and Sales Stimulator among thousands of Belknap Customers. We have sold Car-load after Car-load, in fact Train-load after Train-load and still it is one of our most popular numbers.

A glance at the illustration shows that the proportions, the construction and general design is the kind that readily appeals to every prospective Customer.

Large 24 pound capacity metal Flour Bin —large glass Sugar Jar—mouse-proof Bread Drawer—wire shelf for cooking utensils in lower compartment—wire pan rack on inside door to lower compartment.



All drawers are full metal construction.

Select hardwood is used throughout. Solid ends in top section. Angle brace construction—sliding porcelain top—roll curtain front. All Cabinets have wide interior upper compartment.

Height 68 inches—porcelain top 26x40 inches—top extended measures 33x40 inches. All drawers are large and roomy.

Made in four beautiful lacquered finishes as described below.

	Each
No. N25GO — Golden oak finish	$59 25
No. N25GE Grey lacquer finish	
No. N25JG Jade green lacquer finish	62 25
No. N25WE White lacquer finish	

Base and top packed separately in heavy paper carton; shipping wt each 127 lbs.

	Per Set
No. F25—Colonial Glassware Sets for Kitchen Cabinets, including: Coffee Jar, Tea Jar, and 4 Spice Jars; wt per set 5 lbs	$2 55

One set in carton.

NEW COLORS AND NEW DESIGNS IN KITCHEN CABINETS

BEAUTIFULLY FINISHED---CONVENIENT---COMPACT

The New Flour Bin Arrangement Affords Greater Storage Space.

The Many New Efficiency Features Are Instantly Admired By All Who See It

CONSTRUCTION—

Hardwood, strongly braced box type construction, solid ends in top section. Sides are flush allowing more storage space in top section. All joints are mortise and tenon, glued and nailed.

SIZE—

Height 70 inches, width 40 inches; porcelain top 25x40 inches. Work table 34 inches from floor.

FINISH—

Lacquered (not enameled). Stencil decorations in two colors. Interior lacquered to match.

UPPER COMPARTMENT—

Storage space across entire cabinet, with one shelf, cook book holder, card rack and change tray on door. Furnished with 5 piece spice set, coffee container, sugar bowl, 15 lb. flour bowl with hand flour sifter.

LOWER COMPARTMENT—

Large cutlery drawer is of wood. Two linen drawers and bread box are of metal. Large roomy cupboard with two doors on which pan racks are fitted. Bread board also furnished.

CURTAIN FRONT—

Easy moving full curtain, with clear front feature. When closed gives a very neat flat appearance. Dust proof and neat looking.

PORCELAIN TOP—

White porcelain, with black edge.

	Each
No. 35-BL—Beige (Caramel) lacquered finish	$81 75
No. 35-GO—Golden oak lacquered finish	78 75
No. 35-WE—White lacquered, decorated	81 75
No. 35-GE—Gray lacquered, decorated	81 75
No. 35-JG—Jade green lacquered, decorated	81 75

KITCHEN CABINETS
—BLUE GRASS—ALL STEEL

The structural frame is of heavy angle steel, cut and formed on special machines; securely welded into proper shape causing every drawer and door to fit perfectly. The enamel is applied similar to that on white-enameled steel beds.

A number of coats are applied by an air brush and each coat baked on. The result is, a surface that will not chip or peel off.

The entire body is of heavy sheet steel with all joints electrically welded. The base is fitted with tin lined bread or cake box, one large linen drawer, one towel drawer, one partitioned cutlery drawer, large utensil compartment with removable shelf, and pan rack on inside of door. A white maple bread board is also furnished.

Top contains tilting flour bin with sifter, glass sugar container, seven glass spice jars and glass measuring cup.

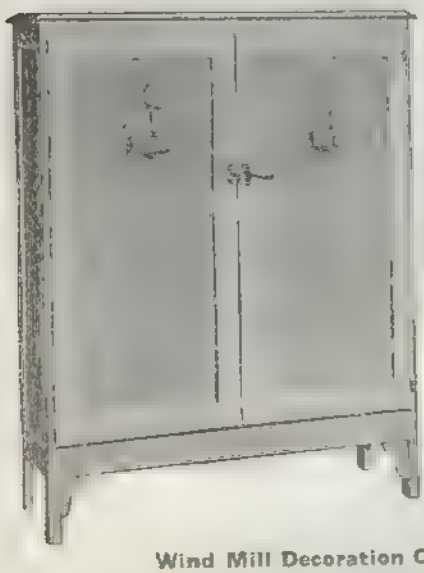
Height over all 70 inches; width 40 inches; top 40½x26 inches; extending to 37 inches when drawn out.

With porcelain sliding top.

	Each
No. BG2S—White enameled	$157 50
No. BG3S—Grey enameled	157 50

Base and top separately; shipping wt each 331 lbs.

UTILITY CUPBOARDS



Hardwood construction, nickel plated refrigerator type door catch. Equipped with three 12 inch shelves and large storage compartment in bottom. Top 14x38 inches; height 48 inches.

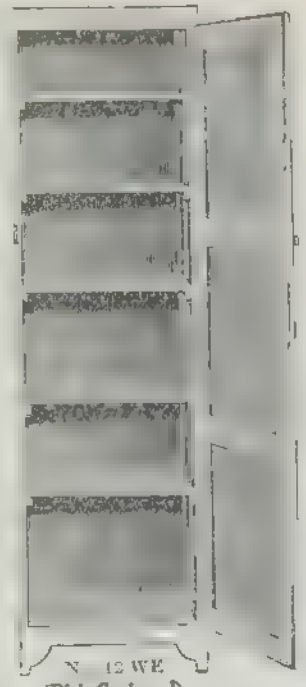
Wind Mill Decoration On Doors.

	Each
No. 8GE—Gray enameled finish inside and out	$32 55
No. 8JG—Green enameled finish inside and out	32 55

Crated; shipping wt each 95 lbs.

BROOM CLOSET AND DISH CUPBOARD

No. 10 WE
(Broom Closet)



No. 12 WE
(Dish Cupboard)

Seasoned kiln-dried hardwood three-ply construction shelves, back and door panels; nickel plated hinges and door latch. May be used as a combination in bungalows and small apartments. Height over all 70 inches; width 19 inches; depth 13¼ inches.

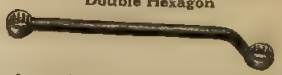
T9	3/4	1/2	Decrease	.75
T90	7/8	5/8	Decrease	1.50

Double End Box Type Wrenches

Double Hexagon



A complete series in sizes from ⅜" to 7/8" inclusive. Same socket size on each end of tool.
Especially adapted to automotive, truck or tractor jobs where height will not permit use of ordinary socket wrenches. Sockets have extremely thin walls. Double hexagon feature allows short bite in close quarters. Same socket sizes at each end of tool.

No.	Socket Size Inch	Price	No.	Socket Size Inch	Price

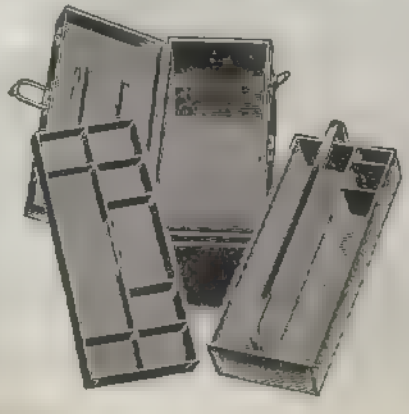
No. 118—Size 18x10x13 ins; wt each 11 lbs..... **12 75**
No. 120—Size 20x11x13 ins; wt each 12 lbs..... **13 50**
No. 122—Size 22x11x13 ins; wt each 13 lbs..... **13 50**

One in carton.

COMBINATION CASES, KENNEDY'S



24 gauge steel case, reinforced, 22 gauge steel tray, brown baked enameled finish. Two snug fitting trays, divided into compartments for small tools and parts, upper tray is 8 inches deep, and is fitted with handle which turns down into tray, can be carried as a tote box. With multiple change lock, side catches, corner irons and leather handle, reinforced with steel core.

Each

No. 716—Size 16x8x9 ins..... **$14 25**

One in carton; wt each 11 lbs.

MINERS' CARBIDE LAMPS

JUSTRITE

Seamless brass. Hook is riveted and soldered; fits all caps. Clasp made of spring brass, holds lamp secure to cap; will fit all standard cap shields.

Burner tip is made of imported lava, with 4 air holes, which prevents carbonizing.

JUSTRITE

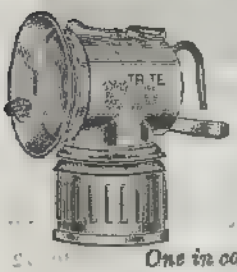
With Matchless Reflector.

Polished brass; ¼ inch nickel plated reflector; hook riveted to body. Polygon feed; round hook self-lighting attachment. Throws 16 candle power light 250 feet.

	Per Doz
No. 747—Burning capacity 2½ hrs; charge 2 oz carbide; height over all 3¾ ins	$39 60

One in carton; wt per doz 7 lbs.

JUSTRITE—Lever Feed, With Sparker.



Valve is operated by a lever sliding back and forth over notches, and held firmly in place by a small spring. The sparkler on reflector completely eliminates the use of matches.

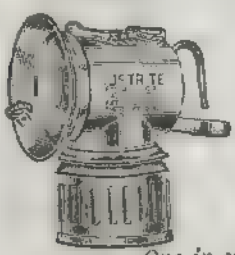
Height 4¼ inches; diameter reflector 2¼ inches; 13½ candle power. Furnished with one No. J77 carbide container.

	Per Doz
No. 85—Lamp only; polished	$33 00

One in cardboard box; wt each 6 ozs.

JUSTRITE—Polygon Feed, With Sparker.

Valve Control—Lighter Attachment.



The sparker or igniter on reflector completely eliminates the use of matches.

Height 4¼ inches; diameter reflector 2⅝ inches; 16½ candle power.

Lamp only; polished brass.

No.	707
Doz lots, Per Doz	$25 50
Gro lots, Per Doz	24 00

One in cardboard box; wt each 6 ozs.

JUSTRITE—Polygon Feed, With Sparker.

Seamless brass; polygon. Square valve threaded and soldered on the valve stem. The sharp corners of the button break, also rip away the caked carbide, insuring a steady free water flow. Diameter of reflector 3 ins.

	Doz lots, Per Doz	Gross lots, Per Doz
No. 767—Lamp only; polished brass	$28 50	27 00
No. 769—Lamp only; nickel plated	35 25	33 00

One in cardboard box; wt each 6 ozs.

VICTOR—Regulating Valve Water Feed, Detachable Reflector and Brace With Sparker.

Water feed is adjustable to permit the water to flow freely. Reflector polished brass, with wire edge that fits snug to the reflector brace; fastened to lamp with a knurled nut. Height 3¾ inches; detachable reflector 2⅝ inches in diameter; 16 candle power. Polished brass.

Lamp Only.

No.	661
Doz lots, Per Doz	$25 50
Gro lots, Per Doz	24 00

One in cardboard box; wt each 4½ ozs.

MINERS' CARBIDE LAMPS

GUYS DROPPER

Seamless brass. Has 2½ inch deep brass polished reflector intended for miners working in wet places or where the roof is low. Fitted with Guys patented water dropper and valve cleaner.

Height 4 inches; diameter of reflector 2½ inches.

PLUMBS AND LEVELS

ELDER'S ANGLE STASTRAIT

First grade select, straight grained air dried stock, finished with water-proof red paint. All spirit vials are set solid and protected by heavy glass lens, making them dirt, dust and water proof. All vials permanently marked and set in openings that do not fully penetrate the stock, these openings are finished in white providing a background against which vials are easily read. Levels are constructed from white pine or redwood. Designed to plumb a corner both ways at one appliance. The angle when placed at top or bottom of a square or round object levels and straight edges at one application. This applies to both leveling and plumbing.

Wt each, lbs	2¼	2¾	2 15/16	2½
Each	$10 80	11 70	12 90	14 25

One in cardboard box.

MACHINISTS' LEVELS

STANLEY

Nickel plated cast iron frame; proved glasses set solid in plaster inside of an iron case; the top plate is entirely separate from the glass.

Nos.	38½	39½
Length, ins	4	6
Wt per doz, lbs	3½	8
Per Doz	$21 00	27 00

Half doz in cardboard box.

STANLEY

Eclipse, V Bottom.

Nickel plated, with ground glasses; for mill wrights and machinists; used in leveling up shafting, pipe, etc.; also used on flat surface as well. The outer shell of the level can be turned so as to completely protect the glass when not in use.

Nos.	34V-6	34V-8
Length, ins	6	8
Wt each, lbs	¾	1¼
Each	$5 25	6 75

One in cardboard box.

LINE AND SURFACE LEVELS

STEVENS

Aluminum body; end pieces and hooks are formed from one piece of nickel silver; spring nickel silver clips. A handy level for the machinist, millwright, carpenter and electrician, particularly adapted for road and highway construction, in excavation and survey work.

LINE LEVEL

Reverse clips prevent level from falling off line. Length 3 inches.

Per Doz

No. 550—Wt each ½ oz... $12 75

COMBINATION LINE AND SURFACE LEVEL

Attached with patented spring clips, can be used either with line or on flat or circular surfaces for leveling. Length 3 inches.

Per Doz

No. 552—Wt each ½ oz.....$18 75

One doz in cardboard box.

HALLS

An accurate proved level glass placed in octagon aluminum tube with spring nickel silver twin hooks attached at each end by two nickel silver rivets that pass through the tube and each pair of hooks holding them firmly in place. A metal carrier is provided to hold the level in place allowing it to rest on the under flat plumbing door and window frames. The most important feature is its use on a line for laying out foundations, grading, sewering and all classes of construction.

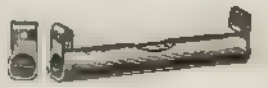
Per Doz

No. 1921—Length 3 ins $12 75

One doz in cardboard box; wt per doz ½ lb.

LINE AND SURFACE LEVELS

STANLEY



Aluminum tubing, bottom flat for surface leveling; one piece brass hooks and guards makes it impossible for it to fall off the line; proved glasses set perfectly level and solid, each hook machined and set same distance from bottom.

A handy level for laying foundations and walls, running grades, trimming hedges, etc.

Per Doz

No. 87—Length 3¼ ins; approx wt each ½ oz..... $19 50

Half doz on display card; wt per doz 1¼ lbs.

POCKET LEVELS

STANLEY

Iron body, japanned, steel set screw, can be attached to any straight edge or carpenter's square. Length 3¼ inches.

Per Doz

No. 40—Iron top plate..... $6 30

Same as No. L327 Lantern but with added improvement of built-in pump; hand operated filler plug and green porcelain enamel top. Fount holds two pints of fuel, enough for 12 to 15 hours service. One in carton complete with chimney, 2 mantles, wrench, cleaning pick, extra generator.

No. L427. Ship. wt. 6 lbs...Each **$7 50**

Operates like the Quick-Lite Lamp—has the same style of burner; uses the same generator and mantle; Mica chimney makes it wind-proof, storm-proof; insect-proof; fount and ventilator nickel finished; fount 6 inches diameter, holds 2 pints of gasoline, enough for 12 to 15 hours service; height overall 14 inches; one in a carton complete with Mica chimney, two mantles, pump, wrench, cleaning pick and extra generator.

No. L327. Ship. wt. 6 lbs...Each **$6 75**

FILTERING FUNNELS

COLEMAN

Much of the difficulty that users have with gasoline lighting and heating and cooking devices is caused by dirty gasoline. Such fuel quickly stops up the generators and gas tips and the result is improper operation. Gasoline accumulates dirt and impurities in handling; and also water, which is condensed in storage tanks. All this foreign matter can be removed when the gasoline is strained thru the Coleman Filtering Funnel. This funnel is strongly made, heavily copper plated and non-corrosive. In the bottom of the funnel is a fine brass wire strainer above which is a removable ring covered with a special filtering fabric. When this fabric is saturated with gasoline, water or dirt will not pass thru.

No. 0. Small size for gasoline lamp and lantern use. .....Each **$0 60**

No. 1. For use with Coleman stoves and other general use ....Each **$1 20**

MANTLES

FOR COLEMAN LAMPS AND LANTERNS

Made just right in size, shape, texture and chemical treatment to work properly with the Coleman gas tip and air intake in producing the wonderful 300 candle power brilliance.

STANLEY GAGE, SELF SETTING

Japanned smooth iron castings, polished face and sides; varnished rosewood handle and knob; brass screw adjustment. The self setting feature lies in the fact that the plane iron if taken out to be sharpened goes back in exactly the same position as before removal. Likewise the plane cap when taken out to allow removal of cutter goes back in its same position.

The plane cap is so designed that by slight adjustment it connects the cutter to either single or double iron. The plane iron consists of three pieces; cutter, adjustment slide and binder plate, all being fastened by one screw. The adjustment slide is machined on its sides to accurately fit the groove machined in the frog and is permanently fixed both sideways and endwise.

STANLEY, Iron Block.

Adjustable Double End.

Hardwood knob; has two slots and movable cutter seat. When it is desired to use it as a bull nose plane the cap and cutter can be removed and the adjustable cutter seat reversed.

Each

No. 131—Length 8 ins; 1⅝ in. cutter..... $5 85
One in cardboard box; wt each 1¾ lbs.

STANLEY, Rabbet and Block.

A detachable side will easily change this tool from a block plane to a rabbet plane or vice versa; the cutter is set on a skew.

Each

No. 140—Length 7 ins; 1¾ in. cutter..... $6 30
One in cardboard box; wt each 2 lbs.

Per Doz

No. 140C—Extra cutters, 1⅝ ins; for No. 140 plane... $12 75
Half doz in cardboard box; wt per doz 1 lb.

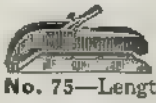
STANLEY, Side Rabbet.

For side-rabbeting and trimming dados, mouldings and grooves of all sorts. A reversible nose piece will give the tool a form by which it will work close up into corners when required.

Each

No. 98—Length 4 ins; ½ in. cutter..... $4 65
One in cardboard box; wt each about ½ lbs.

STANLEY, Bull-nose Rabbet.



Non-adjustable, polished bottom, for general rabbeting and working into close corners.

Each

No. 75—Length 4 ins; 1 in. cutter..... $1 65
One in cardboard box; wt about ¾ lb.

STANLEY, Carriage Makers' Rabbet.

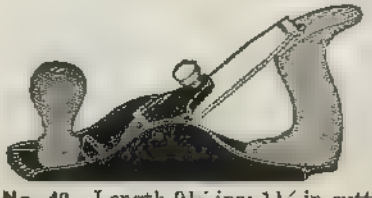
Varnished rosewood handle and knob; with screw and lever adjustments.

Each

No. 10½—Length 9 ins; 2⅛ in. cutter..... $12 00
One in cardboard box; wt each about 9 lbs

No. 10½C—Extra cutters, 2⅛ in; for No. 10½ plane.. 1 59
Half doz in cardboard box; wt per doz 5 lbs.

STANLEY, Scrub.



Japanned, cast iron frame; beech handle and knob. Designed for planing down to rough dimensions any board too wide to rip with saw. This is made possible by extra heavy cutter with rounded cutting edge.

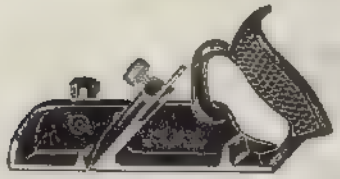
Each

No. 40—Length 9⅛ ins; 1¼ in cutter..... $4 95
One in cardboard box; wt each 2⅛ lbs.

PLANES

Cast iron frame, tool steel cutters, tempered and polished.

STANLEY, Improved Rabbet.

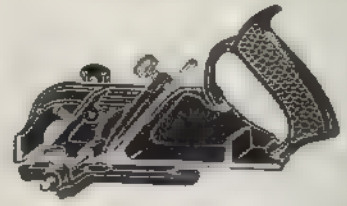


Japanned cast iron frame and handle. All fitted with detachable depth gauge. No. 190 with spur for working across grain. Length over all 8 inches.

	Each
No. 192—1 inch cutter; wt each 2 lbs	$5 55
No. 191—1¼ in. cutter; wt each 2¼ lbs	5 85
No. 190—1½ in. cutter; wt each 2½ lbs	6 30

One in cardboard box.

STANLEY, Duplex Rabbet and Filletster.

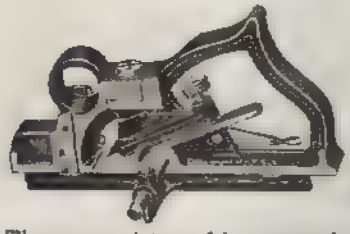


Japanned cast iron frame and handle. Can be used as a bull nose rabbet. The arm to which the fence is secured can be screwed into either side of the stock, making a superior right or left hand filletster, with adjustable spur and depth gauge.

	Each
No. 78—Length 8½ ins; 1¾ in. cutter	$6 90

One in cardboard box; wt each about 3 lbs.

STANLEY, Rabbet and Filletster.



Japanned cast iron frame, fence and handle. The arm to which the fence is secured can be screwed into either side of the stock, making a superior right or left hand filletster, with adjustable spur and depth gauge, allowing a groove to be cut any desired depth up to ½ inch. The screw at top of frame can be removed allowing the plane to be used as a bull nose rabbet. Plane is also equipped with spur for use in working across the grain.

	Each
No. 278—Length 6¾ ins; 1 in. cutter	$7 05

One in cardboard box; wt each 2 lbs.

STANLEY, Tongueing and Grooving.

Nickel plated cast iron frame and handle; rosewood knob. Has two plow cutters of the same width, and one extra wide cutter. When the guide or fence is set both cutters work and a tongue can be made. Fence hung on a pivot, can be swung around end for end. This movement covers one of the cutters.

	Each
No. 48—Length 10½ ins; cuts 5/16 in. groove on boards ¼ to 1¼ ins; centers on ⅞ in	$10 95

One in cardboard box; wt each 3¾ lbs.

PLANES

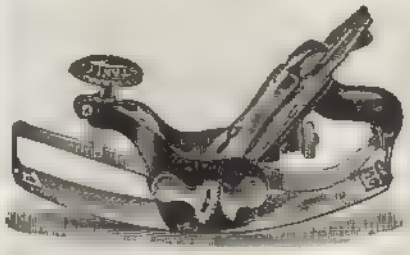
STANLEY, Double End Match.

Nickel plated cast iron frame, handle and cap. Provided with both tongue and groove irons, both governed by one permanent fence. With one side a tongue can be cut and by reversing ends the plane will cut a groove to fit. Tongueing tools made wide on one side for use on thicker stuff than plane will tongue and groove in the center.

Nos.	147	148
Length, ins	9	9
Size of cutter, ins	5/16	¾
For boards, ins	½ to ¾	¼ to 1
Centers on, ins	⅝	⅛
Wt each, lbs	2¼	2¾
Each	$9 00	9 75

One in cardboard box.

STANLEY, Adjustable Circular.



Japanned cast iron frames, caps and handles; polished bottom. Can be adjusted to work on concave or convex surfaces; graduated scale on the gears, face can be set to work an arc of the same circle, both concave and convex.

	Each
No. 113—Length 10 ins; 1¾ in. cutter	$15 75

One in cardboard box; wt each about 4 lbs.

STANLEY, Plow, Dado, Filletster and Matching.

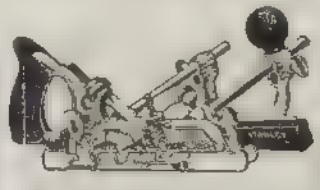
Nickel plated cast iron; rosewood handle and knob.

Has 8 plow and dado bits, 1/16 to 1¼ inch, one 1½ inch filletster cutter, 1 slitting blade, one ¼ inch tongueing tool. Is readily converted into a filletster, plow or matching plane. All the tools except the slitting blade are secured on the main stock askew.

	Each
No. 46—With 11 cutters; length 10½ ins	$23 25

One in cardboard box; wt each 6 lbs.

STANLEY, Adjustable Beading, Rabbet and Matching.



Nickel plated cast iron; rosewood handle, knob and fence.

Fitted with an adjustable fence or guide and a depth gauge also with spurs for use when working across the grain.

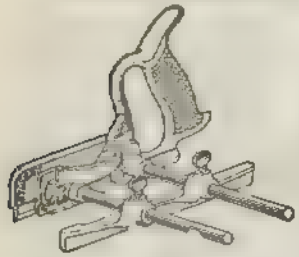
Has one 1½ inch sash tool, one ¼ inch match tool, one slitting tool, one 1¼ inch filletster, eleven plow and dado tools, ⅛ to ⅞ inch, seven beading tools, ⅛ to ½ inch.

	Each
No. 45—With 22 cutters; length 11 ins	$33 00

One in cardboard box; wt each 9½ lbs.

PLANES

STANLEY, Adjustable. Beading and Matching.



Nickel plated cast iron stock and frame. For ordinary center beading. By adjusting fence, center beading can be done up to 5 inches from the edge of a board. Except for working across the grain, the spurs need not be used. Each plane furnished with 1/8, 5/16, 1/4, 1/16, 3/8, 7/16 and 1/2 inch beading tools, 1/4, 5/16, 3/8, 7/16, 1/2, 5/8, and 1/8 inch plow and dado bits, and a pair of 1/4 inch, tongueing tools. Each

No. 50—With 15 cutters; length 9 1/4 ins $18 00

One in cardboard box; wt 5 1/2 lbs

STANLEY, Wood Workers' Handy Router.

Nickel plated, cast iron; beech-wood knobs; open throat. Furnished with patented pointed cutters.

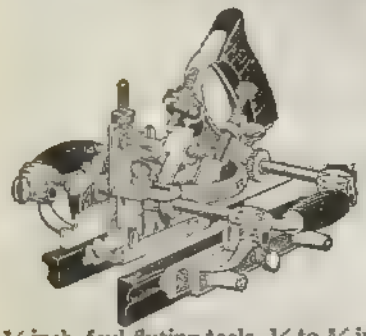
Perfectly adapted to smooth the bottom of grooves, panels or all depressions below the general surface of any wood work.

Bits can also be clamped to back side of upright post, and outside of stock. In this position will plane into corners, will router out mortises for sash frame pulleys, or will smooth surfaces not easily reached with any other tool. Each

No. 71—With one cutter each, 1/4 and 1/2 in; length 7 1/2 ins $8 55

One in cardboard box; wt each 2 1/2 lbs.

STANLEY, Patent, Universal.



Consists of a main stock with two sets of transverse sliding arms, a depth gauge adjusted by a screw and a sliding arm, and a sliding cutter with stop. The bottom is adjustable both vertically and laterally.

Has one 1 1/4 inch sash tool, one 1 1/4 inch match tool, one slitting tool, one fillester, eleven plow and dado tools, 1/8 to 3/8 inch, nine beading tools, 1/8 to 3/4 inch, foul fluting tools, 1/4 to 5/8 inch, four hollow cutters, 1/2 to 1 inch, four round cutters, 1/2 to 1 inch, two quarter hollow cutters, 1/2 and 3/4 inch, two quarter round cutters, 5/8 and 7/8 inch, three reverse ogee cutters, 1/2 to 1 inch, two Roman ogee cutters, 5/8 and 7/8 inch, three Grecian ogee cutters, 1/2 to 1 inch, two 1/4 round cutters with bead, 5/8 and 7/8 inch, three reeding tools, two beads, 1/8 to 1/4 inch. Each

No. 55—Nickel plated, cast iron frame; rosewood handles; complete with 53 tool steel cutters; tempered and polished, arranged in four separate cases $64 50

One in cardboard box; wt complete about 15 1/4 lbs.

STANLEY

Adjustable Scraper.

Japanned cast iron frame; rosewood handle and knob. The blade is adjustable endwise and for angle and can be firmly locked in any position desired.

This tool is used for scraping and finishing veneers, cabinet work or hard wood in any form. Can be used equally well as a tooth plane and scraping off old paint and glue. Each

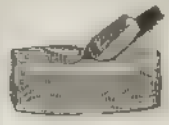
No. 112—Length 9 ins; 3 in. cutter $9 00

One in cardboard box; wt each 1 lbs.

WOOD BENCH PLANES

Selected seasoned beechwood, plain finish; extra quality cast steel cutters, tempered; polished starts.

Smooth.



Length 8 inches; width of cut 1 1/8 to 2 inches. Each

No. 03—Double Iron $3 75

Packed loose; wt each about 2 lbs.

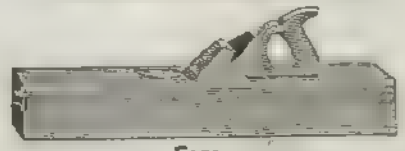
Jack.

Length 16 ins; width of cut 2 3/8 to 2 1/4 inches. Each

No. 015—Double Iron $4 50

Packed loose; wt each about 5 lbs.

Fore.



Each

No. 021—Double Iron; length 22 ins; width of cut 2 3/8 to 2 1/8 ins $7 50

Packed loose; wt each about 6 lbs.

PLANE IRONS

All orders for Plane Irons should specify the number of plane for which they are intended.

Special steel bit, tempered and sharpened.

COMMON, Single.

For common wood bench planes.

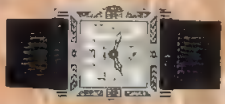
Discriminating Men Wear Locust Wrist Watches

THE prevailing style in Men's Watches decrees either the leather strap or metal band. The latter is designed either in a woven wire mesh, or a flexible link band bracelet, both of which are adjustable to size. A large variety of case designs, equipped with either leather or metal bands, gives opportunity for selection according to the buyer's preference.

The Locust movements, whether 15 or 17 Jewel, are sturdily constructed, and will easily withstand ordinary usage. Proper cleaning and oiling at frequent intervals will prolong the life of any watch.

Illustrations are 7/8 actual size.

Because of impending changes in U. S. Customs duty, all prices are subject to change without notice.



L4072—[illegible] Jewel Locust Movement, Cut Balance, 14 Kt. White Gold Filled Case, Leather Strap and Gold Filled Buckle $37.00

Wrist Watches For Both Conservative and More Modern Tastes

EVERY man, whether ultra-conservative, or with ideas leaning to the more modern, eventually wears a Wrist Watch. The usefulness of this type of Watch has been proven, and any of these Locust Wrist Watches will be a pleasure to wear. The choice of designs is dependent on individual tastes; but the dependability of the movement is equally good in all models.

Particular attention is called to lower priced Watches, which are designed to fill the need for the young boy, who is buying his first watch. They are as dependable as the more costly ones.

Illustrations are ⅞ actual size.

Because of impending changes in U. S. Customs duty, all prices are subject to change without notice.

Watches With Black Silk Ribbon

THE conservative woman prefers a Watch whose attractiveness is increased by the contrasting white of the Watch and the Black of the silk grosgrain ribbon. The Watches on this page are either in White Rolled Plate cases, or in White 14 Kt. Solid Gold cases, with black ribbons, and white buckles, whose quality matches that of the cases.

The movements whether 15 or 17 Jewels, or less, are well constructed, and the certificate of the test which accompanies each Watch, is the guarantee of the Maker to the Wearer.

Each Watch is packed in a useful and handsome presentation box.

Illustrations are ⅞ actual size.

RADIO SETS

LONG DISTANCE, SIX TUBE

Shielded Outdoor Antenna Type. Two Tuning Dials. Wave Length Range 200 to 600 Meters.

Distinguished for performance and clear tone. The solid steel cabinet gives added shielding properties that greatly contribute to the selectivity and performance of this set.

TUBES—Six.

USES—Receiving Radio programs broadcast on two hundred to six hundred meter wave lengths, five hundred to fifteen hundred kilo-cycles.

SPECIAL FEATURES.

1. Good distance, volume, selectivity and quality.
2. Tuned by a single illuminated dial.
3. Neat and compact.
4. All tuning elements enclosed by metal shielding.
5. Carefully inspected and tested both at factory and by our own Radio experts.
6. Exceptionally sturdy because of design, material (including flexible wires) and construction.

CURRENT SUPPLY—(A) 6 volts; Plate (B) Either battery or battery eliminator; Filament 45, 90, & 135 volts; grid bias. (C) 9 Volts.

ANTENNA—Outdoor.

CONTROLS—One tuning dial, on and off switch, and volume control (Potentiometer).

TYPES OF CIRCUIT—Three stages of tuned radio frequency, a detector and two stages of transformer coupled audio frequency amplification.

MATERIALS AND SIZE:

Panel—Steel frosted brown crackled finish 18x7 inches.
Sub-Panel—Bakelite.
Shielding—Steel.
Cabinet—Wood, dark American walnut finish.

Battery Operated.

CONSOLE TYPE

The pleasing proportions and interesting details in this cabinet instantly appeal to all who see it. The built-in loud speaker is of the latest type and reproduces reception with unusual clarity and mellowness.

Compact and efficient, easy to operate because of the single drum tuning dial.

The compactness, simplicity and modern character of the whole assembly is very manifest.

TUBES—Eight in Receiver and one rectifying tube in Power Pack. Nine in all.

USES—Receiving Radio programs broadcast on two hundred to six hundred meter wave lengths, five hundred to fifteen hundred kilo-cycles.

SPECIAL FEATURES:

1. Unsurpassed in distance, volume, selectivity and tone.
2. Furnished with all connections made except antenna, ground, loud speaker and light socket.
3. Tuned by a single illuminated dial.
4. Neat and compact.
5. All tuning elements enclosed by metal shielding.
6. Carefully inspected and tested both at the factory and by our own Radio experts.
7. Exceptionally sturdy because of design, material, including flexible wires and construction.
8. One of the finest radio receivers made.
9. Worm drive for revolving drum and gang condensers.

CURRENT SUPPLY—AC single phase, 60 cycle 110 volt.

ANTENNA—Outdoor.

CONTROLS—One tuning dial, on and off switch and volume control Potentiometer. It also has a switch turning off the radio frequency amplifying tubes and rehostat controlling the filament of audio amplifying tubes. The latter are used when the audio frequency amplifying systems of the receiver is being used in connection with a Phonograph.

TYPES OF CIRCUIT—Three stages of balanced and shielded neutrodyne radio frequency amplification, a detector and three stages of audio frequency amplification.

The first two are transformer coupled and consists of one tube each. The last stage of audio frequency amplification contains two tubes parallel called "push pull."

POWER PACK—Supplies all current, filament plate and grid necessary to operate receiver from light socket.

MATERIAL AND SIZE—

Cabinet—Burl walnut, handsomely finished.
Panel—Burl walnut.
Shielding—Aluminum.
Top 17x26 inches; height 55 inches.

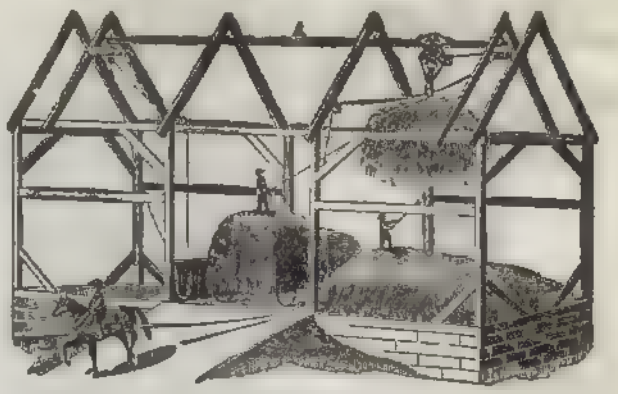
HAY CARRIERS

DIRECTIONS FOR RIGGING HAY CARRIERS



Directions for reversing all our Swivel Carriers.

Pull the carrier to stop block or bumper, allowing the lifting pulley to drop out of the carrier. Take rope out of pulley at end of barn and while standing on the floor beneath the carrier give the rope a little slack from the hand to the carrier and give it a little throw to obtain a half turn in the swivel. Rethread the pulleys in the end of the barn you wish to operate in, then the carrier is ready for operation. Before pulling large rope out of pulleys tie a small rope to the end of it so the small rope will be through pulleys, for pulling up the large rope, the reverse, see cut above.

Directions For Putting Up Track.

Support track to every rafter by means of rack eyes and rafter irons. Place stop block or bumper directly over unloading place, and to prevent carrier from running off track bolt carrier stop or pulley fastener to end of the track, tie a rope from one rafter to the other, letting rope hang four or five inches under the track, or nail a board to the rafters close to and over it.

Material Required for a Steel Track Outfit for Different Length Barns.

For a 40 Foot Barn—One hay carrier fork or hay sling with sling pulley, one reversible carrier, 40 feet steel track, 21 hanging hooks, 21 rafter brackets, 5 knot passing pulleys, 6 floor hooks, 110 feet ¾ inch manila rope, 50 feet ⅜ inch check rope, 40 feet ⅜ inch reverse rope.

For a 50 Foot Barn—One hay carrier fork or hay sling with sling pulley, one reversible carrier, 48 feet steel track, 25 hanging hooks, 25 rafter brackets, 5 knot passing pulleys, 6 floor hooks, 130 feet ¾ inch manila rope, 55 feet ⅜ inch check rope, 50 feet ⅜ inch reverse rope.

For a 60 Foot Barn—One hay carrier fork or hay sling with sling pulley, one reversible carrier, 60 feet steel track, 31 hanging hooks, 31 rafter brackets, 5 knot passing pulleys, 6 floor hooks, 160 feet ¾ inch manila rope, 60 feet ⅜ inch check rope, 60 feet ⅜ inch reverse rope.

Material Required for Wood Track Outfits.

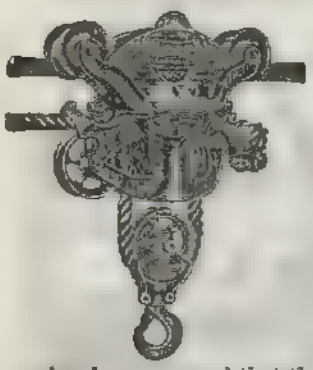
Material required for wood track outfits for different length barns, same as for steel track, except hanging hooks. Use No. 71 wood track hanging hooks in place of these.

Different lengths of barn will use track, hanging hooks and rope in same ratio as above.

If required to take hay in at end of barn and have rope pass down at far end, figure same amount of draft rope. If draft rope be returned to same end of barn and then down, this require about one fourth more draft rope.

HAY CARRIERS

—BLUE GRASS—



Swivel Reversible, For Double Angle Steel Track.

Malleable iron, finished in blue and gold. The travelers and sheaves throughout revolve upon bushings, thus reducing friction and wear. The lifting pulley is supplied with new patent hook, by means of which the fork can be easily removed without the use of a wrench, at the same time locking it in perfectly when in use.

Throat has large opening and the simple locking mechanism is so arranged that the lifting head or fork pulley cannot fail to enter and lock securely to the carrier. Locks are operated without the use of springs and engage projections upon the lifting head practically in a line with the axis of the pulley.

Diameter of track wheels 3¼ inches; 1 inch tread; height over all 11 inches; length 14 inches.

	Each
No. BG10—With trip block and lifting pulley, **less rope**	$21 30

Packed loose; wt each 23 lbs.

Hay Carrier Outfits.

Hay carrier, track, track fixtures and hay fork pulleys included in this outfit. This does not include Hay Fork, Sling or Rope.

	Each

CLIMAX

Swivel Reversible, For 4x4 inch Wood Track.

With this carrier the fork can be carried within seven inches of the track, which makes it possible to fill the mow closer to the comb of the roof.

The throat has large opening and the simple locking mechanism is so arranged that the lifting head or pulley locks directly on the sides or frame of the carrier, not depending on separate dogs or lugs to hold the load.

Diameter of track wheels 5¼ inches; tread 1¼ inches; height over all 16½ inches; length 19 inches.

	Each
No. 115—With trip block and lifting pulley; less rope: wt each 30 lbs	$21 30
No. 116—Extra trip block, for No. 115 carrier; wt each ¾ lb	1 14
No. 117—Extra lifting pulley, for No. 115 carrier; wt each 3¾ lbs	2 85

Packed loose.

Hay Carrier Outfits.

BRACKETS AND CLAMPS

FOR HAY RACK

Partial view of hayrack made with brackets and clamps.

Section showing manner of construction.

These brackets make the strongest kind of hay racks, as the wood is not weakened by boring holes for bolts where strength is most essential. Set consists of 8 steel clamps, 4 left and 4 right brackets, 8 upper grooved steel washers, 8 lower clips or washers, and 16 nuts. For sills 2x8 inches.

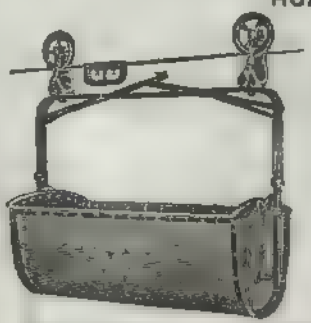
LITTER CARRIERS

HUDSON



20 gauge galvanized steel tub closely riveted to angle steel frame 1x1x⅛ inch. Ends reinforced at center by 3¾x4⅛x13¼ inch malleable pivot castings. All joints soldered. Heavy angle iron reinforcement completely around top, bottom and sides. Latches at both ends of tub, lock and unlock simultaneously. The tub dumps automatically by means of a trip and is self-cleaning when dumped.

Track wheels gray iron, 5⅛ inches in diameter, roller bearings steel axles mounted on swiveled wheel frame to permit wheels to take curves without binding on track.

Can be used on 0000 rod track both inside and outside of barn. Can also be used on rigid track inside barn and rod outside track if so desired. **Price does not include track.**

	Each
No. 70—Capacity tub 6 bu; length 40 ins; width 22 ins; depth 16 ins	✣$59 25

PYREX

TRANSPARENT OVEN WARE

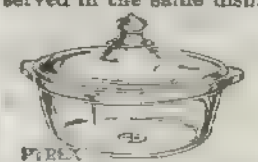
A clear tough glass, scientifically made to withstand the sudden changes of temperature incidental to baking. Easily cleaned and the most sanitary of cooking utensils.

Will not absorb odors or flavors; discolor, glaze or flake and has a smooth hard surface.

Pyrex dishes have a large capacity for absorbing heat, which means economy of fuel. The food may be baked and served in the same dish.



CASSEROLES

Each with Equal Value of Other Pyrex

No. 622SPEC—Capacity 1 qt; diam 6⅛ ins; depth 2⅜ ins	$2 10

One in carton; wt each 2¼ lbs.

STANLEY PLANE PARTS

BAILEY IRON

Bailey Old Style.

Bailey New Style.

An Improvement has been made in the Bailey Iron Plane which necessitated a change in the construction of the Bottom and Frog, thereby making it impossible to use the new style Frog in the old style Bottom, or the old style Frog in a new style Bottom.

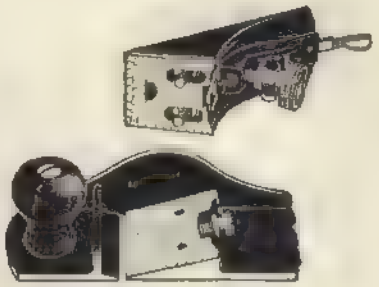
For a time an intermediate style was made having same frog and bottom as the latest design, except that there was no Frog adjusting screw, consequently no clip on the Frog.

The latest design Frog or Bottom will be furnished for both the intermediate and new style Planes. If your plane is of the intermediate pattern, remove the steel clip from the Frog and the parts will fit.

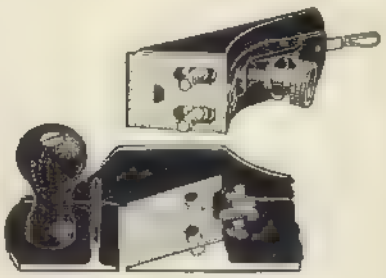
In order that we may fill your order correctly, kindly advise us which style Plane you have.

The difference in construction of the Frogs and Bottoms is very clearly shown in the illustrations above

BED ROCK



Bed-Rock Old Style.



Bed-Rock New Style.

An Improvement has been made in the Bed Rock Plane which necessitated a change in the construction of the Bottom and Frog, thereby making it impossible to use the new style Frog in an old style Bottom or the old style Frog in a new style Bottom.

In order that we may fill your order correctly kindly advise us which style Plane you have.

The difference in construction of the Frogs and Bottoms is very clearly shown in the illustrations above

PLANE PARTS

INTERCHANGEABLE

In the following tables the numbers of Planes taking the same identical part are given on the same line or group, for instance—

A 1⅝ inch Single Iron is the same in 13 numbers of Planes, therefore an order for Single Plane Irons for a No. 9½ Plane would provide for any or all of the Planes shown in the same line or group, or

An order for Adjusting Nuts for No 9½ Plane would provide for any of the planes in that line, viz., Nos. 9½, 9¾, 15 and 15½.

PART No. 1

SINGLE PLANE IRONS

For Bailey, Bed Rock and Stanley Iron Planes.

Used in Planes:

1¼ inch. No. 1 ....Each $0 45
1⅝ inch. Nos. 2, 602....Each $0 50

ADJUSTING LEVERS

For Planes:

No. 1	Each $0 10
Nos. 2, 2C, 3, 3C, 4, 4C, 4½, 4½C, 5, 5C, 5¼, 5¼C, 5½, 5½C, 6, 6C, 7, 7C, 8, 8C, 602, 603, 603C, 604, 604C, 604½, 604½C, 605, 605C, 605½, 605½C, 606, 606C, 607, 607C, 608, 608C	Each $0 10
Nos. 22, 24, 26, 27½, 28, 31, 32, 35, 36	Each $0 10
Nos. 9½, 9¾, 15, 15½, 16, 17, 18, 19	Each $0 10

PART No. 8

ADJUSTING NUTS

For Planes:

No. 1	Each $0 20
Nos. 2, 2C, 602	Each 20
Nos. 3, 3C, 4, 4C, 4½, 4½C, 5, 5C, 5¼, 5¼C, 5½, 5½C, 6, 6C, 7, 7C, 8, 8C	Each $0 20
Nos. 603, 603C, 604, 604C, 604½, 604½C, 605, 605C, 605½, 605½C, 606, 606C, 607, 607C, 608, 608C	Each $0 20
Nos. 22, 24, 26, 27½, 28, 31, 32, 35, 36	Each $0 20
Nos. 9½, 9¾, 15, 15½	Each 20
Nos. 16, 17, 18, 19	Each 20
Nos. 60, 65, 61, 63	Each 20
Nos. 60½, 65½	Each 20
No. 62	Each 20
No. 131	Each 20
Nos. 140, 220	Each 20
No. 203	Each 20

STANLEY PLANE PARTS

PART No. 9
LATERAL ADJUSTING LEVER

For Planes:

Nos. 2, 2C, 602, 22, 24.....Each $0 20

Nos. 3, 3C, 4, 4C, 4½, 4½C, 5, 5C, 5¼, 5¼C, 5½, 5½C, 6, 6C, 7, 7C, 8, 8C, 603, 603C, 604, 604C, 604½, 604½C, 605, 605C, 605½, 605½C, 606, 606C, 607, 607C, 608, 608C, 26, 27½, 28, 31, 32, 35, 36 .....Each 20

Nos. 9½, 9¾, 15, 15½, 16, 17, 18, 19 .....Each $0 20

PART No. 10
FROG SCREWS

For Planes:

No. 1 .....Each $0 10
No. 2, 2C .....Each 10

Nos. 3, 3C, 4, 4C, 4½, 4½C, 5, 5C, 5¼, 5¼C, 5½, 5½C, 6, 6C, 7, 7C, 8, 8C .....Each $0 10

FROG SCREW AND BUSHING

For Planes:

Nos. 22, 24, 26, 27½, 28, 31, 32, 35, 36 .....Each $0 20

PART No. 11
HANDLES

For Planes:

No. 1 .....Each $0 40
Nos. 2, 2C, 602.....Each 40

Nos. 3, 3C, 603, 603C, 4, 4C, 5¼, 5¼C, 604, 604C .....Each $0 40

Nos. 4½, 4½C, 5, 5C, 5½, 5½C, 6, 6C, 7, 7C, 8, 8C, 604½, 604½C, 605, 605C, 605½, 605½C, 606, 606C, 607, 607C, 608, 608C .....Each $0 40
Nos. 26, 27, 27½, 28, 31, 32.Each 20
Nos. 35, 36 .....Each 20
Nos. 9¾, 15½ .....Each 50
No. 62 .....Each 60

PART No. 12
KNOBS

For Planes:

No. 1 .....Each $0 30
Nos. 2, 2C, 602 .....Each 30

Nos. 3, 3C, 4, 4C, 5¼, 5¼C, 603, 603C, 604, 604C .....Each $0 30

Nos. 4½, 4½C, 5, 5C, 604½, 604½C, 605, 605C .....Each $0 30

Nos. 5½, 5½C, 6, 6C, 7, 7C, 8, 8C, 605½, 605½C, 606, 606C, 607, 607C, 608, 608C .....Each $0 30

Nos. 22, 24, 35, 26, 27½, 28, 31, 32, 36 .....Each $0 20
Nos. 110, 120, 130 .....Each 20
Nos. 131, 140, 220, 63, 203, 61.Each 30

PART No. 13
HANDLE BOLTS AND NUTS

For Planes:

No. 1 .....Each $0 20
Nos. 2, 2C, 602.....Each 20

Nos. 3, 3C, 4, 4C, 5¼, 5¼C, 603, 603C, 604, 604C 26, 27½, 28, 31, 32 Each 20

Nos. 4½, 4½C, 5, 5C, 5½, 5½C, 6, 6C, 7, 7C, 8, 8C, 604½, 604½C, 605, 605C, 605½, 605½C, 606, 606C, 607, 607C, 608, 608C .....Each $0 20
Nos. 35, 36 .....Each 20

PART No. 14
KNOB BOLTS AND NUTS

For Planes:

No. 1 .....Each $0 20
Nos. 2, 2C, 602 .....Each 20

Nos. 3, 3C, 4, 4C, 5¼, 5¼C, 603, 603C, 604, 604C .....Each $0 20

Nos. 4½, 4½C, 5, 5C, 604½, 604½C, 605, 605C .....Each $0 20

Nos. 5½, 5½C, 6, 6C, 7, 7C, 8, 8C, 605½, 605½C, 606, 606C, 607, 607C, 608, 608C .....Each $0 20

KNOB SCREWS

For Planes:

Nos. 22, 24, 35.....Each 10
Nos. 26, 27½, 28, 31, 32, 36.Each 10

PART No. 15
PLANE HANDLE TOE SCREWS

For Planes:

Nos. 4½, 4½C, 5, 5C, 5½, 5½C, 6, 6C, 7, 7C, 8, 8C, 604½, 604½C, 605, 605C, 605½, 605½C, 606, 606C, 607, 607C, 608, 608C .....Each $0 10

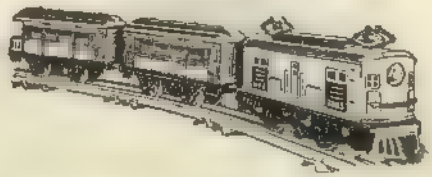
ELECTRIC TRAINS

AMERICAN FLYER



The Junior Champ. Narrow Gauge.

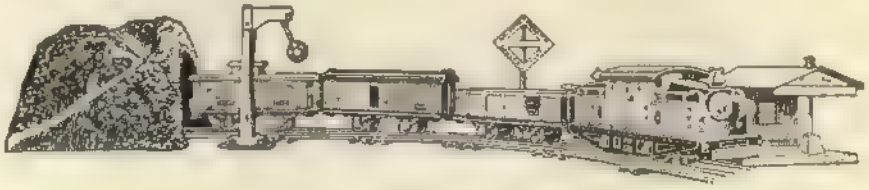
This is a very special number which combines beauty, finish and detail with exceptional low cost. The No. 1093, 7 in. locomotive is finished entirely in two-tone green oven baked enamel. Its beauty is enhanced by the addition of name-plates, hand rails, etc. The Empire Limited, No. 1123 pullman and 1124 observation cars are 5½ inches long and have detailed chrome yellow lithographed steel sides with green enameled roofs. Length of train 19½ inches. Eight curved tracks included.

No. 1310. (25 Watt Transformer recommended). ....**Each $5 50**

The Vanguard. Narrow Gauge.

This new all enamel low swung and extraordinarily wide train, offers a full size measure of excellence, design, size, finish and detail at a very low price. The No. 3100, 7½ inch locomotive duplicates refinements previously limited to only the higher priced trains. It has brilliant red enameled sides, red enameled top and is handsomely decorated with solid brass details. The new No. 3141 passenger car and 3142 observation car are both 6½ inches long and are finished in two-tone red automobile enamel. Full detail trim emphasizes the finish of these new designed wide and low swung cars. The observation car is fitted with a wide canopy and platform railing. Train is 20½ inches long. Eight curve track included.

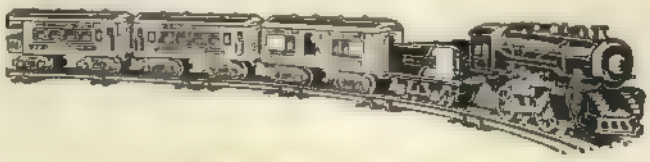
No. 1312. (50 Watt Transformer recommended) .....**Each $7 75**



The Clipper. Narrow Gauge.

This complete 31 inch long freight train outfit enjoyed a great reception during the New York Toy Fair. No. 3103, 8 inch locomotive is finished in Victory Red enamel. The new freight cars No. 3013 sand car, 3012 automobile car, 3014 caboose are 6½ inches long and are fitted with brass journal boxes, hand rails, ladders and brake wheels. Equipment consists of No. 206 danger signal, 261 tunnel, 93 suburban station and new 222 banjo signal. Eight curve and two straight tracks included.

No. 1316. (75 Watt Transformer recommended) .....**Each $11 00**



The Iron Horse. Narrow Gauge.

The price doesn't begin to index the quality of this 34 inch long train. Consists of No. 3192, 12 in. steam type locomotive with tender. Baggage car No. 3150, pullman car 3151 and observation car 3152 are all 6½ inches long equipped with double trucks and are finished in chrome yellow enamel. Eight curve and four straight tracks included.

No. 1319. (75 Watt Transformer recommended) .....**Each $12 50**

ELECTRIC TRAINS

AMERICAN FLYER

Old Dominion. Narrow Gauge.

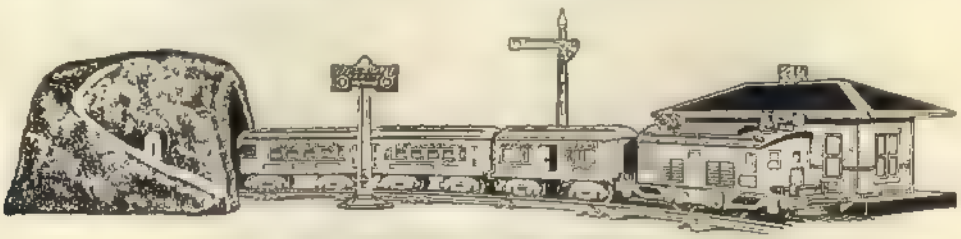
This 44 inch steam type train posesses an unusual number of distinctive features. Consists of No. 3192, 12 inch steam type locomotive and tender, new freight cars No 3046 log car 3016 sand car, 3015 automobile car and 3017 caboose. Cars are 6½ inches long and have double trucks. Solid brass journal boxes, hand rails, brake wheels and ladders bring out the details of these cars. Eight curve and four straight tracks are included.

No. 1321. (75 Watt Transformer recommended) .....Each **$13 50**

The Frontenac, Ltd. Narrow Gauge.

The trim appearance of this 31 inch train with its No. 3107, 9 inch reverse locomotive finished in two-tone blue enamel and its two-tone green enamel cars make it an outstanding value. No 3150 baggage car, 3161 pullman and 3162 observation cars are all 6½ inches long, and are very wide and low slung in construction. The pullman and observation cars are electrically lighted. Eight curve and four straight tracks included.

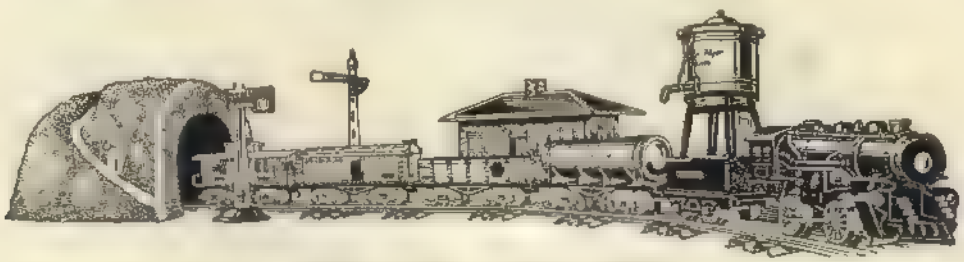
No. 1322. (75 Watt Transformer recommended) .....Each **$14 00**



New Bluebird. Narrow Gauge.

This complete outfit is outstanding in its popularity and with the new full enameled lower and wider cars and the addition of a new flashing signal, its popularity is certain to increase Length of train is 31 inches. Locomotive No 3107, 9 inches with reverse, is finished in two-tone blue enamel with gray chassis No. 3150 baggage car, 3161 pullman and 3162 observation are all 6½ inches long, and finished in two-tone blue enamel with gray trucks. Pullman and observation cars are electrically lighted No. 2011 semaphore, 96 station, 263 tunnel, 223 flashing signal, eight curve and six straight tracks are included.

No. 1328. (75 Watt Transformer recommended) .....Each **$18 00**



Major Leaguer. Narrow Gauge.

Complete outfit as shown consists of a 45 inch train with No 3193, 12 inch steam type locomotive with reverse and tender, 3018 tank car, 3016 sand car, 3015 automobile car and 3017 caboose. Cars are 6½ inches long, of double truck construction and have full brass trim. The following equipment is also included: No. 2020 water tank, 2011 semaphore, 96 station, 263 tunnel, 223 flashing signal, eight curve and six of straight pieces of track.

No. 1329. (75 Watt Transformer recommended) .....Each **$19 00**

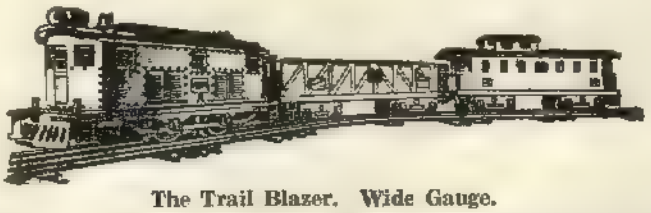
ELECTRIC TRAINS

AMERICAN FLYER

The Commodore. Narrow Gauge.

Especially has care been lavished upon the appearance of this 42 inch train, which presents a remarkable trim assembly Consists of the new No 3194, 14¾ inch massive steam type locomotive with reverse and eight wheel tender, two 3171 pullman cars and one 3172 observation car Cars are 8¼ inches long of double truck construction with lights and etched nameplates and are finished in rookie tan bodies with mitus green roofs. Eight curve and six straight tracks are included.

No. 1339. (75 Watt Transformer recommended) .....Each **$20 00**



The Trail Blazer. Wide Gauge.

This all steel freight train with its realistic cars, finished in sprayed-on enamel and decorated with solid brass trim is a very popular outfit with the young "wide gauge" electrical railroaders. It is also a very good outfit for those who desire a freight train in addition to a passenger train. Gross weight 17½ lbs. Locomotive Model 4644 of the New Haven type 12 inches long is equipped with a manual control reversing lever that extends out through the cab roof, which can be easily flipped while in motion, thus reversing the direction of travel. Brilliantly finished in two-tone Sunset Red and attractively decorated with solid brass trim, such as deeply etched nameplates, journal boxes, air tanks, flag fixtures, handrails, pantagraph, and bell plus a die-cast headlight fitted with a genuine Mazda lamp—it is an exceptionally classy locomotive Powered by the same size and quality motor as used in the "President's Special" the crack train of the American Flyer lines. Cars—the sand car and caboose are each 14 inches long and are the longest and heaviest freight cars made. Automatic couplers that are interchangeable with all our wide gauge cars, and are especially beautiful with deep embossings and solid brass trim Sand car 4017 is finished in Emerald green while the caboose 4011 is two-tone Victory Red. (The color of the caboose is subject to change). Track—eight curve and two straight track sections form an oval 3 feet 9 inches by 4 feet 11 inches—a total length of 13 feet 5 inches.

No. 1471. (75 Watt Transformer recommended) .....Each **$21 75**

The Eagle. Wide Gauge.

The longest 2-car passenger train of the finest quality with the most features at the lowest price. The entire train is finished in two-tone Emerald green. It is 4 feet long Gross weight 18½ lbs. Locomotive—Model 4644 is the New Haven type and is 12 inches long. Equipped with manual control reversing lever which can be easily shifted while the train is in motion, thus reversing the direction of travel. Flag Lolders and sparkling brass trim, such as etched nameplates, handrails, bell, pantagraph, pilots and die-cast headlight fitted with genuine Mazda lamp. Cars—pssenger car 4151 and the observation car 4152 are 14 inches long exclusive of automatic couplers. Decorated with brass air tanks, steps and journal boxes The deeply embossed one-piece roof is finishd in sprayed on enamel while the car sides are lithographped in green and other attractive colors. Under-carriage is in French gray enamel. The observation car, with the addition of brass platform railing and train sign has a canopy with red rear and green sidemarkers and a Mazda lamp located in the platform dome. The interior of each car is also illuminated with one Mazda lamp. Track—eight curve and two straight track sections form an oval 3 feet 9 inches by 4 feet 11 inches—a total length of 13 feet 5 inches.

No. 1472. (75 Watt Transformer recommended) .....Each **$23 00**

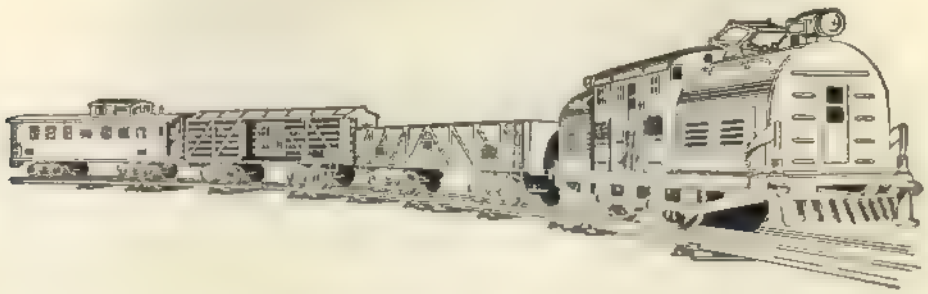
ELECTRIC TRAINS

AMERICAN FLYER

The Statesman. Wide Gauge.

Finished in a pleasing combination of two-tone orange enamel and lithograph; and with its true proportioned streamline effect "The Statesman" is well in keeping with its name. Its overall length is 61 inches and is brightly illuminated with six genuine Mazda lamps Gross weight 23 2 lbs Locomotive—Manual control, reverse locomotive Model 4654, of the New Haven type is 12½ inches long and finished in sprayed-on enamel. It carries a well balanced set of solid brass trim such as four deeply etched nameplates, flag fixtures with white markers, over sized doors, pantagraph, bell, whistle, pilot, air tank, hand rails and journal boxes plus two diecast non-reversing headlights. The deeply embossed cab sides give it a very powerful and commanding appearance. Cars—two pullman cars 4151 and observation car 4152 are 14 inches long each, exclusive of their automatic couplers. Heavily embossed one-piece steel roofs are finished in spray on enamel while the car sides are lithographed. Solid brass journal boxes air tanks and steps are featured on each car while the observation car boasts of an unusually attractive brass platform railing plus canopy with red gear and green side markers. Track eight curved and four straight track sections form an oval 3 feet 9 inches by 6 feet 1 in—a total length of 16 feet.

No. 1473. (100 Watt Transformer recommended) .....Each **$31 00**



The Pathfinder. Wide Gauge.

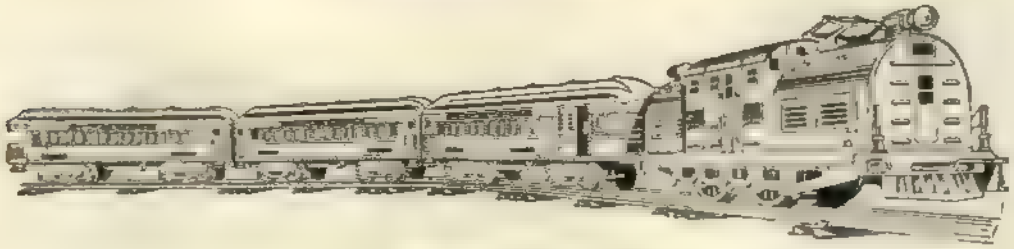
With Remote Control Reverse Locomotive No. 4685

This new powerful train is just like the ones that haul the nation's freight traffic. Each car is finished in different combinations of long lasting automobile enamels which gives the made-up train a beautiful coloring. Length of train is 5 feet 3 inches; gross weight 22½ lbs Locomotive—St. Paul type remote control reverse 13½ inches long,4685 is strongly constructed of heavy pressed steel and die-castings. Its motor is very powerful and will pull the cars at a fast clip Finished in a bright red enamel with solid brass doors, handrails, pantagraph, ladders and six etched nameplates, this locomotive is a real beauty Cars—all cars are constructed of heavy gauge steel and are deeply embossed, bringing out the structural bars and rib. Sand car 4017, stock car 4020 with sliding doors and 4021 caboose, with interior light are all 14 inches long and of different enameled colors with solid brass ladders, journal boxes, railings, brake wheels and etched nameplates. All cars are equipped with the famous high speed three-point suspension American Flyer trucks which allows them to travel at a high rate of speed without danger of derailment. Track—eight curve and four straight track sections form an oval 3 feet 9 inches by 6 feet 1 inch—a total length of 16 feet.

No. 1493. (100 Watt Transformer recommended) ....Each **$38 90**

ELECTRIC TRAINS

AMERICAN FLYER



The Lone Scout. Wide Gauge.

With Remote Control Reverse Locomotive No. 4685.

This new train is modeled after the famous Chicago, Milwaukee and St Paul crack trains. It is an innovation in miniature railroading that embodies the very best features of the finest trains. Many true-to-life features are brought out in detailed colored lithography that are not possible with cars finished entirely in enamel. Do not underestimate the realistic appearance or the fine quality of this train because of its low price. It is equipped with many brass details. Length of train is 5 feet 1 in., gross weight 24 lbs. Locomotive—the big powerful remote reverse locomotive 4685 is of the St Paul type and is 13½ inches long. Its many solid brass details show up prominently in contrast with the locomotive's bright red enamel finish. Cars—club car 4250 with two sliding doors, pullman car 4251 and observation car 4252 are all 14 inches long and are electrically lighted with Mazda lamps. The observation car has an additional dome light. The roofs are enameled in the color harmony with the locomotive while the sides are of detailed lithography. The solid brass doors, steps, air tanks, journal boxes, etched nameplates and the observation car railing, supply the necessary trim to these realistic cars. Track- eight curved and four straight track sections form an oval 3 feet 9 in. by 6 feet 1 inch—a total length of 16 feet.

No. 1494. (100 Watt Transformer recommended) .....Each **$40 00**

The Pioneer. Steam Type. Wide Gauge.

The impressive refinements and pleasing proportions have won outstanding approval for this 6 foot long, low cost steam type freight. It consists of scale model No. 4664-25 inch steam type locomotive with manual reverse and new eight-wheel Vanderbilt type tender and the longest wide gauge freight cars made. The heavy diecasting and the solid copper, brass and nickel trim gives this locomotive its massive appearance. No. 4017 sand car, 4018 automobile car and 4021 electric lighted caboose are all 14 inches long and are finished in bright automobile enamels. Eight curve and four straight tracks are included.

No. 1460. (100 Watt Transformer recommended) .....Each **$43 00**

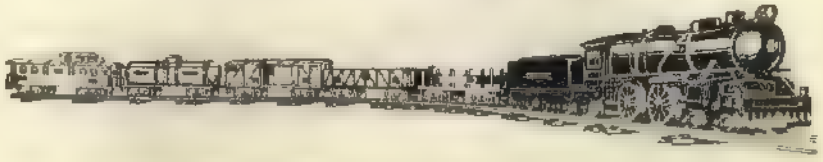
New Lone Scout. Steam Type. Wide Gauge.

The locomotive of this train is equipped with a ringing bell which is an exclusive patented American Flyer feature. Heretofore the ringing bell has been supplied only on trains priced at $41.75 and up. With the exception of the locomotive the composition of this train is the same as No. 1494 Lone Scout.

No. 1470. (100 Watt Transformer recommended) .....Each **$37 50**

ELECTRIC TRAINS

AMERICAN FLYER



Old Ironsides. Steam Type. Wide Gauge.

With Remote Control Locomotive No. 4694

Complete in every detail of actual railroad equipment construction and design, this new all-steel five-car steam type freight is the most true-to-life miniature freight train ever produced. It is 8 feet 8 inches long; gross weight 34¼ lbs. Locomotive and tender—Model 4694 equipped with triple action remote control reversing power plant. Length of locomotive is 14½ inches and the tender is 10 inches long. Heavy die castings and solid brass trim gives it a massive, rugged appearance. Cars—machinery car 4022, sand car 4017, auto car 4018, tank car 4010 and lighted caboose 4021 are all 14 inches long and are of different colors. Track—eight curve and eight straight track sections from an oval 4 feet 11 inches by 7 feet 3 inches—a total length of 20 feet 5 inches. Reverse controlling switch Model 4100 included.

No. 1495. (100 Watt Transformer recommended) .....Each **$55 00**

The President's Special

A DeLuxe Train modeled after the 20th Century. Triple Action Remote Control Reverse Motor 4689. Automatic ringing bell, automatic mail bag set. Locomotive—Model 4689, modeled after the latest New York Central 12 wheeler, is 18½ inches long—the longest made. Automatic ringing bell and power cutout. It also features twin reversible headlights and the famous American Flyer triple action remote control reverse motor. The entire locomotive fairly glistens with its brilliant solid brass trim—a big American Eagle on the front platform, large guard rails on front and rear trucks, ladders, handrails, journal boxes, air tanks, double pantagraphs, headlights and bell, individual brass windows, doors and louvers and six etched nameplates. Deeply embossed cab and roof finished in a two-tone Rolls Royce Blue; under-carriage French gray with red enameled wheel spokes and pilot. Heavy cast iron pony trucks elaborately decorated in keeping with the rest of the unit.

Car equipment—the most magnificent and realistic models ever imagined, four 19-inch long cars with strongly constructed car bodies display heavy embossings throughout, finished in a bright Rolls Royce Blue, sprayed on enamel, heavy one-piece deeply embossed steel roofs finished in a darker shade of the same color. Six wheel high speed trucks, enable these cars to travel at high speed over switches, cross-overs and sharp curves without danger of derailment. Truck frames heavily embossed and finished in polished nickel plate. Eight brass nameplates, with the name of the train, "President's Special," car name, type of car and the American Flyer lines, give a very realistic appearance to each car. Individual brass window frames with individual transparencies, swinging doors that close automatically, handrails, steps, journal boxes, air tanks and battery boxes, all of highly polished solid brass, add a warm richness to these already magnicent models. Each car has a lighting switch located in the battery box with which one can turn the brilliant illumination "on" or "off" as desired.

Cars—club car 4390, "West Point" with its large mail compartment and three interior Mazda lamps, has a sliding door with brass bars and a knob. The diner 4393, "Annapolis" with three interior lamps, is typical of the finest dining cars of today. The pullman 4391 "Academy" is illuminated with three Mazda lamps and greatly assists in carrying out the long, streamline effect of this magnificent train. Observation car 4392, "Army-Navy" with two interior Mazda lamps has an especially attractive observation platform. The hand railing is of ornamental polished brass with a lighted train sign featuring the name "President's Special." An additional lamp is placed in the dome, which lights the platform and the red rear and green side markers in the platform canopy. Track and equipment—eight curve and twelve straight track sections form an ovel 4 feet 11 inches by 9 feet 7 inches -a total length of 24 feet. Automatic mail bag set model 4122 and reverse controlling switch Model 4100 included.

Train Set No. 1489. Ship. wt. 40 lbs. (100 Watt Transformer recommended or 150 watt for greater power)..Each **$82 00**

ELECTRIC TRAINS

AMERICAN FLYER

The Warrior. Steam Type. Wide Gauge.

With Remote Control Locomotive No. 4694.

This new four-car passenger train is beautifully enameled tan with green roofs; has brass trim throughout. It is unusually well designed and is lighted with nine Mazda lamps. It is 7 feet 2 inches long; gross weight 34⅛ lbs. Locomotive and tender—triple action remote control steam type locomotive and tender 4694 is 26 inches long over all. Locomotive is of ten wheel construction and has all features of real engines. Cars—club car 4340, pullman car 4341, dining car 4343 and observation car 4342 are 14 inches long, beautifully finished in enamel and decorated with solid brass trim. Track and equipment—eight curve and eight straight track sections form an oval 4 feet 11 inches by 7 feet 3 inches—a total length of 20 feet 5 inches. Automatic mail bag set Model 4122 and reverse controlling switch Model 4100 are included.

No. 1497. (100 Watt Transformer recommended) .....Each **$59 75**

ELECTRIC TRAIN ACCESSORIES

TRANSFORMERS

Dial Type. Alternating Current.

The American Flyer dial type transformer has eight distinct features as follows: Speed control—by "fractional voltage steps," eliminates necessity of a rheostat; concealed switch—appearance improved, also due to new construction, positive electrical contact is assured; dial operation—this is an exclusive American Flyer feature; distinctive shield—attractively designed and has direct reading chart showing at all times the actual voltage being supplied by the transformer; approved type—meets all requirements and are approvd by National Board of Underwriters; capacity—built up to full capacity. While especially made to operate American Flyer trains, they are equally as good in the operation of other toys; complete line—from the smallest to the largest. 110 volt, 60 cycle.

POCKET KNIVES

REMINGTON

Fully Warranted.

Manufactured by the Remington Cutlery Works, whose plant, in construction, arrangement, convenience and adaptability, is of the most modern type. They have designed and built equipment best adapted to the production of Pocket Cutlery to the uniform high Remington standard of quality, on a large scale.

Remington blade steel is not a matter of chance, tradition or custom. Regardless of first cost, they have sought and found for Remington blades the blade steel that will stand up under the most exacting tests and the rough hard usage for which Pocket Knives are not intended, but which they usually undergo.

Heat treatment—hardening and tempering—is by their own laboratory process. Every lot of blade steel is analyzed and tested at random before its actual use in process is permitted.

"The prime function of a Pocket Knife is to cut—to cut keenly." To this end they have designed equipment and adopted methods which insure a strong keen cutting edge on every Remington knife blade.

Enchanting New Banjo Ukuleles

Unexcelled Quality for Professional or Student

Just as it is essential for the master to have a good instrument, so it is essential that the beginner learn on an instrument of high quality. The instruments we illustrate are known for their playability, smooth effortless performance, full rich tone and perfect intonation. All merchandise in the John Plain Book is 100% guaranteed.

A GREAT VALUE—BANJO UKE

Made of heavy 7-inch wood shell and genuine calfskin head. Has 10 nickel plated brackets and heavy nickel top hoop; patent pegs. Is finished in deep maroon, either with or without carved resonator. Bound in celluloid, with "F" holes.

9G70127 With Resonator. PRICE... **$12.50**
9G70128 Without Resonator. PRICE **10.70**
9G70129 Cover for either model **2.85**

SNAPPY TONE BANJO UKE

Here's a new, very snappy tone Banjo Uke that looks as good as it plays. It is made with a 7-inch metal shell with heavy top hoop and 12 brackets. All parts are highly nickel plated. Has dark finished neck, with patent keys. The head is made of selected calfskin.

9G70130 PRICE **$11.85**
9G70131 Case for above. PRICE **2.85**

GENUINE MAHOGANY BIG RESONATOR

This is one of the biggest Banjo Ukulele values ever offered. Made with 7-inch genuine Mahogany shell, fitted with genuine Mahogany neck and fine overlapping resonator. Has 12 nickel plated flat top professional brackets, with fine nickel plated flange. The back edge of resonator and back of heel are bound with white celluloid. Is fitted with correctly designed black finger-board, and has high-grade non-slip patent pegs.

9G70132 PRICE **$17.00**
9G70133 Case for above. PRICE **3.00**

OUR BEST SELLING BANJO UKE

This is one of our best sellers, combining beauty of tone with beauty of appearance. The entire instrument is finished in dull black, with a fine calfskin head decorated with "La Venicia" scene. The top and back edge are bound with white celluloid. Has non-slip patent pegs.

9G70134 PRICE **$10.00**
9G70135 Case for above. PRICE **2.75**

Every instrument is carefully tested and inspected before leaving our hands, assuring perfect adjustment and maximum musical performance. Each instrument is expertly constructed of high quality materials, assuring long life and the best in tone quality.

THE ULTIMATE IN BANJO UKE QUALITY

This is the most attractive Banjo Uke ever designed. It is built for tone and has all the snappiness of a Banjo. It is made with 7-inch shell, equipped with heavy nickel plated rim and 12 professional brackets. A feature is the artistic overlapping tone resonator. The finger-board is correctly adjusted, and is bound with white celluloid

9G70136 PRICE **$21.50**
9G70137 Case for same. PRICE **6.40**

Mandolins, Guitars and Tenor Banjos

STANDARD GUITAR

This is a standard model made of best grade figured birchwood, tan color, polished satin finish. Has close grained spruce top with sound-hole and top edges bound in black. The fingerboard is ebonized, with inlaid pearl position dots. Has nickel plated patent pegs, with ebonized bridge and pins. Is carefully adjusted and inspected. Fine tone quality.

9G70138 PRICE **$13.80**

FLAT MANDOLIN

This fancy model flat back Mandolin is made of well seasoned birchwood with selected spruce top. The back, sides and neck are finished in medium brown; the top is in the natural color. The finish is dull rubbed. Unpolished. Has ebonized finger board, with black celluloid guard plate. A very handsome model with good tone.

9G70139 PRICE **$16.40**

Case for Above

9G70140 PRICE **15.00**

BIG VALUE GUITAR

This big value Guitar is very attractive in its beauty, red mahogany finish. It is bound with white celluloid around the sound-hole, has attractive colored design on top; has ebonized fingerboard; white position dots; metal tail-piece, black patent heads. A super value!

9G70143 PRICE **$10.00**

CONCERT GUITAR

The good mellow tone comes from the correct design and careful finish of this Concert Guitar. The instrument is finished in dull, rich black, with an artistic white spruce top. Is handsomely decorated with Domino design. The oval fingerboard and both edges of body are bound with white celluloid.

9G70141 PRICE..... **$21.40**

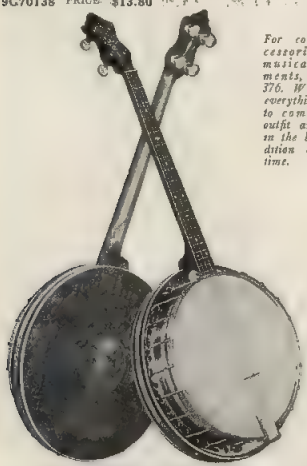
DE LUXE GUITAR

For de luxe tone quality and good finish, many professionals select this model. It is made of selected, figured birchwood, shaded in a rich mahogany finish. The ebonized finger-board has inlaid pearl position dots. Fittings include German Silver frets, nickel plated patent heads, ebonized bridge and pins.

9G70142 PRICE. **$15.00**

For complete accessories for all musical instruments, see Page 376. We can supply everything you need to complete your outfit and keep it in the best of condition all of the time.

You can convert the three guitars 9G70141, 9G70142 and 9G70143 into Hawaiian Guitars by ordering the extension nut 9G70224 shown on Page 376.



BEST TENOR BANJO MADE

We know of no better Tenor Banjo made! This one is made on a 7-ply Walnut shell, bound on the side with embossed band finished in Dutch Silver. Is equipped with excellent calf head, with 20 bracket flange and heavy hoop of embossed brass. A feature is the resonator made of Walnut, 13½ inches in diameter. It is beautifully embossed and decorated. The Walnut neck has an ebonized finger-board, inlaid with pearl dots. Head plate has large pearl ornament. The finest quality is in every part.

9G70146 PRICE..... **$70.00**

GORGEOUS MAPLE TENOR BANJO

This four-string Banjo has an 11-inch solid Maple rim, veneered with Bird's Eye Maple. The neck is of solid Maple, with light Walnut finger-board, German Silver frets and position dots. Head-piece and heel of neck are veneered with Walnut. The head is of genuine calf-skin, fittings include nickel plated top hoop and 16 nickel plated brackets with patent pegs. Splendid tone!

9G70145 PRICE..... **$15.00**

PROFESSIONAL QUALITY TENOR BANJO

A beautiful, professional quality Tenor Banjo. It is 11 inches in diameter made of Bird's Eye Maple, of 7 ply laminated construction. Has black and white bone inlay on side. The Maple neck has an ebonized finger-board, accurately fretted and true in tone. Has pearl dots for position indicators; fitted with 20 professional brackets, "L" hoop, and good quality calf-head. The resonator adds to the tone quality.

9G70144 PRICE. **$27.00**

High Grade Imported 8-Day Mystery Clocks, 400-Day and "Never-Wind" Clocks

The 8-Day Mystery Clocks, having no pendulum springs, are absolutely insensible to atmospheric influence, hence, their accurate time-keeping qualities are unimpaired.

Our 400-Day and "Never-Wind" Clocks are as interesting as mysterious. Here are clocks that run 400 days with one winding. Dependable and accurate in its unfaltering time-keeping performance. And our celebrated "NEVER-WIND" clock is epoch making—a real sensation

These clocks are as decorative as they are practical They suggest themselves as very distinctive and exclusive gift articles, for Weddings, Birthdays, Anniversaries or Holiday Time.

Priced very moderately in this selling

"SALOME" MYSTERY CLOCK

Height 15 inches. Dial 2 inches.

Imitation Bronze Figure, exquisitely modelled with Swinging 8-Day Time Clock, in rich and attractive lasting gilt finish. Faultless workmanship and finish. Gratefully acceptable as a gift for any occasion

No. 3143 Each $25 00

"ELEPHANT" MYSTERY CLOCK

An ideal clock for the sideboard or mantel. Animal designs are especially popular, particularly the Elephant design portrayed above.

Height 14 inches. Dial 2 inches

Imitation bronze figure with swinging 8-day Time Clock, in rich and attractive lasting gilt finish. Excellent workmanship and finish. Is a boon companion to the low price prevailing in this selling.

No. 3141 Each $27 00

"GAMIN" MYSTERY CLOCK

Height 16 inches. Dial 2 inches

A very popular and pleasing model which makes a splendid gift article. Immensely enhances surrounding in the home. Imitation bronze figure, masterly modelled with Swinging 8-day Time Clock in rich and attractive lasting gilt finish, serviceable and dependable.

No. 3144 Each $32 00

IMPORTED 400 DAY CLOCK

Colored Green Enamel Dial, Stand and Pendulum

Think of having a clock that runs 400 days at one winding—longer than a year. It is a clock of unusual interest. Requires practically no attention whatsoever. Merely to wind up once a year. Both movement and dial are of the finest quality, the movement being 8-inch dial, pretty Gothic and stately. Gilt Numerals and Spots. Fitted with the imported Pocket Jeweled movement, and possessing all of the fine qualities of the pocket watch movement are these. The case is made in green enamel finish, with gilt trimmings, and the whole forms a handsome ornament for any mantel, sideboard or desk. Height 14½ inches. Base of brass 7½ inches

No. 3145 Each $34 00

NEVER-WIND CLOCK

The Cure For Clock Troubles

Tireless time keeping without tiresome winding. This sensational clock is never wound. Without outside aid it runs from year's end to year's end as faithfully as the sun rises. The motive power is furnished by a powerful little electric dry-cell battery hidden in the base. Each battery is guaranteed for one year and usually lasts longer. It is a standard size and can be replaced by anyone. Money could not make a better clock. A fine ornament of great beauty. The frame is jeweled with genuine rubies. Never Wind Clock is the name of the base. Nothing to be placed on it. Only a new battery as easily as you do in the pocket flashlight. It is a clock of marvelous timekeeping accuracy. It would make a most delightful wedding or anniversary gift.

No. 3V1100 8-inch porcelain dial Each $36.40

No. 3V2000 9½-inch porcelain dial Each 42.00

IMPORTED 400 DAY CLOCK

Silver Dial

Another very attractive 400 day Clock. A clock which performs day in and day out throughout the entire year and only requires winding but once. Will keep the most correct time always. Indispensable to those to get out of order. Has 8-inch polished brass movement and case. Movement is nickel-plated. Pocket make adjusted movement—the same make movement which our high grade imported chime clocks are fitted with. 4-inch Silver Dial. Glass Globe. Height 15¾ inches. Base 7½ inches. Attractively priced.

No. 3145 Each $30.00

WRENCHES

MIDGET WRENCH SETS

An assortment of Midget "Superrenches" for those troublesome little jobs where a man needs a small tool that's a help—not a hindrance.

Midget "Superrenches" are extremely light and thin, yet amazingly strong for their size. Both openings in each wrench are the same, but at different angles (15 degrees and 75 degrees)—where one head can not operate, the other will. On Automotive Electrical Work (Magnetos, Timers, Generators, Wiring Connections, etc.); Carburetors, Radios and all delicate adjustments, or in the closest of close quarters, a Midget "Superrench" Set is invaluable.

Genuine "Superrenches," forged from Chrome-Molybdenum steel, heat-treated and Chrome-Finished, with heads buffed bright.

Every "Superrench" is Guaranteed Against Breakage.

No.	Openings Milled	Extreme Length	Thickness Heads
1114	5/32 & 3/16	3	1/8
1116	1/4 & 1/4	3	1/8

Williams' Midget "Superrenches"
(Chrome-Molybdenum)

A combination of Williams' Midget "Superrenches" and "Husky" Socket Wrenches providing a handful of helfulness on electrical jobs, unequalled in cramped quarters and for delicate adjustments. The only assortment of Open-end and Socket Wrenches in midget size for such service. Electricians, mechanics, motorists and radio fans need this convenient set.

Midget "Superrenches" are extremely light and thin, yet amazingly strong. Each wrench has two openings of the same size—but at different angles (15 and 75 degrees). Where one head can't operate, the other will.

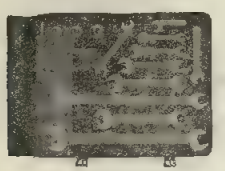
"SUPERRENCH" SET



For Brake Adjustment
(Chrome-Molybdenum)

After a careful and complete survey of all popular makes of cars, including 1929 models, this set of ten Open End and four Socket Wrenches has been designed.

Various shapes and openings are required in the adjustment of Lockheed Hydraulic, and Bendix, Steeldraulic, or other mechanical brakes and the service mechanic will appreciate this set of tools as one that can be relied upon for accuracy, strength and ease of operation.

Wrenches in "Superrench" Brake Adjustment Set No. 1950 are drop-forged from chrome-molybdenum steel, heat-treated and chrome-finished, and like the entire Williams "Superrench" line are guaranteed for life against breakage.

L

WILLIAMS WRENCHES

Obstruction Pattern—Chrome Molybdenum

Obstruction pattern wrenches will reach many nuts in awkward places. Its narrow pointed jaws and thin heads with 75 degree angle of openings are especially designed for just such jobs. The wrenches are heat treated and chrome finished heads, buffed bright.

WILLIAMS MIDGET "SUPERWRENCHES"

Midget "Superrenches" are extremely light and thin, yet amazingly strong for their size. Both openings in each wrench are the same size, but at different angles (15° and 75°)—where one head can not operate, the other will. On auto-electrical work (magnetos, timers, generators, wiring connections, etc.); and carburetors, radios—in fact, for all delicate adjustments, or in the closest of close quarters, this Midget "Superrench" Set is invaluable.

Genuine "Superrenches," forged from chrome-molybdenum steel, heat-treated and chrome-finished, with heads buffed bright

Every "Superrench" is guaranteed against breakage.

BROAD CROSS CUT SAWS

Handles must be ordered separate from saws.

—BLUE GRASS—

Blue Grass Cross Cut Saws are made of the same extra quality materials and the same infinite care characterizes their production as with other Blue Grass tools.

The needs of the lumbermen and the peculiarties of the different timbers have been carefully studied in order to make the Blue Grass Cross Cut saw a tool that in real use would respond readily and constantly to the demands of the user under any and all conditions.

All Blue Grass Cross Cut saws are ground an even gauge throughout the entire tooth edge, and then tapered to a extra thin back, which insures quick cutting and ease of operation, with just the right flexibility and stiffness to prevent bucking.

Each saw is beautifully polished and etched altogether a tool in a class by itself—unequaled in appearance—unapproachable in performance, and covered from tip to tip with our guarantee.

Extra quality crucible spring steel, evenly tempered, polished and etched. Ground gradually thinner from teeth to back, filed and set ready for use.

—BLUE GRASS—

Canadian, Lance Tooth, Perforated, 14 gauge at tooth edge, 19 gauge at center of back, extra thin back.

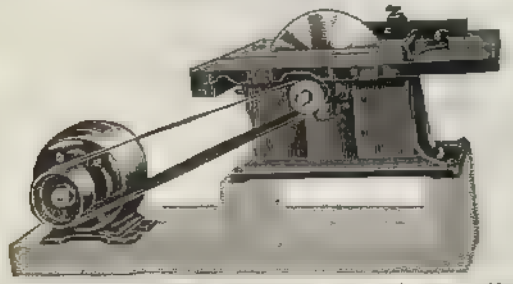
BENCH SAWS

TOBRIN—CIRCULAR



8 inch circular saw mounted on a cast iron frame; adjustable steel table equipped with both rip and cut-off guides that may be adjusted to any angle; bearings are bronze anti-friction metal, lubricated by both grease and oil cups. Motor and saw mounted on wood base, painted grey. Designed for ripping, cross cutting and mitering stock up to 2½ inches thick; depending on size of motor, ¼ H. P. motor will not operate to the full capacity of table under all conditions and larger motor is recommended for heavy work; table elevates for grooving and also may be tilted 10 degrees for beveling.

Height of machine from foot to table top 7 inches, size of base 6½x13½ inches; size of table 14x16 inches.

¼ H. P. Motor, 1750 R. P. M., 110 Volt, 60 Cycle, Alternating Current. Each

No. 8TC—Complete with 10 ft cord, separable attachment plug and an endless belt.....$156 00

One in wood box; wt each 105 lbs.

ELECTRIC HAND SAWS

CROWE'S SAFETY

Cast aluminum handles, motor base and safety guard. The motor is of special design and can be operated from standard lamp socket. Supplied with cross cut, rip or combination crucible steel circular saw tempered and hardened. Pistol grip type handles with pull trigger for operating. Automatic safety guard operated by spring that must be released before it can be used, when saw disengages from material the guard is thrown back, covering saw so that it can not come in contact with operator or material. Used by contractors, carpenters, etc., where a fast cutting saw is needed. Brass grease gun, 5 pound can of cup grease, 7½ feet of ⅝ inch rubber covered cable and extra 50 foot extension of ⅝ inch rubber covered cable, each fitted with metal covered porcelain socket and attachment plug.

Approved By Underwriters Laboratories.

Operates On 110 Volts A. C. or D. C

MEN'S SADDLES

—BLUE GRASS—

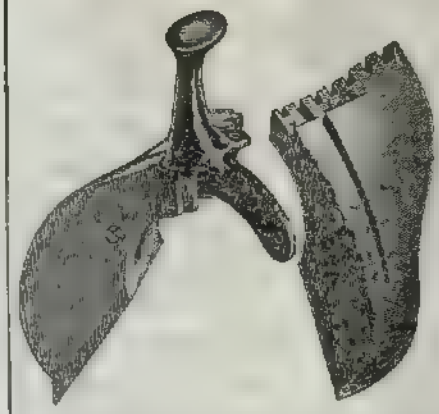
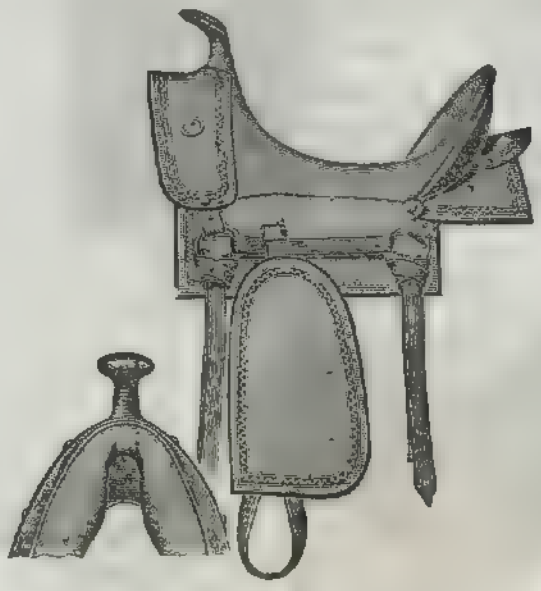
TEXAS



This cut shows the construction of the "Sampson" tree now used in all our Texas Saddles which makes the horn and fork so strong that we guarantee it to stand any strain.

The wood fork is made of two pieces of selected dry timber, dovetailed, glued and compressed together by machinery. The Base of the Steel Horn is countersunk into the "**Inlock**" Wood Fork. The steel horn is then "Keyed" by inserting a 3½ inch screw or bolt through the fork, through the horn and then into the wood in front.

TEXAS



Fair Skirting Leather.

Tree—14 inches, deep seat.

SOLDER

—BELKNAP'S GUARANTEED—

All solder sent out by this company is guaranteed to conform in percentage of materials composing it to the percentages indicated in describing it. Owing to the difficulty of consumers in getting honest solder, we have discarded the conventional method of description and changed to below. The first two figures given in each case indicate the percentage of tin and the next two figures the percentage of lead. Each bar of solder excepting wire solder, sent out by us will be stamped to show the percentages of tin and lead. In about 2 pound bars.

Per 100 Lbs

No. 703—110 volts; length 12 ins; size tip 1x2¼ ins .. $12 75

One in cardboard box; wt each 1¼ lbs.

DRAKE, RADIO

Elements wound with nichrome wire on lava spool; removable solid copper tip; ebonized wood handle, light weight point. For radio, electric switch boards and other delicate work. Will operate on either alternating or direct current. Complete with 6 ft. of cord and separable attachment plug.

Each

No. 603—110 volts; length 11½ ins; size tip ⅜x2¼ ins .. $6 75

One in cardboard box; wt each 1 lb.

DRAKE, JUNIOR

Elements wound with nichrome wire on lava spool; solid copper tip; ebonized wood handle. Will operate on either alternating or direct current. Complete with 6 feet of cord separable attachment plug.

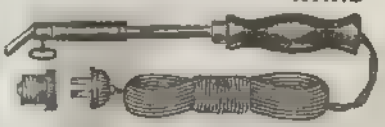
Light weight copper; especially adapted for general house hold purposes.

Each

No. 803—110 volts; length 11½ ins; size tip ⅝x2 ins $4 50

One in cardboard box; wt each ¾ lbs.

WARD



Highest grade nichrome wire, wound on special lavarock core; mica lining thoroughly insulates inside of sleeve; solid copper swivel point adjustable to any position to 45 degrees; all metal parts electro nickel plated; hardwood handle, baked rubberoid finish. Will operate on either alternating or direct current. Complete with 6 feet of cord with separable attachment plug.

Each

No. 169—105 to 115 volts; length 18¼ ins; size tip ⅜x1¼ ins $6 00

One in cardboard box; wt each ¾ lb.

GAS FURNACES

Double Burner.

Top of heavy sheet-iron brick lined. Each

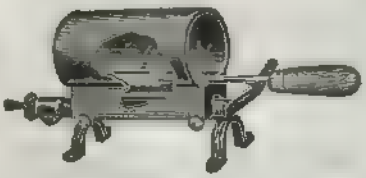
No. 2—Length 14½ ins; width 8½ ins; height 7 ins..... $19 80

One in wood box; wt 12¾ lbs.

Single Burner.

Cast iron base, legs and burner, sheet iron hood.

Price does not include soldering copper.



Each

No. 1—Length 15¼ ins; diam 3¼ ins; height 7½ ins... $12 75

Packed loose; wt each 4½ lbs.

FIRE POTS

BUTTLE'S PATTERN Burns Charcoal.

Japanned sheet iron body, cast iron legs, base, door and sliding top; base burner with double damper and reversible flue. Fitted with wire bail, wood handle.

Each

No. 2—Height over all 16¾ ins; diam 8 ins; opening 3¾x2¼ ins....$16 50

One in crate; wt each 19 lbs.

CLAYTON AND LAMBERT

Heavy gauge seamless drawn steel tank, reinforced, tinned inside and out, fitted with cushion protection band preventing injury to base of tank. Supplied with a large funnel and filler plug having a dust-proof cap. Removable top section permits producing an open fire. Each

No. 60—Capacity ¾ gal; height over all 15 ins; diam base 8¼ ins.....$19 50

One in carton; wt each 11 lbs.

CLAYTON AND LAMBERT

Burns Gasoline Only.

Heavy gauge seamless drawn steel tank reinforced, tinned inside and out, fitted with patented cushion protection band preventing injury to the base of the tank. Supplied with a large funnel and filler plug having a dust proof cap. Top section can be removed, thus producing an open fire. Each

No. 1—Capacity 1 gal; height over all 13 ins; diam base 9⅝ ins..... 33 00

TURNER

Burns Gasoline or Kerosene.

Heavy steel, rust-proof tank, inlets welded and bottom rolled in and sealed; dust-proof cap; large parachute principle pump; malleable top plate; heavy steel coil cup and one piece hood; hinged tilted top section, when tilted exposes the coil, burner, shut-off valve and makes drip cup accessible for removing solder; steel uprights welded to tank and securely bolted to top plate. Heavy wire bail.

Each

No. 6—Capacity 10 pints; height over all 14 ins; diam base 9¼ ins.....$19 50

One in carton; wt each 11 lbs.

TURNER

Burns Gasoline Only.

Seamless drawn steel tank, bottom welded in. Spider casting supports the uprights and eliminates leaks

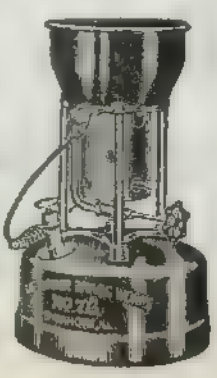
Extra large uprights and one piece coil cup sufficiently heavy to withstand rough use and abuse, will not warp.

Malleable top plate and one piece shield furnished.

Each

No. 76—Capacity 7 pints; height over all 14½ ins; diam base 9½ ins.....$24 00

One in carton; wt each 12 lbs.



MY, WHAT A VALUE!

That's what everyone says when they see this remarkable, highly efficient

BELCO BLOW TORCH

1. Extra Heavy Brass Tank.
2. Concave bottom with brass filler plug.
3. Needle point valve.
4. Bronze burner with underflow across base of burner, insuring quick generation in wind or coldest weather.
5. Large, well shaped, wood grip handle.
6. Solid hook for soldering copper.
7. Heavy, durable brass pump in tank.
8. Produces maximum heat.
9. Absolutely dependable.
10. An all-round good Torch.

Burns Gasoline or Kerosene.

Constructed with shut-off and adjusting needle separate, preventing an enlarged orifice.

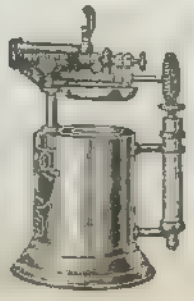
Self lubricated pump with automatic check fitted in handle. Extra large burner recommended for outside work.



Each

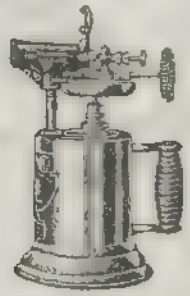
No. 38T—Capacity 1 qt; diam base 5¾ ins; height over all 9⅞ ins..... $16 50
One in carton; wt each 4 lbs

BLOW TORCHES

TURNER MASTER LINE

Burns Gasoline or Kerosene.

Polished heavy seamless drawn brass tank, concave bottom; pistol grip handle. One opening on top making it impossible to overflow. Equipped with safety valve that automatically opens and closes at 40 lbs. pressure making it safe against bursting, etc. The baffle is the obstruction in the burner on which the flame is constantly applied, heating the fuel to a hot dry gas insuring vaporization, thus generating 400 degrees more heat on lower fuel consumption. The flared tube in the front of the fuel jet automatically syphons the correct proportion of air regardless of the size of flame desired.



TURNER

Burns Gasoline or Kerosene.

Constructed with shut-off and adjusting needle separate, preventing an enlarged orifice.

Self lubricated parachute pump with automatic check fitted in tank; corrugated wood handle. Each

No. 39—Capacity 1 qt; diam base 5½ ins; height over all 9¾ ins.....$17 25

SOCKET WRENCHES

WALDEN-WORCESTER. INTERCHANGEABLE

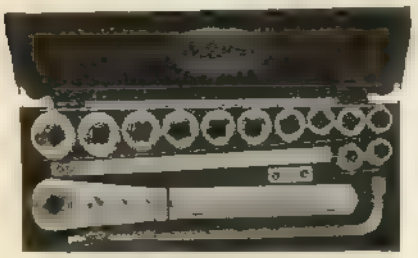
DRAIN PLUG SETS

A necessity in every oil station and garage. A plug, hex. socket, or square socket to quickly remove the plug from any crank case or transmission. Fits drain plugs of over 90 per cent of passenger cars and trucks. Sliding bar handle used as Tee or Offset.

Contents: One sliding bar handle; 7 hexagon sockets, one each ½, ¾, 15/16, 1, 1 1/16, 1⅛, 1¼ inch; 9 square sockets, one each 5/16, ⅜, 7/16, ½, 9/16, ⅝, 11/16, ¾, 13/16 inch; 8 plugs, one each 5/16, ⅜, 7/16, ½, 9/16, ⅝, 11/16, ¾ inch.

Set No. 21. Complete in steel box. Wt. 8½ lbs. .....Set **$6 85**

GARAGE SETS



For work that requires a wide range of sockets with few accessory parts and handles. Adapted to busy garages that need extra socket sets.

Contents: Twelve **Chrome Nickel** Hex. sockets, 7/16, 1/2, 9/16, 19/32, 5/8, 11/16, 3/4, 25/32, 13/16, 7/8, 15/16, 1 inch. No. OR916—10½ in. ratchet wrench; No. 1125—10½ in. offset handle; No. 1109—plug connector for ratchet wrench; No. 1139—9 in. extension bar for ratchet wrench.

Set No. 16R. Complete in steel box. Wt. 10 ozs. .....Set **$7 75**

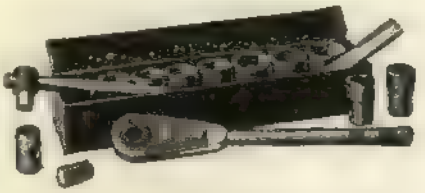
SERVICE SETS

A very useful general service assortment of the most needed parts. Specially designed for the service station. Also offers the garage mechanic an ideal wrench set of his own

Contents: Twelve **Chrome Nickel** Hex. sockets—7/16, 1/2, 9/16, 19/32, 5/8, 11/16, 3/4, 25/32, 7/8, 15/16, 1, 1 1/16 in. No. 1115—Short shank speed brace with rotating knurled grips, 14¼ in.; No. 1122—Tee handle with rotating knurled grip, 12 in.; No. 1125—Offset handle, 10½ in.; No. 1102—Universal joint, makes Tee Flex out of ordinary sockets.

Set No. 25R. Complete in steel box. Wt. 17 lbs. .....Set **$8 70**

HEAVY DUTY



A liberal margin of strength and ruggedness in every part. No matter how tightly a nut is frozen, it must yield. Special heat-treated sockets. Cross-drilled to receive handle, affording close grip on nut. One inch Hex. broach in back for other combinations. The "510 Set" is a necessity in every shop. In shops servicing busses and trucks every mechanic needs a "510 Set" of his own.

Contents: Ten Heavy-Duty Hex. Sockets—1, 1 1/16, 1⅛, 1¼, 1 7/16, 1½, 1⅝, 1¾, 1 13/16, 2 in. No. 1132—Heavy-duty ratchet wrench; No. 1116—Plug connector; No. 1117—Heavy-duty extension bar; No.1123—Crossbar handle; No. 1103—Offset adapter. Box 20½x5½x3½.

Set No. 510. Complete in steel box. Wt. 30 lbs. .....Set **$24 50**

HEAVY DUTY

A heavy-duty wrench set for the mechanic who runs into a lot of "heavy" work. Extremely useful for wheel adjustment or brake-relining work. Sturdily built tools that easily move large diameter nuts, even when they're frozen.

Contents: Six Heavy-Duty Hex. Sockets—1¼, 1⅜, 1 7/16, 1½, 1⅝, 1¾.; No. 1103—Offset adapter; No. 1112—Tee handle shank; No. 1123—Crossbar handle. Box 20½x4x3¼.

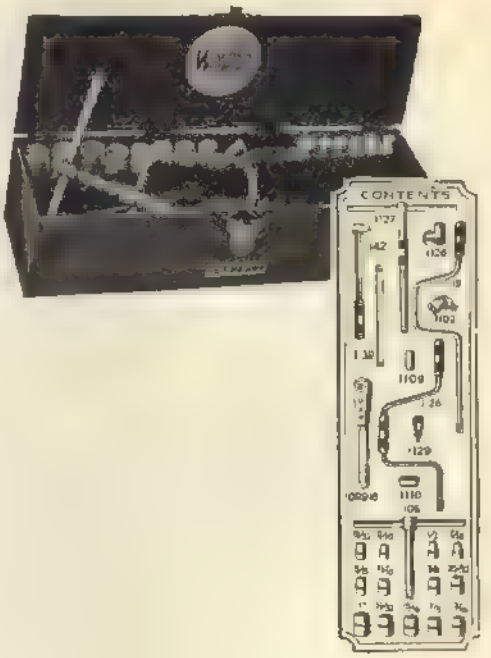
Set No. 500. Complete in steel box. Wt. 21½ lbs. .....Set **$12 35**

SOCKET WRENCHES

WALDEN-WORCESTER. INTERCHANGEABLE

GARAGE

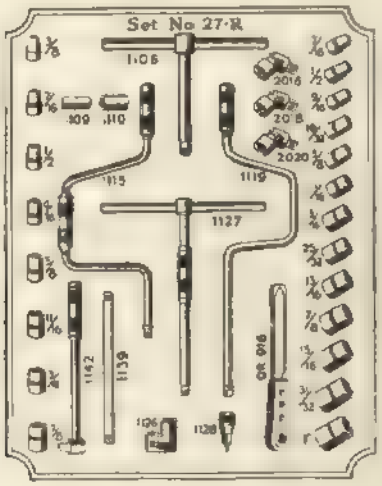
No. 26R



Similar to Set No. 27R except that it does not contain the square socket series. Particularly adapted to garage use, as it will service all makes of cars in the sizes that are most needed. Many mechanics prefer this set on account of its wide range of socket sizes and handy assortment of special parts. Extra space in the steel tool box 20½x6½x5 inches, makes it a genuine mechanic's tool kit.

Contents: 13 **Chrome Nickel** hexagon sockets—7/16, 1/2, 9/16, 19/32, ,5/8, 11/16, 3/4, 25/32, 13/16, 7/8, 15/16, 31/32 and 1 in. No. OR916 ratchet wrench 10½ in.; No. 1142—Offset handle 10½ in.; No. 1106—Short shank Tee handle, 6 in.; No. 1127—Tee handle with rotating knurled grip, 12 in.; No. 1115—Short shank speed brace, 14¼ in.; No. 1119—Long shank speed brace, 20 in.; No. 1109—Plug connector; No. 1110—Socket connector; No. 1139—Extension bar, 9 in.; No. 1126—Stud wrench; No. 1129—Screw driver bit, 5/8 in. blade; No. 1102—Universal joint.

Set No. 26R. Complete in steel tool box. Wt. 23 lbs..Set **$17 80**



No. 27R.

Designed to meet the requirements of the average industrial plant, factory, machine shop or auto service station. The large and varied assortment of sockets, for both hexagon and square nuts, fills every socket need encountered in the general run of work. Sockets of chrome nickel steel.

Contents: Eight **Chrome Nickel** square sockets—3/8, 7/16, 1/2, 9/16, 5/8, 11, 16, 3/4, 7/8 inch. Thirteen **Chrome Nickel** hexagon sockets—7/16, 1/2, 9/16, 19/32, 5/8, 11/16, 3/4, 25/32, 15/16, 7/8, 15/16, 31/32 and 1 inch. Three Tee-flex sockets -1/2, 9/16 and 5/8 inch. One each No. 1106—short shank Tee handle, 6 inches; No. 1127—Tee handle with rotating knurled grip, 12 inches; No. 1119—Long shank speed brace, 20 inches; No 1115—Short shank speed bracce, 15 inches; No. 1142—Offset handle 10½ inches; No. OR916—Ratchet wrench, 10½ inches; No. 1109—Plug connector; No. 1110—Socket connector; No. 1139—Extension bar, 9 inches; No. 1126—Stud wrench; No. 1128—Screw driver bit, 3/8 in. blade; Steel tool box 21½x9x11 inches.

Set No. 27R. Complete in steel tool box. Wt 30 lbs. .....Set **$25 95**

DOUBLE HEX SOCKETS

Double Hex Sockets are made of chrome nickel steel; thin wall, hard surfaced, double broached to fit hexagon nuts in twice as many positions. To the mechanic working in close corners the advantage is obvious. It is only necessary to swing the handle through one-twelfth turn before the nut fits in the next notch of the socket. The improved process of heat treating the strongest steel obtainable now makes it possible to offer the mechanic a socket that will not round or break.

Sets

Set consists of eight double Hex sockets for hexagon nuts—7/16, 1/2, 9/16, 5/8, 11/16, 3/4, 13/16 and 7/8 inch. A most valuable addition to any wrench kit.

Set No. 806. In steel box. Wt. 3 lbs. .....Set **$5 00**

LONG SHANK SPEED WRENCHES

No. 1119. Length overall 20 inches; shank 9¼ inches, so that bend clears obstructions. Wt. 1½ lbs...Each **$1 50**

SHORT SHANK SPEED WRENCHES

No. 1115. Length overall 14¼ in. Shank 4¼ in. Rotating knurled grips. Wt. 2 lbs..... Each **$1 85**

COMBINATION TEE AND OFFSET HANDLES

No. 1111. Length overall 10 inches. Wt. 1 lb. .....Each **$1 10**

SOCKET WRENCHES AND PARTS

WALDEN-WORCESTER. INTERCHANGEABLE

SHORT SHANK TEE HANDLE WRENCHES

No. 1106. Shank 6 in., cross bar 8 in. Wt. 1 lb. .....Each **$1 50**

TEE HANDLE WRENCHES

Heavy construction permits use on nuts of larger intermediate sizes. Massive handle enables one to get more power out of one hand. Rotating knurled grip to spin the nuts.

No. 1122. Wt. 1½ lbs. ..Each **$1 50**

CYLINDER-HEAD TEE HANDLE WRENCHES

Twenty inch shank allows cross-bar handle to clear hood and cowl when working on cylinder heads. Rotating knurled grip to spin nuts on or off.

No. 1134. Wt. 3 lbs.....Each **$3 10**

LONG HANDLE TEE WRENCHES

Cross bar 10 inches; shank 12 inches, with rotating knurled grip. Like 1134 with shorter shank and lighter construction.

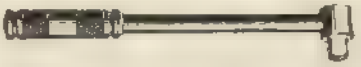
No. 1127. Wt. 2 lbs.....Each **$2 25**

SWIVEL OFFSET HANDLE

A popular offset with swivel head so handle can swing clear of obstructions. High grade steel permits this feature without making the tool bulky or awkward. Length 10½ inches.

No. 1171. Wt. 1½ lbs.....Each **$1 75**

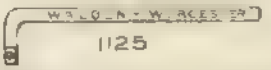
FIXED-HEAD OFFSET HANDLE



For powerful leverage in close quarters, comfortable handle. Length 10½ inches.

No. 1142. Wt. 1½ lbs. ....Each **$1 25**

OFFSET HANDLE



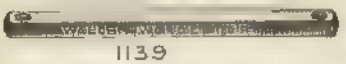
Short offset for tight places. Knurled bar handle. Length 10 5/16 inches.

No. 1125. Wt 1 lb. ....Each **$0 85**

PLUG CONNECTORS

No. 1109. Length 1½ inches for use with ratchet handles and similar combinations; with ball friction on each end. Wt. ea. 2 ozs. .....Each **$0 35**

EXTENSION BARS



Lengthens tee or offset combinations so handles clear obstructions; have ball friction on each end to hold sockets and other parts in engagement.

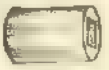
No. 1139. 9 in. Wt. ⅝ lbs..Each **$0 75**

STUD WRENCHES

Quickly removes or sets studs from 5/16 in. to 5/8 in. Hardened milled roller grips stud firmly but without injury. Roller can be reset when worn. Used with any interchangeable handle or tee.

No. 1126. Wt. 4 ozs.....Each **$2 10**

SOCKET CONNECTORS



Both ends broached square for handles. Length 1½ inches.

No. 1110. Wt. 2 ozs.....Each **$0 50**

UNIVERSAL JOINTS

Chrome Nickel Steel Joint, one end broached square, the other a square plug. Makes Tee Flex wrench out of any handle.

No. 1102. Wt 8 ozs.....Each **$2 25**

RIM WRENCHES

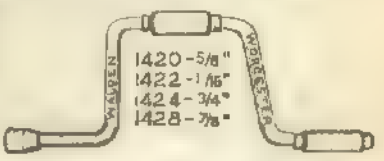
No. 1720. ⅝ in. Hex. Ford Model T, Dodge 4-cylinder and Victory, etc. Length overall 15½ inches. Wt. 1 lb. .....Each **$0 60**

No. 1722. 11/16 in. Hex. for Ford Model A, Nash, Packard 8, etc. Length overall 15½ in. Wt. 1 lb..Each **$0 60**

No. 1724. 3/4 in. Hex. for Chevrolet, Essex, etc. Length overall 15½ in. Wt. 1 lb. .....Each **$0 60**

No. 1726. 13/16 in. Hex. for Model A Fords. Length overall 15½ in. Wt. 1½ lbs.....Each **$0 60**

No. 1728. 7/8 in. Hex. for busses and trucks. Length overall 15½ in. Wt 1½ lbs. .....Each **$0 60**



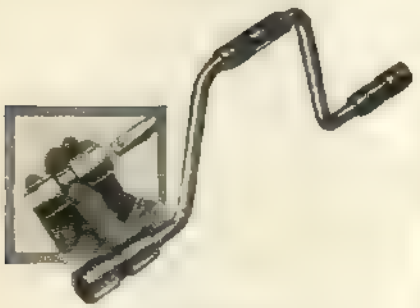
No. 1420. ⅝ in. Hex. for Ford Model T, Dodge 4-cylinder and Victory, etc. Wt. 1¾ lbs.....Each **$1 25**

No. 1422. 11/16 in. Hex. for Ford Model A, Nash, Packard 8, etc. Wt. 1¾ lbs. .....Each **$1 25**

No. 1424. ¾ in. Hex. for Buick, Chevrolet, Essex, etc. Wt.1¾ lbs.Each **$1 25**

SOCKET WRENCHES
WALDEN - WORCESTER

RIM



Double Duplex Socket.

Each of the two Duplex-Sockets has two popular hex. sizes (5/8 and 11/16, and 3/4 and 7/8 in.), deep broached to engage acorn nuts of wire and disc wheels to their full depth.

No. 1454. Wt. 3 lbs. $2 25

For ClevWeld Rims

A special tire wrench for the ClevWeld rim used on many popular makes of cars. Hexagon socket ¾ inches. Heat treated tip on other end opens rim quickly.

No. 3124. Wt. ea., 1 lb.... Each **$1 00**

BATTERY AND STARTER

A double hexagon box-type drop-forging. Hexagon sockets ⅞ and ⅝ in. Every mechanic or electrical man "carries it in his pocket."

No. 480. Wt. 3 ozs. .....Each **$0 85**

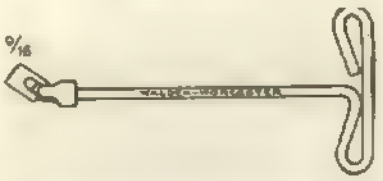
RIM

Four Way

A strong dependable tool that meets a recognized need in the modern garage. Cadmium Plated Chrome Nickel steel sockets and a rigid drop-forged frame. Sockets cannot come off. The powerful leverage of the crossbar quickly loosens nuts that are "frozen" while the power back of this double leverage insures a tight bring-up with little effort. The weight of this wrench is nicely balanced, so that nuts readily spin off after loosening. Sockets are deeply broached to take a sure hold on the acorn nuts of disc and wire wheels without slipping. Fitted with four different size sockets to take care of the rim nuts of practically all cars.

No 1444. Socket sizes; ⅝, 11/16, ¾ and ⅞ in. Wt. ea., 2½ lbs..Each **$2 00**

TEE FLEX



Universal Joint—Tee Handle

Inaccessible nuts can be easily turned. Rigid tee handle with Chrome Nickel steel universal joint socket. Shank 13 in. For cylinder-to-base bolts, manifolds, body bolts, oil pans, brake supports, etc.

No. 1016. ½ inch hexagon socket. **For Model A Fords** on oil feed pipe, valve cover and brake shaft. Wt. 1 lb. .....Each **$2 50**

No. 1018. 9/16 inch hexagon socket. **For Model A Fords** on exhaust pipe clamp screw, fly wheel housing, universal joint, differential housing, shock absorbers. **For Model T Fords** on commutator case support nut, exhaust manifold to cylinder block clamp nut, intake manifold to cylinder block clamp nut. Wt. 1 lb. .....Each **$2 50**

No. 1020. 5/8 inch hexagon socket. **For Model T Fords** on connecting rod, cylinder head, water cylinder inlet connection. Wt. 1½ lbs..Each **$2 70**

FIXED HANDLE SPEED

Used as a speed-tool in assembling and dismantling cars. Popular for cylinder head work. Shank 10¾ in. long. Hexagon socket.

No. 6016. 1/2 inch. For Model A Ford on crank case screws. Wt. 1½ lbs. .....Each **$1 00**

No. 6018. 9/16 inch. **For Model A Ford** on timing gear cover. **For Model T Ford** on intake manifold to cylinder block, exhaust manifold to cylinder block, cylinder to lower base, fan bracket bolt, transmission cover bolt and nut, timing gear cover. Wt. 1½ lbs. .....Each **$1 00**

No. 6020. 5/8 inch. **For Model T Ford** on battery cable terminal to floor, cylinder head, water inlet. Wt. 1½ lbs. .....Each **$1 00**

No. 6022. 11/16 inch. **For Model T Ford** on truck rear axle housing split, water outlet. Wt. 2 lbs. ....Each **$1 00**

No. 6024. ¾ inch. Wt., 1¾ lbs. .....Each **$1 00**

No. 6025. 25/32 inch. Wt., 1¾ lbs. .....Each **$1 00**

No. 6026. 13/16 inch. Wt., 1¾ lbs. .....Each **$1 00**

No. 6028. ⅞ inch. Wt., 1 13/16 lbs. .....Each **$1 00**

SHORT SHANK SPEED

For Model T Ford on crank case lower cover, differential drive gear, steering tube flange nut; 8 inch shank, 1/2 inch hexagon socket.

No. 6064. Wt. 1 lb. .....Each **$0 85**

CHEVROLET MAIN BEARING

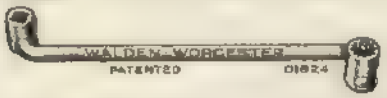
Chrome Nickel Drop Forging. Heat treted, permitting necessary thinness to reach in and grip front, center, and rear main bearing nuts in their awkward placing. For replacing bearings of all models of Chevrolet including 1928, while motor is in chassis. Sizes 7/8 and 13/16 in. Double hexagon. Length 15 inches.

No. 385C. Wt. 1½ lbs....Each **$3 35**

SOCKET WRENCHES

WALDEN - WORCESTER

OFFSET SWIVEL MAIN BEARING



For Model A Fords on main bearing. **For Model T Fords** the 9/16 inch square socket is for front and center main bearings and the 3/4 inch double broached socket will reach the rear main bearing.

No. 01824. 9/16 inch square and 3/4 inch double hexagon sockets. Wt. 1½ lbs. .....Each $2 10

BOXTITE
DOUBLEHEX BOX TYPE

The latest refinement in wrenches combining speed, safety, strength and convenience. One end offset with tapered cup to reach nuts in deep recesses. Thin narrow head on other end easily clears obstructions above the nut. Accurately double broached same size both ends.

Chrome Nickel Drop Forged. Specially heat treated to give unequaled strength and toughness. Permanent Chromium Plate.

DOUBLE END OFFSET
2 SOCKETS

Popular sizes for bearing and engine work. **For Model T Fords** on brake shoe support, cam shaft bearing set screw, commutator case support bolt, crank case arm bolt and nut, differential case nut, fan bracket bolt, muffler rod nut, spindle pivot nut, transmission drive plate screws. **For Model A Fords** on timing gear cover, fly wheel housing, universal joint and starter.

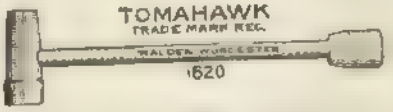
No. 2418. Length 9 inches, hexagon sockets 9/16 and 3/4 inch. Wt. 1 lb. .....Each $0 90

DOUBLE END OFFSET
2 SOCKETS

For Model T Fords. The 9/16 inch square socket takes both the center and front main bearing. The 9/16 inch hexagon socket has thin walls for clearance for wrist pin use only.

No. R1881 9/16 in. hexagon and 9/16 inch square. Wt. 1 lb. Each $1 25

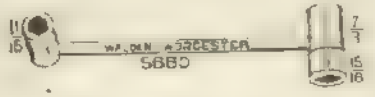
DOUBLE END OFFSET
3 SOCKETS



Large re-sale market to Models T and A Ford and Fordson owners. For **Model T Fords** on cylinder head cap screws, dash bracket to dash drive shaft roller bearing housing cap screws, fender to running board, hub brace rod support, front motor support, muffler rod nut, running board nuts, steering tube flange bolt nut, water cylinder inlet connection, water cylinder outlet connection. **For Model A Fords** on spring clips, bumper, water inlet, brake rod connection, generator adjustment, timing gear side plate, valve cover, engine perch support, exhaust pipe bracket.

No. 1620. Hexagon socket sizes 5/8 and 1/2 inch in double end, 5/8 inch in single end. Wt. 15 ozs. ....Each $1 00

DOUBLE END OFFSET
3 SOCKETS



Popular hexagon sizes for the garage. Also substantial resale market to car owners

No. 5660. Length overall 10½ inches, hexagon socket sizes 11/16, 7/8 and 15/16 inch. **For Model T Fords** on battery clamp nut and bolt, brake shoe support, drive shaft castle nut, front radius rod nut, spindle pivot with oiler, spring clip nuts, steering arm nut, front wheel flange nut, rer wheel to brake drum. **For Model A Fords** on cylinder head, water outlet, shackle, rear radius rod, engine perch and mud guard support. Wt. 1½ lbs. .....Each $1 20

CONNECTING ROD

Fits all connecting rod nuts on **Model T Fords,** including the fourth connecting rod. Hexagon socket 5/8 in. Length overall 10 5/16 in.

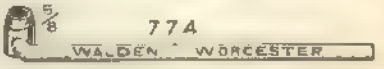
No. 5810. Wt. 1 lb.....Each $0 70

FLY WHEEL CAP SCREW

Used on fly wheel cap screws on **Model T Fords.** Hexagon socket 11/16 in.; length overall, 11¾ in

No. 3822. Wt. ¾ lb. .....Each $0 70

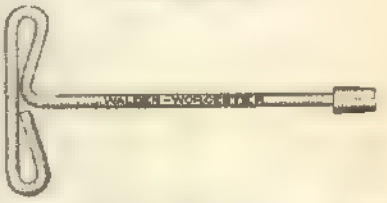
CONNECTING ROD SWIVEL



For connecting rods on Model T Fords.

No. 774. 5/8 inch hexagon socket. Wt. 1 lb. .....Each $1 25

TEE HANDLE



Useful on such places as cylinder heads, oil pan to base, intake and exhaust manifold clamps, timing gear cases, water inlet and outlet, differential housing front and rear, tie rod clevises, valve cover plates, rocker arm supports (Buick Cars), transmission covers. Hexagon sockets.

Handles, 6 in.; shanks, 12 in.

No. 2716. Size 1/2 inch. For **Model A Fords** on crank case screw, bumper and valve cover.....Each $0 75

No. 2718. Size 9/16 in. For **Model T Fords** on commutator case support, crank case to lower base, cylinder cover, fan adjustment, magnet cap screw, radiator support, universal ball cap .....Each $0 75

No. 2720. Size 5/8 in. For **Model T Fords** on cylinder head cap screws, drive shaft roller bearing, and water inlet .....Each $0.75

Weights from 1 to 1½ lbs.

WRENCHES

WALDEN - WORCESTER

SPARK PLUG AND CYLINDER HEAD

For **Model T Fords** on cylinder head cap screws, spark plug, water cylinder outlet, differential oil plug drain, transmission drain plug.

No. 3620. Length overall, 11 inches; hexagon socket sizes 15/16 inch and 5/8 inch. Wt. 1 lb.....Each $0 90

SOCKET WRENCH SETS

BETHLEHEM

QUICKWAY

A small, neat, extremely efficient wrench set for special work on carburetors, magnetos, generators, etc. Just the thing for mechanics, electricians, repairmen and auto owners. Contains seven sockets and a detachable T-handle with ball check in the end. Socket sizes: 9/32 in.; 5/16 in.; 11/32 in.; 3/8 in.; 7/16 in.; 15/32 in. and 1/2 in. Nicely packed in individual box.

Set No. A. Wt., 1½ lb.....Set $1 50

RATCHET WRENCHES

Used on **Model T Ford** brake and reverse transmission bands.

No. B4564. Hexagon opening, 11/16 inch; length overall, 6⅜ inches. Wt. each, 4 ozs. .....Each $0 60

Simple construction, few working parts. A strong durable tool that will be found useful in a wide variety of applications. Length 11 inches, opening 1/2 inch.

No. OR916. Wt. 2 lbs....Each $3 50

SPINTITE WRENCHES

For Hexagon Nuts.

Socket wrenches for small nuts in screw driver form. The Spintite socket gets a firm grip and the long reach gets into cramped places. The shank is drilled to go over extending screws. For electrical equipment, carburetors, windshield wipers, etc.

Nos.	3406	3408	3410	3411
Hex. open'g in.	3/16	1/4	5/16	11/32

Williams' *"Superrench"
(Chrome-Molybdenum)
Midget Electrical Set No. 1120

Midget "Superrenches" are extremely light and thin, yet amazingly strong for their size. Both openings in each wrench are the same size, **but at different angles** (15° and 75°)—where one head can not operate, the other **will.** On Auto-Electrical Work (Magnetos, Timers, Generators, Wiring Connections, etc.) and Carburetors, Radios—in fact, for all delicate adjustments, or in the closest of close quarters, this Midget "Superrench" Set is invaluable.

Genuine "Superrenches," forged from Chrome-Molybdenum steel, heat-treated, Chrome-finished, heads buffed.

Every "Supperrench" is Guaranteed Against Breakage

No.	†Openings Milled	Extreme Leng	Thickness Heads	Price Chrome-Finished

Williams' Drop Forged Steel Wrenches

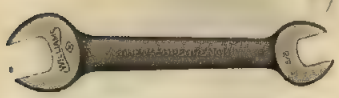
Williams' *"Superrench"
(Chrome-Molybdenum)

Engineers' Wrenches
15° Angle, Double Head



"Superrench" Wrenches, Engineers' Pattern, are particularly serviceable in close, cramped quarters where clearance is limited. Their heads are thinner and their jaws narrower than carbon steel wrenches with the same openings. Their generous length is ample for efficient service.

Furnished heat-treated and Chrome-Finished, with heads buffed bright.

Every "Supperrench" is Guaranteed Against Breakage

Williams' "Superrench"
(Chrome-Molybdenum)

Tappet Wrenches
Long—Thin—Light—Strong

These extra long, thin Wrenches are specially designed for tappet adjustment; their length is ample to prevent burning the hands while working on tappets when the motor is hot (the only time for such service).

The 15° angle of opening is unequalled in efficiency. It makes the same size opening in both heads of the wrench unnecessary. Consequently, **each** "Superrench" serves **two** sizes of tappets.

Drop-forged from Chrome-Molybdenum steel, the strongest, toughest and most desirable material for the purpose ever produced. Though thin and light, their strength is amazing.

Furnished heat-treated, Chrome-Finished (**rust-proof**), heads buffed bright.

Every "Superrench" is Guaranteed Against Breakage

Williams Drop Forged Steel Wrenches

Williams' "Superrench"
(Chrome-Molybdenum)

Construction Wrenches
15° Angle

Redesigned and lengthened. Jaws are long and narrow, providing substantially full bearing on square nuts.

Forged from Chrome-Molybdenum steel, these wrenches are much stronger than carbon steel wrenches of corresponding size. They are absolutely dependable and assure safety in operation.

Furnished heat-treated and Chrome-Finished; the heads are not buffed bright.

Every "Superrench" is Guaranteed Against Breakage

No	For U. S Standard Nut; Size Bolt	Opening Milled	Extreme Length	Thickness Head	Price, Chrome-Finished

1210	1	1 5/8	23	27/32	9.50

Structural "Superrench"
Straight Opening

Redesigned and lengthened. Jaws long and narrow; handles are tapered for easy insertion into bolt holes.

Forged from Chrome-Molybdenum steel, these wrenches are much stronger than carbon steel wrenches of corresponding size. They are absolutely dependable and assure safety in operation.

The abrupt offset and angle of handle provide for clearance of obstructions, even when these are close to the head, and safety to the operator's hands. The wrench is particularly well balanced.

Furnished heat-treated and Chrome-Finished; the heads are not buffed bright.

Every "Superrench" is Guaranteed Against Breakage
